But while there were no reliability runs, outside of the annual tour of the Wisconsin State Automobile association, which attracted only a few cars, the makers did not let up in their efforts to prove officially the value of their product. This was mainly along the line of gasoline economy and probably two dozen such trials were held in different parts of the country, all under official supervision, which demonstrated most convincingly that the modern automobile and the modern carbureter have been so perfected that the average owner effects a great saving on his fuel in comparison with other years.

Chicago as usual has its team reliability matches, but the annual Glidden tour did not take place and it looks as if that classic will not be renewed in the future. The failure to stage this may be put down to a lack of interest in reliability runs by automobile manufacturers, who seem to feel that they have ably demonstrated to the public the dependability of the modern motor car.

Hill climbs, once as popular as reliabilities, also seem to have gone into the discard, for while half a dozen of these climbs were staged in various parts of the country they were of local caliber and brought out poor fields, as the makers did not support them.

HOUR RECORDS.

The world's record for twenty-four hours is 1,581 miles 1,310 yards, an average pace of 65.9 miles an hour, made June 28-29, 1907, by S. F. Edge in a six cylinder Napier on the three and one-quarter mile cement track at Weybridge, England.

The circular track twenty-four hour record was raised to 1,253 miles by Patschke and Poole in a Stearns at Brighton Beach track, New York, Aug. 19-20, 1910. The former record was 1,196 miles, made by Patschke and Mulford in a Lozier in 1909.

An American competitive speedway twenty-four hour record was created at Los Angeles, where a Fiat covered 1,491 miles.

The one hour record was put at 107 miles 1,672 yards by a twelve cylinder Sunbeam on the English Brooklands track Oct. 11, 1913.

The twelve hour record was put at 1,078 miles 400 yards by the same car and on the same track on Oct. 11, 1913.

TRANSCONTINENTAL RECORD.

A record of 10 days 18 hours 12 minutes from New York to San Francisco was made Aug. 8-18, 1910, by L. L. Whitman, driving a four cylinder Reo, the fastest trip ever made across the continent in a motor car. The record from San Francisco to New York is 15 days 12 hours, made in a Franklin in 1906 by Whitman.

CHICAGO-NEW YORK RECORD.

The record by automobile between Chicago and New York is 39:53:00. It was made by a Franklin twenty-eight horse power runabout Aug. 21-22, 1907. The route followed was via Elkhart, Cleveland, Erie, Buffalo, Rochester, Syracuse, Utica, Newburgh and along the east side of the Hudson to New York. The distance was 1,050 miles. The previous record was 56:58:00, also made by a Franklin, a six cylinder car.

FENCING.

NATIONAL CHAMPIONSHIPS.

In the national fencing championship tournament in New York, N. Y., April 29-May 1, 1914, Dr. Scott D. Breckenridge of Washington, D. C., won the title in the foils contest. Dr. W. F. Allen of Boston was first with the dueling swords and W. H. P. Van Blyjenburgh of Springfield, Mass., won the championship in the saber bouts. The tournament was under the auspices of the Amateur Fencers' League of America.

The junior championships of the same organization were decided in New York Feb. 24. Steddsford Pitt won the dueling sword championship and J. B. B. Parker the saber championship.

CURLING.

INTERNATIONAL CHAMPIONSHIP.

The Gordon international medal, emblematic of the championship of the United States and Canada, was played for Feb. 20, 1914, at Montreal. The Canadians won by 138 shots, the grand total for each side standing: Canada, 418; United States, 280. By games the score was: Canada, 13; United States, 3. The United States was represented by rinks from New York, Boston, Utica, Schenectady and Jersey City. W. R. J. Hughes of the Caledonia rink, Montreal, again won the honor of holding the medal, his rink defeating John Leslie's rink of St. Andrew's club of New York by a score of 31 to 5.

NORTHWESTERN BONSPIEL.

Winners in Northwestern Curling association bonspiel, held in Duluth, Minn., Jan. 12-21, 1914: International event for Louis W. Hill trophy—Six American rinks defeated six Canadian rinks, 67 to 63.

Minneapolis event—J. S. Gates rink of Superior, Wis., defeated the Clough Gates rink of same place, 15 to 6.

Duluth Curling club trophy—Won by J. M. McLeod rink of Minneapolis, Minn.

Patrick-Duluth event—Won by Brewer Whyte rink of Duluth, Minn.

Western Curling club event—Won by Dinham rink of Duluth, Minn.

Grand aggregate prize—Won by Clough Gates of Superior, Wis.

DOG RACING.

ALL-ALASKA SWEEPSTAKES.

John Johnson, with his team of eighteen Siberian wolves, won the 1914 All-Alaska sweepstakes, covering the course of 412 miles from Nome to Candle and return in 81 hours and 3 minutes. The race, which ended April 17, was run in stormy weather and the time was far below record of 74:14:20, made by Johnson with his Siberian team in 1910.

SKAT.

Henry Wendt of Milwaukee won the championship and a prize of $1,000 at the seventeenth annual tournament of the North American Skat league held in Milwaukee, Wis., June 13-14, 1914. He took twenty-seven net games and 755 points, his score of net games being the highest that ever won first prize at a national tournament. E. M. Gross of Peoria, Ill., where the 1915 tournament is to be held, was elected president for the 1914-1915 term.

AERONAUTICS IN 1914.

The use of aeroplanes and dirigible balloons for military purposes was the main feature in the aeronautical world in 1914. Some details as to the number of craft used by the European armies and the part played by them in the great world conflict will be found in the article dealing with that subject. Prior to the breaking out of hostilities some new records, especially in altitude and endurance, were established and these are given herewith.

AEROPLANING.

RECORDS FOR ALTITUDE.

The record for height attained by aeroplane is held by Heinrich Oelreich, a German aviator, who ascended from Leipzig, Germany, July 14, 1914, and reached a height of approximately 24,606 feet. The best American record is held by Capt. H. LeR. Muller of the 1st aeroplane corps, U. S. army, who, starting from a field at San Diego, Cal., Oct. 8, 1914, ascended to a height of 17,441 feet. Record of notable altitude flights:

Georges Legagneux, Pau, France, Dec. 9, 1910, 10,499 feet.

Arch Hoxsey, Los Angeles, Cal., Dec. 26, 1910, 11,474 feet (unofficial).

Capt. Felix, Etampes, France, Aug 5, 1911, 11,330 feet.

Lincoln Beachey, Chicago, Ill., Aug. 20, 1911, 11,642 feet.

Roland G. Garros, Parame, France, Nov. 7, 1911, 13,943 feet.

Lieut. Blaschke, Vienna, June 29, 1912, 14,300 feet.

Roland G. Garros, Houlgate, Sept. 6, 1912, 16,076 feet.

Georges Legagneux, Villacoublay, Sept. 17, 1912, 17,881 feet.

Edmond Perreyon, Buc Aerodrome, France, March 11, 1913, 19,650 feet.

Georges Legagneux, St. Raphael, France, Dec. 27, 1913, 19,300 feet.

Theodore MacCauley, San Diego, Cal., Feb. 25, 1914, 12,120 feet.

Herr Linnekogel, Johannisthal, Germany, March 31, 1914, 20,564 feet.

Heinrich Oelreich, Leipzig, Germany, July 14, 1914, 24,606 feet.

De Lloyd Thompson, Kansas City, Mo., Aug. 6, 1914, 15,600 feet.

Capt. H. LeR. Muller, San Diego, Cal., Oct. 8, 1914, 17,441 feet.

RECORD FOR ENDURANCE.

The record for time spent in the air in non-stop aeroplane flights is held by Reinhold Boehm, a German aviator. At Johannisthal, Germany, July 11, 1914, he set the endurance record at 24 hours and 12 minutes. He used an ordinary Albatross army biplane and covered approximately 1,350 miles. Other notable endurance performances in 1914 were:

Herr Brunolanger, Johannisthal, Germany, Feb. 3, 14 hours 7 minutes.

Herr Ingold, Munich, Germany, Feb. 8, 16 hours 20 minutes.

Gustav Basser, Johannisthal, Germany, June 24, 18 hours 10 minutes.

Herr Landmann, Johannisthal, Germany, June 28, 21 hours 49 minutes.

LONDON TO MANCHESTER AND BACK.

Walter L. Brock, American, won an aeroplane race from London to Manchester and return, June 20, 1914, covering the course of 322 miles in 4:42:26, or at the rate of about 69 miles an hour.

LONDON TO PARIS AND BACK.

Walter L. Brock won an aeroplane race from the Hendon field, London, to Paris, France, and return July 11, 1914, his flying time for the distance of 502 miles being 7:03:06. Garros, the French flyer, was second.

FLIGHT ACROSS ALPS.

Achillo Landini, Italian, accompanied by Dr. Lampugnani as passenger, crossed the Monte Rosa range of the Alps, July 27, 1914, from Novara, Italy, to Visp, Switzerland, in about three hours. They had to rise to an elevation of more than 15,217 feet and suffered greatly from the cold.

ACROSS THE NORTH SEA.

Lieut. Gran, Norwegian, made an aeroplane flight across the North sea from Aberdeenshire, Scotland, to Stavanger, Norway, July 31, 1914. He made the distance of 230 miles in 4 hours 10 minutes.

FLIGHT OVER MONT BLANC.

M. Parmelin, chief pilot of the Deperdussin school of aviation in Reims, France, made a flight over Mont Blanc Feb. 11, 1914. His course was from Geneva, Switzerland, to Aosta, Italy. He rose to a height of 17,384 feet, at which elevation he suffered from intense cold. He used oxygen to withstand the rarefied atmosphere.

AVIATION FATALITIES.

BALLOONING.

BENNETT CUP RECORD.

Year.	Winner.	Distance.
1906	America (American)	402 miles
1907	Pommern (German)	880 miles
1908	Helvetia (Swiss)	620 miles
1909	America II. (American)	695 miles
1910	America II. (American)	1,171 miles
1911	Berlin II. (German)	471 miles
1912	Picardie (French)	1,354 miles
1913	Goodyear (American)	400 miles
1914	No contest.	

There was no contest for the Bennett cup in 1914 owing to the war in Europe. The American elimination race took place before hostilities began on the other side of the Atlantic and when it was planned to hold the big race as usual. Eight balloons started from St. Louis July 11, but weather conditions were unfavorable and the distances made were comparatively short. The race was won by the Goodyear, piloted by R. A. D. Preston of Akron, O. It landed near Constance, Ky., about 300 miles from the starting point.

MILITARY AVIATION DISASTER IN AUSTRIA.

While engaged in mimic warfare at a height of 1,300 feet above the ground a biplane and a dirigible collided near Vienna, Austria, June 20, 1914, with the result that all the men on both the airships were killed. The disaster occurred at the time of the Austrian army maneuvers and under conditions supposed to be identical with those liable to take place in actual warfare. The biplane, which was supposed to attack the dirigible, circled about the balloon several times, then rose to a higher altitude, apparently for the purpose of attacking the slower craft from above. The pilot for some unknown reason failed to keep clear of the slower craft. The nose of the biplane struck the covering of the dirigible and ripped it open. An explosion followed; the balloon burst into flames, which enveloped the biplane, and then the wreckage fell to the earth within full view of hundreds of spectators. All the aviators were killed before they reached the ground by the gas explosion. The dirigible was manned by Capt. Johann Hauswirth, in command; Lieut. Ernst Hofstetter, Lieut. Bruer, Lieut. Haidinger, Corporal Hadima, Corporal Weber and Engineer Kammerer. Those on the biplane were Lieut. Flatz and Lieut. Hoosta.

BALLOON RACE IN OREGON.

Four balloons left Portland, Ore., June 11, 1914, on the first race of the kind ever attempted on the north Pacific coast. Each carried a pilot and a passenger. The Uncle Sam, piloted by H. E. Honeywell of St. Louis, was wrecked by a thunderstorm the same evening. The Million Population Club, piloted by John Barry of St. Louis, was struck by lightning and wrecked. The Kansas City III., piloted by John Watts of Kansas City, landed safely in Marion county. The Springfield, piloted by Roy Donaldson, was wrecked in a storm near Blue Lake. The pilot and his passenger, W. Henderson of Portland, were four days in the woods before they reached a forest rangers' camp at Walker's Prairie, June 17. The distances traversed by the various balloons were short.

RECORD FOR DISTANCE.

The record for distance traveled in a balloon in continuous flight in a race is held by Maurice Benaims of France, who made 1,354 miles in contesting for the James Gordon Bennett cup Oct. 27-29, 1912. In 1900 Count de la Vaulx made a journey of 1,193 miles and in 1910 Alan R. Hawley and Augustus Post covered 1,171 miles.

Hans Berliner with two passengers made a balloon flight Feb. 8-16, 1914, from Bitterfeld, Germany, to Kirgischansk, in the Ural mountains, Russia. The distance is approximately 1,800 miles.

The record for distance traveled over water in a dirigible balloon is held by Walter Wellman, who on Oct. 15-18, 1910, made approximately 1,000 miles in an attempt to cross the Atlantic in the America.

RECORD FOR HEIGHT.

The record for height made in an ordinary gas balloon is 28,750 feet. It was made by Prof. Berson of Berlin, Dec. 4, 1894. A record of nearly 33,000 feet was claimed for the French balloon Icare in 1913.

The world's dirigible balloon record for altitude is 9,514 feet. It was made by the French dirigible Clement-Bayard III. May 20, 1912. The balloon carried six passengers.

WOMAN SUFFRAGE.

Women now have the right to vote in the following states:

Alaska (territory).	Montana.
Arizona.	Nevada.
California.	Oregon.
Colorado.	Utah.
Idaho.	Washington.
Illinois.*	Wyoming.
Kansas.	

*For offices not mentioned in state constitution.

In the election of Nov. 3, 1914, woman suffrage amendments were carried in Nevada and Montana and were defeated in Ohio, Missouri, Nebraska, North Dakota and South Dakota.

States allowing partial suffrage to women are: Connecticut, Delaware, Florida, Iowa, Indiana, Illinois, Kentucky, Michigan, Massachusetts, Minnesota, Mississippi, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Oklahoma, Ohio (defeated full suffrage in 1912 and 1914), South Dakota, Vermont and Wisconsin.

In Iowa the legislature of 1913 voted to submit a suffrage amendment to the people. Such amendment must pass the general assembly meeting in January, 1915, and then it is to go before the people for approval.

Militant suffrage activities in England ceased when the great European war broke out.

SYNOPSIS OF FEDERAL RESERVE ACT.

The banking and currency act, officially known as the "federal reserve act," was passed at the second session of the 63d congress and approved by the president Dec. 23, 1913. Its main provisions are as follows:

RESERVE CITIES AND DISTRICTS.

The secretary of the treasury, the secretary of agriculture and the comptroller of the currency, acting as "the reserve bank organization committee," shall designate not fewer than eight nor more than twelve cities to be known as federal reserve cities, and shall divide continental United States, excluding Alaska, into districts, each district to contain one federal reserve city. [Twelve such cities and districts were designated.] The districts shall be apportioned with due regard to the convenience and customary course of business and need not be coterminous with any state or states. They may be readjusted from time to time by the federal reserve board. The districts shall be known as federal reserve districts and be designated by numbers.

Every national bank is required and every eligible bank and trust company is authorized to accept in writing the provisions of the act within sixty days after its passage. Every national bank is required to subscribe to the capital stock of the federal reserve bank in its district a sum equal to 6 per cent of its capital stock and surplus. Should any national bank fail to become a member bank within a year from the passage of the act or fail to comply with any of its provisions the rights of such bank under the national bank act shall be forfeited after the matter has been determined in a court of competent jurisdiction. Should bank subscriptions to the capital stock of a reserve bank be insufficient stock may be offered to public subscription, but no individual, copartnership or corporation other than a member bank of its district shall be permitted to hold at any time more than $25,000 par value of stock in any reserve bank. Such stock shall not be entitled to voting power. If necessary stock may be allotted to the United States.

No federal reserve bank shall begin business with a subscribed capital of less than $4,000,000. Each federal reserve bank shall establish branch banks within its district to be operated by a board of directors under rules approved by the federal reserve board. When a federal bank shall have filed its certificate of organization with the comptroller of currency it shall become a body corporate and shall have power:

1. To adopt and use a corporate seal.
2. To have succession for twenty years.
3. To make contracts.
4. To sue and be sued.
5. To appoint and discharge its own officers and employes.
6. To adopt by-laws for the regulation of its business.
7. To exercise powers specifically granted in the act and other incidental powers necessary in carrying on the business of banking within the limitations of the act.
8. To receive circulating notes upon deposit of United States bonds with the treasurer of the United States.

In addition to the above powers specifically enumerated in section 4 of the act the following powers are granted by other sections:

To elect a member of the federal advisory council (sec. 12).

To receive deposits from member banks and the United States of money, national bank notes, federal reserve notes, checks or drafts upon member banks; for exchange purposes it may receive from other reserve banks money, national bank notes, checks and drafts (sec. 13).

To discount notes, drafts and bills of exchange arising out of actual commercial transactions, upon the indorsement of any of its member banks (sec. 13).

To discount acceptances which are based on the importation or exportation of goods and are indorsed by at least one member bank.

To buy or sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations or individuals, cable transfers and bankers' acceptances and bills of exchange (sec. 14).

To deal in gold coin and bullion at home or abroad, make loans thereon, exchange federal reserve notes for gold, gold coin or gold certificates, and to contract for loans of gold or bullion, giving as security government bonds, etc. (sec. 14).

To buy and sell at home or abroad bonds and notes of the United States, and bills, notes, revenue bonds and warrants issued in anticipation of the collection of taxes or other assured revenues issued by any state, county, district, political subdivision or municipality in the continental United States, including irrigation, drainage and reclamation districts (sec. 14).

To establish from time to time rates of discount to be charged by the federal reserve bank for each class of paper (sec. 14).

To establish accounts with other federal reserve banks for exchange purposes, to open and maintain banking accounts in foreign countries, appoint correspondents and establish agencies in such countries for the purpose of buying, selling and collecting bills of exchange (sec. 14).

To receive deposits from the government and when so required by the secretary of the treas-

ury to act as fiscal agent of the United States (sec. 15).

To obtain federal reserve notes on the presentation of securities consisting of notes and bills accepted for rediscount provided it maintains reserves in gold of not less than 40 per cent against them (sec. 16).

To receive on deposit at par from member banks or from federal reserve banks checks and drafts drawn upon any of its depositors, and, when remitted by a federal reserve bank or member bank, upon funds to the credit of such depositor in the reserve or member bank (sec. 16).

To exercise the functions of a clearing house for its member banks (sec. 16).

To purchase United States bonds securing circulation to be retired, the amount to be determined by the federal reserve board (sec. 18).

To have 2 per cent gold bonds bearing circulation privilege refunded into 3 per cent gold bonds without the circulation privilege (sec. 18).

To provide for special examination of member banks within its district (sec. 21).

RESERVE BANK DIRECTORS.

Every federal reserve bank shall be conducted under the supervision and control of a board of directors. The board shall administer the affairs of the bank fairly and shall extend to each member bank such discounts, advancements and accommodations as may safely and reasonably be made with due regard to the claims of other banks.

Such board of directors shall consist of nine members, holding office for three years, and divided into three classes, designated as classes A, B and C.

Class A shall consist of three members chosen by the stockholding banks.

Class B shall consist of three members, who, at the time of their election, shall be actively engaged in their district in commerce, agriculture or some other industrial pursuit.

Class C shall consist of three members, who shall be designated by the federal reserve board, and one of the three shall be designated as the chairman of the board of directors.

No director of class B or C shall be an officer, director, employe or stockholder of any bank.

Directors of class A and class B shall be chosen by preferential ballot by electors named by the member banks.

Class C directors, appointed by the federal reserve board, shall have been for at least two years residents of the district for which they are appointed. One of them shall be named by the reserve board as chairman of the board of directors and as "federal reserve agent." He shall be a person of tested banking experience; he is to have an office in the reserve bank and in addition to his duties as chairman shall act as the official representative of the federal reserve board and make reports to it. His compensation is to be fixed by the reserve board and paid by the bank to which he is designated. Another of the directors shall be designated to act as deputy chairman and deputy reserve agent.

CAPITAL STOCK.

The capital stock of each federal reserve bank shall be divided into shares of $100 each. It may be increased or decreased from time to time. Shares owned by member banks shall not be transferred or hypothecated.

DIVISION OF EARNINGS.

After the expenses of a federal reserve bank have been paid, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. After the dividend claims have been paid the net earnings shall be paid to the United States as a franchise tax, except that one-half of the net earnings shall be paid into a surplus fund until it shall amount to 40 per cent of the paid-in capital stock of the bank.

TAX EXEMPTION.

Federal reserve banks, including capital stock, surplus and income derived therefrom, shall be exempt from federal, state and local taxation, except taxes on real estate.

STATE BANKS.

State banks may be converted into national banks by a vote of shareholders owning not less than 51 per cent of the capital stock.

State banks and trust companies, under rules prescribed by the organization committee or federal reserve board, may subscribe for and hold stock in the federal reserve banks in their respective districts. No applying bank shall be admitted to membership until it possesses sufficient capital to entitle it to become a national bank in the place where it is situated.

FEDERAL RESERVE BOARD.

A federal reserve board is created consisting of seven members, including the secretary of the treasury and the comptroller of the currency, members ex-officio, and five members appointed by the president of the United States with the consent of the senate. Not more than one of the members shall be from any one federal reserve district. In making the appointments the president shall have due regard to a fair representation of the commercial, industrial and geographical divisions of the country. Each of the five members so appointed shall receive an annual salary of $12,000 and traveling expenses and the comptroller of the currency shall, in addition to the salary paid him as comptroller [$6,000] receive $7,000 annually for his services as a member of the board. The five appointed members shall devote their entire time to the business of the federal reserve board. At least two of them shall be persons experienced in banking or finance. One shall be designated to serve for two, one for four, one for six, one for eight and one for ten years and thereafter each member so appointed shall serve for ten years. Of the five appointed members one shall be designated by the president as governor and one as vice-governor of the federal reserve board. The secretary of the treasury may assign offices in the treasury department for the use of the board.

POWERS OF THE RESERVE BOARD.

The federal reserve board shall be authorized and empowered:

(a) To examine the accounts and affairs of each reserve and member bank and publish a weekly statement of the condition of each reserve bank and a consolidated statement for all reserve banks.

(b) To permit, or, by a vote of five board members, to require reserve banks to rediscount the discounted paper of other reserve banks and fix the rates of interest in such transactions.

(c) To suspend for a period not exceeding thirty days, and from time to time to renew such suspension for periods not exceeding fifteen days, any reserve requirements specified in the act, provided that it shall establish a graduated tax upon the amounts by which the reserve requirements may be permitted to fall below specified levels.

(d) To supervise and regulate the issue and retirement of federal reserve notes.

(e) To add to the number of cities classified as reserve and central reserve cities, to reclassify them or to terminate their designation as reserve cities.

(f) To suspend or remove any officer or director of any federal reserve bank.

(g) To require the writing off of doubtful or worthless assets on the books and balance sheets of reserve banks.

(h) To suspend, for violation of the act, the operations of any reserve bank, to administer the same and to liquidate or reorganize it.

(i) To require bonds of federal reserve agents, to make regulations for safeguarding all collateral, bonds, reserve notes, money or property of any kind in the hands of such agents, and to make all rules necessary to enable the board to perform the duties specified in the act.

(j) To exercise general supervision over federal reserve banks.

(k) To grant to national banks the right to

act as trustee, executor, administrator or registrar of stocks and bonds.

(l) To employ attorneys, experts, assistants, clerks and others deemed necessary to conduct the business of the board and to fix in advance all salaries and fees.

The above powers are specified in section 11 of the act. Powers conferred on the board in other sections of the law are:

To readjust federal reserve districts (sec. 2).

To adopt rules governing transfer of public stock in reserve banks (sec. 2).

To regulate establishment of branch reserve banks and select three out of seven directors of such banks (sec. 3).

To select three class C directors for each reserve bank and to designate one of them as chairman of the board and federal reserve agent (sec. 4).

To receive and pass upon applications of state banks and trust companies to become stockholders in reserve banks (sec. 9).

To cancel and restore membership of banks failing to comply with the provisions of the act or the regulations of the board (sec. 9).

To levy semiannually upon reserve banks an assessment to pay the expenses and salaries of the board (sec. 10).

To make an annual report of its operations to the speaker of the house of representatives (sec. 10).

To call meetings of the advisory council and to approve salaries and allowances granted to members of the advisory council (sec. 12).

To determine or define the character of paper which may be discounted by reserve banks and to fix amount of notes, drafts and bills drawn or issued for agricultural purposes or based on live stock which may be discounted (sec. 13).

To regulate the discounting by reserve banks of bills receivable, domestic and foreign bills of exchange and acceptances (sec. 13).

To prescribe rules for the purchase and sale by reserve banks of cable transfers and bankers' acceptances, bills of exchange and securities issued by the government, states, counties or other political subdivisions (sec. 14).

To review rates of discount to be charged by reserve banks (sec. 14).

To consent to the maintenance by reserve banks of accounts, correspondents and agencies in foreign countries (sec. 14).

To issue at discretion federal reserve notes for the purpose of making advances to reserve banks (sec. 16).

To fix charges to be collected by member banks from patrons whose checks are cleared through reserve banks (sec. 16).

To make regulations for the transfer of funds and charges therefor among the reserve banks and their branches (sec. 16).

To exercise functions of a clearing house for federal reserve banks, to designate a reserve bank to exercise such functions or to require each reserve bank to be a clearing house for its member banks (sec. 16).

To require, at its discretion, reserve banks to buy United States bonds when surrendered by member banks to retire circulating notes and to allot such bonds proportionately to each reserve bank (sec. 18).

To approve exchange of 2 per cent for 3 per cent bonds by reserve banks and the secretary of the treasury (sec. 18).

To permit a member bank to act as agent of a nonmember bank in receiving discounts from a reserve bank (sec. 19).

To permit a member bank to check against the reserve carried by it with a reserve bank (sec. 19).

To permit national banks outside the continental United States, except in the Philippine islands, to become member banks of any reserve district (sec. 19).

To order annual and special examinations of reserve banks, to accept examinations by state authorities of state banks or trust companies that are stockholders in a federal reserve bank and to order at any time special examinations of such banks, and to fix the salaries of all bank examiners (sec. 21).

To add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate (sec. 24).

To approve or reject applications of national banks to establish branches in foreign countries or dependencies of the United States for the furtherance of the foreign commerce of the United States and to order special examinations of such branches (sec. 25).

FEDERAL ADVISORY COUNCIL.

There is created a federal advisory council to consist of as many members as there are federal reserve districts. Each reserve bank shall select from its own district one member of the council, whose compensation shall be fixed by his board of directors subject to the approval of the reserve board. The council shall meet in Washington, D. C., at least four times a year and oftener if called by the reserve board. It shall have power (1) to confer with the federal reserve board on general business conditions; (2) to make representations concerning matters within the jurisdiction of the board; (3) to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, open market operations by such banks, and the general affairs of the reserve banking system.

FEDERAL RESERVE NOTES.

Federal reserve notes, to be issued for the purpose of making advances to reserve banks through the federal reserve agents, are authorized. They shall be obligations of the United States and shall be receivable by all national and member banks and federal reserve banks and for all taxes, customs and other public dues. They shall be redeemable in gold on demand at the treasury department in Washington, D. C., or in gold or lawful money at any reserve bank.

Any reserve bank may apply to the local federal reserve agent for such amount of reserve notes as it may require, offering as collateral an equal amount of notes and bills accepted for rediscount under the provisions of the act.

Every federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its federal reserve notes in actual circulation, and not offset by gold or lawful money deposited with the federal reserve agent. Notes so paid out shall bear upon their faces a distinctive letter and serial number, which shall be assigned by the federal reserve board to each federal reserve bank. Whenever reserve notes issued through one reserve bank shall be received by another reserve bank, they shall be promptly returned for credit or redemption to the reserve bank through which they were originally issued. No reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the treasury of the United States shall be paid out of the redemption fund and returned to the reserve banks through which they were originally issued, and thereupon such reserve bank shall, upon demand of the secretary of the treasury, reimburse such redemption fund in lawful money or, if such reserve notes have been redeemed by the treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the secretary of the treasury in gold or gold certificates, and such reserve bank shall, so long as any of its reserve notes remain outstanding, maintain with the treasurer in gold an amount sufficient in the judgment of the secretary to provide for all redemptions to be made by the treasurer. Federal reserve notes received by the treasury, otherwise than for redemption, may be exchanged for gold out of the redemption fund and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States.

The federal reserve board shall require each

reserve bank to maintain on deposit in the United States treasury a sum in gold sufficient for the redemption of the reserve notes issued to such bank, but such deposit shall be counted as part of the 40 per cent reserve required. The bank supplied with reserve notes shall be charged with the amount of the notes and pay such interest as may be established by the reserve board.

The comptroller of the currency shall have plates and dies engraved and have printed therefrom and numbered such quantities of reserve notes of the denominations of $5, $10, $20, $50 and $100, as may be required. The expenses incident to the issue and retirement of federal reserve notes shall be paid by the reserve banks.

BANK RESERVES.

Demand deposits within the meaning of the act shall comprise all deposits payable within thirty days, and time deposits shall comprise all deposits payable after thirty days, and all savings accounts and certificates of deposit which are subject to not less than thirty days' notice before payment.

When the secretary of the treasury shall have officially announced the establishment of a federal reserve bank in any district, every subscribing member bank shall establish and maintain reserves as follows:

(a) A bank not in a reserve or central reserve city shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits.

(b) A bank in a reserve city shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits.

(c) A bank in a central reserve city shall hold and maintain a reserve equal to 18 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits.

LOANS ON FARM LANDS.

Any national banking association not situated in a central reserve city may make loans secured by improved and unincumbered farm land, situated within its federal reserve district, but no such loan shall be made for a longer time than five years, nor for an amount exceeding 50 per cent of the actual value of the property offered as security. Any such bank may make such loans in an aggregate sum equal to 25 per cent of its capital and surplus or to one-third of its time deposits and such banks may continue to receive time deposits and to pay interest on the same.

TAX ON CIRCULATING NOTES.

National banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first three months a tax at the rate of 3 per cent per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterward an additional tax rate of one-half of 1 per cent per annum for each month until a tax of 6 per cent per annum is reached, and thereafter such tax of 6 per cent upon the average amount of such notes.

CENTENARIANS IN THE UNITED STATES.

According to the census of 1910 there were then in the United States 3,555 persons 100 years of age and over. Of these, 1,380 were men and 2,175 were women. Classified according to the color they were: White men, 326; white women, 438; total, 764; negro men, 1,004; negro women, 1,671; total, 2,675; Indian men, 50; Indian women, 66; total, 116. Classified as to place of birth, 439 were native white and 293 foreign born white. The number of centenarians reported by the census of 1900 was 3,504. "It may be noted," says a census report in commenting on these figures, "that the proportion of centenarians, according to the census returns, was less in 1910 than in 1900. In fact, the proportion has steadily decreased from census to census for over half a century. The number of centenarians reported in 1910 was equal to 4 for each 100,000 of the total population, while the corresponding ratio in 1850 was 11. It is improbable that any such decrease in longevity has actually occurred. By no means have all those who report themselves as 100 years old or more, in fact, reached that age, and the apparent reduction in the proportion of centenarians is probably due to greater accuracy in the returns."

Deaths of centenarians reported from Nov. 1, 1913, to Nov. 1, 1914:

BUCK'S STOVE COMPANY BOYCOTT CASE.

Proceedings were brought in the Supreme court of the District of Columbia in August, 1907, against the officers of the American Federation of Labor to enjoin them from conducting a boycott against the Buck's Stove and Range company of St. Louis, Mo., by advertising that the concern was on the "unfair" and "we don't patronize" lists of the federation's official organ. The injunction was issued by Judge Gould Dec. 23, 1907. On the plea that the injunction was being violated proceedings for contempt of court were brought against Samuel Gompers, president; John Mitchell, vice-president, and Frank Morrison, secretary of the federation. They were declared guilty by Justice Wright of the Supreme court of the District of Columbia Dec. 23, 1908. Mr. Gompers was sentenced to one year's imprisonment, Mr. Mitchell to nine months' and Mr. Morrison to six months' imprisonment. They were admitted to bail and the case was taken to the Court of Appeals of the District of Columbia, which tribunal decided Nov. 2, 1909, that the decree against them was valid.

An appeal was taken to the United States Supreme court, which on May 15, 1911, reversed the judgments of the lower courts and remanded the case. May 5, 1913, the Court of Appeals of the District of Columbia again affirmed the original findings in the contempt case, but reduced Mr. Gompers' sentence to thirty days in jail and held that Mitchell and Morrison should be exempt from prison sentences, but should each pay a fine of $500. June 19, 1913, Chief Justice White of the United States Supreme court granted an appeal by the defendants that the case be heard again by the highest tribunal.

May 11, 1914, the United States Supreme court set aside the sentences imposed upon Gompers, Mitchell and Morrison on the ground that they were barred by the statute of limitations. Justice Holmes, who read the opinion, held that the contempt proceedings should have been begun within three years from the date of the offense.

ARCTIC AND ANTARCTIC EXPLORATION.

DISASTER TO STEFANSSON EXPEDITION.

Vilhjalmar Stefansson's exploring ship, the Karluk, a steam whaler of 320 tons, was crushed in the ice in the Arctic ocean early on the morning of Jan. 16, 1914, sixty miles north of Herald island, which is northeast of Siberia. Capt. Robert A. Bartlett was in command, Mr. Stefansson himself being engaged in exploring work elsewhere at the time. The officers, crew and scientists aboard had time to leave the ship and take some dogs, provisions and tents with them. All except eight reached Wrangel island over the ice and passed the rest of the winter there in tents. March 18 Capt. Bartlett, accompanied by a number of Eskimos, went by dog sledge 100 miles to the mainland forty miles west of Cape North, and thence along the coast to Cape North. He was taken across the strait on the whaler Herman and arrived at St. Michael, Alaska, May 31. Here he at once set about making preparations for the relief of the men remaining on Wrangel island.

In July the revenue cutter Bear was sent out, but on account of heavy ice was unable to reach the island. Then in August the schooner Wing and Wing was engaged for the rescue work. In the early part of September it reached Roger's harbor, Wrangel island, and here after much difficulty John Munro, chief engineer; F. W. Maurer, fireman, and R. Templeman, steward, were taken aboard. The vessel then went to Cape Waring, where the following were found: W. McKinlay, meteorologist; Neil Williamson, second engineer; J. R. Hadley, ship's carpenter; C. Williams, seaman; Ernest Chafe, cabin boy, and an Eskimo family. It was thought that others might be on Herald island, but all efforts to reach it failed because of heavy ice. The schooner then started for Nome, but on the way met the Bear, to which the rescued were transferred and brought to Nome, which point was reached on Sept. 14.

Three men died on Wrangel island before the rescue ship arrived. These were George S. Malloch, geologist; Bjarme Mamen, topographer, and George Breddy, a fireman, who accidentally shot himself. The others died of nephritis. The others who left the Karluk at the time the vessel went down, but who failed to reach Wrangel island, were in two parties of four each. One consisted of the first and second officers, Alexander Anderson and Charles Barker, and Brady and King, seamen. The second party consisted of Henri Beuchat, anthropologist; James Murray, oceanographer; Dr. A. Forbes Mackay, surgeon, and a seaman named Morris. It is the general opinion that these men all perished.

No news was received up to a late date in the fall from Mr. Stefansson.

SHACKLETON TRANSANTARCTIC EXPEDITION.

In spite of the fact that England was engaged in a great war with Germany, Austria-Hungary and Turkey, Sir Ernest Shackleton started in the fall of 1914 on another expedition to the south polar regions. His plan this time was not simply to go to the pole and back, but to traverse the south polar region from one side to the other. Before his departure Sir Ernest said that in recent years the interest of geographers and the public had been centered in the approach to the pole from the Ross sea, and that on the opposite side but little progress had been made. In the Weddell quadrant there were still great white spaces on the map representing unexplored regions. It was the object of his expedition to start from a base in the Weddell sea, traverse the unknown area to the pole and then go on, probably over the route taken by Capt. Scott in his journey to the pole.

The expedition is making use of two ships, as there will be two parties in the undertaking. Sir E. Shackleton secured the Polaris, a ship built in Norway especially for polar work, renamed it the Endurance and fitted it out for the party under his own leadership. The other ship is the Aurora, a vessel already famous in antarctic work. This will be used by the second party, which is to meet the first if it succeeds in making the crossing. The Endurance sailed from London Aug. 1 with a portion of the expeditionary force. Sir Ernest Shackleton and others of the party left Sept. 18 and arrived at Buenos Aires, Argentina, Oct. 8. With the leader of the expedition and the rest of the Weddell sea party aboard the Endurance sailed from Buenos Aires Oct. 26. The plan was for the ship to proceed to the Falkland islands and South Georgia and thence to the Weddell sea. The Aurora was to leave Australia about Dec. 1 and proceed to McMurdo sound with the Ross sea party. The leader of this section of the expedition is Lieut. Æneas Mackintosh. The Weddell sea party includes, in addition to Sir E. Shackleton, Frank Wild, second in command; George Marston, Tom Crean, Capt. Orde Leese, J. McIlroy, R. W. James, physicist; L. Hussey, assistant physicist; J. M. Wordie, geologist; V. Studd, geologist; Lieut. F. Dobbs and Lieut. C. Brocklehurst and a number of others occupying minor positions. What is called the shore party numbers fifteen men.

The Endurance is a vessel of 658 tons and is 144 feet long and 25 feet wide. It carries in addition to the crew and expeditionary force a large number of dogs and several motor sledges for the land and ice journey. Sir E. Shackleton hopes, should his plan for the crossing of the Antarctic meet with success, to meet the Ross sea party in April of next year. In case of his inability to cross in the first season, he has arranged for the Aurora to winter in the Ross sea in order to meet him in March, 1916, should he be successful in effecting a crossing during the second season.

AMUNDSEN EXPEDITION CANCELED.

Capt. Roald Amundsen's projected expedition to the north polar regions was canceled in 1914. His purpose was to sail in the Fram from San Francisco, enter the arctic ice north of Bering strait in September, 1915 or 1916, and drift across the polar area. Many difficulties were encountered by the explorer in raising the necessary funds and then the European war broke out, disarranging all his plans. Sept. 10, 1914, it was announced that he had postponed the expedition indefinitely. Capt. Amundsen was to have been accompanied by Capt. Wilhelm Filschner of the German navy.

RETURN OF MAWSON EXPEDITION.

Dr. Douglas Mawson, the Australian explorer, and six companions who were forced to spend the winter of 1913-1914 on Adelie land, were brought back to Adelaide, South Australia, Feb. 26, 1914, on the steamship Aurora. All of the party were well. Dr. Mawson said that the scientific results of the expedition, which reached Adelie or Wilke's land in the fall of 1911, included the mapping of newly discovered lands, the finding of extraordinary marine fauna at a depth of two miles and the discovery of copper beds and coal fields.

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided among Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan. In Maryland in 1904 7 of the presidential electors chosen were democrats and 1 republican. In 1908 Maryland elected 6 democratic and 2 republican electors. In 1912 California elected 11 progressive and 2 democratic electors.

APPORTIONMENT OF REPRESENTATIVES.

[From census bureau report.]

The apportionment of representatives in congress, under the first six censuses—1790 to 1840, inclusive—was made by congress, each by a separate act. The law for taking the census of 1850, which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the house at 233 and directed the secretary of the interior thereafter to make the apportionment. The apportionment of 1860 was also made under this law, but congress, on March 4, 1862, fixed the total number of representatives at 241, and the secretary of the interior apportioned the new quotas to the states. The apportionments from and after the census of 1870 were made by congress, each by a separate act, hence it may be assumed that the power conferred on the secretary of the interior by the act of May 23, 1850, was repealed by implication. The following shows the dates of the apportionment acts and the ratio of population to each representative:

Census.	Date.	Ratio.
1910	Aug. 8, 1911	211 877
1900	Jan. 16, 1901	194,182

VICE-PRESIDENTIAL CANDIDATES.

The vice-presidential candidates, who were voted for and who received the same number of ballots as party nominees for president, were: 1900, Theodore Roosevelt, Rep., and Adlai E. Stevenson, Dem.; 1904, Charles W. Fairbanks, Rep., and Henry G. Davis, Dem.; 1908, James S. Sherman, Rep., and John W. Kern, Dem.; 1912, Thomas R. Marshall, Dem., Hiram W. Johnson, Prog., and Nicholas Murray Butler, Rep. In 1912 James S. Sherman, the republican nominee, died just prior to the election and no attempt was made to fill his place. The republican electors cast their eight votes for Nicholas Murray Butler of New York. An informal poll of the members of the republican national committee taken after Mr. Sherman's death showed a strong sentiment for Herbert S. Hadley of Missouri for vice-president, but a meeting of the committee, which had been announced for Nov. 12, was called off by Chairman Charles D. Hilles, and no formal action was ever taken on the subject.

THE PRESIDENTIAL ELECTION OF 1916.

The next president and vice-president of the United States will be chosen Nov. 7, 1916. As is well known, these officials are not elected directly by the people, but by electors, who are voted for on the party tickets on the date named. The electors chosen meet on the second Monday in January following their election in their respective states and vote by ballot for president and vice-president of the United States. The result is transmitted to the president of the senate in Washington. On the second Wednesday in February succeeding the meeting of the electors the electoral votes are opened and counted in the presence of both houses of congress and the result announced by the president of the senate.

While the president and vice-president are thus formally elected in 1917, the actual choice is made in 1916. Many of the states now provide for the expression of presidential preferences at the party primaries and it is possible that the candidates in 1916 will practically be named in this way. However, in the spring and summer of that year national party conventions will be held for the nomination of candidates for president and vice-president of the United States for the term beginning March 4, 1917. These conventions are not provided for by the constitution, but it has become the invariable rule that the candidates presented by them are voted for by the presidential electors. The latter are nominated at the state party conventions or primaries and are elected on the first Tuesday after the first Monday in November of every fourth year, preceding the end of the presidential term. Each state is entitled to as many electors as it has senators and representatives. No senator or representative or person holding an office of trust or honor under the United States may be an elector. The twelfth amendment to the constitution prescribes how the electors shall meet and cast their ballots and how congress shall count the votes. The article is as follows:

"The electors shall meet in their respective states and vote by ballot for president and vice-president, one of whom at least shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as president, and in distinct ballots the person voted for as vice-president, and they shall make distinct lists of all persons voted for as president and of all persons voted for as vice-president, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the government of the United States, directed to the president of the senate.

"The president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for president shall be the president, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as president, the house of representatives shall choose immediately by ballot the president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the house of representatives shall not choose a president, whenever the right of choice shall devolve upon them, before the 4th day of March next following, then the vice-president shall act as president, as in the case of the death or other constitutional disability of the president.

"The person having the greatest number of votes as vice-president shall be the vice-president, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest members on the list the senate shall choose the vice-president; a quorum for the purpose shall consist of two-thirds of the whole number of senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of president shall be eligible to that of vice-president of the United States."

Section 5, article II., of the constitution prescribes the qualifications of the president as follows:

"No person except a natural born citizen or a citizen of the United States at the time of the adoption of the constitution shall be eligible to the office of president; neither shall any person be eligible to that office who shall not have attained to the age of 35 years and been fourteen years a resident within the United States."

The qualifications of the vice-president are the same as those of the president.

DELEGATES TO REPUBLICAN NATIONAL CONVENTION.

At a meeting of the republican national committee held in Washington, D. C., Dec. 16-17, 1913, the following resolution was adopted:

"Confident that the action of this committee, representing, as it does, practically the unanimous sentiment of the republican electors of the states, will be ratified by the republican electors of the states, be it

"Resolved, That this committee shall issue a call for the national convention, to be held in the year 1916, to nominate candidates for president and vice-president in accordance with the following basis of representation: Each state shall be entitled in such convention to four delegates at large; one delegate at large for each representative in congress at large from any state; one delegate from each congressional district; an additional delegate from each congressional district in which the vote either for republican presidential electors in 1908 or for the republican candidate for congress in 1914 shall not have been less than 7,500, and that for each delegate chosen an alternate delegate shall be chosen in the same manner and at the same time to act in the absence of the delegate.

"Provided, however, That the above basis of representation shall not be made the basis of the call for the national convention to be held

in the year 1916, unless prior to Jan. 1, 1915, republican state conventions held under the laws of the states, or called by the republican state committees of the states in such number of states as are entitled to cast a majority of the votes in the present electoral college, shall ratify the action of this committee in respect to determining this basis of representation."

This action was taken for the purpose of reducing the number of delegates from the southern states to the national convention. Under this plan the southern delegates in the 1916 convention will be 16 per cent of the total number instead of 33 per cent, as in 1912. The total number of delegates will be reduced from 1,078, as in 1912, to 993. Every state convention held between Dec. 17, 1913, and Nov. 1, 1914, except that in Texas, gave its assent to the plan, which therefore will be carried out. In the next national convention the reductions in the state delegations will be as follows:

Alabama	8	South Carolina	7
Arkansas	3	Tennessee	3
Florida	4	Texas	16
Georgia	11	Virginia	8
Louisiana	8	Hawaii	4
Mississippi	8	Porto Rico	2
New York	2	Philippine Islands	2
North Carolina	3

POLITICAL PARTY PLATFORMS OF 1912 IN BRIEF.

The following summary includes the principal planks in the platforms adopted at the national conventions in 1912:

DEMOCRATIC.

Collection of tariff duties to be limited to the necessities of the government honestly and economically administered.

Immediate downward revision of the tariff duties, especially upon necessaries of life.

Placing upon free list of articles competing with trust controlled products.

Enforcement of criminal and civil law against trusts and trust officials.

Prevention of holding companies and interlocking directorates.

Preservation of the rights of the states.

Ratification of the income tax and direct senatorial election propositions.

Prohibiting corporations from making campaign contributions.

Valuation of railroads, telegraph and telephone lines and property of express companies.

Systematic revision of the banking and currency laws.

Establishment of a system of rural credits.

Prevention of overflows of the Mississippi river.

Development of inland waterways.

Protection of labor unions from unjust court proceedings.

Employes' compensation law.

Prevention of gambling in agricultural products by organized exchanges.

Conservation of natural resources.

Fostering of merchant marine.

Exemption of American ships engaged in coasting trade from Panama canal tolls

United and independent health service.

Extension and maintenance of the civil service.

Reform in administration of civil and criminal law.

Recognition of independence of Philippines as soon as a stable government can be established.

Protection of American citizenship abroad irrespective of race or creed.

Establishment of parcel post.

Generous pension policy.

Protection of uniform of the United States.

TERM OF PRESIDENT.

"We favor a single presidential term and to that end urge the adoption of an amendment to the constitution making the president of the United States ineligible for re-election and we pledge the candidate of this convention to that principle."

POPULIST.

Issuance of money by the government direct to the people.

Loans by the government to the people.

Government ownership of telegraph and telephone systems and the parcel post.

The initiative, the referendum, direct election of United States senators, direct primaries, presidential primaries and equal suffrage.

Registration of lobbyists.

Graduated income and inheritance tax.

Free schools in the lines of manual and occupational training.

Recognition of the Chinese republic.

Old age pensions.

The commission form of government for cities.

Granting of franchises to public utility corporations by popular vote.

PROGRESSIVE.

Providing for an easier method of amending the federal constitution.

Bringing under effective national jurisdiction those problems which have expanded beyond the reach of the individual states.

Equal suffrage for men and women.

Limitation and publicity of campaign contributions.

Registration of lobbyists.

"The progressive party demands such restriction of the power of the courts as shall leave to the people the ultimate authority to determine fundamental questions of social welfare and public policy. To secure this end it pledges itself to provide:

"(1) That when an act, passed under the police power of the state, is held unconstitutional under the state constitution by the courts, the people, after an ample interval for deliberation, shall have an opportunity to vote on the question whether they desire the act to become law notwithstanding such decision.

"(2) That every decision of the highest appellate court of a state declaring an act of the legislature unconstitutional on the ground of its violation of the federal constitution shall be subject to the same review by the Supreme court of the United States as is now accorded to decisions sustaining such legislation."

Reform of legal procedure and judicial methods.

Conservation of human resources.

Legislation looking to prevention of industrial accidents, occupational diseases, overwork and involuntary unemployment.

Fixing of minimum safety and health standards in the various occupations.

Prohibition of child labor.

Establishment of an eight hour day for women and young persons.

One day's rest in seven for wage workers.

Abolition of convict contract labor system.

Standards of compensation for death by industrial accident and trade disease.

Protection of home life against sickness, irregular employment and old age through a system of social insurance adapted to American use.

Establishment of continuation schools for industrial education.

Establishment of a department of labor.

Development of agricultural credit and co-operation.

Inquiry into the high cost of living.

Establishment of single national health service.

Establishment of a strong federal administrative commission, which shall maintain permanent active supervision over industrial corporations engaged in interstate commerce, or such of them as are of public importance.

Revision of patent law to prevent its abuse by monopolies.

Physical valuation of railroads.

Revision of the national currency system on the basis of soundness and elasticity.

Extension of foreign commerce through appointment of competent diplomatic and consular officers.

Conservation of the national resources.

Building of national highways and extension of good roads.

Improvement of waterways through co-operation of nation, states and cities.

"We believe in a protective tariff which shall equalize conditions of competition between the United States and foreign countries, both for the farmer and the manufacturer, and which shall maintain for labor an adequate standard of living."

"We demand tariff revision because the present tariff is unjust to the people of the United States. Fair dealing toward the people requires an immediate downward revision of those schedules wherein duties are shown to be unjust or excessive. We pledge ourselves to the establishment of a nonpartisan scientific tariff commission, reporting both to the president and to either branch of congress."

Passage of federal law for graduated inheritance tax; ratification of income tax amendment.

Settlement of international differences by judicial and other peaceful means.

Building of two battle ships a year.

Creation of a parcel post.

Extension and enforcement of civil service law.

Governmental supervision over investments.

PROHIBITION.

Prohibition of the manufacture, importation, exportation, transportation and sale of alcoholic beverages.

Suffrage for women on the same terms as for men.

Uniform marriage and divorce law. Extermination of polygamy.

Absolute protection of the rights of labor, without impairment of the rights of capital.

Settlement of international disputes by arbitration.
Abolition of child labor in mines, workshops and factories.
Election of United States senators by direct vote of the people.
Presidential term of six years and one term only.
Court review of postoffice and other departmental decisions and orders; the extension of the postal savings bank system and of rural delivery and the establishment of an efficient parcel post.
Initiative, referendum and recall.
As the tariff is a commercial question, it should be fixed on the scientific basis of accurate knowledge, secured by means of a permanent, omnipartisan tariff commission with ample powers.
Equitable graduated income and inheritance taxes.
Conservation of our forest and mineral reserves and the reclamation of waste lands.
Clearly defined laws for the regulation and control of corporations transacting an interstate business.
Efficiency and economy in governmental administration.
The protection of one day in seven as a day of rest.

REPUBLICAN.

Protection of the rights of the individual to freest possible development of his own powers.
Upholding of the authority and integrity of the courts, both state and federal.
Legislation to prevent long delays and costly appeals in civil and criminal cases.
"While we regard the recall of judges as unnecessary and unwise, we favor such action as may be necessary to simplify the process by which any judge who is found to be derelict in his duty may be removed from office."
Measures for maintaining international peace.
Enactment of legislation supplementary to the antitrust act which will define as criminal offenses those specific acts that mark attempts to restrain and monopolize trade.
Creation of a federal trade commission.
"We reaffirm our belief in a protective tariff."
"We hold that the import duties should be high enough while yielding a sufficient revenue to protect adequately American industries and wages. Some of the existing import duties are too high and should be reduced. Readjustment should be made from time to time to conform to changed conditions and to reduce excessive rates, but without injury to any American industry.
"To accomplish this correct information is indispensable. This information can best be obtained by an expert commission."
Scientific inquiry into the causes of the high cost of living.
Revision of banking and currency systems; these, however, to be safeguarded from sectional, financial or political domination.
Passage of state and federal laws for the establishment of organizations having for their purpose the loaning of funds to farmers.
Extension and enforcement of civil service law.
Publicity and further restriction of campaign contributions.
Conservation of the national resources.
Establishment of parcel post.
Protection of American citizenship abroad, regardless of race, religion or previous political allegiance.
Maintenance of an adequate navy.
Revival of the merchant marine.
Flood prevention along Mississippi river.
Reclamation of arid lands.
Improvement of rivers and harbors.
Revision of immigration laws.
Enactment of laws for the protection of seamen and requiring the use of additional safety appliances at sea.

SOCIALIST.

Absolute freedom of press, speech and assemblage.
Collective ownership of patents with royalties for inventors.
Equal suffrage for men and women.
Adoption of initiative, referendum, recall and proportional representation.
Abolition of senate and president's veto power.
Election of president and vice-president by direct vote.
Abolition of power of United States Supreme court to pass upon constitutionality of laws passed by congress.
Enactment of laws for vocational education; bureau of education to be made a department.
Abolition of federal district courts and United States Circuit Court of Appeals.
Creation of an independent bureau of health.
Revision of constitution of the United States.
Collective ownership of railroads, telegraphs, telephones, steamboat lines and large scale industries.
Acquisition by cities, states or nation of grain elevators, stockyards, storage warehouses and other distributing agencies in order to reduce the cost of living.
Inclusion of mines, oil wells, quarries, forests and water power in public domain.
Further conservation and development of natural resources for the benefit of all the people.
Collective ownership of land.
Collective ownership and democratic management of banking and currency system.
Conservation of human resources, particularly of the lives and well-being of workers and their families.
Establishment of minimum wage scales.
Establishment of a noncontributory system of old age pensions, insurance by the state against unemployment and invalidism, and compulsory insurance by employers of their workers, without cost to the latter, against industrial diseases, accidents and death.
The platform advocates these and other similar measures as "calculated to strengthen the working class in its fight for the realization of its ultimate aim, the co-operative commonwealth."

SOCIALIST LABOR.

Substitution of industrial or socialist republic for political state.
Placing of land and all means of production, transportation and distribution in the hands of the people as a collective body.
National congress to consist of representatives of the useful occupations of the land.

CONFLAGRATION IN SALEM, MASS.

More than 1,000 buildings were destroyed by fire in Salem, Mass., June 25, 1914. Some 18,000 persons were made homeless and four lost their lives. The property loss was estimated at $12,000,000, of which $10,000,000 was covered by insurance. The fire began at 2 o'clock in the afternoon, when an explosion occurred in the factory of the Korn Leather company at Proctor and Boston streets. This factory stood near the foot of Gallows hill, famous as the place where witches were hanged in colonial days. A high wind carried the flames through the manufacturing district, thence southeastward to the heart of the city, across a tenement house section and to the water front. A shift in the wind sent the fire northward along Lafayette street, where many of the city's finest residences were burned. Scores of business houses were destroyed and only the free use of dynamite prevented the fire from sweeping the whole city. The Salem hospital was burned but all the patients were removed safely. The Peabody museum, the birthplace of Nathaniel Hawthorne, the House of the Seven Gables and other structures of historic interest escaped the flames. The state and city authorities took prompt steps to provide the homeless with shelter and food.

WELSH CHURCH DISESTABLISHMENT.

The first bill to become a law under the parliament act was that disestablishing the Welsh church. It was brought into parliament in 1912 and 1913, passed by the house of commons and rejected by the house of lords on both occasions. It was introduced again in 1914 and was passed by the commons for the third time (May 19) by a vote of 328 to 251. It then became a law automatically without the sanction of the lords. The act terminates the establishment of the church of England in Wales and Monmouthshire, dissolves all cathedrals and ecclesiastical corporations and ends ecclesiastical law and the coercive jurisdiction of ecclesiastical courts. No Welsh bishop is now eligible to sit in the house of lords, but the Welsh clergy may sit in the house of commons. Property belonging to the Welsh church is vested by the act in Welsh commissioners, who manage and distribute it.

CHRISTIAN SCIENCE CHURCH.

The Christian Science church was founded in 1872 by Mary Baker Eddy, the discoverer of Christian science and author of its textbook, "Science and Health, with Key to the Scriptures." The church was organized "to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Church Manual). In 1892 the church was reorganized as the First Church of Christ, Scientist, known as the mother church, in Boston, Mass. The present officers of the mother church are:

President—John C. Lathrop.
Clerk—John V. Dittemore.
Treasurer—Adam H. Dickey.
Directors—Archibald McLellan, Allison V. Stewart, James A. Neal, John V. Dittemore, Adam H. Dickey.

All Christian science churches and societies in the United States and in foreign countries are branches of the mother church. Lesson-sermons compiled from the bible and "Science and Health, with Key to the Scriptures" are read at the services in Christian science churches.

Mrs. Eddy founded the Christian Science Journal, Sentinel, Quarterly, Der Herold der Christian Science and The Christian Science Monitor (a daily newspaper), all of which are published by the Christian Science Publishing society in Boston.

There is in connection with the Christian science movement an official board of lectureship designed to furnish the public correct information concerning the fundamental teachings of Christian science. Lectures given by members of this board are free to the public.

RELIGIONS OF THE WORLD.

According to the revised (1898) edition of Mulhall's Dictionary of Statistics, there are 476,100,000 Christians in the world. The same authority places the number of Roman catholics in Europe, America and Australia at 223,090,000; protestants, 157,050,000, and Greeks, 88,660,000. It has been estimated that there are in the world 256,000,000 followers of Confucius, 190,000,000 Hindus, 176,800,000 Mohammedans, 148,000,000 Buddhists, 118,000,000 polytheists, 43,000,000 Taoists, 14,000,000 Shintoists and 12,000,000 Jews. Of the Christians more than 230,000,000 are catholics, 98,000,000 orthodox Greeks, 70,000,000 Lutherans, 21,000,000 episcopalians, 17,000,000 methodists, 11,000,000 baptists, 9,000,000 presbyterians and 4,500,000 congregationalists.

SUMMARY OF CAUSES.

The long predicted and long dreaded war between the powers of Europe broke out in the summer of 1914 and within a few weeks was being carried on by land and sea in nearly every quarter of the globe. Beginning with a conflict between Austria-Hungary and Servia, it spread to Germany, Russia, France, Great Britain and its dominions, Belgium, Japan, Montenegro and Turkey. War credits were voted by the billions of dollars and armed men were placed in the field by millions. The commerce and industry of the world were paralyzed not only through the destruction or threat of destruction of merchant vessels by hostile warships and the closing of communications, but by the disarrangement of international finances. It was nothing less than a world catastrophe.

The immediate causes of the war are considered very fully in the diplomatic correspondence between the representatives of the powers involved. The letters, notes and telegrams exchanged and statements made by the ambassadors, ministers, premiers, rulers, high officials and other agents of Great Britain, Germany, Russia, Belgium, France and Servia are given in full hereinafter in order that they may be easily accessible to students of the great conflict. It will be seen that the assassination of Archduke Ferdinand, the crown prince of Austria-Hungary, and his wife by a Servian at Sarajevo June 28, 1914, was the event which led the dual monarchy to declare war on Servia. Russia came to the defense of Servia and this brought Germany into the conflict as the ally of Austria-Hungary. Russia and France were allies and hence Germany attacked both. Germany refused to respect the neutrality of Belgium and this drew Great Britain into the struggle. Japan as an ally of Great Britain seized the opportunity to attack Germany's colony of Kiaochow in China. Canada, India, Australia and other dominions and possessions of Britain came to the assistance of the mother country for obvious reasons. Later Turkey attacked Russia, for reasons which it did not proclaim, but which may be conjectured. Britain and France attacked Turkey in support of their ally, Russia. Montenegro entered the war as a Slav country closely connected with Servia and long at enmity with Austria-Hungary. These were the immediate reasons why one country after another became involved in the war, the precipitating cause of which concerned directly only Austria-Hungary and Servia.

But there were other deeper and more potent reasons why the great powers of the old world were plunged into war. There has been an endless amount of discussion as to these and no attempt will be made here to pass judgment upon them. Among the causes most frequently advanced are these:

1. Commercial and industrial rivalry, especially as developed between Germany and Great Britain.
2. International jealousy as to power and predominance in the world. This involved—
3. Excessive armaments entailing heavy burdens on the people and developing a spirit of—
4. Militarism and growth of military parties and military castes.
5. Conflict of Slav and Teuton races resulting from national aspirations for territorial expansion; racial antagonism.
6. Desire of certain rulers to put an end to internal strife by consolidating public opinion through the agency of a foreign war appealing to the patriotism of the people.
7. Desire to preserve the status quo in Europe by preserving the neutrality and independence of the smaller nations.
8. Revenge resulting from former conflicts, such as the war of 1870 between the German states and France and the more recent Balkan wars.
9. Conflict of national ideals or "cultures."
10. Conflict of democracy as opposed to autocracy and bureaucracy.
11. Personal ambitions of men high in position, authority and power.
12. Persistent talk of war by yellow journals and jingoists.
13. Publication of books, like those of Gen. von Bernhardi, declaring war to be a blessing, a necessity and a great factor in the furtherance of culture and power.
14. Formation of international alliances preventing the localizing of any conflict.

The following were among the claims made in justification of the attitude of the various nations involved in the war:

On behalf of Servia—That the growth and legitimate aspirations of the nation had always been hampered and to a great extent prevented by Austria-Hungary; that the dual monarchy had annexed Bosnia and Herzegovina, provinces inhabited chiefly by Slavs or races closely akin to the Serbs; that Austria-Hungary had taken a hostile attitude toward Servia and Montenegro in the late Balkan wars.

On behalf of Montenegro—That Austria-Hungary was chiefly responsible for compelling Montenegro to give up Scutari after its capture in April, 1913; that the dual monarchy had always been hostile to Montenegro.

On behalf of Austria-Hungary—That the Servians and Montenegrins were continually plotting against the dual monarchy with the object of separating the Slav provinces from it and destroying its power; that to carry out this purpose they formed secret organizations for the purpose of fomenting discord in Bosnia, Herzegovina and other provinces; that Servia aided and abetted the plot to assassinate Archduke Ferdinand and his wife.

On behalf of Russia—That Servia was under the protection of Russia, which was bound to defend the smaller nation in case it was attacked by Austria-Hungary; that as the main Slavic power it was its duty to come to the defense of Servia, a Slavic state; that Austria-Hungary and Germany had been hostile toward Russia and its political and industrial progress; that Germany had backed up Turkey in opposition to Russia.

On behalf of Germany—That Austria-Hungary's war against Servia was just; that as the ally of the dual monarchy it was bound to come to its defense when threatened by Russia; that Russia had mobilized and was ready to attack

not only Austria-Hungary, but Germany; that France had mobilized and as the ally of Russia was preparing to attack Germany; that France had prepared for years to make war on Germany in revenge for the defeat of 1870; that the violation of the neutrality of Belgium was a bitter military necessity; that Britain and France had themselves planned to violate the neutrality of Belgium in making war on Germany; that the triple entente had inclosed Germany in a "ring of iron" to prevent its expansion; that its colonization plans had been hampered; that it was a fight between German culture and Russian barbarism; that it was virtually a fight for the very existence of the German empire.

On behalf of Great Britain—That Great Britain was bound to defend the neutrality of Belgium as guaranteed by the powers of Europe; that it was important to sustain the balance of power in Europe by preserving the independence of the smaller nations such as Belgium, Holland, Switzerland and the Scandinavian kingdoms; that it was bound to assist France if attacked under such circumstances as actually occurred; that it was a fight against German military arrogance; that it was a case of British democracy as opposed to German autocracy; that it was a case of defending its own power and safety as a nation.

On behalf of Belgium—That its honor, integrity and dignity as a nation required it to defend its pledged neutrality and national independence to the last.

On behalf of Japan—That its alliance with Great Britain and the safety of its commerce as well as the preservation of peace in the far east compelled Japan to make war on Germany and take possession of Tsingtao and other places used by German commerce raiders.

On behalf of Turkey—That it had a right to take the opportunity to attack its old enemy, Russia, and try to recover some of the territory and prestige lost in the Balkan wars.

THE ASSASSINATION OF ARCHDUKE FERDINAND.

Archduke Francis Ferdinand of Austria and his wife, the duchess of Hohenberg, were shot and instantly killed by a student named Gavrilo Prinzip in Sarajevo, Bosnia, Sunday, June 28, 1914. The archduke, nephew of Emperor Francis Joseph and heir to the Austro-Hungarian throne, was making an official visit with his wife to the country which, with Herzegovina, was annexed to Austria-Hungary in October, 1908. He was accompanied by a large military suite and it was said that he wore a bullet-proof shirt of mail to protect him in case an attempt was made on his life. Other precautions were also taken, as it was realized that he was very unpopular among the Servians, who wished Bosnia to become a part of Servia. In Sarajevo, the capital of the annexed country, the feeling seemed to be especially bitter.

Two attempts to kill the heir-apparent and his wife were made. The first occurred when the royal couple were proceeding in an automobile to the town hall, where they were to be officially welcomed. A man named Nedeljo Gabrinovics, 21 years old, threw a bomb at the archduke's car, but the missile was warded off and did not explode until a second automobile, containing members of the archduke's suite, was passing over it. Col. Morizzi, aid de camp to the archduke, and Count Waldeck were injured by the flying fragments, the former so severely that he had to be taken to a hospital. Six persons among the spectators were also more or less seriously hurt. Gabrinovics sprang into the River Miljacka in an effort to escape, but witnesses of his deed captured him and turned him over to the police.

Following the explosion of the bomb the duch-

ess tried to dissuade the archduke from continuing to the town hall, but M. Potiorek, governor of Bosnia, allayed her fears and the visit was made. When the burgomaster began the customary address the archduke interrupted him and said angrily:

"Herr Burgomaster, it is perfectly scandalous. We have come to Sarajevo and a bomb is thrown at us." Here he paused a moment and then said: "Now you can go on." The mayor delivered his address and the archduke replied in suitable terms. After spending half an hour in making the rounds of the town hall the archduke and the duchess started in an automobile for the garrison hospital to visit Col. Morizzi. As the car reached the corner of Rudolf and Francis Joseph streets, Gavrilo Prinzip, who was on the sidewalk, drew a revolver and fired two shots at the royal couple. The first shot struck the duchess low down on the right side; the second bullet hit the archduke in the neck and pierced the jugular vein. The duchess became unconscious immediately and fell across the knees of her husband, who likewise became unconscious a few seconds after he was hit. Both died without uttering a word.

ARCHDUKE FRANCIS FERDINAND AND WIFE.

Prinzip was seized by the police before he could stir from the spot and hurried away to prevent the great crowd, which had gathered, from mobbing him. When questioned he said he was 18 years of age and had studied for a time in Belgrade, Servia. He declared that he had long intended to kill some eminent person for nationalist motives. He denied that he knew Gabrinovics and said that the first attempt to kill the archduke by means of a bomb was a surprise to him. The authorities were convinced that the assassination was the result of a carefully laid plot by persons who hated the archduke because he represented the nation which had defeated the national aspirations of the Serbs in Bosnia.

Oct. 26, Prinzip; Grabez, a student; Nedeljo, Gabrinovics and twenty-one others were found guilty of treason. Oct. 28 Prinzip was sentenced to imprisonment for twenty years. Four of the conspirators were sentenced to death by hanging, one to life imprisonment, two to twenty years, one to sixteen years, one to thirteen years, two to ten years, one to seven years and two to three years.

Francis Ferdinand was born Dec. 18, 1863. His father, the Archduke Carl Ludwig, was a brother of Emperor Francis Joseph, and his mother was Maria Annunziata, daughter of Ferdinand II. of Naples. Francis Ferdinand became heir-apparent when Crown Prince Rudolph, the only son of Francis Joseph, met a tragic death in 1889. July 1, 1900, he entered into a morganatic marriage with Sophie, duchess of Hohenberg, born Countess Chotek, renouncing on her behalf and their future heirs all claims to the throne of Austria-Hungary. The duchess was born in Stuttgart, March 1, 1868. They left three children, Sophie, Maximilian and Ernest.

By the death of Francis Ferdinand the Archduke Charles Francis Joseph, born Aug. 17, 1887, son of Archduke Otto, younger brother of Francis Ferdinand, became heir-apparent to the throne of Austria-Hungary.

INTERNATIONAL COMBINATIONS.

THE TRIPLE ALLIANCE.

The nations in the triple alliance at the beginning of the war were Germany, Austria-Hungary and Italy. Prior to its formation in 1884, Bismarck had brought about an alliance between Germany and Austria for the purpose of making a joint defense in case of either being attacked by Russia. In 1881 Tunis was occupied by France, and Italy, feeling itself isolated and threatened by this move, entered the Austro-German compact, which thus became a triple alliance. The terms of the treaty have never been officially published, but it has been well understood that the signatory powers agreed to defend the integrity of their continental possessions from attack by any other power. The alliance has been renewed or extended from time to time and it was reported, though not officially confirmed, that it was renewed in 1912 for a period of twelve years. In the meantime the relations of Italy with France had grown cordial and in 1902 the government in Rome assured the president of the republic that in no case could Italy become either the instrument or the auxiliary of an aggression against France. An understanding was reached as to all Mediterranean and African questions not only between Italy and France but between Italy and England. These good relations were maintained and it was felt in Germany and Austria-Hungary that so far as concerned Britain and France and their ally Russia, Italy's adherence to the alliance could not be relied upon. It was announced in Rome Aug. 1, 1914, that "Italy's obligations under the triple alliance applied only to a defensive war" and that therefore the country would remain neutral in the struggle begun by Austria-Hungary and Germany.

THE TRIPLE ENTENTE.

The nations in the triple entente are France, Russia and Great Britain. As the triple alliance at the start was a dual alliance, so the triple entente began with a dual compact between France and Russia, dating back to 1897. This had reference to mutual support in case of a war with Germany. Great Britain originally favored the triple alliance as against Russia, but the growth of better relations with France and of the feeling that Germany with its vast naval and military preparations for war was more dangerous to British supremacy than Russia led to a change of attitude. In 1904 an entente cordiale between Britain and France was brought about, and this was extended to include Russia, the understanding thus becoming a triple entente. The compact has been described more as in the nature of a "gentlemen's agreement" than as a formal alliance. It left the governments free to determine for themselves whether to take part in a war affecting one or the other parties to the agreement or to remain neutral.

BRITISH WHITE PAPER.

Issued by foreign office in London Aug. 5, 1914.

NO. 1. SIR EDWARD GREY TO SIR E. GOSCHEN.

London, Foreign Office, July 20, 1914.

Sir: I asked the German ambassador to-day if he had any news of what was going on in Vienna with regard to Servia.

He said that he had not, but Austria was certainly going to take some step, and he regarded the situation as very uncomfortable.

I said that I had not heard anything recently, except that Count Berchtold, in speaking to the Italian ambassador in Vienna, had deprecated the suggestion that the situation was grave, but had said that it should be cleared up.

The German ambassador said that it would be a very desirable thing if Russia could act as a mediator with regard to Servia.

I said that I assumed that the Austrian government would not do anything until they had first disclosed to the public their case against Servia, founded presumably upon what they had discovered at the trial.

The ambassador said that he certainly assumed that they would act upon some case that would be made known.

I said that this would make it easier for others, such as Russia, to counsel moderation in Belgrade. In fact, the more Austria could keep her demand within reasonable limits, and the stronger the justification she could produce for making any demand, the more chance there would be of smoothing things over. I hated the idea of a war between any of the great powers, and that any of them should be dragged into a war by Servia would be detestable.

The ambassador agreed wholeheartedly in this sentiment. I am, &c., E. GREY.

NO. 2. SIR E. GOSCHEN TO SIR EDWARD GREY.

(Received July 22.)

(Telegraphic.) Berlin, July 22, 1914.

Last night I met secretary of state for foreign affairs, and the forthcoming Austrian demarche at Belgrade was alluded to by his excellency in the conversation that ensued. His excellency was evidently of opinion that this step on Austria's part would have been made ere this. He insisted that question at issue was one for settlement between Servia and Austria alone, and that there should be no interference from outside in the discussions between those two countries. He had, therefore, considered it inadvisable that the Austro-Hungarian government should be approached by the German government on the matter. He had, however, on several occasions in conversation with the Servian minister emphasized the extreme importance that Austro-Servian relations should be put on a proper footing.

Finally, his excellency observed to me that for a long time past the attitude adopted toward Servia by Austria had, in his opinion, been one of great forbearance.

NO. 3. SIR EDWARD GREY TO SIR M. DE BUNSEN.

London, Foreign Office, July 23, 1914.

Sir: Count Mensdorff told me to-day that he would be able to-morrow morning to let me have officially the communication that he understood was being made to Servia to-day by Austria. He then explained privately what the nature of the demand would be. As he told me that the facts would all be set out in the paper that he would give me to-morrow, it is unnecessary to record them now. I gathered that they would include proof of the complicity of some Servian officials in the plot to murder the Archduke Franz Ferdinand, and a long list of demands consequently made by Austria on Servia.

As regards all this, I said that it was not a matter on which I would make any comment until I received an official communication, and it seemed to me probably a matter on which I should not be able to make any comment at first sight.

But, when Count Mensdorff told me that he supposed there would be something in the nature of a time limit, which was in effect akin to an ultimatum, I said that I regretted this very much. To begin with, a time limit might inflame opinion in Russia, and it would make it difficult, if not impossible, to give more time, even if after a few days it appeared that by giving more time there would be a prospect of securing a peaceful settlement and getting a satisfactory reply from Servia. I admitted that if there was no time limit the proceedings might be unduly protracted, but I urged that a time limit could always be introduced afterward; that, if the demands were made without a time limit in the first instance, Russian public opinion might be less excited, after a week it might have cooled down, and if the Austrian case was very strong it might be apparent that the Russian government would be in a position to use their influence in favor of a satisfactory reply from Servia. A time limit was generally a thing to be used only in the last resort, after other means had been tried and failed.

Count Mensdorff said that if Servia, in the interval that had elapsed since the murder of the archduke, had voluntarily instituted an inquiry on her own territory, all this might have been avoided. In 1909 Servia had said in a note that she intended to live on terms of good neighborlood with Austria; but she had never kept her promise; she had stirred up agitation the object of which was to disintegrate Austria, and it was absolutely necessary for Austria to protect herself.

I said that I would not comment upon or criticise what Count Mensdorff had told me this afternoon, but I could not help dwelling upon the awful consequences involved in the situation. Great apprehension had been expressed to me, not specially by M. Cambon and Count Benckendorff, but also by others, as to what might happen, and it had been represented to me that it would be very desirable that those who had influence in St. Petersburg should use it on be-

half of patience and moderation, I had replied that the amount of influence that could be used in this sense would depend upon how reasonable were the Austrian demands and how strong the justification that Austria might have discovered for making her demands. The possible consequences of the present situation were terrible. If as many as four great powers of Europe—let us say Austria, France, Russia and Germany—were engaged in war, it seemed to me that it must involve the expenditure of so vast a sum of money and such an interference with trade that a war would be accompanied or followed by a complete collapse of European credit and industry. In these days, in great industrial states, this would mean a state of things worse than that of 1848, and, irrespective of who were victors in the war, many things might be completely swept away.

Count Mensdorff did not demur to this statement of the possible consequences of the present situation, but he said that all would depend upon Russia.

I made the remark that in a time of difficulties such as this, it was just as true to say that it required two to keep the peace as it was to say, ordinarily, that it took two to make a quarrel. I hoped very much that if there were difficulties Austria and Russia would be able in the first instance to discuss them directly with each other.

Count Mensdorff said that he hoped this would be possible, but he was under the impression that the attitude in St. Petersburg had not been very favorable recently. I am, &c., E. GREY.

NO. 4. COUNT BERCHTOLD TO COUNT MENSDORFF. (Communciated by Count Mensdorff, Vienna, July 24, 1914—Translation.)

The Austro-Hungarian government felt compelled to address the following note to the Servian government on the 23d July, through the medium of the Austro-Hungarian minister at Belgrade:

"On the 31st March, 1909, the Servian minister in Vienna, on the instructions of the Servian government, made the following declaration to the imperial and royal government:

"Servia recognizes that the fait accompli regarding Bosnia has not affected her rights, and consequently she will conform to the decisions that the powers may take in conformity with article 25 of the treaty of Berlin. In deference to the advice of the great powers Servia undertakes to renounce from now onward the attitude of protest and opposition which she has adopted with regard to the annexation since last autumn. She undertakes, moreover, to modify the direction of her policy with regard to Austria-Hungary and to live in future on good neighborly terms with the latter."

The history of recent years, and in particular the painful events of the 28th June last, have shown the existence of a subversive movement with the object of detaching a part of the territories of Austria-Hungary from the monarchy. The movement, which had its birth under the eye of the Servian government, has gone so far as to make itself manifest on both sides of the Servian frontier in the shape of acts of terrorism and a series of outrages and murders.

Far from carrying out the formal undertakings contained in the declaration of the 31st March, 1909, the royal Servian government has done nothing to repress these movements. It has permitted the criminal machinations of various societies and associations directed against the monarchy and has tolerated unrestrained language on the part of the press, the glorification of the perpetrators of outrages and the participation of officers and functionaries in subversive agitation. It has permitted an unwholesome propaganda in public instruction. In short, it has permitted all manifestations of a nature to incite the Servian population to hatred of the monarchy and contempt of its institutions.

This culpable tolerance of the royal Servian government had not ceased at the moment when the events of the 28th June last proved its fatal consequences to the whole world.

It results from the depositions and confessions of the criminal perpetrators of the outrage of the 28th June that the Serajevo assassinations were planned in Belgrade, that the arms and explosives with which the murderers were provided had been given to them by Servian officers and functionaries belonging to the Narodna Odbrana, and, finally, that the passage into Bosnia of the criminals and their arms was organized and effected by the chiefs of the Servian frontier service.

The above-mentioned results of the magisterial investigation do not permit the Austro-Hungarian government to pursue any longer the attitude of expectant forbearance which it has maintained for years in face of the machinations hatched in Belgrade, and thence propagated in the territories of the monarchy. The results, on the contrary, impose on it the duty of putting an end to the intrigues which form a perpetual menace to the tranquillity of the monarchy.

To achieve this end the imperial and royal government sees itself compelled to demand from the royal Servian government a formal assurance that it condemns this dangerous propaganda against the monarchy; in other words, the whole series of tendencies, the ultimate aim of which is to detach from the monarchy territories belonging to it, and that it undertakes to suppress by every means this criminal and terrorist propaganda.

In order to give a formal character to this undertaking the royal Servian government shall publish on the front page of its official journal of the 26th June (13th July) the following declaration:

"The royal government of Servia condemns the propaganda directed against Austria-Hungary—i. e., the general tendency of which the final aim is to detach from the Austro-Hungarian monarchy territories belonging to it, and it sincerely deplores the fatal consequences of these criminal proceedings.

"The royal government regrets that Servian officers and functionaries participated in the above mentioned propaganda and thus compromised the good neighborly relations to which the royal government was solemnly pledged by its declaration of the 31st March, 1909.

"The royal government, which disapproves and repudiates all idea of interfering or attempting to interfere with the destinies of the inhabitants of any part whatsoever of Austria-Hungary, considers it its duty formally to warn officers and functionaries, and the whole population of the kingdom, that henceforward it will proceed with the utmost rigor against persons who may be guilty of such machinations, which it will use all its efforts to anticipate and suppress."

This declaration shall simultaneously be communicated to the royal army as an order of the day by his majesty the king and shall be published in the official bulletin of the army.

The royal Servian government further undertakes:

1. To suppress any publication which incites to hatred and contempt of the Austro-Hungarian monarchy and the general tendency of which is directed against its territorial integrity;

2. To dissolve immediately the society styled Narodna Odbrana, to confiscate all its means of propaganda, and to proceed in the same manner against other societies and their branches in Servia which engage in propaganda against the Austro-Hungarian monarchy. The royal government shall take the necessary measures to prevent the societies dissolved from continuing their activity under another name and form;

3. To eliminate without delay from public instruction in Servia, both as regards the teaching body and also as regards the methods of instruction, everything that serves, or might serve, to foment the propaganda against Austria-Hungary;

4. To remove from the military service, and from the administration in general, all officers and functionaries guilty of propaganda against the Austro-Hungarian monarchy whose names and deeds the Austro-Hungarian government reserves to itself the right of communicating to the royal government;

5. To accept the collaboration in Servia of representatives of the Austro-Hungarian government in the suppression of the subversive movement

directed against the territoria integrity of the monarchy;

6. To take judicial proceedings against accessories to the plot of the 28th June who are on Servian territory. Delegates of the Austro-Hungarian government will take part in the investigation relating thereto;

7. To proceed without delay to the arrest of Major Voija Tankositch and of the individual named Milan Ciganovitch, a Servian state employe, who have been compromised by the results of the magisterial inquiry at Serajevo;

8. To prevent by effective measures the cooperation of the Servian authorities in the illicit traffic in arms and explosives across the frontier, to dismiss and punish severely the officials of the frontier service at Schabatz and Loznica guilty of having assisted the perpetrators of the Serajevo crime by facilitating their passage across the frontier;

9. To furnish the imperial and royal government with explanations regarding the unjustifiable utterances of high Servian officials, both in Servia and abroad, who, notwithstanding their official position, did not hesitate after the crime of the 28th June to express themselves in interviews in terms of hostility to the Austro-Hungarian government; and, finally,

10. To notify the imperial and royal government without delay of the execution of the measures comprised under the preceding heads.

The Austro-Hungarian government expects the reply of the royal government at the latest by 6 o'clock on Saturday evening, the 25th July.

A memorandum dealing with the results of the magisterial inquiry at Serajevo with regard to the officials mentioned under heads (7) and (8) is attached to this note.

I have the honor to request your excellency to bring the contents of this note to the knowledge of the government to which you are accredited, accompanying your communication with the following observations:

On the 31st March, 1909, the royal Servian government addressed to Austria-Hungary the declaration of which the text is reproduced above.

On the very day after this declaration Servia embarked on a policy of instilling revolutionary ideas into the Serb subjects of the Austro-Hungarian monarchy, and so preparing the separation of the Austro-Hungarian territory on the Servian frontier.

Servia became the centre of a criminal agitation.

No time was lost in the formation of societies and groups, whose object, either avowed or secret, was the creation of disorders on Austro-Hungarian territory. These societies and groups count among their members generals and diplomatists, government officials and judges—in short, men at the top of official and unofficial society in the kingdom.

Servian journalism is almost entirely at the service of this propaganda, which is directed against Austria-Hungary, and not a day passes without the organs of the Servian press stirring up their readers to hatred or contempt for the neighboring monarchy, or to outrages directed more or less openly against its security and integrity.

A large number of agents are employed in carrying on by every means the agitation against Austria-Hungary and corrupting the youth in the frontier provinces.

Since the recent Balkan crisis there has been a recrudescence of the spirit of conspiracy inherent in Servian politicians, which has left such sanguinary imprints on the history of the kingdom. Individuals belonging formerly to bands employed in Macedonia have come to place themselves at the disposal of the terrorist propaganda against Austria-Hungary.

In the presence of these doings, to which Austria-Hungary has been exposed for years, the Servian government has not thought it incumbent on it to take the slightest step. The Servian government has thus failed in the duty imposed on it by the solemn declaration of the 31st March, 1909, and acted in opposition to the will of Europe and the undertaking given to Austria-Hungary.

The patience of the imperial and royal government in the face of the provocative attitude of Servia was inspired by the territorial disinterestedness of the Austro-Hungarian monarchy and the hope that the Servian government would end in spite of everything by appreciating Austria-Hungary's friendship at its true value. By observing a benevolent attitude toward the political interests of Servia, the imperial and royal government hoped that the kingdom would finally decide to follow an analogous line of conduct on its own side. In particular Austria-Hungary expected a development of this kind in the political ideas of Servia, when, after the events of 1912, the imperial and royal government, by its disinterested and ungrudging attitude, made such a considerable aggrandizement of Servia possible.

The benevolence which Austria-Hungary showed toward the neighboring state had no restraining effect on the proceedings of the kingdom, which continued to tolerate on its territory a propaganda of which the fatal consequences were demonstrated to the whole world on the 28th June last, when the heir presumptive to the monarchy and his illustrious consort fell victims to a plot hatched at Belgrade.

In the presence of this state of things the imperial and royal government has felt compelled to take new and urgent steps at Belgrade with a view to inducing the Servian government to stop the incendiary movement that is threatening the security and integrity of the Austro-Hungarian monarchy.

The imperial and royal government is convinced that in taking this step it will find itself in full agreement with the sentiments of all civilized nations, who cannot permit regicide to become a weapon that can be employed with impunity in political strife and the peace of Europe to be continually disturbed by movements emanating from Belgrade.

In support of the above the imperial and royal government holds at the disposal of the British government a dossier elucidating the Servian intrigues and the connection between these intrigues and the murder of the 28th June.

An identical communication has been addressed to the imperial and royal representatives accredited to the other signatory powers.

You are authorized to leave a copy of this dispatch in the hands of the minister for foreign affairs.

Vienna, July 24, 1914.

ANNEX.

The criminal inquiry opened by the court of Serajevo against Gavrilo Princip and his accessories in and before the act of assassinatfon committed by them on the 28th June last, has up to the present led to the following conclusions:

1. The plot, having as its object the assassination of the Archduke Francis Ferdinand at the time of his visit to Serajevo, was formed at Belgrade by Gavrilo Princip, Nedeljko Cabrinovic, one Milan Ciganovic, and Trifko Grabez, with the assistance of Commander Voija Tankosic.

2. The six bombs and the four Browning pistols and ammunition with which the guilty parties committed the act were delivered to Princip, Cabrinovic, and Grabez, by the man Milan Ciganovic and Commander Voija Tankosic at Belgrade.

3. The bombs are hand-grenades, coming from the arms depot of the Servian army at Kragujevac.

4. In order to insure the success of the act, Ciganovic taught Princip, Cabrinovic, and Grabez how to use the bombs, and gave lessons in firing Browning pistols to Princip and Grabez in a forest near the shooting ground at Topschider.

5. To enable Princip, Cabrinovic, and Grabez to cross the frontier of Bosnia-Herzegovina and smuggle in their contraband of arms secretly, a secret system of transport was organized by Ciganovic.

By this arrangement the introduction into Bosnia-Herzegovina of criminals and their arms was effected by the officials controlling the frontiers at Chabac (Rade Popovic) and Loznica, as well as by the customs officer Rudivoj Grebic of Loznica, with the assistance of various individuals.

NO. 5. SIR EDWARD GREY TO SIR M. DE BUNSEN. (Telegraphic.)

London, Foreign Office, July 24, 1914.

Note addressed to Servia, together with an explanation of the reasons leading up to it, has been communicated to me by Count Mensdorff.

In the ensuing conversation with his excellency I remarked that it seemed to me a matter for great regret that a time limit, and such a short one at that, had been insisted upon at this stage of the proceedings. The murder of the archduke and some of the circumstances respecting Servia quoted in the note aroused sympathy with Austria, as was but natural, but at the same time I had never before seen one state address to another independent state a document of so formidable a character. Demand No. 5 would be hardly consistent with the maintenance of Servia's independent sovereignty if it were to mean, as it seemed that it might, that Austria-Hungary was to be invested with a right to appoint officials who would have authority within the frontiers of Servia.

I added that I felt great apprehension, and that I should concern myself with the matter simply and solely from the point of view of the peace of Europe. The merits of the dispute between Austria and Servia were not the concern of his majesty's government, and such comments as I had made above were not made in order to discuss those merits.

I ended by saying that doubtless we should enter into an exchange of views with other powers, and that I must await their views as to what could be done to mitigate the difficulties of the situation.

Count Mensdorff replied that the present situation might never have arisen if Servia had held out a hand after the murder of the archduke; Servia had, however, shown no sign of sympathy or help, though some weeks had already elapsed since the murder; a time limit, said his excellency, was essential, owing to the procrastination on Servia's part.

I said that if Servia had procrastinated in replying a time limit could have been introduced later; but, as things now stood, the terms of the Servian reply had been dictated by Austria, who had not been content to limit herself to a demand for a reply within a limit of forty-eight hours from its presentation.

NO. 6. SIR G. BUCHANAN TO SIR EDWARD GREY. (Received July 24.)

(Telegraphic.) St. Petersburg, July 24, 1914.

I had a telephone message this morning from M. Sazonof to the effect that the text of the Austrian ultimatum had just reached him.

His excellency added that a reply within forty-eight hours was demanded, and he begged me to meet him at the French embassy to discuss matters, as Austrian step clearly meant that war was imminent.

Minister for foreign affairs said that Austria's conduct was both provocative and immoral; she would never have taken such action unless Germany had first been consulted; some of her demands were quite impossible of acceptance. He hoped that his majesty's government would not fail to proclaim their solidarity with Russia and France.

The French ambassador gave me to understand that France would fulfill all the obligations entailed by her alliance with Russia, if necessity arose, besides supporting Russia strongly in any diplomatic negotiations.

I said that I would telegraph a full report to you of what their excellencies had just said to me. I could not, of course, speak in the name of his majesty's government, but personally I saw no reason to expect any declaration of solidarity from his majesty's government that would entail an unconditional engagement on their part to support Russia and France by force of arms. Direct British interests in Servia were nil, and a war on behalf of that country would never be sanctioned by British public opinion. To this M. Sazonof replied that we must not forget that the general European question was involved, the Servian question being but a part of the former, and that Great Britain could not afford to efface herself from the problems now at issue.

In reply to these remarks I observed that I gathered from what he said that his excellency was suggesting that Great Britain should join in making a communication to Austria to the effect that active intervention by her in the internal affairs of Servia could not be tolerated. But, supposing Austria nevertheless proceeded to embark on military measures against Servia in spite of our representations, was it the intention of the Russian government forthwith to declare war on Austria?

M. Sazonof said that he himself thought that Russian mobilization would at any rate have to be carried out; but a council of ministers was being held this afternoon to consider the whole question. A further council would be held, probably to-morrow, at which the emperor would preside, when a decision would be come to.

I said that it seemed to me that the important point was to induce Austria to extend the time limit, and that the first thing to do was to bring an influence to bear on Austria with that end in view; French ambassador, however, thought that either Austria had made up her mind to act at once or that she was bluffing. Whichever it might be, our only chance of averting war was for us to adopt a firm and united attitude. He did not think there was time to carry out my suggestion. Thereupon I said that it seemed to me desirable that we should know just how far Servia was prepared to go to meet the demands formulated by Austria in her note. M. Sazonof replied that he must first consult his colleagues on this point, but that doubtless some of the Austrian demands could be accepted by Servia.

French ambassador and M. Sazonof both continued to press me for a declaration of complete solidarity of his majesty's government with French and Russian governments, and I therefore said that it seemed to me possible that you might perhaps be willing to make strong representations to both German and Austrian governments, urging upon them that an attack upon Servia by Austria would endanger the whole peace of Europe. Perhaps you might see your way to saying to them that such action on the part of Austria would probably mean Russian intervention, which would involve France and Germany, and that it would be difficult for Great Britain to keep out if the war were to become general. M. Sazonof answered that we would sooner or later be dragged into war, if it did break out; we should have rendered war more likely if we did not from the outset make common cause with his country and with France; at any rate, he hoped his majesty's government would express strong reprobation of action taken by Austria.

President of French republic and president of the council cannot reach France, on their return from Russia, for four or five days, and it looks as though Austria purposely chose this moment to present their ultimatum.

It seems to me, from the language held by French ambassador, that, even if we decline to join them, France and Russia are determined to make a strong stand.

NO. 7. SIR M. DE BUNSEN TO SIR EDWARD GREY. (Received July 24.)

(Telegraphic.) Vienna, July 24, 1914.

Before departing on leave of absence, I was assured by Russian ambassador that any action taken by Austria to humiliate Servia could not leave Russia indifferent.

Russian charge d'affaires was received this morning by minister for foreign affairs, and said to him, as his own personal view, that Austrian note was drawn up in a form rendering it impossible of acceptance as it stood, and that it was both unusual and peremptory in its terms. Minister for foreign affairs replied that Austrian minister was under instructions to leave Belgrade unless Austrian demands were accepted integrally by 4 p. m. tomorrow. His excellency added that dual monarchy felt that its very existence was at stake; and that the step taken had caused great satisfaction throughout the country. He did not think that objections to what had been done could be raised by any power.

NO. 8. MR. CRACKANTHORPE TO SIR EDWARD GREY.
(Received July 24.)

(Telegraphic.) Belgrade, July 24, 1914.

Austrian demands are considered absolutely unacceptable by Servian government, who earnestly trust that his majesty's government may see their way to induce Austrian government to moderate them.

This request was conveyed to me by Servian prime minister, who returned early this morning to Belgrade. His excellency is dejected, and is clearly very anxious as to developments that may arise.

NO. 9. NOTE COMMUNICATED BY GERMAN AMBASSADOR.

London, July 24, 1914.

The publications of the Austro-Hungarian government concerning the circumstances under which the assassination of the Austrian heir presumptive and his consort has taken place disclose unmistakably the aims which the Great Servian propaganda has set itself, and the means it employs to realize them. The facts now made known must also do away with the last doubts that the centre of activity of all those tendencies which are directed toward the detachment of the southern Slav provinces from the Austro-Hungarian monarchy and their incorporation into the Servian kingdom is to be found in Belgrade, and is at work there with at least the connivance of members of government and army.

The Servian intrigues have been going on for many years. In an especially marked form the Great Servian chauvinism manifested itself during the Bosnian crisis. It was only owing to the far-reaching self-restraint and moderation of the Austro-Hungarian government and to the energetic interference of the great powers that the Servian provocations to which Austria-Hungary was then exposed did not lead to a conflict. The assurance of good conduct in future which was given by the Servian government at that time has not been kept. Under the eyes, at least with the tacit permission of official Servia, the Great Servian propaganda has continuously increased in extension and intensity; to its account must be set the recent crime, the threads of which lead to Belgrade. It has become clearly evident that it would not be consistent either with the dignity or with the self-preservation of the Austro-Hungarian monarchy still longer to remain inactive in face of this movement on the other side of the frontier, by which the security and the integrity of her territories are constantly menaced. Under these circumstances the course of procedure and demands of the Austro-Hungarian government can only be regarded as equitable and moderate. In spite of that, the attitude which public opinion as well as the government in Servia has recently adopted does not exclude the apprehension that the Servian government might refuse to comply with those demands, and might allow themselves to be carried away into a provocative attitude against Austria-Hungary. The Austro-Hungarian government, if it does not wish definitely to abandon Austria's position as a great power, would then have no choice but to obtain the fulfillment of their demands from the Servian government by strong pressure and, if necessary, by using military measures, the choice of the means having to be left to them.

The imperial government want to emphasize their opinion that in the present case there is only question of a matter to be settled exclusively between Austria-Hungary and Servia, and that the great powers ought seriously to endeavor to reserve it to those two immediately concerned. The imperial government desire urgently the localization of the conflict, because every interference of another power would, owing to the different treaty obligations, be followed by incalculable consequences.

NO. 10. SIR EDWARD GREY TO SIR F. BERTIE.

London, Foreign Office, July 24, 1914.

Sir: After telling M. Cambon to-day of the Austrian communication to Servia which I had received this morning, and of the comment I had made to Count Mensdorff upon it yesterday, I told M. Cambon that this afternoon I was to see the German ambassador, who some days ago had asked me privately to exercise moderating influence in St. Petersburg. I would say to the ambassador that, of course, if the presentation of this ultimatum to Servia did not lead to trouble between Austria and Russia, we need not concern ourselves about it; but if Russia took the view of the Austrian ultimatum, which it seemed to me that any power interested in Servia would take, I should be quite powerless, in face of the terms of the ultimatum, to exercise any moderating influence. I would say that I thought the only chance of any mediating or moderating influence being exercised was that Germany, France, Italy and ourselves, who had not direct interests in Servia, should act together for the sake of peace, simultaneously in Vienna and St. Petersburg.

M. Cambon said that, if there was a chance of mediation by the four powers, he had no doubt that his government would be glad to join in it; but he pointed out that we could not say anything in St. Petersburg till Russia had expressed some opinion or taken some action. But, when two days were over, Austria would march into Servia, for the Servians could not possibly accept the Austrian demand. Russia would be compelled by her public opinion to take action as soon as Austria attacked Servia, and therefore, once the Austrians had attacked Servia, it would be too late for any mediation.

I said that I had not contemplated anything being said in St. Petersburg until after it was clear that there must be trouble between Austria and Russia. I had thought that if Austria did move into Servia, and Russia then mobilized, it would be possible for the four powers to urge Austria to stop her advance, and Russia also to stop hers, pending mediation. But it would be essential for any chance of success for such a step that Germany should participate in it.

M. Cambon said that it would be too late after Austria had once moved against Servia. The important thing was to gain time by mediation in Vienna. The best chance of this being accepted would be that Germany should propose it to the other powers.

I said that by this he meant a mediation between Austria and Servia.

He replied that it was so.

I said that I would talk to the German ambassador this afternoon on the subject.

I am, &c., E. GREY.

NO. 11. SIR EDWARD GREY TO SIR H. RUMBOLD.
(Telegraphic.)

London, Foreign Office, July 24, 1914.

German ambassador has communicated to me the view of the German government about the Austrian demand in Servia. I understand the German government is making the same communication to the powers.

I said that if the Austrian ultimatum to Servia did not lead to trouble between Austria and Russia, I had no concern with it; I had heard nothing yet from St. Petersburg, but I was very apprehensive of the view Russia would take of the situation. I reminded the German ambassador that some days ago he had expressed a personal hope that if need arose I would endeavor to exercise moderating influence at St. Petersburg, but now I said that, in view of the extraordinarily stiff character of the Austrian note, the shortness of the time allowed, and the wide scope of the demands upon Servia, I felt quite helpless as far as Russia was concerned, and I did not believe any power could exercise influence alone.

The only chance I could see of mediating or moderating influence being effective, was that the four powers, Germany, Italy, France, and ourselves, should work together simultaneously at Vienna and St. Petersburg in favor of moderation in the event of the relations between Austria and Russia becoming threatening.

The immediate danger was that in a few hours Austria might march into Servia and Russian Slav opinion demand that Russia should march to help Servia; it would be very desirable to get Austria not to precipitate military action and so to gain more time. But none of us could influence Austria in this direction unless Germany would propose and participate in such action at Vienna. You should inform secretary of state.

Prince Lichnowsky said that Austria might be expected to move when the time limit expired unless Servia could give unconditional acceptance of Austrian demands in toto. Speaking privately, his excellency suggested that a negative reply must in no case be returned by Servia; a reply favorable on some points must be sent at once, so that an excuse against immediate action might be afforded to Austria.

NO. 12. SIR EDWARD GREY TO MR. CRACKANTHORPE.

(Telegraphic.)

London, Foreign Office, July 24, 1914.

Servia ought to promise that, if it is proved that Servian officials, however subordinate they may be, were accomplices in the murder of the archduke at Serajevo, she will give Austria the fullest satisfaction. She certainly ought to express concern and regret. For the rest, Servian government must reply to Austrian demands as they consider best in Servian interests.

It is impossible to say whether military action by Austria when time limit expires can be averted by anything but unconditional acceptance of her demands, but only chance appears to lie in avoiding an absolute refusal and replying favorably to as many points as the time limit allows.

Servian minister here has begged that his majesty's government will express their views, but I cannot undertake responsibility of saying more than I have said above, and I do not like to say even that without knowing what is being said at Belgrade by French and Russian governments. You should therefore consult your French and Russian colleagues as to repeating what my views are, as expressed above, to Servian government.

I have urged upon German ambassador that Austria should not precipitate military action.

NO. 13. NOTE COMMUNICATED BY RUSSIAN AMBASSADOR, JULY 25.

(Translation.)

M. Sazonof telegraphs to the Russian charge d'affaires at Vienna on the 11th (24th) July, 1914.

"The communication made by Austria-Hungary to the powers the day after the presentation of the ultimatum at Belgrade leaves a period to the powers which is quite insufficient to enable them to take any steps which might help to smooth away the difficulties that have arisen.

"In order to prevent the consequences, equally incalculable and fatal to all the powers, which may result from the course of action followed by the Austro-Hungarian government, it seems to us to be above all essential that the period allowed for the Servian reply should be extended. Austria-Hungary, having declared her readiness to inform the powers of the results of the inquiry upon which the imperial and royal government base their accusations, should equally allow them sufficient time to study them.

"In this case, if the powers were convinced that certain of the Austrian demands were well founded, they would be in a position to offer advice to the Servian government.

"A refusal to prolong the term of the ultimatum would render nugatory the proposals made by the Austro-Hungarian government to the powers, and would be in contradiction to the very bases of international relations.

"Prince Kudachef is instructed to communicate the above to the cabinet at Vienna.

"M. Sazanof hopes that his Britannic majesty's government will share to the point of view set forth above, and he trusts that Sir E. Grey will see his way to furnish similar instructions to the British ambassador at Vienna."

NO. 14. SIR EDWARD GREY TO F. BERTIE AND TO SIR G. BUCHANAN.

(Telegraphic.)

London, Foreign Office, July 25, 1914.

Austrian ambassador has been authorized to explain to me that the step taken at Belgrade was not an ultimatum, but a demarche with a time limit, and that if the Austrian demands were not complied with within the time limit the Austro-Hungarian government would break off diplomatic relations and begin military preparations, not operations.

In case Austro-Hungarian government have not given the same information at Paris, (St. Petersburg), you should inform minister for foreign affairs as soon as possible; it makes the immediate situation rather less acute.

NO. 15. SIR F. BERTIE TO SIR EDWARD GREY.

(Received July 25.)

(Telegraphic.) Paris, July 25, 1914.

I learn from the acting political director that the French government has not yet received the explanation from the Austrian government contained in your telegram to-day.* They have, however, through the Servian minister here, given similar advice to Servia as was contained in your telegram to Belgrade, of yesterday.†

NO. 16. SIR F. BERTIE TO SIR EDWARD GREY.

(Received July 25.)

(Telegraphic.) Paris, July 25, 1914.

Acting minister for foreign affairs has no suggestions to make except that moderating advice might be given at Vienna as well as at Belgrade. He hopes that the Servian government's answer to the Austrian ultimatum will be sufficiently favorable to obviate extreme measures being taken by the Austrian government. He says, however, that there would be a revolution in Servia if she were to accept the Austrian demands in their entirety.

NO. 17. SIR G. BUCHANAN TO SIR EDWARD GREY.

(Received July 25.)

(Telegraphic.) St. Petersourg, July 25, 1914.

I saw the minister for foreign affairs this morning, and communicated to his excellency the substance of your telegram of to-day to Paris,* and this afternoon I discussed with him the communication which the French ambassador suggested should be made to the Servian government, as recorded in your telegram of yesterday to Belgrade.†

The minister for foreign affairs said, as regards the former, that the explanations of the Austrian ambassador did not quite correspond with the information which had reached him from German quarters. As regards the latter, both his excellency and the French ambassador agreed that it is too late to make such a communication, as the time limit expires this evening.

The minister for foreign affairs said, that Servia was quite ready to do as you had suggested and to punish those proved to be guilty, but that no independent state could be expected to accept the political demands which had been put forward. The minister for foreign affairs thought, from a conversation which he had with the Servian minister yesterday, that, in the event of the Austrians attacking Servia, the Servian government would abandon Belgrade and withdraw their forces into the interior, while they would at the same time appeal to the powers to help them. His excellency was in favor of their making this appeal. He would like to see the question placed on an international footing, as the obligations taken by Servia in 1908, to which reference is made in the Austrian ultimatum, were given not to Austria, but to the powers.

If Servia should appeal to the powers, Russia would be quite ready to stand aside and leave the question in the hands of England, France, Germany and Italy. It was possible, in his opinion, that Servia might propose to submit the question to arbitration.

On my expressing the earnest hope that Russia would not precipitate war by mobilizing until you had had time to use your influence in favor of peace, his excellency assured me that Russia had no aggressive intentions, and she would take no action until it was forced on her. Austria's action was in reality directed against Russia. She aimed at overthrowing the present status quo in the Balkans and establishing her own hegemony there. He did not believe that Germany really wanted war, but her attitude was decided by ours. If we took our stand firmly with France and Russia there would be no war. If we failed them now rivers of blood would flow, and we would in the end be dragged into war.

I said that England could play the role of mediator at Berlin and Vienna to better purpose as friend, who, if her counsels of moderation were disregarded, might one day be converted

into an ally, than if she were to declare herself Russia's ally at once. His excellency said that unfortunately Germany was convinced that she could count upon our neutrality.

I said all I could to impress prudence on the minister for foreign affairs and warned him that if Russia mobilized Germany would not be content with mere mobilization or give Russia time to carry out hers, but would probably declare war at once. His excellency replied that Russia could not allow Austria to crush Servia and become the predominant power in the Balkans, and, if she feels secure of the support of France, she will face all the risks of war. He assured me once more that he did not wish to precipitate a conflict, but that unless Germany could restrain Austria I could regard the situation as desperate.

NO. 18. SIR H. RUMBOLD TO SIR EDWARD GREY.
(Received July 25.)

(Telegraphic.) Berlin, July 25, 1914.

Your telegram of the 24th July* acted on.

Secretary of state for foreign affairs says that on receipt of a telegram at 10 this morning from German ambassador at London, he immediately instructed German ambassador at Vienna to pass on to Austrian minister for foreign affairs your suggestion for an extension of time limit, and to speak to his excellency about it. Unfortunately it appeared from press that Count Berchtold is at Ischl, and secretary of state thought that in these circumstances there would be delay and difficulty in getting time limit extended. Secretary of state said that he did not know what Austria-Hungary had ready on the spot, but he admitted quite freely that Austro-Hungarian government wished to give the Servians a lesson, and that they meant to take military action. He also admitted that Servian government could not swallow certain of the Austro-Hungarian demands.

Secretary of state said that a reassuring feature of situation was that Count Berchtold had sent for Russian representative at Vienna and had told him that Austria-Hungary had no intention of seizing Servian territory. This step should, in his opinion, exercise a calming influence at St. Petersburg. I asked whether it was not to be feared that, in taking military action against Servia, Austria would dangerously excite public opinion in Russia. He said he thought not. He remained of opinion that crisis could be localized. I said that telegrams from Russia in this morning's papers did not look very assuring, but he maintained his optimistic view with regard to Russia. He said that he had given the Russian government to understand and that last thing Germany wanted was a general war, and he would do all in his power to prevent such a calamity. If the relations between Austria and Russia became threatening, he was quite ready to fall in with your suggestion as to the four powers working in favor of moderation at Vienna and St. Petersburg.

Secretary of state confessed privately that he thought the note left much to be desired as a diplomatic document. He repeated very earnestly that, though he had been accused of knowing all about the contents of that note, he had, in fact, had no such knowledge.

NO. 19. SIR R. RODD TO SIR EDWARD GREY.
(Received July 25.)

(Telegraphic.) Rome, July 25, 1914.

I saw the secretary general this morning and found that he knew of the suggestion that France, Italy, Germany and ourselves should work at Vienna and St. Petersburg in favor of moderation, if the relations between Austria and Servia became menacing. In his opinion Austria will only be restrained by the unconditional acceptance by the Servian government of her note. There is reliable information that Austria intends to seize the Salonica railway.

NO. 20. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 25.)

(Telegraphic.) Vienna, July 25, 1914.

Language of press this morning leaves the impression that the surrender of Servia is neither expected nor really desired. It is officially announced that the Austrian minister is instructed to leave Belgrade with staff of legation failing unconditional acceptance of note at 6 p. m. today.

Minister for foreign affairs goes to Ischl today to communicate personally to the emperor Servian reply when it comes.

NO. 21. MR. CRACKANTHORPE TO SIR EDWARD GREY.
(Received July 25.)

(Telegraphic.) Belgrade, July 25, 1914.

The council of ministers is now drawing up their reply to the Austrian note. I am informed by the undersecretary of state for foreign affairs that it will be most conciliatory and will meet the Austrian demands in as large measure as is possible.

The following is a brief summary of the projected reply:

The Servian government consent to the publication of a declaration in the official gazette. The ten points are accepted with reservations. Servian government declare themselves ready to agree to a mixed commission of inquiry so long as the appointment of the commission can be shown to be in accordance with international usage. They consent to dismiss and prosecute those officers who can be clearly proved to be guilty, and they have already arrested the officer referred to in the Austrian note. They are prepared to suppress the Narodna Odbrana.

The Servian government consider that unless the Austrian government want war at any cost, they cannot but be content with the full satisfaction offered in the Servian reply.

NO. 22. MR. CRACKANTHORPE TO SIR EDWARD GREY.
(Received July 25.)

(Telegraphic). Belgrade, July 25, 1914.

I have seen the new French minister, who has just arrived from Constantinople, and my Russian colleague, and informed them of your views.

They have not yet received instructions from their governments, and in view of this and of the proposed conciliatory terms of the Servian reply, I have up to now abstained from offering advice to the Servian government.

I think it is highly probable that the Russian government have already urged the utmost moderation on the Servian government.

The government has left for Nisch, where the skupshtina will meet on Monday. I am leaving with my other colleagues, but the vice-consul is remaining in charge of the archives.

NO. 24. SIR EDWARD GREY TO SIR G. BUCHANAN.
(Telegraphic.)

London, Foreign Office, July 25, 1914.

You spoke quite rightly in very difficult circumstances as to the attitude of his majesty's government. I entirely approve what you said, as reported in your telegram of yesterday,* and I cannot promise more on behalf of the government.

I do not consider that public opinion here would or ought to sanction our going to war over a Servian quarrel. If, however, war does take place, the development of other issues may draw us into it, and I am therefore anxious to prevent it.

The sudden, brusque, and peremptory character of the Austrian demarche makes it almost inevitable that in a very short time both Russia and Austria will have mobilized against each other. In this event, the only chance of peace, in my opinion, is for the other four powers to join in asking the Austrian and Russian governments not to cross the frontier, and to give time for the four powers acting at Vienna and St. Petersburg to try and arrange matters. If Germany will adopt this view, I feel strongly that France and ourselves should act upon it. Italy would no doubt gladly co-operate.

No diplomatic intervention or mediation would be tolerated by either Russia or Austria unless it was clearly impartial and included the allies or friends of both. The co-operation of Germany would, therefore, be essential.

*See No. 6.

NO. 25. SIR EDWARD GREY TO SIR H. RUMBOLD.

(Telegraphic.)

London, Foreign Office, July 25, 1914.

The Austrian ambassador has been authorized to inform me that the Austrian method of procedure on expiry of the time limit would be to break off diplomatic relations and commence military preparations, but not military operations. In informing the German ambassador of this, I said that it interposed a stage of mobilization before the frontier was actually crossed, which I had urged yesterday should be delayed.

Apparently we should now soon be face to face with the mobilization of Austria and Russia. The only chance of peace, if this did happen, would be for Germany, France, Russia and ourselves to keep together and to join in asking Austria and Russia not to cross the frontier till we had had time to try and arrange matters between them.

The German ambassador read me a telegram from the German foreign office saying that his government had not known beforehand, and had had no more than other powers to do with the stiff terms of the Austrian note to Servia, but that once she had launched that note, Austria could not draw back. Prince Lichnowsky said, however, that if what I contemplated was mediation between Austria and Russia, Austria might be able with dignity to accept it. He expressed himself as personally favorable to this suggestion.

I concurred in his observation, and said that I felt I had no title to intervene between Austria and Servia, but as soon as the question became one as between Austria and Russia, the peace of Europe was affected, in which we must all take a hand.

I impressed upon the ambassador that, in the event of Russian and Austrian mobilization, the participation of Germany would be essential to any diplomatic action for peace. Alone we could do nothing. The French government were traveling at the moment, and I had had no time to consult them, and could not, therefore, be sure of their views, but I was prepared, if the German government agreed with my suggestion, to tell the French government that I thought it the right thing to act upon it.

NO. 26. SIR EDWARD GREY TO SIR M. DE BUNSEN.

(Telegraphic.)

London, Foreign Office, July 25, 1914.

The Russian ambassador has communicated to me the following telegram, which his government have sent to the Russian ambassador at Vienna, with instructions to communicate it to the Austrian minister for foreign affairs:

"The delay given to Servia for a reply is so limited that the powers are prevented from taking any steps to avert the complications which are threatening. The Russian government trust that the Austrian government will prolong the time limit, and as the latter have declared their willingness to inform the powers of the data on which they have based their demands on Servia, the Russian government hope that these particulars will be furnished in order that the powers may examine the matter. If they found that some of the Austrian requests were well founded, they would be in a position to advise the Servian government accordingly. If the Austrian government were indisposed to prolong the time limit, not only would they be acting against international ethics, but they would deprive their communication to the powers of any practical meaning."

You may support in general terms the step taken by your Russian colleague.

Since the telegram to the Russian ambassador at Vienna was sent, it has been a relief to hear that the steps which the Austrian government were taking were to be limited for the moment to the rupture of relations and to military preparations, and not operations. I trust, therefore, that if the Austro-Hungarian government consider it too late to prolong the time limit, they will at any rate give time in the sense and for the reasons desired by Russia before taking any irretrievable steps.

I have communicated to German ambassador the forecast of the Servian reply contained in Mr. Crackanthorpe's telegram of to-day.* I have said that, if Servian reply, when received at Vienna, corresponds to this forecast, I hope the German government will feel able to influence the Austrian government to take a favorable view of it.

London, Foreign Office, July 25, 1914.

Sir:—The Italian ambassador came to see me today. I told him in general terms what I had said to the German ambassador this morning.

The Italian ambassador cordially approved of this. He made no secret of the fact that Italy was most desirous to see war avoided. I am, &c.,

NO. 30. SIR EDWARD GREY TO MR. CRACKANTHORPE.

London, Foreign Office, July 25, 1914.

Sir:—The Servian minister called on the 23d instant and spoke to Sir A. Nicolson on the present strained relations between Servia and Austria-Hungary.

He said that his government were most anxious and disquieted. They were perfectly ready to meet any reasonable demands of Austria-Hungary so long as such demands were kept on the "terrain juridique." If the results of the inquiry at Serajevo—an inquiry conducted with so much mystery and secrecy—disclosed the fact that there were any individuals conspiring or organizing plots on Servian territory, the Servian government would be quite ready to take the necessary steps to give satisfaction; but if Austria transported the question on to the political ground, and said that Servian policy, being inconvenient to her, must undergo a radical change, and that Servia must abandon certain political ideals, no independent state would, or could, submit to such dictation.

He mentioned that both the assassins of the archduke were Austrian subjects—Bosniaks; that one of them had been in Servia, and that the Servian authorities, considering him suspect and dangerous, had desired to expel him, but on applying to the Austrian authorities found that the latter protected him, and said that he was an innocent and harmless individual.

Sir A. Nicolson, on being asked by M. Boschkovitch his opinion on the whole question, observed that there were no data on which to base one, though it was to be hoped that the Servian government would endeavor to meet the Austrian demands in a conciliatory and moderate spirit. I am, &c., E. GREY.

Servian reply to the Austro-Hungarian demands is not considered satisfactory, and the Austro-Hungarian minister has left Belgrade. War is thought to be imminent.

NO. 32. SIR M. DE BUNSEN TO SIR EDWARD GREY

(Received July 26.)

(Telegraphic.) Vienna, July 26, 1914.

According to confident belief of German ambassador, Russia will keep quiet during chastisement of Servia, which Austro-Hungary is resolved to inflict, having received assurances that no Servian territory will be annexed by Austria Hungary. In reply to my question whether Russian government might not be compelled by public opinion to intervene on behalf of kindred nationality, he said that everything depended on the personality of the Russian minister for foreign affairs, who could resist easily, if he chose, the pressure of a few newspapers. He pointed out that the days of Pan-Slav agitation in Russia were over, and that Moscow was perfectly quiet. The Russian minister for foreign affairs would not, his excellency thought, be so imprudent as to take a step which would probably result in

many frontier questions in which Russia is interested, such as Swedish, Polish, Ruthene, Rumanian, and Persian questions, being brought into the melting pot. France, too, was not at all in a condition for facing a war.

I replied that matters had, I thought, been made a little difficult for other powers by the tone of Austro-Hungarian government's ultimatum to Servia. One naturally sympathizes with many of the requirements of the ultimatum, if only the manner of expressing them had been more temperate. It was, however, impossible, according to the German ambassador, to speak effectively in any other way to Servia. Servia was about to receive a lesson which she required; the quarrel, however, ought not to be extended in any way to foreign countries. He doubted Russia, who had no right to assume a protectorate over Servia, acting as if she made any such claim. As for Germany, she knew very well what she was about in backing up Austria-Hungary in this matter.

The German ambassador had heard of a letter addressed by you yesterday to the German ambassador in London in which you expressed the hope that the Servian concessions would be regarded as satisfactory. He asked whether I had been informed that a pretense of giving way at the last moment had been made by the Servian government. I had, I said, heard that on practically every point Servia had been willing to give in. His excellency replied that Servian concessions were all a sham. Servia proved that she well knew that they were insufficient to satisfy the legitimate demands of Austria-Hungary by the fact that before making her offer she had ordered mobilization and retirement of government from Belgrade.

Emperor returns suddenly tonight, and under secretary of state for foreign affairs says that foreign office regret this step, which was taken on his majesty's own initiative. They fear that his majesty's sudden return may cause speculation and excitement. Under secretary of state likewise told me that German ambassador at St. Petersburg had reported that, in conversation with Russian minister for foreign affairs, latter had said that if Austria annexed bits of Servian territory Russia would not remain indifferent. Under secretary of state drew conclusion that Russia would not act if Austria did not annex territory.

Would minister for foreign affairs be disposed to instruct ambassador here to join with representatives of France, Italy, and Germany, and myself, to meet here in conference immediately for the purpose of discovering an issue which would prevent complications? You should ask minister for foreign affairs whether he would do this. If so, when bringing the above suggestion to the notice of the governments to which they are accredited, representatives at Belgrade, Vienna, and St. Petersburg could be authorized to request that all active military operations should be suspended pending results of conference.

NO. 38. SIR R. RODD TO SIR EDWARD GREY.
(Received July 27.)

Rome, July 23, 1914.

Sir: I gather that the Italian government have been made cognizant of the terms of the communication which will be addressed to Servia. Secretary general, whom I saw this morning at the Italian foreign office, took the view that the gravity of the situation lay in the conviction of the Austro-Hungarian government that it was absolutely necessary for their prestige, after the many disillusions which the turn of events in the Balkans has occasioned, to score a definite success. I have, &c., RENNELL RODD.

NO. 39. REPLY OF SERVIAN GOVERNMENT TO AUSTRO-HUNGARIAN NOTE.

(Communicated by the Servian minister, July 27.)

The royal Servian government have received the communication of the imperial and royal government of the 10th instant, and are convinced that their reply will remove any misunderstanding which may threaten to impair the good neighborly relations between the Austro-Hungarian monarchy and the kingdom of Servia.

Conscious of the fact that the protests which were made both from the tribune of the national skupshtina and in the declarations and actions of the responsible representatives of the state—protests which were cut short by the declaration made by the Servian government on the 18th March, 1909—have not been renewed on any occasion as regards the great neighboring monarchy, and that no attempt has been made since that time, either by the successive royal governments or by their organs, to change the political and legal state of affairs created in Bosnia and Herzegovina, the royal government draw attention to the fact that in this connection the imperial and royal government have made no representation except one concerning a school book, and that on that occasion the imperial and royal government received an entirely satisfactory explanation. Servia has several times given proofs of her pacific and moderate policy during the Balkan crisis, and it is thanks to Servia and to the sacrifice that she has made in the exclusive interest of European peace that that peace has been preserved. The royal government cannot be held responsible for manifestations of a private character, such as articles in the press and the peaceable work of societies—manifestations which take place in nearly all countries in the ordinary course of events, and which as a general rule escape official control. The royal government are all the less responsible in view of the fact that at the time of the solution of a series of questions which arose between Servia and Austria-Hungary they gave proof of a great readiness to oblige, and thus succeeded in settling the majority of these questions to the advantage of the two neighboring countries.

For these reasons the royal government have been pained and surprised at the statements according to which members of the kingdom of Servia are supposed to have participated in the preparations for the crime committed at Sarajevo; the royal government expected to be invited to collaborate in an investigation of all that concerns this crime, and they were ready,

in order to prove the entire correctness of their attitude, to take measures against any persons concerning whom representations were made to them. Failing in, therefore, with the desire of the imperial and royal government, they are prepared to hand over for trial any Servian subject, without regard to his situation or rank, of whose complicity in the crime of Sarajevo proofs are forthcoming, and more especially they undertake to cause to be published on the first page of the "Journal officiel," on the date of the 13th (26th) July, the following declaration:

"The royal government of Servia condemn all propaganda which may be directed against Austria-Hungary, that is to say, all such tendencies as aim at ultimately detaching from the Austro-Hungarian monarchy territories which form part thereof, and they sincerely deplore the baneful consequences of these criminal movements. The royal government regret that, according to the communication from the imperial and royal government, certain Servian officers and officials should have taken part in the above-mentioned propaganda, and thus compromise the good neighborly relations to which the royal Servian government was solemnly engaged by the declaration of the 31st March, 1909, which declaration disapproves and repudiates all idea or attempt at interference with the destiny of the inhabitants of any part whatsoever of Austria-Hungary, and they consider it their duty formally to warn the officers, officials, and entire population of the kingdom that henceforth they will take the most rigorous steps against all such persons as are guilty of such acts, to prevent and to repress which they will use their utmost endeavor."

This declaration will be brought to the knowledge of the royal army in an order of the day, in the name of his majesty the king, by his royal highness the Crown Prince Alexander, and will be published in the next official army bulletin.

The royal government further undertake:

1. To introduce at the first regular convocation of the skupshtina a provision into the press law providing for the most severe punishment of incitement to hatred or contempt of the Austro-Hungarian monarchy, and for taking action against any publication the general tendency of which is directed against the territorial integrity of Austria-Hungary. The government engage at the approaching revision of the constitution to cause an amendment to be introduced into article 22 of the constitution of such a nature that such publication may be confiscated, a proceeding at present impossible under the categorical terms of article 22 of the constitution.

2. The government possess no proof, nor does the note of the imperial and royal government furnish them with any, that the "Narodna Odbrana" and other similar societies have committed up to the present any criminal act of this nature through the proceedings of any of their members. Nevertheless, the royal government will accept the demand of the imperial and royal government and will dissolve the "Narodna Odbrana" society and every other society which may be directing its efforts against Austria-Hungary.

3. The royal Servian government undertake to remove without delay from their public educational establishments in Servia all that serves or could serve to foment propaganda against Austria-Hungary, whenever the imperial and royal government furnish them with facts and proofs of this propaganda.

4. The royal government also agree to remove from military service all such persons as the judicial inquiry may have proved to be guilty of acts directed against the integrity of the territory of the Austro-Hungarian monarchy, and they expect the imperial and royal government to communicate to them at a later date the names and the acts of these officers and officials for the purposes of the proceedings which are to be taken against them.

5. The royal government must confess that they do not clearly grasp the meaning or the scope of the demand made by the imperial and royal government that Servia shall undertake to accept the collaboration of the organs of the imperial and royal government upon their territory, but they declare that they will admit such collaboration as agrees with the principle of international law, with criminal procedure, and with good neighborly relations.

6. It goes without saying that the royal government consider it their duty to open an inquiry against all such persons as are, or eventually may be, implicated in the plot of the 15th June, and who happen to be within the territory of the kingdom. As regards the participation in this inquiry of Austro-Hungarian agents or authorities appointed for this purpose by the imperial and royal government, the royal government cannot accept such an arrangement, as it would be a violation of the constitution and of the law of criminal procedure; nevertheless, in concrete cases communications as to the results of the investigation in question might be given to the Austro-Hungarian agents.

7. The royal government proceeded, on the very evening of the delivery of the note, to arrest Commandant Voislav Tankossitch. As regards Milan Ziganovitch, who is a subject of the Austro-Hungarian monarchy and who up to the 15th June was employed (on probation) by the directorate of railways, it has not yet been possible to arrest him.

The Austro-Hungarian government are requested to be so good as to supply as soon as possible, in the customary form, the presumptive evidence of guilt, as well as the eventual proofs of guilt which have been collected up to the present time, at the inquiry at Sarajevo, for the purposes of the latter inquiry.

8. The Servian government will reinforce and extend the measures which have been taken for preventing the illicit traffic of arms and explosives across the frontier. It goes without saying that they will immediately order an inquiry and will severely punish the frontier officials on the Schabatz-Loznitza line who have failed in their duty and allowed the authors of the crime of Sarajevo to pass.

9. The royal government will gladly give explanations of the remarks made by their officials, whether in Servia or abroad, in interviews after the crime, and which, according to the statement of the imperial and royal government, were hostile toward the monarchy, as soon as the imperial and royal government have communicated to them the passages in question in these remarks, and as soon as they have shown that the remarks were actually made by the said officials, although the royal government will itself take steps to collect evidence and proofs.

10. The royal government will inform the imperial and royal government of the execution of the measures comprised under the above heads, in so far as this has not already been done by the present note, as soon as each measure has been ordered and carried out.

If the imperial and royal government are not satisfied with this reply, the Servian government, considering that it is not to the common interest to precipitate the solution of this question, are ready, as always, to accept a pacific understanding, either by referring this question to the decision of the international tribunal of The Hague, or to the great powers which took part in the drawing up of the declaration made by the Servian government on the 18th (31st), March, 1909.

Belgrade, July 12 (25), 1914.

NO. 40. SIR M. DE BUNSEN TO SIR EDWARD GREY.

(Received July 27.)

(Telegraphic.) Vienna, July 26, 1914.

Russian ambassador just returned from leave thinks that Austro-Hungarian government are determined on war, and that it is impossible for Russia to remain indifferent. He does not propose to press for more time in the sense of your telegram of the 25th instant,* (last paragraph).

When the repetition of your telegram of the 26th instant to Paris† arrived I had the French

and Russian ambassadors both with me. They expressed great satisfaction with its contents, which I communicated to them. They doubted, however, whether the principle of Russia being an interested party entitled to have a say in the settlement of a purely Austro-Servian dispute would be accepted by either the Austro-Hungarian or the German government.

Instructions were also given to the Italian ambassador to support the request of the Russian government that the time limit should be postponed. They arrived, however, too late for any useful action to be taken.

NO. 41. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 27.)

(Telegraphic.) Vienna, July 27, 1914.

I have had conversations with all my colleagues representing the great powers. The impression left on my mind is that the Austro-Hungarian note was so drawn up as to make war inevitable; that the Austro-Hungarian government are fully resolved to have war with Servia; that they consider their position as a great power to be at stake, and that until punishment has been administered to Servia it is unlikely that they will listen to proposals of mediation. This country has gone wild with joy at the prospect of war with Servia, and its postponement or prevention would undoubtedly be a great disappointment.

I propose, subject to any special directions you desire to send me, to express to the Austrian minister for foreign affairs the hope of his majesty's government that it may yet be possible to avoid war, and to ask his excellency whether he cannot suggest a way out even now.

NO. 42. SIR F. BERTIE TO SIR EDWARD GREY.
(Received July 27.)

(Telegraphic.) Paris, July 27, 1914.

Your proposal as stated in your two telegrams of yesterday,* is accepted by the French government. French ambassador in London, who returns there this evening, has been instructed accordingly. Instructions have been sent to the French ambassador at Berlin to concert with his British colleague as to the advisability of their speaking jointly to the German government. Necessary instructions have also been sent to the French representatives at Belgrade, Vienna, and St. Petersburg, but until it is known that the Germans have spoken at Vienna with some success, it would, in the opinion of the ministry of foreign affairs, be dangerous for the French, Russian and British ambassadors to do so.

(Received July 27.)

(Telegraphic.) Berlin, July 27, 1914.

Your telegram of 26th July.*

Secretary of state says that conference you suggest would practically amount to a court of arbitration and could not, in his opinion, be called together except at the request of Austria and Russia. He could not, therefore, fall in with your suggestion, desirous though he was to cooperate for the maintenance of peace. I said I was sure that your idea had nothing to do with arbitration, but meant that representatives of the four nations not directly interested should discuss and suggest means for avoiding a dangerous situation. He maintained, however, that such a conference as you proposed was not practicable. He added that news he had just received from St. Petersburg showed that there was no intention on the part of M. de Sazonof to exchange views with Count Berchtold. He thought that this method of procedure might lead to a satisfactory result, and that it would be best, before doing anything else, to await outcome of the exchange of views between the Austrian and Russian governments.

In the course of a short conversation secretary of state said that as yet Austria was only partially mobilizing, but that if Russia mobilized against Germany latter would have to follow suit. I asked him what he meant by "mobilizing against Germany." He said that if Russia only mobilized in south, Germany would not mobilize, but if she mobilized in north, Germany would have to do so, too, and Russian system of mobilization was so complicated that it might be difficult exactly to locate her mobilization. Germany would therefore have to be very careful not to be taken by surprise.

Finally, secretary of state said that news from St. Petersburg had caused him to take more hopeful view of the general situation.

NO. 44. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 27.)

(Telegraphic.) St. Petersburg, July 27, 1914.

Austrian ambassador tried, in a long conversation which he had yesterday with the minister for foreign affairs, to explain away objectionable features of the recent action taken by the Austro-Hungarian government. Minister for foreign affairs pointed out that, although he perfectly understood Austria's motives, the ultimatum had been so drafted that it could not possibly be accepted as a whole by the Servian government. Although the demands were reasonable enough in some cases, others not only could not possibly be put into immediate execution, seeing that they entailed revision of existing Servian laws, but were, moreover, incompatible with Servia's dignity as an independent state. It would be useless for Russia to offer her good offices at Belgrade, in view of the fact that she was the object of such suspicion in Austria. In order, however, to put an end to the present tension, he thought that England and Italy might be willing to collaborate with Austria. The Austrian ambassador undertook to communicate his excellency's remarks to his government.

On the minister for foreign affairs questioning me, I told him that I had correctly defined the attitude of his majesty's government in my conversation with him, which I reported in my telegram of the 24th instant.* I added that you could not promise to do anything more, and that his excellency was mistaken if he believed that the cause of peace could be promoted by our telling the German government that they would have to deal with us as well as with Russia and France if she supported Austria by force of arms. Their attitude would merely be stiffened by such a menace, and we could only induce her to use her influence at Vienna to avert war by approaching her in the capacity of a friend who was anxious to preserve peace. His excellency must not, if our efforts were to be successful, do anything to precipitate a conflict. In these circumstances I trusted that the Russian government would defer the mobilization ukase for as long as possible and that troops would not be allowed to cross the frontier even when it was issued.

In reply the minister for foreign affairs told me that until the issue of the imperial ukase no effective steps toward mobilization could be taken, and the Austro-Hungarian government would profit by delay in order to complete her military preparations if it was deferred too long.

NO. 46. SIR EDWARD GREY TO SIR E. GOSCHEN.
(Telegraphic.)

London, Foreign Office, July 27, 1914.

German ambassador has informed me that German government accept in principle mediation between Austria and Russia by the four powers, reserving, of course, their right as an ally to help Austria if attacked. He has also been instructed to request me to use influence in St. Petersburg to localize the war and to keep up the peace of Europe.

I have replied that the Servian reply went further than could have been expected to meet the

Austrian demands. German secretary of state has himself said that there were some things in the Austrian note that Servia could hardly be expected to accept I assumed that Servian reply could not have gone as far as it did unless Russia had exercised conciliatory influence at Belgrade, and it was really at Vienna that moderating influence was now required. If Austria put the Servian reply aside as being worth nothing and marched into Servia, it meant that she was determined to crush Servia at all costs, being reckless of the consequences that might be involved. Servian reply should at least be treated as a basis for discussion and pause. I said German government should urge this at Vienna.

I recalled what German government had said as to the gravity of the situation if the war could not be localized, and observed that if Germany assisted Austria against Russia it would be because, without any reference to the merits of the dispute, Germany could not afford to see Austria crushed. Just so other issues might be raised that would supersede the dispute between Austria and Servia, and would bring other powers in, and the war would be the biggest ever known; but as long as Germany would work to keep the peace I would keep closely in touch. I repeated that after the Servian reply it was at Vienna that some moderation must be urged.

London, Foreign Office, July 27, 1914.

See my telegram of today to Sir E. Goschen.*

I have been told by the Russian ambassador that in German and Austrian circles impression prevails that in any event we would stand aside. His excellency deplored the effect that such an impression must produce.

This impression ought, as I have pointed out, to be dispelled by the orders we have given to the first fleet, which is concentrated, as it happens, at Portland, not to disperse for manœuvre leave. But I explained to the Russian ambassador that my reference to it must not be taken to mean that anything more than diplomatic action was promised.

We hear from German and Austrian sources that they believe Russia will take no action so long as Austria agrees not to take Servian territory. I pointed this out, and added that it would be absurd if we were to appear more Servian than the Russians in our dealings with the German and Austrian governments.

NO. 48. SIR EDWARD GREY TO SIR M. DE BUNSEN.

London, Foreign Office, July 27, 1914.

Sir: Count Mensdorff told me by instruction today that the Servian government had not accepted the demands which the Austrian government were obliged to address to them in order to secure permanently the most vital Austrian interests. Servia showed that she did not intend to abandon her subversive aims, tending toward continuous disorder in the Austrian frontier territories and their final disruption from the Austrian monarchy. Very reluctantly, and against their wish, the Austrian government were compelled to take more severe measures to enforce a fundamental change of the attitude of enmity pursued up to now by Servia. As the British government knew, the Austrian government had for many years endeavored to find a way to get on with their turbulent neighbor, though this had been made very difficult for them by the continuous provocations of Servia. The Serajevo murder had made clear to every one what appalling consequences the Servian propaganda had already produced, and what a permanent threat to Austria it involved. We would understand that the Austrian government must consider that the moment had arrived to obtain, by means of the strongest pressure, guarantees for the definite suppression of the Servian aspirations and for the security of peace and order on the southeastern frontier of Austria. As the peaceable means to this effect were exhausted, the Austrian government must at last appeal to force. They had not taken this decision without reluctance. Their action, which had no sort of aggressive tendency, could not be represented otherwise than as an act of self-defense. Also they thought that they would serve a European interest if they prevented Servia from being henceforth an element of general unrest, such as she had been for the last ten years. The high sense of justice of the British nation and of British statesmen could not blame the Austrian government if the latter defended by the sword what was theirs, and cleared up their position with a country whose hostile policy had forced upon them for years measures so costly as to have gravely injured Austrian national prosperity. Finally, the Austrian government, confiding in their amicable relations with us, felt that they could count on our sympathy in a fight that was forced on them, and on our assistance in localizing the fight, if necessary.

Count Mensdorff added on his own account that, as long as Servia was confronted with Turkey, Austria never took very severe measures because of her adherence to the policy of the free development of the Balkan states. Now that Servia had doubled her territory and population without any Austrian interference, the repression of Servian subversive aims was a matter of self-defense and self-preservation on Austria's part. He reiterated that Austria had no intention of taking Servian territory or aggressive designs against Servian territory.

I said that I could not understand the construction put by the Austrian government upon the Servian reply, and I told Count Mensdorff the substance of the conversation that I had had with the German ambassador this morning about that reply.

Count Mensdorff admitted that, on paper, the Servian reply might seem to be satisfactory; but the Servians had refused the one thing—the cooperation of Austrian officials and police—which would be a real guarantee that in practice the Servians would not carry on their subversive campaign against Austria.

I said it seemed to me as if the Austrian government believed that, even after the Servian reply, they could make war upon Servia anyhow, without risk of bringing Russia into the dispute. If they could make war on Servia and at the same time pacify Russia, well and good; but, if not, the consequences would be incalculable. I pointed out to him that I quoted this phrase from an expression of the views of the German government. I feared that it would be expected in St. Petersburg that the Servian reply would diminish the tension, and now, when Russia found that there was increased tension, the situation would become increasingly serious. Already the effect on Europe was one of anxiety. I pointed out that our fleet was to have dispersed today, but we had felt unable to let it disperse. We should not think of calling up reserves at this moment, and there was no menace in what we had done about our fleet; but, owing to the possibility of a European conflagration, it was impossible for us to disperse our forces at this moment. I gave this as an illustration of the anxiety that was felt. It seemed to me that the Servian reply already involved the greatest humiliation to Servia that I had ever seen a country undergo, and it was very disappointing to me that the reply was treated by the Austrian government as if it were as unsatisfactory as a blank negative. I am, &c.,

E. GREY.

NO. 49. SIR EDWARD GREY TO SIR R. RODD.

London, Foreign Office, July 27, 1914.

Sir: The Italian ambassador informed Sir A. Nicolson today that the Italian minister for foreign affairs agreed entirely with my proposal for a conference of four to be held in London.

As regards the question of asking Russia, Austria-Hungary, and Servia to suspend military operations pending the result of the conference, the Marquis di San Giuliano would recommend the suggestion warmly to the German government, and would inquire what procedure they would propose should be followed at Vienna.

NO. 50. SIR M. DE BUNSEN TO SIR EDWARD GREY.

(Received July 31.)

Vienna, July 28, 1914.

Sir: I have the honor to transmit to you here-

with the text of the Austro-Hungarian note announcing the declaration of war against Servia.
I have, &c., MAURICE DE BUNSEN.

Enclosure in No. 50.

Copy of note verbale, dated Vienna, July 28, 1914.
(Translation.)

In order to bring to an end the subversive intrigues originating from Belgrade and aimed at the territorial integrity of the Austro-Hungarian monarchy, the imperial and royal government has delivered to the royal Servian government a note in which a series of demands were formulated, for the acceptance of which a delay of forty-eight hours has been granted to the royal government. The royal Servian government not having answered this note in a satisfactory manner, the imperial and royal government are themselves compelled to see to the safeguarding of their rights and interests, and, with this object, to have recourse to force of arms.

Austria-Hungary, who had just addressed to Servia a formal declaration, in conformity with article 1 of the convention of the 18th October, 1907, relative to the opening of hostilities, considers herself henceforward in a state of war with Servia.

In bringing the above notice of his Britannic majesty's embassy, the ministry for foreign affairs has the honor to declare that Austria-Hungary will act during the hostilities in conformity with the terms of the conventions of The Hague of the 18th October, 1907, as also with those of the declaration of London of the 28th February, 1909, provided an analogous procedure is adopted by Servia.

The embassy is requested to be so good as to communicate the present notification as soon as possible to the British government.

NO. 51. SIR F. BERTIE TO SIR EDWARD GREY.
(Received July 28.)

Paris, July 27, 1914.

Sir: I have the honor to transmit to you herewith copy of a memorandum from the acting minister for foreign affairs as to the steps to be taken to prevent an outbreak of hostilities between Austria-Hungary and Servia.
I have, &c., FRANCIS BERTIE.

Enclosure in No. 51.

Note communicated to Sir F. Bertie by M. Bienvenu-Martin.
(Translation.)

In a note of the 25th of this month, his excellency the British ambassador informed the government of the republic that, in Sir E. Grey's opinion, the only possible way of assuring the maintenance of peace in case of the relations between Russia and Austria becoming more strained would be if the representatives of Great Britain, France, Germany, and Italy in Austria and Russia were to take joint action; and he expressed the wish to know if the government of the republic were disposed to welcome such a suggestion.

The minister for foreign affairs ad interim has the honor to inform his excellency Sir F. Bertie that he has requested M. Jules Cambon to concert with the British ambassador in Germany and to support any representation which they may consider it advisable to make to the Berlin cabinet.

In accordance with the desire expressed by the British government and conveyed to them by Sir F. Bertie in his note of the 26th of this month, the government of the republic have also authorized M. Paul Cambon to take part in the conference which Sir E. Grey has proposed with a view to discovering a means of settling the present difficulties.

The government of the republic is likewise ready to instruct the representatives at St. Petersburg, Vienna, and Belgrade to induce the Russian, Austrian, and Servian governments to abstain from all active military operations pending the results of this conference. He considers, however, that the chance of Sir E. Grey's proposal being successful depends essentially on the action which the Berlin government would be willing to take at Vienna. Representations made to the Austro-Hungarian government for the purpose of bringing about a suspension of military operations would seem bound to fail unless the German government do not beforehand exercise their influence on the Vienna cabinet.

The president of the council ad interim takes the opportunity, &c.

NO. 52. NOTE COMMUNICATED BY FRENCH EMBASSY.
JULY 28, 1914.
(Translation.)

The government of the republic accepts Sir Edward Grey's proposal in regard to intervention by Great Britain, France, Germany, and Italy, with a view to avoiding active military operations on the frontiers of Austria, Russia, and Servia; and they have authorized M. P. Cambon to take part in the deliberations of the four representatives at the meeting which is to be held in London.

The French ambassador in Berlin has received instructions to consult first the British ambassador in Berlin, and then to support the action taken by the latter in such manner and degree as may be considered appropriate.

M. Viviani is ready to send to the representatives of France in Vienna, St. Petersburg, and Belgrade instructions in the sense suggested by the British government.

NO. 53. M. SAZONOF TO COUNT BENCKENDORFF.
(Communicated by Count Benckendorff, July 28.)
(Translation.)

(Telegraphic.) St. Petersburg, July 27, 1914.

The British ambassador came to ascertain whether we think it desirable that Great Britain should take the initiative in convoking a conference in London of the representatives of England, France, Germany, and Italy to examine the possibility of a way out of the present situation.

I replied to the ambassador that I have begun conversations with the Austro-Hungarian ambassador under conditions which I hope may be favorable. I have not, however, received as yet any reply to the proposal made by me for revising the note between the two cabinets.

If direct explanations with the Vienna cabinet were to prove impossible, I am ready to accept the British proposal, or any other proposal of a kind that would bring about a favorable solution of the conflict.

I wish, however, to put an end from this day forth to a misunderstanding which might arise from the answer given by the French minister of justice to the German ambassador regarding counsels of moderation to be given to the imperial cabinet.

NO. 54. M. SAZONOF TO COUNT BENCKENDORFF.
(Communicated by Count Benckendorff, July 28, 1914.)
(Translation.)

(Telegraphic.) St. Petersburg, July 15 (28), 1914.

My interviews with the German ambassador confirm my impression that Germany is, if anything, in favor of the uncompromising attitude adopted by Austria.

The Berlin cabinet, who could have prevented the whole of this crisis developing, appear to be exerting no influence on their ally.

The ambassador considers that the Servian reply is insufficient.

This attitude of the German government is most alarming.

It seems to me that England is in a better position than any other power to make another attempt to Berlin to induce the German government to take the necessary action. There is no doubt that the key of the situation is to be found at Berlin.

NO. 55. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) St. Petersburg, July 27, 1914.

With reference to my telegram of yesterday,* I saw the minister of foreign affairs this afternoon and found him very conciliatory and more optimistic.

He would, he said, use all his influence at Belgrade to induce the Servian government to go as far as possible in giving satisfaction to Austria, but her territorial integrity must be guaranteed

and her rights as a sovereign state respected, so that she should not become Austria's vassal. He did not know whether Austria would accept friendly exchange of views which he had proposed, but, if she did, he wished to keep in close contact with the other powers throughout the conversations that would ensue.

He again referred to the fact that the obligations undertaken by Servia in 1908, alluded to in the Austrian ultimatum, were given to the powers.

I asked if he had heard of your proposal with regard to conference of the four powers, and on his replying in the affirmative, I told him confidentially of your instructions to me, and inquired whether instead of such a conference he would prefer a direct exchange of views, which he had proposed. The German ambassador, to whom I had just spoken, had expressed his personal opinion that a direct exchange of views would be more agreeable to Austria-Hungary.

His excellency said he was perfectly ready to stand aside if the powers accepted the proposal for a conference, but he trusted that you would keep in touch with the Russian ambassador in the event of its taking place.

NO. 56. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) Vienna, July 27, 1914.

The Russian ambassador had today a long and earnest conversation with Baron Macchio, the under secretary of state for foreign affairs. He told him that, having just come back from St. Petersburg, he was well acquainted with the views of the Russian government and the state of Russian public opinion. He could assure him that if actual war broke out with Servia it would be impossible to localize it, for Russia was not prepared to give way again, as she had done on previous occasions, and especially during the annexation crisis of 1909. He earnestly hoped that something would be done before Servia was actually invaded. Baron Macchio replied that this would now be difficult, as a skirmish had already taken place on the Danube, in which the Servians had been aggressors. The Russian ambassador said that he would do all he could to keep the Servians quiet pending any discussions that might yet take place, and he told me that he would advise his government to induce the Servian government to avoid any conflict as long as possible, and to fall back before an Austrian advance. Time so gained should suffice to enable a settlement to be reached. He had just heard of a satisfactory conversation which the Russian minister for foreign affairs had yesterday with the Austrian ambassador at St. Petersburg. The former had agreed that much of the Austro-Hungarian note to Servia had been perfectly reasonable, and in fact they had practically reached an understanding as to the guarantees which Servia might reasonably be asked to give to Austria-Hungary for her future good behavior. The Russian ambassador urged that the Austrian ambassador at St. Petersburg should be furnished with full powers to continue discussion with the Russian minister for foreign affairs, who was very willing to advise Servia to yield all that could be fairly asked of her as an independent power. Baron Macchio promised to submit this suggestion to the minister for foreign affairs.

NO. 57. SIR R. RODD TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) Rome, July 27, 1914.

Minister for foreign affairs greatly doubts whether Germany will be willing to invite Austria to suspend military action pending the conference, but he had hopes that military action may be practically deferred by the fact of the conference meeting at once. As at present informed, he sees no possibility of Austria receding from any point laid down in her note to Servia, but he believes that if Servia will even now accept it Austria will be satisfied, and if she had reason to think that such will be the advice of the powers, Austria may defer action. Servia may be induced to accept note in its entirety on the advice of the four powers invited to the conference, and this would enable her to say that she had yielded to Europe and not to Austria-Hungary alone.

Telegrams from Vienna to the press here stating that Austria is favorably impressed with the declarations of the Italian government have, the minister for foreign affairs assures me, no foundation. He said he had expressed no opinion to Austria with regard to the note. He assured me both before and after communication of the note, and again today, that Austrian government have given him assurances that they demand no territorial sacrifices from Servia.

I communicated to the acting minister for foreign affairs this afternoon the substance of your conversation with the German ambassador, recorded in your telegram* to Berlin of the 27th July.

(Telegraphic.) Paris, July 28, 1914.

I informed the acting minister for foreign affairs today of your conversation with the Russian ambassador, as recorded in your telegram of yesterday* to St. Petersburg.

He is grateful for the communication and quite appreciates the impossibility for his majesty's government to declare themselves "solidaires" with Russia on a question between Austria and Servia, which in its present condition is not one affecting England. He also sees that you cannot take up an attitude at Berlin and Vienna more Servian than that attributed in German and Austrian sources to the Russian government.

German ambassador has stated that Austria would respect the integrity of Servia, but when asked whether her independence also would be respected, he gave no assurance.

NO. 60. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) Berlin, July 28, 1914.

Secretary of state spoke yesterday in the same sense as that reported in my telegram of yesterday* to my French and Italian colleagues respecting your proposal. I discussed with my two colleagues this morning his reply, and we found, that while refusing the proposed conference, he had said to all of us that nevertheless he desired to work with us for the maintenance of general peace. We therefore deduced that if he is sincere in this wish he can only be objecting to the form of your proposal. Perhaps he himself could be induced to suggest lines on which he would find it possible to work with us.

(Received July 28.)

(Telegraphic.) Vienna, July 28, 1914.

I saw minister for foreign affairs this morning.

His excellency declared that Austria-Hungary cannot delay warlike proceedings against Servia, and would have to decline any suggestion of negotiations on basis of Servian reply.

Prestige of dual monarchy was engaged, and nothing could now prevent conflict.

NO. 62. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) Vienna, July 28, 1914.

I spoke to minister for foreign affairs today in the sense of your telegram of 27th July* to Berlin. I avoided the word "mediation," but said that, as mentioned in your speech, which he had just read to me, you had hopes that conversations in London between the four powers less interested might yet lead to an arrangement which Austro-Hungarian government would accept as satisfactory and as rendering actual hostilities unnecessary. I added that you had re-

garded Servian reply as having gone far to meet just demands of Austria-Hungary; that you thought it constituted a fair basis of discussion during which warlike operations might remain in abeyance, and that Austrian ambassador in Berlin was speaking in this sense. Minister for foreign affairs said quietly, but firmly, that no discussion could be accepted on basis of Servian note; that war would be declared today, and that well-known pacific character of emperor, as well as, he might add, his own, might be accepted as a guarantee that war was both just and inevitable. This was a matter that must be settled directly between the two parties immediately concerned. I said that you would hear with regret that hostilities could not be arrested, as you feared that they might lead to complications threatening the peace of Europe.

In taking leave of his excellency, I begged him to believe that if in the course of present grave crisis our point of view should sometimes differ from his, this would arise, not from want of sympathy with the many just complaints which Austria-Hungary had against Servia, but from the fact that, whereas Austria-Hungary put first the quarrel with Servia, you were anxious in the first instance for peace of Europe. I trusted this larger aspect of the question would appeal with equal force to his excellency. He said he had it also in mind, but thought that Russia ought not to oppose operations like those impending, which did not aim at territorial aggrandizement and which could no longer be postponed.

Your telegram of 25th July to Paris.*

I have communicated substance to minister for foreign affairs, who immediately telegraphed in precisely similar terms to Berlin and Vienna.

NO. 64. SIR R. RODD TO SIR EDWARD GREY.
(Received July 28.)

(Telegraphic.) Rome, July 28, 1914.

At the request of the minister for foreign affairs I submit the following to you:

In a long conversation this morning Servian charge d'affaires had said he thought that if some explanations were given regarding mode in which Austrian agents would require to intervene under article V. and article VI., Servia might still accept the whole Austrian note.

As it was not to be anticipated that Austria would give such explanations to Servia, they might be given to powers engaged in discussions, who might then advise Servia to accept without conditions.

The Austro-Hungarian government had in the meantime published a long official explanation of grounds on which Servian reply was considered inadequate. Minister for foreign affairs considered many points besides explanation—such as slight verbal difference in sentence regarding renunciation of propaganda—quite childish, but there was a passage which might prove useful in facilitating such a course as was considered practicable by the Servian charge d'affaires. It was stated that co-operation of Austrian agents in Servia was to be only in investigation, not in judicial or administrative measures. Servia was said to have willfully misinterpreted this. He thought, therefore, that ground might be cleared here.

I only reproduce from memory, as I had not yet received text of Austrian declaration.

Minister impressed upon me, above all, his anxiety for the immediate beginning of discussion. A wide general latitude to accept at once every point or suggestion on which he could be in agreement with ourselves and Germany had been given to Italian ambassador.

NO. 67. SIR EDWARD GREY TO SIR E. GOSCHEN.
(Telegraphic.)

London, Foreign Office, July 28, 1914.

Explanation given in your telegram of the 27th July* of what was my idea in proposing a conference is quite right. It would not be an arbitration, but a private and informal discussion to ascertain what suggestion could be made for a settlement. No suggestion would be put forward that had not previously been ascertained to be acceptable to Austria and Russia, with whom the mediating powers could easily keep in touch through their respective allies.

But as long as there is a prospect of a direct exchange of views between Austria and Russia, I would suspend every other suggestion, as I entirely agree that it is the most preferable method of all.

I understand that the Russian minister for foreign affairs has proposed a friendly exchange of views to the Austrian government, and if the latter accepts, it will no doubt relieve the tension and make the situation less critical.

It is very satisfactory to hear from the German ambassador here that the German government have taken action at Vienna in the sense of the conversation recorded in my telegram of yesterday to you.†

(Telegraphic.)

London, Foreign Office, July 28, 1914.

German government having accepted principle of mediation between Austria and Russia by the four powers, if necessary, I am ready to propose that the German secretary of state should suggest the lines on which this principle should be applied. I will, however, keep the idea in reserve until we see how the conversations between Austria and Russia progress.

London, Foreign Office, July 28, 1914.

It is most satisfactory that there is a prospect of direct exchange of views between the Russian and Austrian governments, as reported in your telegram of the 27th July.*

I am ready to put forward any practical proposal that would facilitate this, but I am not quite clear as to what the Russian minister for foreign affairs proposes the ministers at Belgrade should do. Could he not first mention in an exchange of views with Austria his willingness to co-operate in some such scheme? It might then take more concrete shape.

NO. 70. TELEGRAMS COMMUNICATED BY COUNT BENCKENDORFF, JULY 29, 1914.

(1) Telegram from M. Sazonof to Russian ambassador at Berlin, dated July 28, 1914.

In consequence of the declaration of war by Austria against Servia, the imperial government will announce tomorrow (29th) the mobilization in the military circonscriptions of Odessa, Kieff, Moscow and Kazan. Please inform German government, confirming the absence in Russia of any aggressive intention against Germany.

The Russian ambassador at Vienna has not been recalled from his post.

(2) Telegram to Count Benckendorff.

The Austrian declaration of war clearly puts an end to the idea of direct communications between Austria and Russia. Action by London cabinet in order to set on foot mediation with a view to suspension of military operations of Austria against Servia is now most urgent.

Unless military operations are stopped, mediation would only allow matters to drag on and give Austria time to crush Servia.

NO. 71. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) Berlin, July 28, 1914.

At invitation of imperial chancellor, I called upon his excellency this evening. He said that he wished me to tell you that he was most anxious that Germany should work together with England for maintenance of general peace, as they had done successfully in the last European crisis. He had not been able to accept your proposal for a conference of representatives of the great powers, because he did not think that it would be effective, and because such a conference would, in his opinion, have had appearance of an "areopagus" consisting of two powers of each group sitting in judgment upon the two remaining powers; but his inability to accept proposed conference must not be regarded as militating against his strong desire for effective co-operation. You could be assured that he was doing his very best both at Vienna and St. Petersburg to get the two governments to discuss the situation directly with each other and in a friendly way. He had great hopes that such discussions would take place and lead to a satisfactory result, but if the news were true which he had just read in the papers, that Russia had mobilized fourteen army corps in the south, he thought situation was very serious, and he himself would be in a very difficult position, as in these circumstances it would be out of his power to continue to preach moderation at Vienna. He added that Austria, who as yet was only partially mobilizing, would have to take similar measures, and if war were to result, Russia would be entirely responsible. I ventured to say that if Austria refused to take any notice of Servian note, which, to my mind, gave way in nearly every point demanded by Austria, and which in any case offered a basis for discussion, surely a certain portion of responsibility would rest with her. His excellency said that he did not wish to discuss Servian note, but that Austria's standpoint, and in this he agreed, was that her quarrel with Servia was a purely Austrian concern with which Russia had nothing to do. He reiterated his desire to co-operate with England and his intention to do his utmost to maintain general peace. "A war between the great powers must be avoided," were his last words.

Austrian colleague said to me today that a general war was most unlikely, as Russia neither wanted nor was in a position to make war. I think that that opinion is shared by many people here.

NO. 72. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) St. Petersburg, July 28, 1914.

Minister for foreign affairs begged me to thank you for the language you had held to the German ambassador, as reported in your telegram* to Berlin, substance of which I communicated to his excellency. He took a pessimistic view of the situation, having received the same disquieting news from Vienna as had reached his majesty's government. I said it was important that we should know the real intentions of the imperial government, and asked him whether he would be satisfied with the assurance which the Austrian ambassador had, I understood, been instructed to give in respect of Servia's integrity and independence. I added that I was sure any arrangements for averting a European war would be welcomed by his majesty's government. In reply his excellency stated that if Servia were attacked, Russia would not be satisfied with any engagement which Austria might take on these two points, and that order for mobilization against Austria would be issued on the day that Austria crossed Servian frontier.

I told the German ambassador, who appealed to me to give moderating counsels to the minister for foreign affairs, that from the beginning I had not ceased to do so, and that the German ambassador at Vienna should now in his turn use his restraining influence. I made it clear to his excellency that, Russia being thoroughly in earnest, a general war could not be averted if Servia were attacked by Austria.

As regards the suggestion of conference, the ambassador had received no instructions, and before acting with me the French and Italian ambassadors are still waiting for their final instructions.

I have received note verbale from ministry for foreign affairs, stating that, the Servian government not having replied to note of 23d July* in a satisfactory manner, imperial and royal government is compelled itself to provide for protection of its rights, and to have recourse for that object to force of arms. Austria-Hungary has addressed to Servia formal declaration, according to article 1 of convention of 18th October, 1907, relative to opening of hostilities, and considers herself from today in state of war with Servia. Austria-Hungary will conform, provided Servia does so, to stipulations of Hague conventions of 18th October, 1907, and to declaration of London of 26th February, 1909.

(Received July 29.)

(Telegraphic.) Vienna, July 28, 1914.

I am informed by the Russian ambassador that the Russian government's suggestion has been declined by the Austro-Hungarian government. The suggestion was to the effect that the means of settling the Austro-Servian conflict should be discussed directly between Russian minister for foreign affairs and the Austrian ambassador at St. Petersburg, who should be authorized accordingly.

The Russian ambassador thinks that a conference in London of the less interested powers, such as you have proposed, offers now the only prospect of preserving peace of Europe, and he is sure that the Russian government will acquiesce willingly in your proposal. So long as opposing armies have not actually come in contact, all hope need not be abandoned.

NO. 75. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) Berlin, July 29, 1914.

I was sent for again to-day by the imperial chancellor, who told me that he regretted to state that the Austro-Hungarian government, to whom he had at once communicated your opinion, had answered that events had marched too rapidly and that it was therefore too late to act upon your suggestion that the Servian reply might form the basis of discussion. His excellency had, on receiving their reply, dispatched a message to Vienna, in which he explained that, although a certain desire had, in his opinion, been shown in the Servian reply to meet the demands of Austria, he understood entirely that, without some sure guarantees that Servia would carry out in their entirety the demands made upon her, the Austro-Hungarian government could not rest satisfied in view of their past experience. He had then gone on to say that the hostilities which were about to be undertaken against Servia had presumably the exclusive object of securing such guarantees, seeing that the Austrian government already assured the Russian government that they had no territorial designs.

He advised the Austro-Hungarian government, should this view be correct, to speak openly in this sense. The holding of such language would, he hoped, eliminate all possible misunderstandings.

As yet, he told me, he had not received a reply from Vienna.

From the fact that he had gone so far in the matter of giving advice at Vienna, his excellency hoped that you would realize that he was sincerely doing all in his power to prevent danger of European complications.

The fact of his communicating this information to you was a proof of the confidence which he felt in you and evidence of his anxiety that you should know he was doing his best to support

your efforts in the cause of general peace, efforts which he sincerely appreciated.

NO. 76. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) Berlin, July 29, 1914.

I found secretary of state very depressed today. He reminded me that he had told me the other day that he had to be very careful in giving advice to Austria, as any idea that they were being pressed would be likely to cause them to precipitate matters and present a fait accompli. This had, in fact, now happened, and he was not sure that his communication of your suggestion that Servia's reply offered a basis for discussion had not hastened declaration of war. He was much troubled by reports of mobilization in Russia and of certain military measures, which he did not specify, being taken in France. He subsequently spoke of these measures to my French colleague, who informed him that French government had done nothing more than the German government had done, namely, recalled officers on leave. His excellency denied German government had done this, but as a matter of fact it is true. My French colleague said to under secretary of state in course of conversation that seemed to him that when Austria had entered Servia, and so satisfied her military prestige, the moment might then be favorable for four disinterested powers to discuss situation and come forward with suggestions for preventing graver complications. Under secretary of state seemed to think idea worthy of consideration, as he replied that would be a different matter from conference proposed by you.

Russian ambassador returned today and has informed imperial government that Russia is mobilizing in four southern governments.

London, Foreign Office, July 29, 1914.

I must appreciate the language of chancellor, as reported in your telegram of today.* His excellency may rely upon it that this country will continue, as heretofore, to strain effort to secure peace and to avert the calamity we all fear. If he can induce Austria to satisfy Russia and to abstain from going so far as to come into collision with her, we shall all join in deep gratitude to his excellency for having saved the peace of Europe.

NO. 78. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) St. Petersburg, July 29, 1914.

Partial mobilization was ordered to-day.

I communicated the substance of your telegram of the 28th instant* to Berlin to the minister for foreign affairs in accordance with your instructions, and informed him confidentially of remarks as to mobilization which the German secretary of state had made to the British ambassador at Berlin. This had already reached his excellency from another source. The mobilization, he explained, would only be directed against Austria.

Austrian government had now definitely declined direct conversation between Vienna and St. Petersburg. The minister for foreign affairs said he had proposed such an exchange of views on advice of German ambassador. He proposed, when informing German ambassador of this refusal of Austria's, to urge that a return should be made to your proposal for a conference of four ambassadors, or, at all events, for an exchange of views between the three ambassadors less directly interested, yourself, and also the Austrian ambassador if you thought it advisable. Any arrangement approved by France and England would be acceptable to him, and he did not care what form such conversations took. No time was to be lost, and the only way to avert war was for you to succeed in arriving, by means of conversations with ambassadors, either collectively or individually, at some formula which Austria could be induced to accept. Throughout Russian government had been perfectly frank and conciliatory, and had done all in their power to maintain peace. If their efforts to maintain peace failed, he trusted that it would be realized by the British public that it was not fault of the Russian government.

I asked him whether he would raise objections, if the suggestion made in Rome telegram of 27th July,† which I mentioned to him, were carried out. In reply his excellency said that he would agree to anything arranged by the four powers, provided it was acceptable to Servia; he could not, he said, be more Servian than Servia. Some supplementary statement or explanation would, however, have to be made in order to tone down the sharpness of the ultimatum.

Minister for foreign affairs said that proposal referred to in your telegram of the 28th instant‡ was one of secondary importance. Under altered circumstances of situation he did not attach weight to it. Further, the German ambassador had informed his excellency, so the latter told me, that his government were continuing at Vienna to exert friendly influence. I fear that the German ambassador will not help to smooth matters over, if he uses to his own government the same language as he did to me today. He accused the Russian government of endangering the peace of Europe by their mobilization, and said, when I referred to all that had been recently done by Austria, that he could not discuss such matters. I called his attention to the fact that Austrian consuls had warned all Austrian subjects liable to military service to join the colors, that Austria had already partially mobilized, and had now declared war on Servia. From what had passed during the Balkan crises, she knew that this act was one which it was impossible without humiliation for Russia to submit to. Had not Russia by mobilizing shown that she was in earnest, Austria would have traded on Russia's desire for peace, and would have believed that she could go to any lengths. Minister for foreign affairs had given me to understand that Russia would not precipitate war by crossing frontier immediately, and a week or more would, in any case, elapse before mobilization was completed. In order to find an issue out of a dangerous situation, it was necessary that we should in the meanwhile all work together.

NO. 79. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) Vienna, July 29, 1914.

There is at present no step which we could usefully take to stop war with Servia, to which Austro-Hungarian government are now fully committed by the emperor's appeal to his people, which has been published this morning, and by the declaration of war. French and Italian ambassadors agree with me in this view. If the Austro-Hungarian government would convert into a binding engagement to Europe the declaration which has been made at St. Petersburg to the effect that she desires neither to destroy the independence of Servia nor to acquire Servian territory, the Italian ambassador thinks that Russia might be induced to remain quiet. This, however, the Italian ambassador is convinced the Austrian government would refuse to do.

NO. 80. SIR R. RODD TO SIR EDWARD GREY.
(Received July 29.)

(Telegraphic.) Rome, July 29, 1914.

In your telegram of the 27th instant* to Berlin, German ambassador was reported to have accepted in principle the idea of a conference. This is in contradiction with the telegram of the 27th instant† from Berlin.

Information received by the Italian government from Berlin shows that German view is correctly represented in Sir E. Goschen's telegram of the 27th July,† but what creates difficulty is rather the "conference," so the minister for foreign affairs understands, than the principle. He is going to urge, in a telegram which he is sending to Berlin to-night, adherence to the idea of an exchange of views in London. He suggests that the German secretary of state might propose a formula acceptable to his government. Minister for foreign affairs is of opinion that this exchange of views would keep the door open

if the direct communication between Vienna and St. Petersburg fails to have any result. He thinks that this exchange of views might be concomitant with such direct communication.

The German government are also being informed that the Italian government would not be pardoned by public opinion here unless they had taken every possible step so as to avoid war. He is urging that the German government must lend their co-operation in this.

He added that there seemed to be a difficulty in making Germany believe that Russia was in earnest. As Germany, however, was really anxious for good relations with ourselves, if she believed that Great Britain would act with Russia and France he thought it would have a great effect.

Even should it prove impossible to induce Germany to take part, he would still advocate that England and Italy, each as representing one group, should continue to exchange views.

With reference to your telegram of yesterday.*

It is impossible for me to initiate discussions with ambassadors here, as I understand from Austrian minister for foreign affairs that Austria will not accept any discussion on basis of Servian note, and the inference of all I have heard from Vienna and Berlin is that Austria will not accept any form of mediation by the powers as between Austria and Servia. Italian minister for foreign affairs must therefore speak at Berlin and Vienna. I shall be glad if a favorable reception is given to any suggestions he can make there.

London, Foreign Office, July 29, 1914.

The German ambassador has been instructed by the German chancellor to inform me that he is endeavoring to mediate between Vienna and St. Petersburg, and he hopes with good success. Austria and Russia seem to be in constant touch, and he is endeavoring to make Vienna explain in a satisfactory form at St. Petersburg the scope and extension of Austrian proceedings in Servia. I told the German ambassador that an agreement arrived at direct between Austria and Russia would be the best possible solution. I would press no proposal as long as there was a prospect of that, but my information this morning was that the Austrian government had declined the suggestion of the Russian government that the Austrian ambassador at St. Petersburg should be authorized to discuss directly with the Russian minister for foreign affairs the means of settling the Austro-Servian conflict. The press correspondents at St. Petersburg had been told that Russian government would mobilize. The German government have said that they were favorable in principle to mediation between Russia and Austria if necessary. They seemed to think the particular method of conference, consultation, or discussion, or even conversations a quatre in London too formal a method. I urged that the German government should suggest any method by which the influence of the four powers could be used together to prevent war between Austria and Russia. France agreed, Italy agreed. The whole idea of mediation or mediating influence was ready to be put into operation by any method that Germany could suggest if mine was not acceptable. In fact, mediation was ready to come into operation by any method that Germany thought possible if only Germany would "press the button" in the interests of peace.

NO. 85. SIR E. GOSCHEN TO SIR EDWARD GREY.

(Received July 29.)

(Telegraphic.) Berlin, July 29, 1914.

I was asked to call upon the chancellor tonight. His excellency had just returned from Potsdam.

He said that should Austria be attacked by Russia a European conflagration might, he feared, become inevitable, owing to Germany's obligations as Austria's ally, in spite of his continued efforts to maintain peace. He then proceeded to make the following strong bid for British neutrality. He said that it was clear, so far as he was able to judge the main principle which governed British policy, that Great Britain would never stand by and allow France to be crushed in any conflict there might be. That, however, was not the object at which Germany aimed. Provided that neutrality of Great Britain were certain, every assurance would be given to the British government that the imperial government aimed at no territorial acquisitions at the expense of France should they prove victorious in any war that might ensue.

I questioned his excellency about the French colonies, and he said that he was unable to give a similar undertaking in that respect. As regards Holland, however, his excellency said that, so long as Germany's adversaries respected the integrity and neutrality of the Netherlands, Germany was ready to give his majesty's government an assurance that she would do likewise. It depended upon the action of France what operations Germany might be forced to enter upon in Belgium, but when the war was over Belgian integrity would be respected if she had not sided against Germany.

His excellency ended by saying that ever since he had been chancellor the object of his policy had been, as you were aware, to bring about an understanding with England: he trusted that these assurances might form the basis of that understanding which he so much desired. He had in mind a general neutrality agreement between England and Germany, though it was of course at the present moment too early to discuss details, and an assurance of British neutrality in the conflict which the present crisis might possibly produce would enable him to look forward to realization of his desire.

In reply to his excellency's inquiry how I thought his request would appeal to you, I said that I did not think it probable that at this stage of events you would care to bind yourself to any course of action and that I was of opinion that you would desire to retain full liberty.

Our conversation upon this subject having come to an end, I communicated the contents of your telegram of today* to his excellency, who expressed his best thanks to you.

Minister for foreign affairs thinks that moment is past for any further discussions on basis of Servian note, in view of the communication made today by Russia at Berlin regarding partial mobilization. The utmost he now hopes for is that Germany may use her influence at Vienna to prevent or moderate any further demands on Servia.

NO. 87. SIR EDWARD GREY TO SIR F. BERTIE.

London, Foreign Office, July 29, 1914.

Sir:—After telling M. Cambon today how grave the situation seemed to be, I told him that I meant to tell the German ambassador today that he must not be misled by the friendly tone of our conversations into any sense of false security:

that we should stand aside if all the efforts to preserve the peace, which we were now making in common with Germany, failed, but I went on to say to M. Cambon that I thought it necessary to tell him also that the public opinion here approached the present difficulty from a quite different point of view from that taken during the difficulty as to Morocco a few years ago. In the case of Morocco the dispute was one in which France was primarily interested, and in which it appeared that Germany, in an attempt to crush France, was fastening a quarrel on France on a question that was the subject of a special agreement between France and us. In the present case the dispute between Austria and Servia was not one in which we felt called to take a hand. Even if the question became one between Austria and Russia we should not feel called upon to take a hand in it. It would then be a question of supremacy of Teuton or Slav—a struggle for supremacy in the Balkans; and our idea had always been to avoid being drawn into a war over a Balkan question. If Germany became involved and France became involved, we had not made up our minds what we should do; it was a case that we should have to consider. France would then have been drawn into a quarrel which was not hers, but in which, owing to her alliance, her honor and interest obliged her to engage. We were free from engagements, and we should have to decide what British interests required us to do. I thought it necessary to say that because, as he knew, we were taking all precautions with regard to our fleet, and I was about to warn Prince Lichnowsky not to count on our standing aside, but it would not be fair that I should let M. Cambon be misled into supposing that this meant that we had decided what to do in a contingency that I still hoped might not arise.

M. Cambon said that I had explained the situation very clearly. He understood it to be that in a Balkan quarrel and in a struggle for supremacy between Teuton and Slav we should not feel called to intervene; should other issues be raised, and Germany and France become involved, so that the question became one of the hegemony of Europe, we should then decide what it was necessary for us to do. He seemed quite prepared for this announcement, and made no criticism upon it.

He said French opinion was calm, but decided. He anticipated a demand from Germany that France would be neutral while Germany attacked Russia. This assurance, France, of course, could not give; she was bound to help Russia if Russia was attacked. I am, &c.,

E. GREY.

NO. 88. SIR EDWARD GREY TO SIR E. GOSCHEN.

London, Foreign Office, July 29, 1914.

Sir:—I told the German ambassador this afternoon of the information that I had received, that Russia had informed Germany respecting her mobilization. I also told him of the communication made by Count Benckendorff, that the Austrian declaration of war manifestly rendered vain any direct conversations between Russia and Austria. I said that the hope built upon those direct conversations by the German government yesterday had disappeared today. Today the German chancellor was working in the interest of mediation in Vienna and St. Petersburg. If he succeeded, well and good. If not, it was more important than ever that Germany should take up what I had suggested to the German ambassador this morning, and propose some method by which the four powers should be able to work together to keep the peace of Europe. I pointed out, however, that the Russian government, while desirous of mediation, regarded it as a condition that the military operations against Servia should be suspended, as otherwise a mediation would only drag on matters and give Austria time to crush Servia. It was of course too late for all military operations against Servia to be suspended. In a short time, I supposed, the Austrian forces would be in Belgrade, and in occupation of some Servian territory. But even then it might be possible to bring some mediation into existence, if Austria, while saying that she must hold the occupied territory until she had complete satisfaction from Servia, stated that she would not advance further, pending an effort of the powers to mediate between her and Russia.

The German ambassador said that he had already telegraphed Berlin what I had said to him this morning. I am, &c.,

E. GREY.

NO. 89. SIR EDWARD GREY TO SIR E. GOSCHEN.

London, Foreign Office, July 29, 1914.

Sir:—After speaking to the German ambassador this afternoon about the European situation, I said that I wished to say to him, in a quite private and friendly way, something that was on my mind. The situation was very grave. While it was restricted to the issues at present actually involved, we had no thought of interfering in it. But if Germany became involved in it, and then France, the issue might be so great that it would involve all European interests; and I did not wish him to be misled by the friendly tone of our conversation—which I hoped would continue—into thinking that we should stand aside.

He said that he quite understood this, but he asked whether I meant that we should under certain circumstances intervene.

I replied that I did not wish to say that, or to use anything that was like a threat or an attempt to apply pressure by saying that, if things became worse we should intervene. There would be no question of our intervening if Germany was not involved, or even if France was not involved. But we knew very well that if the issue did become such that we thought British interests required us to intervene, we must intervene at once, and the decision would have to be very rapid, just as the decisions of other powers had to be. I hoped that the friendly tone of our conversations would continue as at present, and that I should be able to keep as closely in touch with the German government in working for peace. But if we failed in our efforts to keep the peace, and if the issue spread so that it involved practically every European interest, I did not wish to be open to any reproach from him that the friendly tone of all our conversations had misled him or his government into supposing that we should not take action, and to the reproach that, if they had not been so misled, the course of things might have been different.

The German ambassador took no exception to what I had said; indeed, he told me that it accorded with what he had already given in Berlin as his view of the situation.

I am, &c.,

E. GREY.

NO. 90. SIR EDWARD GREY TO SIR E. GOSCHEN.

London, Foreign Office, July 29, 1914.

Sir:—In addition to what passed with the German ambassador this morning, as recorded in my telegram of the 29th July* to your excellency, I gave the ambassador a copy of Sir Rennell Rodd's telegram of the 28th July† and of my reply to it.‡ I said I had begun to doubt whether even a complete acceptance of the Austrian demands by Servia would now satisfy Austria. But there appeared, from what the Marquis di San Giuliano had said, to be a method by which, if the powers were allowed to have any say in the matter, they might bring about complete satisfaction for Austria, if only the latter would give them an opportunity. I could, however, make no proposal, for the reasons I have given in my telegram to you, and could only give what the Italian minister for foreign affairs had said to the German ambassador for information, as long as it was understood that Austria would accept no discussion with the powers over her dispute with Servia. As to mediation between Austria and Russia, I said it could not take the form simply of urging Russia to stand on one side while Austria had a free hand to go to any length she pleased. That would not be mediation, it would simply be putting pressure upon Russia in the interests of Austria. The German ambassador said the view of the German government was that Austria could not by force be humiliated, and could not abdicate her position as a great power. I said I entirely agreed, but it was not a question of humiliating Austria, it was a question of how far Austria meant to push the humiliation of others. There must, of course, be

some humiliation to Servia, but Austria might press things so far as to involve the humiliation of Russia.

The German ambassador said that Austria would not take Servian territory, as to which I observed that, by taking territory while leaving nominal Servian independence, Austria might turn Servia practically into a vassal state, and this would affect the whole position of Russia in the Balkans.

I observed that when there was danger of European conflict it was impossible to say who would not be drawn into it. Even the Netherlands apparently were taking precautions.

The German ambassador said emphatically that some means must be found for preserving the peace of Europe. I am, &c., E. GREY.

NO. 91. SIR EDWARD GREY TO SIR M. DE BUNSEN.

London, Foreign Office, July 29, 1914.

Sir:—The Austrian ambassador told me today he had ready a long memorandum which he proposed to leave, and which he said gave an account of the conduct of Servia toward Austria, and an explanation of how necessary the Austrian action was.

I said that I did not wish to discuss the merits of the question between Austria and Servia. The news today seemed to me very bad for the peace of Europe. The powers were not allowed to help in getting satisfaction for Austria, which they might get if they were given an opportunity, and European peace was at stake.

Count Mensdorff said that the war with Servia must proceed. Austria could not continue to be exposed to the necessity of mobilizing again and again, as she had been obliged to do in recent years. She had no idea of territorial aggrandizement, and all she wished was to make sure that her interests were safeguarded.

I said that it would be quite possible, without nominally interfering with the independence of Servia or taking away any of her territory, to turn her into a sort of vassal state.

Count Mensdorff deprecated this.

In reply to some further remarks of mine, as to the effect that the Austrian action might have upon the Russian position in the Balkans, he said that, before the Balkan war, Servia had always been regarded as being in the Austrian sphere of influence. I am, &c., E. GREY.

NO. 92. SIR EDWARD GREY TO SIR R. RODD.

London, Foreign Office, July 29, 1914.

Sir:—The Italian ambassador made me today a communication from the Marquis di San Giuliano suggesting that the German objections to the mediation of the four powers, a mediation that was strongly favored by Italy, might be removed by some change of the form of procedure.

I said that I had already anticipated this by asking the German government to suggest any form of procedure under which the idea of mediation between Austria and Russia, already accepted by the German government in principle, could be applied. I am, &c., E. GREY.

NO. 93. TELEGRAMS COMMUNICATED BY COUNT BENCKENDORFF, JULY 30, 1914.

(1.) Russian Ambassador at Vienna to M. Sazonof.

(Translation.)

(Telegraphic.) Vienna, July 15 (28), 1914.

I spoke to Count Berchtold to-day in the sense of your excellency's instructions. I brought to his notice, in the most friendly manner, how desirable it was to find a solution which, while consolidating good relations between Austria-Hungary and Russia, would give to the Austro-Hungarian monarchy genuine guarantees for its future relations with Servia.

I drew Count Berchtold's attention to all the dangers to the peace of Europe which would be involved by an armed conflict between Austria-Hungary and Servia.

Count Berchtold replied that he was well aware of the gravity of the situation and of the advantages of a frank explanation with the St. Petersburg cabinet. He told me that, on the other hand, the Austro-Hungarian government, who had only decided, much against their will, on the energetic measures which they had taken against Servia, could no longer recede, nor enter into any discussion about the terms of the Austro-Hungarian note.

Count Berchtold added that the crisis had become so acute, and that public opinion had risen to such a pitch of excitement, that the government, even if they wished it, could no longer consent to such a course. This was all the more impossible, he said, inasmuch as the Serviar reply itself furnished proof of the insincerity of Servia's promises for the future.

(2.) M. Sazonof to Count Benckendorff.

(Telegraphic.) St. Petersburg, July 16 (29), 1914.

The German ambassador informs me, in the name of the chancellor, that Germany has not ceased to exercise a moderating influence at Vienna and that she will continue to do so even after the declaration of war. Up to this morning there has been no news that the Austrian army has crossed the Servian frontier. I have begged the ambassador to express my thanks to the chancellor for the friendly tenor of this communication. I have informed him of the military measures taken by Russia, none of which, I told him, were directed against Germany; I added that neither should they be taken as aggressive measures against Austria-Hungary, their explanation being the mobilization of the greater part of the Austro-Hungarian army.

The ambassador said that he was in favor of direct explanations between the Austrian government and ourselves, and I replied that I, too, was quite willing, provided that the advice of the German government, to which he had referred, found an echo at Vienna.

I said at the same time that we were quite ready to accept the proposal for a conference of the four powers, a proposal with which, apparently, Germany was not in entire sympathy.

I told him that, in my opinion, the best manner of turning to account the most suitable methods of finding a peaceful solution would be by arranging for parallel discussions to be carried on by a conference of the four powers—Germany, France, England and Italy—and by a direct exchange of views between Austria-Hungary and Russia on much the same lines as occurred during the most critical moments of last year's crisis.

I told the ambassador that, after the concessions which had been made by Servia, it should not be very difficult to find a compromise to settle the other questions which remained outstanding, provided that Austria showed some goodwill and that all the powers used their entire influence in the direction of conciliation.

(3.) M. Sazonof to Count Benckendorff.

(Telegraphic.) St. Petersburg, July 16 (29), 1914.

At the time of my interview with the German ambassador, dealt with in my preceding telegram, I had not yet received M. Schebeko's telegram of the 15th (28th) July.

The telegram reports the refusal of the Vienna cabinet to agree to a direct exchange of views with the imperial government.

From now on nothing remains for us to do but to rely entirely on the British government to take the initiative in the steps which they may consider advisable.

NO. 94. SIR M. DE BUNSEN TO SIR EDWARD GREY.

(Received July 30.)

(Telegraphic.) Vienna, July 29, 1914.

I learn that the mobilization of Russian corps destined to carry out operations on Austrian frontier has been ordered. My informant is Russian ambassador. Ministry for foreign affairs here has realized, though somewhat late in the day, that Russia will not remain indifferent in present crisis. I believe that the news of Russian mobilization will not be a surprise to the ministry, but so far it is not generally known in Vienna this evening. Unless mediation which German government declared themselves ready to offer in concert with three other great powers not immediately interested in the Austro-Servian dispute be brought to bear forthwith, irrevocable steps may be taken in present temper of this country. German ambassador feigns surprise that Servian affairs should be of such interest to Rus-

sia. Both my Russian and French colleagues have spoken to him to-day. Russian ambassador expressed the hope that it might still be possible to arrange matters, and explained that it was impossible for Russia to do otherwise than take an interest in the present dispute. Russia, he said, had done what she could already at Belgrade to induce Servian government to meet principal Austrian demands in a favorable spirit; if approached in a proper manner he thought she would probably go still further in this direction. But she was justly offended at having been completely ignored, and she could not consent to be excluded from the settlement. German ambassador said that if proposals were put forward which opened any prospect of possible acceptance by both sides he personally thought that Germany might consent to act as mediator in concert with the three other powers.

I gather from what Russian ambassador said to me that he is much afraid of the effect that any serious engagement may have upon Russian public opinion. I gathered, however, that Russia would go a long way to meet Austrian demands on Servia.

NO. 95. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 30.)

(Telegraphic.) Vienna, July 30, 1914.

Russian ambassador hopes that Russian mobilization will be regarded by Austria as what it is, viz., a clear intimation that Russia must be consulted regarding the fate of Servia, but he does not know how the Austrian government are taking it. He says that Russia must have an assurance that Servia will not be crushed, but she would understand that Austria-Hungary is compelled to exact from Servia measures which will secure her Slav provinces from the continuance of hostile propaganda from Servian territory.

The French ambassador hears from Berlin that the German ambassador at Vienna is instructed to speak seriously to the Austro-Hungarian government against acting in a manner calculated to provoke a European war.

Unfortunately the German ambassador is himself so identified with extreme anti-Russian and anti-Servian feeling prevalent in Vienna that he is unlikely to plead the cause of peace with entire sincerity.

Although I am not able to verify it, I have private information that the German ambassador knew the text of the Austrian ultimatum to Servia before it was dispatched and telegraphed it to the German emperor. I know from the German ambassador himself that he indorses every line of it.

NO. 96. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 30.)

(Telegraphic.) Vienna, July 30, 1914.

The Russian ambassador gave the French ambassador and myself this afternoon at the French embassy, where I happened to be, an account of his interview with the minister for foreign affairs, which he said was quite friendly. The minister for foreign affairs had told him that as Russia had mobilized, Austria must, of course, do the same. This, however, should not be regarded as a threat, but merely as the adoption of military precautions similar to those which had been taken across the frontier. He said he had no objection to the Russian minister for foreign affairs and the Austrian ambassador at St. Petersburg continuing their conversations, although he did not say that they could be resumed on the basis of the Servian reply.

On the whole, the Russian ambassador is not dissatisfied. He had begun to make his preparations for his departure on the strength of a rumor that Austria would declare war in reply to mobilization. He now hopes that something may yet be done to prevent war with Austria.

NO. 97. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 30.)

(Telegraphic.) St. Petersburg, July 30, 1914.

French ambassador and I visited minister for foreign affairs this morning. His excellency said that German ambassador had told him yesterday afternoon that German government were willing to guarantee that Servian integrity would be respected by Austria. To this he had replied that this might be so, but nevertheless Servia would become an Austrian vassal, just as, in similar circumstances, Bokhara had become a Russian vassal. There would be a revolution in Russia if she were to tolerate such a state of affairs.

M. Sazonof told us that absolute proof was in possession of Russian government that Germany was making military and naval preparations against Russia—more particularly in the direction of the Gulf of Finland.

German ambassador had a second interview with minister for foreign affairs at 2 a. m., when former completely broke down on seeing that war was inevitable. He appealed to M. Sazonof to make some suggestion which he could telegraph to German government as a last hope. M. Sazonof accordingly drew up and handed to German ambassador a formula in French, of which following is translation:

"If Austria, recognizing that her conflict with Servia has assumed character of question of European interest, declares herself ready to eliminate from her ultimatum points which violate principle of sovereignty of Servia, Russia engages to stop all military preparations."

Preparations for general mobilization will be proceeded with if this proposal is rejected by Austria, and inevitable result will be a European war. Excitement here has reached such a pitch that if Austria refuses to make a concession Russia cannot hold back, and, now that she knows that Germany is arming, she can hardly postpone, for strategical reasons, converting partial into general mobilization.

NO. 98. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 30.)

(Telegraphic.) Berlin, July 30, 1914.

Secretary of state informs me that immediately on receipt of Prince Lichnowsky's telegram recording his last conversation with you he asked Austro-Hungarian government whether they would be willing to accept mediation on basis of occupation by Austrian troops of Belgrade or some other point and issue their conditions from there. He has up till now received no reply, but he fears Russian mobilization against Austria will have increased difficulties, as Austria-Hungary, who has as yet only mobilized against Servia, will probably find it necessary also against Russia. Secretary of state says if you can succeed in getting Russia to agree to above basis for an arrangement and in persuading her in the meantime to take no steps which might be regarded as an act of aggression against Austria he still sees some chance that European peace may be preserved.

He begged me to impress on you difficulty of Germany's position in view of Russian mobilization and military measures which he hears are being taken in France. Beyond recall of officers on leave—a measure which had been officially taken after, and not before, visit of French ambassador yesterday—imperial government had done nothing special in way of military preparations. Something, however, would have soon to be done, for it might be too late, and when they mobilized they would have to mobilize on three sides. He regretted this, as he knew France did not desire war, but it would be a military necessity.

His excellency added that telegram received from Prince Lichnowsky last night contains matter which he had heard with regret, but not exactly with surprise, and at all events he thoroughly appreciated frankness and loyalty with which you had spoken.

He also told me that this telegram had only reached Berlin very late last night; had it been received earlier chancellor would, of course, not have spoken to me in the way he had done.

NO. 99. SIR F. BERTIE TO SIR EDWARD GREY.
(Received July 30.)

(Telegraphic.) Paris, July 30, 1914.

President of the republic tells me that the Russian government have been informed by the German government that unless Russia stopped her mobilization Germany would mobilize. But

a further report, since received from St. Petersburg, states that the German communication had been modified, and was now a request to be informed on what conditions Russia would consent to demobilization. The answer is that she agrees to do so on condition that Austria-Hungary gives an assurance that she will respect the sovereignty of Servia, and submit certain of the demands of the Austrian note, which Servia has not accepted, to an international discussion.

President thinks that these conditions will not be accepted by Austria. He is convinced that peace between the powers is in the hands of Great Britain. If his majesty's government announced that England would come to the aid of France in the event of a conflict between France and Germany as a result of the present differences between Austria and Servia, there would be no war, for Germany would at once modify her attitude.

I explained to him how difficult it would be for his majesty's government to make such an announcement, but he said that he must maintain that it would be in the interests of peace. France, he said, is pacific. She does not desire war, and all that she has done at present is to make preparations for mobilization so as not to be taken unawares. The French government will keep his majesty's government informed of everything that may be done in that way. They have reliable information that the German troops are concentrated round Thionville and Metz ready for war. If there were a general war on the continent it would inevitably draw England into it for the protection of her vital interests. A declaration now of her intention to support France, whose desire it is that peace should be maintained, would almost certainly prevent Germany from going to war.

NO. 100. SIR R. RODD TO SIR EDWARD GREY.

(Received July 30.)

(Telegraphic.) Rome, July 30, 1914.

German ambassador told me last night that he thought that Germany would be able to prevent Austria from making any exorbitant demands if Servia could be induced to submit, and to ask for peace early, say, as soon as the occupation of Belgrade had been accomplished.

I made to his excellency the personal suggestion that some formula might be devised by Germany which might be acceptable for an exchange of views.

I see, however, that you have already made this suggestion.

NO. 101. SIR EDWARD GREY TO SIR E. GOSCHEN.

(Telegraphic.)

London, Foreign Office, July 30, 1914.

Your telegram of 29th July.*

His majesty's government cannot for a moment entertain the chancellor's proposal that they should bind themselves to neutrality on such terms.

What he asks us in effect is to engage to stand by while French colonies are taken and France is beaten so long as Germany does not take French territory as distinct from the colonies.

From the material point of view such a proposal is unacceptable, for France, without further territory in Europe being taken from her, could be so crushed as to lose her position as a great power, and become subordinate to German policy.

Altogether apart from that, it would be a disgrace for us to make this bargain with Germany at the expense of France, a disgrace from which the good name of this country would never recover.

The chancellor also in effect asks us to bargain away whatever obligations or interest we have as regards the neutrality of Belgium. We could not entertain that bargain either.

Having said so much, it is unnecessary to examine whether the prospect of a future general neutrality agreement between England and Germany offered positive advantages sufficient to compensate us for tying our hands now. We must preserve our full freedom to act as circumstances may seem to us to require in any such unfavorable and regrettable development of the present crisis as the chancellor contemplates.

You should speak to the chancellor in the above sense, and add most earnestly that one way of maintaining good relations between England and Germany is that they should continue to work together to preserve the peace of Europe; if we succeed in this object, the mutual relations of Germany and England will, I believe, be ipso facto improved and strengthened. For that object his majesty's government will work in that way with all sincerity and good-will.

And I will say this: If the peace of Europe can be preserved, and the present crisis safely passed, my own endeavor will be to promote some arrangement to which Germany could be a party, by which she could be assured that no aggressive or hostile policy would be pursued against her or her allies by France, Russia, and ourselves, jointly or separately. I have desired this and worked for it, as far as I could, through the last Balkan crisis, and, Germany having a corresponding object, our relations sensibly improved. The idea has hitherto been too Utopian to form the subject of definite proposals, but if this present crisis, so much more acute than any that Europe has gone through for generations, be safely passed, I am hopeful that the relief and reaction which will follow may make possible some more definite rapprochement between the powers than has been possible hitherto.

(Telegraphic.)

London, Foreign Office, July 30, 1914.

I have warned Prince Lichnowsky that Germany must not count upon our standing aside in all circumstances. This is doubtless the substance of the telegram from Prince Lichnowsky to German chancellor, to which reference is made in the last two paragraphs of your telegram of 30th July.*

NO. 103. SIR EDWARD GREY TO SIR G. BUCHANAN.

(Telegraphic.)

London, Foreign Office, July 30, 1914.

German ambassador informs me that German government would endeavor to influence Austria, after taking Belgrade and Servian territory in region of frontier, to promise not to advance further while powers endeavored to arrange that Servia should give satisfaction sufficient to pacify Austria. Territory occupied would, of course, be evacuated when Austria was satisfied. I suggested this yesterday as a possible relief to the situation, and, if it can be obtained, I would earnestly hope that it might be agreed to suspend further military preparations on all sides.

Russian ambassador has told me of condition laid down by M. Sazonof, as quoted in your telegram of the 30th July,* and fears it cannot be modified; but if Austrian advance were stopped after occupation of Belgrade, I think Russian minister for foreign affairs' formula might be changed to read that the powers would examine how Servia could fully satisfy Austria without impairing Servian sovereign rights or independence.

If Austria, having occupied Belgrade and neighboring Servian territory, declares herself ready, in the interest of European peace, to cease her advance and to discuss how a complete settlement can be arrived at I hope that Russia would also consent to discussion and suspension of further military preparations, provided that other powers did the same.

It is a slender chance of preserving peace, but the only one I can suggest if Russian minister for foreign affairs can come to no agreement at Berlin. You should inform minister for foreign affairs.

(Telegraphic.)

London, Foreign Office, July 30, 1914.

You should inform the minister for foreign affairs of my telegram to Sir G. Buchanan of today,* and say that I know that he has been urging Russia not to precipitate a crisis. I hope he may be able to support this last suggestion at St. Petersburg.

NO. 105. SIR EDWARD GREY TO SIR F. BERTIE.

London, Foreign Office, July 30, 1914.

Sir: M. Cambon reminded me today of the letter I had written to him two years ago, in which we agreed that, if the peace of Europe was seriously threatened, we would discuss what we were prepared to do. I inclose for convenience of reference copies of the letter in question and of M. Cambon's reply. He said that the peace of Europe was never more seriously threatened than it was now. He did not wish to ask me to say directly that we would intervene, but he would like me to say what we should do if certain circumstances arose. The particular hypothesis he had in mind was an aggression by Germany on France. He gave me a paper, of which a copy is also inclosed, showing that the German military preparations were more advanced and more on the offensive upon the frontier than anything France had yet done. He anticipated that the aggression would take the form of either a demand that France should cease her preparations, or a demand that she should engage to remain neutral if there was war between Germany and Russia. Neither of these things could France admit.

I said that the cabinet was to meet tomorrow morning, and I would see him again tomorrow afternoon. I am, &c., E. GREY.

Enclosure 1 in No. 105.

SIR EDWARD GREY TO M. CAMBON.

London Foreign Office, Nov. 22, 1912.

My dear Ambassador: From time to time in recent years the French and British naval and military experts have consulted together. It has always been understood that such consultation does not restrict the freedom of either government to decide at any future time whether or not to assist the other by armed force. We have agreed that consultation between experts is not, and ought not to be regarded as, an engagement that commits either government to action in a contingency that has not arisen and may never arise. The disposition, for instance, of the French and British fleets respectively at the present moment is not based upon an engagement to co-operate in war.

You have, however, pointed out that, if either government had grave reason to expect an unprovoked attack by a third power, it might become essential to know whether it could in that event depend upon the armed assistance of the other.

I agree that, if either government had grave reason to expect an unprovoked attack by a third power, or something that threatened the general peace, it should immediately discuss with the other whether both governments should act together to prevent aggression and to preserve peace, and, if so, what measures they would be prepared to take in common. If these measures involved action, the plans of the general staffs would at once be taken into consideration, and the governments would then decide what effect should be given to them.

Yours, &c., E. GREY.

Enclosure 2 in No. 105.

M. CAMBON TO SIR EDWARD GREY.

(Translation.)

French Embassy, London, Nov. 23, 1912.

Dear Sir Edward: You reminded me in your letter of yesterday, 22d November, that during the last few years the military and naval authorities of France and Great Britain had consulted with each other from time to time; that it had always been understood that these consultations should not restrict the liberty of either government to decide in the future whether they should lend each other the support of their armed forces; that, on either side, these consultations between experts were not and should not be considered as engagements binding our governments to take action in certain eventualities; that, however, I had remarked to you that, if one or other of the two governments had grave reasons to fear an unprovoked attack on the part of a third power, it would become essential to know whether it could count on the armed support of the other.

Your letter answers that point, and I am authorized to state that, in the event of one of our two governments having grave reasons to fear either an attack from a third power, or some event threatening the general peace, that government would immediately examine with the other the question whether both governments should act together in order to prevent aggression or preserve peace. If so, the two governments would deliberate as to the measures which they would be prepared to take in common. If those measures involved action the two governments would take into immediate consideration the plans of their general staffs and would then decide as to the effect to be given to those plans.

Yours, &c., PAUL CAMBON.

Enclosure 3 in No. 105.

FRENCH MINISTER FOR FOREIGN AFFAIRS TO M. CAMBON.

(Translation.)

The German army had its advance posts on our frontiers yesterday (Friday). German patrols twice penetrated on to our territory. Our advance posts are withdrawn to a distance of 10 kilometers from the frontier. The local population is protesting against being thus abandoned to the attack of the enemy's army, but the government wishes to make it clear to public opinion and to the British government that in no case will France be the aggressor. The whole 16th corps from Metz, reinforced by a part of the 8th from Treves and Cologne, is occupying the frontier at Metz on the Luxemburg side. The 15th army corps from Strassburg has closed up on the frontier. The inhabitants of Alsace-Lorraine are prevented by the threat of being shot from crossing the frontier. Reservists have been called back to Germany by tens of thousands. This is the last stage before mobilization, whereas we have not called out a single reservist.

As you see, Germany has done it. I would add that all my information goes to show that the German preparations began on Saturday, the very day on which the Austrian note was handed in.

These facts, added to those contained in my telegram of yesterday, will enable you to prove to the British government the pacific intentions of the one party and the aggressive intentions of the other.

Paris, July 31, 1914.

NO. 106. SIR R. RODD TO SIR EDWARD GREY.

(Received July 31.)

(Telegraphic.) Rome, July 30, 1914.

I learned from the minister for foreign affairs, who sent for me this evening, that the Austrian government had declined to continue the direct exchange of views with the Russian government. But he had reason to believe that Germany was now disposed to give more conciliatory advice to Austria, as she seemed convinced that we should act with France and Russia, and was most anxious to avoid issue with us.

He said he was telegraphing to the Italian ambassador at Berlin to ask the German government to suggest that the idea of an exchange of views between the four powers should be resumed in any form which Austria would consider acceptable. It seemed to him that Germany might invite Austria to state exactly the terms which she would demand from Servia, and give a guarantee that she would neither deprive her of independence nor annex territory. It would be useless to ask for anything less than was contained in the Austrian ultimatum, and Germany would support no proposal that did not imply non-success for Austria. We might, on the other hand, ascertain from Russia what she would accept, and, once we knew the standpoints of these two countries, discussions could be commenced at once. There was still time so long as Austria had received no check. He in any case was in favor of continuing an exchange of views with his majesty's government if the idea of discussions between the four powers was impossible.

NO. 107. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Berlin, July 30, 1914.

I do not know whether you have received a reply from the German government to the communication* which you made to them through the German ambassador in London, asking whether they could suggest any method by which the four powers could use their mediating influence between Russia and Austria. I was informed last night that they had not had time to send an answer yet. Today, in reply to an inquiry from the French ambassador as to whether the Imperial government had proposed any course of action, the secretary of state said that he felt that time would be saved by communicating with Vienna direct, and that he had asked the Austro-Hungarian government what would satisfy them. No answer had, however, yet been returned.

The chancellor told me last night that he was "pressing the button" as hard as he could, and that he was not sure whether he had not gone so far in urging moderation at Vienna that matters had been precipitated rather than otherwise. *See No. 84.

NO. 108. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Berlin, July 31, 1914.

Chancellor informs me that his efforts to preach peace and moderation at Vienna have been seriously handicapped by the Russian mobilization against Austria. He has done everything possible to attain his object at Vienna, perhaps even rather more than was altogether palatable at the Ballplatz. He could not, however, leave his country defenseless while time was being utilized by other powers; and if, as he learns is the case, military measures are now being taken by Russia against Germany also, it would be impossible for him to remain quiet. He wished to tell me that it was quite possible that in a very short time, today perhaps, the German government would take some very serious step; he was, in fact, just on the point of going to have an audience with the emperor.

His excellency added that the news of the active preparations on the Russo-German frontier had reached him just when the czar had appealed to the emperor, in the name of their old friendship, to mediate at Vienna, and when the emperor was actually conforming to that request.

NO. 109. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Berlin, July 31, 1914.

I read to the chancellor this morning your answer to his appeal for British neutrality in the event of war, as contained in your telegram of yesterday.* His excellency was so taken up with the news of the Russian measures along the frontier, referred to in my immediately preceding telegram, that he received your communication without comment. He asked me to let him have the message that I had just read to him as a memorandum, as he would like to reflect upon it before giving an answer, and his mind was so full of grave matters that he could not be certain of remembering all its points. I therefore handed to him the text of your message on the understanding that it should be regarded merely as a record of conversation, and not as an official document.

His excellency agreed.

*See No. 101.

NO. 110. SIR EDWARD GREY TO SIR G. BUCHANAN.
(Telegraphic.)

London, Foreign Office, July 31, 1914.

I learn from the German ambassador that, as a result of suggestions by the German government, a conversation has taken place at Vienna between the Austrian minister for foreign affairs and the Russian ambassador. The Austrian ambassador at St. Petersburg has also been instructed that he may converse with the Russian minister for foreign affairs, and that he should give explanations about the Austrian ultimatum to Servia, and discuss suggestions and any questions directly affecting Austro-Russian relations. If the Russian government object to the Austrians mobilizing eight army corps, it might be pointed out that this is not too great a number against 400,000 Servians.

The German ambassador asked me to urge the Russian government to show good will in the discussions and to suspend their military preparations.

It is with great satisfaction that I have learned that discussions are being resumed between Austria and Russia, and you should express this to the minister for foreign affairs and tell him that I earnestly hope he will encourage them.

I informed the German ambassador that, as regards military preparations, I did not see how Russia could be urged to suspend them unless some limit were put by Austria to the advance of her troops into Servia.

NO. 111. SIR EDWARD GREY TO SIR E. GOSCHEN.
(Telegraphic.)

London, Foreign Office, July 31, 1914.

I hope that the conversations which are now proceeding between Austria and Russia may lead to a satisfactory result. The stumbling block hitherto has been Austrian mistrust of Servian assurances and Russian mistrust of Austrian intentions with regard to the independence and integrity of Servia. It has occurred to me that, in the event of this mistrust preventing a solution being found by Vienna and St. Petersburg, Germany might sound Vienna and I would undertake to sound St. Petersburg, whether it would be possible for the four disinterested powers to offer to Austria that they would undertake to see that she obtained full satisfaction of her demands on Servia, provided that they did not impair Servian sovereignty and the integrity of Servian territory. As your excellency is aware, Austria has already declared her willingness to respect them. Russia might be informed by the four powers that they would undertake to prevent Austrian demands going the length of impairing Servian sovereignty and integrity. All powers would of course suspend further military operation or preparations.

You may sound the secretary of state about this proposal.

I said to German ambassador this morning that if Germany could get any reasonable proposal put forward which made it clear that Germany and Austria were striving to preserve European peace, and that Russia and France would be unreasonable if they rejected it, I would support it at St. Petersburg and Paris, and go the length of saying that if Russia and France would not accept it his majesty's government would have nothing more to do with the consequences; but, otherwise, I told German ambassador that if France became involved we should be drawn in.

You can add this when sounding chancellor or secretary of state as to proposal above.

NO. 112. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Berlin, July 31, 1914.

According to information just received by German government from their ambassador at St. Petersburg, whole Russian army and fleet are being mobilized. Chancellor tells me that "kriegsgefahr" will be proclaimed at once by German government, as it can only be against Germany that Russian general mobilization is directed. Mobilization would follow almost immediately. His excellency added in explanation that "kriegsgefahr" signified the taking of certain precautionary measures consequent upon strained relations with a foreign country.

This news from St. Petersburg, added his excellency, seemed to him to put an end to all hope of a peaceful solution of the crisis. Germany must certainly prepare for all emergencies.

I asked him whether he could not still put pressure on the authorities at Vienna to do

something in general interests to reassure Russia and to show themselves disposed to continue discussions on a friendly basis. He replied that last night he had begged Austria to reply to your last proposal, and that he had received a reply to the effect that Austrian minister for foreign affairs would take wishes of the emperor this morning in the matter.

NO. 113. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) St. Petersburg, July 31, 1914.

It has been decided to issue orders for general mobilization.

This decision was taken in consequence of report received from Russian ambassador in Vienna to the effect that Austria is determined not to yield to intervention of powers and that she is moving troops against Russia as well as against Servia.

Russia has also reason to believe that Germany is making active military preparations, and she cannot afford to let her get a start.

NO. 114. SIR EDWARD GREY TO SIR F. BERTIE AND SIR E. GOSCHEN.

(Telegraphic.)

London, Foreign Office, July 31, 1914.

I still trust situation is not irretrievable, but in view of prospect of mobilization in Germany it becomes essential to his majesty's government, in view of existing treaties, to ask whether French (German) government is prepared to engage to respect neutrality of Belgium so long as no other power violates it.

A similar request is being addressed to German (French) government. It is important to have an early answer.

NO. 115. SIR EDWARD GREY TO SIR F. VILLIERS.
(Telegraphic.)

London, Foreign Office, July 31, 1914.

In view of existing treaties, you should inform minister for foreign affairs that, in consideration of the possibility of a European war, I have asked French and German governments whether each is prepared to respect the neutrality of Belgium provided it is violated by no other power.

You should say that I assume that the Belgian government will maintain to the utmost of her power her neutrality, which I desire and expect other powers to uphold and observe.

You should inform the Belgian government that an early reply is desired.

NO. 116. SIR EDWARD GREY TO SIR F. BERTIE.
(Telegraphic.)

London, Foreign Office, July 31, 1914.

I have received your telegram of yesterday's date.*

Nobody here feels that in this dispute, so far as it has yet gone, British treaties or obligations are involved. Feeling is quite different from what it was during the Morocco question. That crisis involved a dispute directly involving France, whereas in this case France is being drawn into a dispute which is not hers.

I believe it to be quite untrue that our attitude has been a decisive factor in situation. German government do not expect our neutrality.

We cannot undertake a definite pledge to intervene in a war. I have so told the French ambassador, who has urged his majesty's government to reconsider this decision.

I have told him that we should not be justified in giving any pledge at the present moment, but that we will certainly consider the situation again directly there is a new development.

NO. 117. SIR F. BERTIE TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Paris, July 31, 1914.

At 7 o'clock this evening I was sent for by minister for foreign affairs. When I arrived the German ambassador was leaving his excellency.

German ambassador had informed his excellency that, in view of the fact that orders had been given for the total mobilization of Russian army and fleet, German government have in an ultimatum which they have addressed to the Russian government required that Russian forces should be demobilized.

The German government will consider it necessary to order the total mobilization of the German army on the Russian and French frontiers if within twelve hours the Russian government do not give an undertaking to comply with German demand.

The minister for foreign affairs asks me to communicate this to you, and inquires what, in these circumstances, will be the attitude of England.

German ambassador could not say when the twelve hours terminate. He is going to call at the ministry for foreign affairs tomorrow (Saturday) at 1 p. m., in order to receive the French government's answer as to the attitude they will adopt in the circumstances.

He intimated the possibility of his requiring his passports.

I am informed by the Russian ambassador that he is not aware of any general mobilization of the Russian forces having taken place.

NO. 118. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received July 31.)

(Telegraphic.) Vienna, July 31, 1914.

I am informed by Count Forgach, under secretary of state, that although Austria was compelled to respond to Russian mobilization, which he deplored, the Austrian ambassador in London has received instructions to inform you that mobilization was not to be regarded as a necessarily hostile act on either side. Telegrams were being exchanged between the emperor of Russia and the German emperor, and conversations were proceeding between Austrian ambassador at St. Petersburg and Russian minister for foreign affairs. A general war might, he seriously hoped, be staved off by these efforts. On my expressing my fear that Germany would mobilize, he said that Germany must do something, in his opinion, to secure her position. As regards Russian intervention on behalf of Servia, Austria-Hungary found it difficult to recognize such a claim. I called his attention to the fact that during the discussion of the Albanian frontier at the London conference of ambassadors the Russian government had stood behind Servia, and that a compromise between the views of Russia and Austria-Hungary resulted with accepted frontier line. Although he spoke in a conciliatory tone, and did not regard the situation as desperate, I could not get from him any suggestion for a similar compromise in the present case. Count Forgach is going this afternoon to see the Russian ambassador, whom I have informed of the above conversation.

The Russian ambassador has explained that Russia has no desire to interfere unduly with Servia; that, as compared with the late Russian minister, the present minister at Belgrade is a man of very moderate views; and that, as regards Austrian demands, Russia had counseled Servia to yield to them as far as she possibly could without sacrificing her independence. His excellency is exerting himself strongly in the interests of peace.

NO. 119. SIR EDWARD GREY TO SIR F. BERTIE.

London, Foreign Office, July 31, 1914.

Sir:—M. Cambon referred today to a telegram that had been shown to Sir Arthur Nicolson this morning from the French ambassador in Berlin, saying that it was the uncertainty with regard to whether we would intervene which was the encouraging element in Berlin, and that if we would only declare definitely on the side of Russia and France it would decide the German attitude in favor of peace. I said that it was quite wrong to suppose that we had left Germany under the impression that we would not intervene. I had refused overtures to promise that we should remain neutral. I had not only definitely declined to say that we would remain neutral; I had even gone so far this morning as to say to the German ambassador that if France and Germany became involved in war we should

be drawn into it. That, of course, was not the same thing as taking an engagement to France, and I told M. Cambon of it only to show that we had not left Germany under the impression that we would stand aside.

M. Cambon then asked me for my reply to what he had said yesterday.

I said that we had come to the conclusion in the cabinet today that we could not give any pledge at the present time. Though we should have to put our policy before parliament, we could not pledge parliament in advance. Up to the present moment we did not feel, and public opinion did not feel, that any treaties or obligations of this country were involved. Further developments might alter this situation and cause the government and parliament to take the view that intervention was justified. The preservation of the neutrality of Belgium might be, I would not say a decisive, but an important factor, in determining our attitude. Whether we proposed to parliament to intervene or not to intervene in a war, parliament would wish to know how we stood with regard to the neutrality of Belgium, and it might be that I should ask both France and Germany whether each was prepared to undertake an engagement that she would not be the first to violate the neutrality of Belgium.

M. Cambon repeated the question whether we would help France if Germany made an attack on her.

I said I could only adhere to the answer that, as far as things had gone at present, we could not take any engagement.

M. Cambon urged that Germany had from the beginning rejected proposals that might have made for peace. It could not be to England's interest that France should be crushed by Germany. We should then be in a very diminished position with regard to Germany. In 1870 we had made a great mistake in allowing an enormous increase of German strength, and we should now be repeating the mistake. He asked me whether I could not submit the question to the cabinet again.

I said that the cabinet would certainly be summoned as soon as there was some new development, but at the present moment the only answer I could give was that we could not undertake any definite engagement.

I am, &c., E. GREY.

NO. 120. SIR G. BUCHANAN TO SIR EDWARD GREY.

(Received Aug. 1.)

(Telegraphic.) St. Petersburg, July 31, 1914.

Minister for foreign affairs sent for me and French ambassador and asked us to telegraph to our respective governments subjoined formula as best calculated to amalgamate proposal made by you in your telegram of 30th July* with formula recorded in my telegram of 30th July.† He trusted it would meet with your approval:

Translation.—"If Austria will agree to check the advance of her troops on Servian territory; if recognizing that the dispute between Austria and Servia has assumed a character of European interest, she will allow the great powers to look into the matter and determine whether Servia could satisfy the Austro-Hungarian government without impairing her rights as a sovereign state or her independence, Russia will undertake to maintain her waiting attitude."

His excellency then alluded to the telegram sent to German emperor by emperor of Russia in reply to the former's telegram. He said that Emperor Nicholas had begun by thanking Emperor William for his telegram and for the hopes of peaceful solution which it held out. His majesty had then proceeded to assure Emperor William that no intention whatever of an aggressive character was concealed behind Russian military preparations. So long as conversation with Austria continued, his imperial majesty undertook that not a single man should be moved across the frontier; it was, however, of course impossible, for reasons explained, to stop a mobilization which was already in progress.

M. Sazonof said that undoubtedly there would be better prospect of a peaceful solution if the suggested conversation were to take place in London, where the atmosphere was far more favorable, and he therefore hoped that you would see your way to agreeing to this.

His excellency ended by expressing his deep gratitude to his majesty's government, who had done so much to save the situation. It would be largely due to them if war were prevented. The emperor, the Russian government, and the Russian people would never forget the firm attitude adopted by Great Britain.

NO. 121. SIR E. GOSCHEN TO SIR EDWARD GREY.

(Received Aug. 1.)

(Telegraphic.) Berlin, July 31, 1914.

Your telegram of 31st July.*

I spent an hour with secretary of state urging him most earnestly to accept your proposal and make another effort to prevent terrible catastrophe of a European war.

He expressed himself very sympathetically toward your proposal, and appreciated your continued efforts to maintain peace, but said it was impossible for the imperial government to consider any proposal until they had received an answer from Russia to their communication of today; this communication, which he admitted had the form of an ultimatum, being that, unless Russia could inform the imperial government within twelve hours that she would immediately countermand her mobilization against Germany and Austria, Germany would be obliged on her side to mobilize at once.

I asked his excellency why they had made their demand even more difficult for Russia to accept by asking them to demobilize in south as well. He replied that it was in order to prevent Russia from saying all her mobilization was only directed against Austria.

His excellency said that if the answer from Russia was satisfactory he thought personally that your proposal merited favorable consideration, and in any case he would lay it before the emperor and chancellor, but he repeated that it was no use discussing it until the Russian government had sent in their answer to the German demand.

He again assured me that both the Emperor William, at the request of the emperor of Russia, and the German foreign office had even up till last night been urging Austria to show willingness to continue discussions—and telegraphic and telephonic communications from Vienna had been of a promising nature—but Russia's mobilization had spoiled everything.

(Telegraphic.) Berlin, July 31, 1914.

Neutrality of Belgium, referred to in your telegram of 31st July to Sir F. Bertie.*

I have seen secretary of state, who informs me that he must consult the emperor and the chancellor before he could possibly answer. I gathered from what he said that he thought any reply they might give could not but disclose a certain amount of their plan of campaign in the event of war ensuing, and he was therefore very doubtful whether they would return any answer at all. His excellency, nevertheless, took note of your request.

It appears from what he said that German government consider that certain hostile acts have already been committed by Belgium. As an instance of this, he alleged that a consignment of corn for Germany had been placed under an embargo already.

I hope to see his excellency tomorrow again to discuss the matter further, but the prospect of obtaining a definite answer seems to me remote.

In speaking to me today the chancellor made it clear that Germany would in any case desire to know the reply returned to you by the French government.

NO. 123. SIR EDWARD GREY TO SIR E. GOSCHEN.

London, Foreign Office, Aug. 1, 1914.

Sir:—I told the German ambassador today that the reply* of the German government with regard to the neutrality of Belgium was a matter of very great regret, because the neutrality of Belgium affected feeling in this country. If Germany could see her way to give the same assurance as that which had been given by France it would materially contribute to relieve anxiety and tension here. On the other hand, if there were a violation of the neutrality of Belgium by one combatant while the other respected it, it would be extremely difficult to restrain public feeling in this country. I said that we had been discussing this question at a cabinet meeting, and as I was authorized to tell him this I gave him a memorandum of it.

He asked me whether, if Germany gave a promise not to violate Belgian neutrality, we would engage to remain neutral.

I replied that I could not say that; our hands were still free, and we were considering what our attitude should be. All I could say was that our attitude would be determined largely by public opinion here, and that neutrality of Belgium would appeal very strongly to public opinion here. I did not think that we could give a promise of neutrality on that condition alone.

The ambassador pressed me as to whether I could not formulate conditions on which we would remain neutral. He even suggested that the integrity of France and her colonies might be guaranteed.

I said that I felt obliged to refuse definitely any promise to remain neutral on similar terms, and I could only say that we must keep our hands free. I am, &c., E. GREY.

(Received Aug. 1.)

(Telegraphic.) Paris, July 31, 1914.

On the receipt at 8:30 tonight of your telegram of this afternoon,* I sent a message to minister for foreign affairs requesting to see him. He received me at 10:30 tonight at the Elysee, where a cabinet council was being held. He took a note of the inquiry as to the respecting by France of the neutrality of Belgium which you instructed me to make.

He told me that a communication had been made to you by the German ambassador in London of the intention of Germany to order a general mobilization of her army if Russia do not demobilize at once. He is urgently anxious as to what the attitude of England will be in the circumstances, and begs an answer may be made by his majesty's government at the earliest moment possible.

Minister for foreign affairs also told me that the German embassy is packing up.

My immediately preceding telegram.*

Political director has brought me the reply of the minister for foreign affairs to your inquiry respecting the neutrality of Belgium. It is as follows:

French government are resolved to respect the neutrality of Belgium, and it would only be in the event of some other power violating that neutrality that France might find herself under the necessity, in order to assure defense of her own security, to act otherwise. This assurance has been given several times. President of the republic spoke of it to the king of the Belgians, and the French minister at Brussels has spontaneously renewed the assurance to the Belgian minister of foreign affairs today.

NO. 126. SIR F. BERTIE TO SIR EDWARD GREY.

(Received Aug. 1.)

(Telegraphic.) Paris, Aug. 1, 1914.

I have had conversation with the political director, who states that the German ambassador was informed on calling at the ministry for foreign affairs this morning, that the French government failed to comprehend the reason which prompted his communication of yesterday evening. It was pointed out to his excellency that general mobilization in Russia had not been ordered until after Austria had decreed a general mobilization and that the Russian government were ready to demobilize if all powers did likewise. It seemed strange to the French government that in view of this and of the fact that Russia and Austria were ready to converse, the German government should have at that moment presented an ultimatum at St. Petersburg requiring immediate demobilization by Russia. There were no differences at issue between France and Germany, but the German ambassador had made a menacing communication to the French government and had requested an answer the next day, intimating that he would have to break off relations and leave Paris if the reply were not satisfactory. The ambassador was informed that the French government considered that this was an extraordinary proceeding.

The German ambassador, who is to see the minister for foreign affairs again this evening, said nothing about demanding his passports, but he stated that he had packed up.

Belgian neutrality.

The instructions conveyed in your telegram of yesterday* have been acted upon.

Belgium expects and desires that other powers will observe and uphold her neutrality, which she intends to maintain to the utmost of her power. In so informing me, minister for foreign affairs said that, in the event of the violation of the neutrality of their territory, they believed that they were in a position to defend themselves against intrusion. The relations between Belgium and her neighbors were excellent, and there was no reason to suspect their intentions; but he thought it well, nevertheless, to be prepared against emergencies.

The Luxemburg minister of state has just received through the German minister in Luxemburg, M. de Buch, a telegram from the chancellor of the German empire, Bethmann-Hollweg, to the effect that the military measures taken in Luxemburg do not constitute a hostile act against Luxemburg, but are only intended to insure against a possible attack of a French army. Full compensation will be paid to Luxemburg for any damage caused by using the railways, which are leased to the empire.

London, Foreign Office, Aug. 1, 1914.

We are informed that authorities at Hamburg have forcibly detained steamers belonging to the Great Central company and other British merchant ships.

I cannot ascertain on what grounds the detention of British ships has been ordered.

You should request German government to send immediate orders that they should be allowed to proceed without delay. The effect on public opinion here will be deplorable unless this is done. His majesty's government, on their side, are most anxious to avoid any incident of an aggressive nature, and the German government will, I hope, be equally careful not to take any step which would make the situation between us impossible.

London, Foreign Office, Aug. 1, 1914.

I still believe that it might be possible to secure peace if only a little respite in time can be gained before any great power begins war.

The Russian government has communicated to me the readiness of Austria to discuss with Russia and the readiness of Austria to accept a basis of mediation which is not open to the objections raised in regard to the formula which Russia originally suggested.

Things ought not to be hopeless so long as Austria and Russia are ready to converse, and I hope that German government may be able to make use of the Russian communications referred to above, in order to avoid tension. His majesty's government are carefully abstaining from any act which may precipitate matters.

M. De Etter came today to communicate the contents of a telegram from M. Sazonof, dated the 31st July, which are as follows:

"The Austro-Hungarian ambassador declares the readiness of his government to discuss the substance of the Austrian ultimatum to Servia. M. Sazonof replied by expressing his satisfaction and said it was desirable that the discussions should take place in London with the participation of the great powers.

"M. Sazonof hoped that the British government would assume the direction of these discussions. The whole of Europe would be thankful to them. It would be very important that Austria should meanwhile put a stop provisionally to her military action on Servian territory." (The above has been communicated to the six powers.)

NO. 134. SIR F. BERTIE TO SIR EDWARD GREY. (Received Aug. 1.)

(Telegraphic.) Paris, Aug. 1, 1914.

President of the republic has informed me that German government were trying to saddle Russia with the responsibility; that it was only after a decree of general mobilization had been issued in Austria that the emperor of Russia ordered a general mobilization; that, although the measures which the German government have already taken are in effect a general mobilization, they are not so designated; that a French general mobilization will become necessary in self-defense, and that France is already forty-eight hours behind Germany as regards German military preparations; that the French troops have orders not to go nearer to the German frontier than a distance of 10 kilometers so as to avoid any grounds for accusations of provocation to Germany, whereas the German troops, on the other hand, are actually on the French frontier and have made incursions on it; that, notwithstanding mobilizations, the emperor of Russia has expressed himself ready to continue his conversations with the German ambassador with a view to preserving the peace; that French government, whose wishes are markedly pacific, sincerely desire the preservation of peace and do not quite despair, even now, of its being possible to avoid war.

NO. 135. SIR EDWARD GREY TO SIR G. BUCHANAN. (Telegraphic.)

London, Foreign Office, Aug. 1, 1914.

Information reaches me from a most reliable source that Austrian government have informed German government that, though the situation has been changed by the mobilization of Russia, they would in full appreciation of the efforts of England for the preservation of peace be ready to consider favorably my proposal for mediation between Austria and Servia. The understanding of this acceptance would naturally be that the Austrian military action against Servia would continue for the present, and that the British government would urge upon Russian government to stop the mobilization of troops directed against Austria, in which case Austria would naturally cancel those defensive military countermeasures in Galicia, which have been forced upon Austria by Russian mobilization.

You should inform minister for foreign affairs and say that if, in the consideration of the acceptance of mediation by Austria, Russia can agree to stop mobilization, it appears still to be possible to preserve peace. Presumably the matter should be discussed with German government, also by Russian government.

NO. 136. SIR F. BERTIE TO SIR EDWARD GREY. (Received Aug. 1.)

(Telegraphic.) Paris, Aug. 1, 1914.

Minister of war informed military attache this afternoon that orders had been given at 3:40 for a general mobilization of the French army. This became necessary because the minister of war knows that, under the system of "Kriegszustand," the Germans have called up six classes. Three classes are sufficient to bring their covering troops up to war strength, the remaining three being the reserve. This, he said, being tantamount to mobilization, is mobilization under another name.

The French forces on the frontier have opposed to them eight army corps on a war footing, and an attack is expected at any moment. It is therefore of the utmost importance to guard against this. A zone of ten kilom. has been left between the French troops and German frontier. The French troops will not attack, and the minister of war is anxious that it should be explained that this act of mobilization is one for purely defensive purposes.

NO. 137. SIR EDWARD GREY TO SIR M. DE BUNSEN. (Telegraphic.)

London, Foreign Office, Aug. 1, 1914.

I saw the Austro-Hungarian ambassador this morning. He supplied me with the substance of a telegram which the Austro-Hungarian minister for foreign affairs had sent to the Austrian ambassador in Paris. In this telegram his excellency was given instructions to assure the French minister for foreign affairs that there was no intention in the minds of the Austro-Hungarian government to impair the sovereign rights of Servia or to obtain territorial aggrandizement. The ambassador added that he was further instructed to inform the French minister for foreign affairs that there was no truth in the report which had been published in Paris to the effect that Austria-Hungary intended to occupy the Sanjak.

Count Mensdorff called again later at the foreign office. He informed me of a telegram sent yesterday to the Austro-Hungarian ambassador at St. Petersburg by Count Berchtold, and gave me the substance.

It states that Count Berchtold begged the Russian ambassador, whom he sent for yesterday, to do his best to remove the wholly erroneous impression in St. Petersburg that the "door had been banged" by Austria-Hungary on all further conversations. The Russian ambassador promised to do this. Count Berchtold repeated on this occasion to the Russian ambassador the assurance which had already been given at St. Petersburg, to the effect that neither an infraction of Servian sovereign rights nor the acquisition

of Servian territory was being contemplated by Austria-Hungary.

Special attention was called by Count Mensdorff to the fact that this telegram contains a statement to the effect that conversations at St. Petersburg had not been broken off by Austria-Hungary.

NO. 138. SIR E. GOSCHEN TO SIR EDWARD GREY.
(Received Aug. 2.)

(Telegraphic.) Berlin, Aug. 1, 1914.

Your telegram of today.*

I have communicated the substance of the above telegram to the secretary of state for foreign affairs, and spent a long time arguing with him that the chief dispute was between Austria and Russia, and that Germany was only drawn in as Austria's ally. If, therefore, Austria and Russia were, as was evident, ready to discuss matters and Germany did not desire war on her own account, it seemed to me only logical that Germany should hold her hand and continue to work for a peaceful settlement. Secretary of state for foreign affairs said that Austria's readiness to discuss was the result of German influence at Vienna, and, had not Russia mobilized against Germany, all would have been well. But Russia, by abstaining from answering Germany's demand that she should demobilize, had caused Germany to mobilize also. Russia had said that her mobilization did not necessarily imply war, and that she could perfectly well remain mobilized for months without making war. This was not the case with Germany. She had the speed and Russia had the numbers, and the safety of the German empire forbade that Germany should allow Russia time to bring up masses of troops from all parts of her wide dominions. The situation now was that, though the imperial government had allowed her several hours beyond the specified time, Russia had sent no answer. Germany had, therefore, ordered mobilization, and the German representative at St. Petersburg had been instructed within a certain time to inform the Russian government that the imperial government must regard their refusal to answer as creating a state of war.

NO. 139. SIR G. BUCHANAN TO SIR EDWARD GREY.
(Received August 2.)

(Telegraphic.) St. Petersburg, Aug. 1, 1914.

My telegram of 31st July.*

The emperor of Russia read his telegram to the German emperor to the German ambassador at the audience given to his excellency yesterday. No progress whatever was made.

In the evening M. Sazonof had an interview with the Austrian ambassador, who, not being definitely instructed by his government, did his best to deflect the conversation toward a general discussion of the relations between Austria-Hungary and Russia instead of keeping to the question of Servia. In reply the minister for foreign affairs expressed his desire that these relations should remain friendly, and said that, taken in general, they were perfectly satisfactory; but the real question which they had to solve at this moment was whether Austria was to crush Servia and to reduce her to the status of a vassal, or whether she was to leave Servia a free and independent state. In these circumstances, while the Servian question was unsolved, the abstract discussion of the relations between Austria-Hungary and Russia was a waste of time. The only place where a successful discussion of this question could be expected was London, and any such discussion was being made impossible by the action of Austria-Hungary in subjecting Belgrade, a virtually unfortified town, to bombardment.

M. Sazonof informed the French ambassador and myself this morning of his conversation with the Austrian ambassador. He went on to say that during the Balkan crisis he had made it clear to the Austrian government that war with Russia must inevitably follow an Austrian attack on Servia. It was clear that Austrian domination of Servia was as intolerable for Russia as the dependence of the Netherlands on Germany would be to Great Britain. It was, in fact, for Russia a question of life and death. The policy of Austria had throughout been both tortuous and immoral, and she thought that she could treat Russia with defiance, secure in the support of her German ally. Similarly the policy of Germany had been an equivocal and double-faced policy, and it mattered little whether the German government knew or did not know the terms of the Austrian ultimatum; what mattered was that her intervention with the Austrian government had been postponed until the moment had passed when its influence would have been felt. Germany was unfortunate in her representatives in Vienna and St. Petersburg; the former was a violent Russophobe who had urged Austria on, the latter had reported to his government that Russia would never go to war. M. Sazonof was completely weary of the ceaseless endeavors he had made to avoid a war. No suggestion held out to him had been refused. He had accepted the proposal for a conference of four, for mediation by Great Britain and Italy, for direct conversation between Austria and Russia; but Germany and Austria-Hungary had either rendered these attempts for peace ineffective by evasive replies or had refused them altogether. The action of the Austro-Hungarian government and the German preparations had forced the Russian government to order mobilization, and the mobilization of Germany had created a desperate situation.

M. Sazonof added that the formula, of which the text is contained in my telegram of 31st July,* had been forwarded by the Russian government to Vienna, and he would adhere to it if you could obtain its acceptance before the frontier was crossed by German troops. In no case would Russia begin hostilities first.

I now see no possibility of a general war being avoided unless the agreement of France and Germany can be obtained to keep their armies mobilized on their own sides of the frontier, as Russia has expressed her readiness to do, pending a last attempt to reach a settlement of the present crisis.

NO. 140. SIR F. BERTIE TO SIR EDWARD GREY.
(Received Aug. 1.)

(Telegraphic.) Paris, Aug. 1, 1914.

The minister of war again sent for the military attache this evening, as he said he wished to keep him informed of the situation. He laid great stress on the fact that the zone of 10 kilom. which he had arranged between the French troops and the German frontier, and which was still occupied by peasants, was a proof of the French endeavors to commit no provocative act.

NO. 141. SIR M. DE BUNSEN TO SIR EDWARD GREY.
(Received Aug. 2.)

(Telegraphic.) Vienna, Aug. 1, 1914.

I am to be received tomorrow by minister for foreign affairs. This afternoon he is to see the French and Russian ambassadors. I have just been informed by the Russian ambassador of German ultimatum requiring that Russia should demobilize within twelve hours. On being asked by the Russian minister for foreign affairs whether the inevitable refusal of Russia to yield to this curt summons meant war, the German ambassador replied that Germany would be forced to mobilize if Russia refused. Russian ambassador at Vienna thinks that war is almost inevitable, and that mobilization is too expensive to be kept for long. Germany will attack Russia at once. He says that the so-called mobilization of Russia amounted to nothing more than that Russia had taken military measures corresponding to those taken by Germany. There seems to be even greater tension between Germany and Russia than there is between Austria and Russia. Russia would, according to the Russian ambassador, be satisfied even now with assurance respecting Servian integrity and independence. He says that Russia had no intention to attack Austria. He is going again today to point out to the minister for foreign affairs

that most terrific consequences must ensue from refusal to make this slight concession. This time Russia would fight to the last extremity. I agree with his excellency that the German ambassador at Vienna desired war from the first, and that his strong personal bias probably colored his action here. The Russian ambassador is convinced that the German government also desired war from the first.

It is the intention of the French ambassador to speak earnestly to the minister for foreign affairs today on the extreme danger of the situation, and to ask whether proposals to serve as a basis of mediation from any quarter are being considered. There is great anxiety to know what England will do. I fear that nothing can alter the determination of Austro-Hungarian government to proceed on their present course if they have made up their mind with the approval of Germany.

My telegram of Aug. 1.*

Secretary of state informs me that orders were sent last night to allow British ships in Hamburg to proceed on their way. He says that this must be regarded as a special favor to his majesty's government, as no other foreign ships have been allowed to leave. Reason of detention was that mines were being laid and other precautions being taken.

NO. 147. MINISTER OF STATE, LUXEMBURG, TO SIR EDWARD GREY.
(Received Aug. 2.)
(Translation.)

(Telegraphic.) Luxemburg, Aug. 2, 1914.

I have the honor to bring to your excellency's notice the following facts:

On Sunday, the 2d August, very early, the German troops, according to the information which has up to now reached the grand ducal government, penetrated into Luxemburg territory by the bridges of Wasserbillig and Remich, and proceeded particularly toward the south and in the direction of Luxemburg, the capital of the grand duchy. A certain number of armored trains with troops and ammunition have been sent along the railway line from Wasserbillig to Luxemburg, where their arrival is expected. These occurrences constitute acts which are manifestly contrary to the neutrality of the grand duchy as guaranteed by the treaty of London of 1867. The Luxemburg government have not failed to address an energetic protest against this aggression to the representatives of his majesty the German emperor at Luxemburg. An identical protest will be sent by telegraph to the secretary of state for foreign affairs at Berlin.

NO. 148. SIR EDWARD GREY TO SIR F. BERTIE.
(Telegraphic.)

London, Foreign Office, Aug. 2, 1914.

After the cabinet this morning I gave M. Cambon the following memorandum:

"I am authorized to give an assurance that if the German fleet comes into the channel or through the North Sea to undertake hostile operations against French coasts or shipping, the British fleet will give all the protection in its power.

"This assurance is of course subject to the policy of his majesty's government receiving the support of parliament, and must not be taken as binding his majesty's government to take any action until the above contingency of action by the German fleet takes place."

I pointed out that we had very large questions and most difficult issues to consider, and that government felt that they could not bind themselves to declare war upon Germany necessarily if war broke out between France and Germany tomorrow, but it was essential to the French government, whose fleet had long been concentrated in the Mediterranean, to know how to make their dispositions with their north coast entirely undefended. We therefore thought it necessary to give them this assurance. It did not bind us to go to war with Germany unless the German fleet took the action indicated, but it did give a security to France that would enable her to settle the disposition of her own Mediterranean fleet.

M. Cambon asked me about the violation of Luxemburg I told him the doctrine on that point laid down by Lord Derby and Lord Clarendon in 1867. He asked me what we should say about the violation of the neutrality of Belgium. I said that was a much more important matter; we were considering what statement we should make in parliament tomorrow—in effect, whether we should declare violation of Belgian neutrality to be a casus belli. I told him what had been said to the German ambassador on this point.

action which they may think it necessary to take."

NO. 152. SIR EDWARD GREY TO SIR F. BERTIE.

London, Foreign Office, Aug 3, 1914.

Sir:—On the 1st instant the French ambassador made the following communication:

"In reply to the German government's intimation of the fact that ultimatums had been presented to France and Russia, and to the question as to what were the intentions of Italy, the Marquis di San Giuliano replied:

" 'The war undertaken by Austria, and the consequences which might result, had, in the word of the German ambassador himself, an aggressive object. Both were therefore in conflict with the purely defensive character of the triple alliance, and in such circumstances Italy would remain neutral.' "

In making this communication, M. Cambon was instructed to lay stress upon the Italian declaration that the present war was not a defensive but an aggressive war, and that, for this reason, the casus fœderis under the terms of the triple alliance did not arise.

I am, &c., E. GREY.

The king of the Belgians had made an appeal to his majesty the king for diplomatic intervention on behalf of Belgium in the following terms.

"Remembering the numerous proofs of your majesty's friendship and that of your predecessor, and the friendly attitude of England in 1870, and the proof of friendship you have just given us again, I make a supreme appeal to the diplomatic intervention of your majesty's government to safeguard the integrity of Belgium."

His majesty's government are also informed that the German government has delivered to the Belgian government a note proposing friendly neutrality entailing free passage through Belgian territory, and promising to maintain the independence and integrity of the kingdom and its possessions at the conclusion of peace, threatening in case of refusal to treat Belgium as an enemy. An answer was requested within twelve hours.

We also understand that Belgium has categorically refused this as a flagrant violation of the law of nations.

His majesty's government are bound to protest against this violation of a treaty to which Germany is a party in common with themselves, and must request an assurance that the demand made upon Belgium will not be proceeded with, and that her neutrality will be respected by Germany. You should ask for an immediate reply.

I continue to receive numerous complaints from British firms as to the detention of their ships at Hamburg, Cuxhaven, and other German ports. This action on the part of the German authorities is totally unjustifiable. It is in direct contravention of international law and of the assurances given to your excellency by the imperial chancellor. You should demand the immediate release of all British ships if such release has not yet been given.

NO. 157. GERMAN FOREIGN SECRETARY TO PRINCE LICHNOWSKY.

(Communicated by Germany embassy, Aug. 4.)

(Telegraphic.) Berlin, Aug. 4, 1914.

Please dispel any mistrust that may subsist on the part of the British government with regard to our intentions, by repeating most positively formal assurance that, even in the case of armed conflict with Belgium, Germany will, under no pretense whatever, annex Belgian territory. Sincerity of this declaration is borne out by fact that we solemnly pledged our word to Holland strictly to respect her neutrality. It is obvious that we could not profitably annex Belgian territory without making at the same time territorial acquisitions at expense of Holland. Please impress upon Sir E. Grey that German army could not be exposed to French attack across Belgium, which was planned according to absolutely unimpeachable information. Germany had consequently to disregard Belgian neutrality, it being for her a question of life or death to prevent French advance.

London, Foreign Office, Aug. 4, 1914.

We hear that Germany has addressed note to Belgian minister for foreign affairs stating that German government will be compelled to carry out, if necessary by force of arms, the measure considered indispensable.

We are also informed that Belgian territory has been violated at Gemmenich.

In these circumstances, and in view of the fact that Germany declined to give the same assurance respecting Belgium as France gave last week in reply to our request made simultaneously at Berlin and Paris, we must repeat that request, and ask that a satisfactory reply to it and to my telegram of this morning* be received here by 12 o'clock tonight. If not, you are instructed to ask for your passports, and to say that his majesty's goverment feel bound to take all steps in their power to uphold the neutrality of Belgium and the observance of a treaty to which Germany is as much a party as ourselves.

NO. 160. SIR E. GOSCHEN TO SIR EDWARD GREY.

[Issued by the British government in continuation of preceding dispatches. It is entitled "Dispatch from his majesty's ambassador at Berlin respecting the rupture of diplomatic relations with the German government."]

London, Aug. 8, 1914.

Sir: In accordance with the instructions contained in your telegram of the 4th instant* I called upon the secretary of state that afternoon and inquired in the name of his majesty's government, whether the imperial government would refrain from violating Belgian neutrality. Herr von Jagow at once replied that he was sorry to say that his answer must be "No," as, in consequence of the German troops having crossed the frontier that morning, Belgian neutrality had been already violated. Herr von Jagow again

went into the reasons why the imperial government had been obliged to take this step, namely, that they had to advance into France by the quickest and easiest way, so as to be able to get well ahead with their operations and endeavour to strike some decisive blow as early as possible. It was a matter of life and death for them, as if they had gone by the more southern route they could not have hoped, in view of the paucity of roads and the strength of the fortresses, to have got through without formidable opposition entailing great loss of time. This loss of time would have meant time gained by the Russians for bringing up their troops to the German frontier. Rapidity of action was the great German asset, while that of Russia was an inexhaustible supply of troops. I pointed out to Herr von Jagow that this fait accompli of the violation of the Belgian frontier rendered, as he would readily understand, the situation exceeding grave, and I asked him whether there was not still time to draw back and avoid possible consequences, which both he and I would deplore. He replied that, for the reasons he had given me, it was now impossible for them to draw back.

During the afternoon I received your further telegram of the same date† and, in compliance with the instructions therein contained, I again proceeded to the imperial foreign office and informed the secretary of state that unless the imperial government could give the assurance by 12 o'clock that night that they would proceed no further with their violation of the Belgian frontier and stop their advance, I had been instructed to demand my passports and inform the imperial government that his majesty's government would have to take all steps in their power to uphold the neutrality of Belgium and the observance of a treaty to which Germany was as much a party as themselves.

Herr von Jagow replied that to his great regret he could give no other answer than that which he had given me earlier in the day, namely, that the safety of the empire rendered it absolutely necessary that the imperial troops should advance through Belgium. I gave his excellency a written summary of your telegram and, pointing out that you had mentioned 12 o'clock as the time when his majesty's government would expect an answer, asked him whether, in view of the terrible consequences which would necessarily ensue, it were not possible even at the last moment that their answer should be reconsidered. He replied that if the time given were even twenty-four hours or more, his answer must be the same. I said that in that case I should have to demand my passports. This interview took place at about 7 o'clock. In a short conversation which ensued Herr von Jagow expressed his poignant regret at the crumbling of his entire policy and that of the chancellor, which had been to make friends with Great Britain and then, through Great Britain, to get closer to France. I said that this sudden end to my work in Berlin was to me also a matter of deep regret and disappointment, but that he must understand that under the circumstances and in view of our engagements, his majesty's government could not possibly have acted otherwise than they had done.

I then said that I should like to go and see the chancellor, as it might be, perhaps, the last time I should have an opportunity of seeing him. He begged me to do so. I found the chancellor very agitated. His excellency at once began a harangue which lasted for about 20 minutes. He said that the step taken by his majesty's government was terrible to a degree; just for a word —"neutrality," a word which in war time had so often been disregarded—just for a scrap of paper Great Britain was going to make war on a kindred nation who desired nothing better than to be friends with her. All his efforts in that direction had been rendered useless by this last terrible step, and the policy to which, as I knew, he had devoted himself since his accession to office had tumbled down like a house of cards. What we had done was unthinkable; it was like striking a man from behind while he was fighting for his life against two assailants. He held Great Britain responsible for all the terrible events that might happen. I protested strongly against that statement, and said that, in the same way as he and Herr von Jagow wished me to understand that for strategical reasons it was a matter of life and death to Germany to advance through Belgium and violate the latter's neutrality, so I would wish him to understand that it was, so to speak, a matter of "life and death" for the honour of Great Britain that she should keep her solemn engagement to do her utmost to defend Belgium's neutrality if attacked. That solemn compact simply had to be kept, or what confidence could any one have in engagements given by Great Britain in the future? The chancellor said, "But at what price will that compact have been kept? Has the British government thought of that?" I hinted to his excellency as plainly as I could that fear of consequences could hardly be regarded as an excuse for breaking solemn engagements, but his excellency was so excited, so evidently overcome by the news of our action, and so little disposed to hear reason, that I refrained from adding fuel to the flame by further argument. As I was leaving he said that the blow of Great Britain joining Germany's enemies was all the greater that almost up to the last moment he and his government had been working with us and supporting our efforts to maintain peace between Austria and Russia. I said that this was part of the tragedy which saw the two nations fall apart just at the moment when the relations between them had been more friendly and cordial than they had been for years. Unfortunately, notwithstanding our efforts to maintain peace between Russia and Austria, the war had spread and had brought us face to face with a situation which, if we held to our engagements, we could not possibly avoid, and which unfortunately entailed our separation from our late fellow workers. He would readily understand that no one regretted this more that I.

After this somewhat painful interview I returned to the embassy and drew up a telegraphic report of what had passed. This telegram was handed in at the central telegraph office a little before 9 p. m. It was accepted by that office, but apparently never dispatched.‡

At about 9:30 p. m. Herr von Zimmerman, the under secretary of state, came to see me. After expressing his deep regret that the very friendly official and personal relations between us were about to cease, he asked me casually whether a demand for passports was equivalent to a declaration of war. I said that such an authority on international law as he was known to be must know as well or better than I what was usual in such cases. I added that there were many cases where diplomatic relations had been broken off and, nevertheless, war had not ensued; but that in this case he would have seen from my instructions, of which I have given Herr von Jagow a written summary, that his majesty's government expected an answer to a definite question by 12 o'clock that night and that in default of a satisfactory answer they would be forced to take such steps as their engagements required. Herr Zimmerman said that that was, in fact, a declaration of war, as the imperial government could not possibly give the assurance required either that night or any other night.

In the meantime, after Herr Zimmerman left me, a flying sheet, issued by the "Berliner Tageblatt," was circulated stating that Great Britain had declared war against Germany. The immediate result of this news was the assemblage of an exceedingly excited and unruly mob before his majesty's embassy. The small force of police which had been sent to guard the embassy was soon overpowered, and the attitude of the mob became more threatening. We took no notice of this demonstration as long as it was confined to noise, but when the crash of glass and the landing of cobblestones into the drawing room, where we were all sitting, warned us that the situation was getting unpleasant, I telephoned to the foreign office an account of what was happening. Herr von Jagow at once informed the chief of police, and an adequate force of mounted police, sent with great promptness, very soon cleared the

street. From that moment on we were well guarded, and no more direct unpleasantness occurred.

After order had been restored Herr von Jagow came to see me and expressed his most heartfelt regrets at what had occurred. He said that the behaviour of his countrymen had made him feel more ashamed than he had words to express. It was an indelible stain on the reputation of Berlin. He said that the flying sheet circulated in the streets had not been authorized by the government; in fact, the chancellor had asked him by telephone whether he thought that such a statement should be issued, and he had replied, "Certainly not, until the morning." It was in consequence of his decision to that effect that only a small force of police had been sent to the neighbourhood of the embassy, as he had thought that the presence of a large force would inevitably attract attention and perhaps lead to disturbances. It was the "pestilential 'Tageblatt,' " which had somehow got hold of the news, that had upset his calculations. He had heard rumours that the mob had been excited to violence by gestures made and missiles thrown from the embassy, but that he felt sure that that was not true (I was able soon to assure him that the report had no foundation whatever), and even if it was, it was no excuse for the disgraceful scenes that had taken place. He feared that I would take home with me a sorry impression of Berlin manners in moments of excitement. In fact, no apology could have been more full and complete.

On the following morning, the 5th August, the emperor sent one of his majesty's aides-de-camp to me with the following message:

"The emperor has charged me to express to your excellency his regret for the occurrences of last night, but to tell you at the same time that you will gather from those occurrences an idea of the feelings of his people respecting the action of Great Britain in joining with other nations against her old allies of Waterloo. His majesty also begs that you will tell the king that he has been proud of the titles of British field marshal and British admiral, but that in consequence of what has occurred he must now at once divest himself of those titles."

I would add that the above message lost none of its acerbity by the manner of its delivery.

On the other hand, I should like to state that I received all through this trying time nothing but courtesy at the hands of Herr von Jagow and the officials of the imperial foreign office. At about 11 o'clock on the same morning Count Wedel handed me my passports—which I had earlier in the day demanded in writing—and told me that he had been instructed to confer with me as to the route which I should follow for my return to England. He said that he had understood that I preferred the route via the Hook of Holland to that via Copenhagen; they had therefore arranged that I should go by the former route, only I should have to wait till the following morning. I agreed to this, and he said that I might be quite assured that there would be no repetition of the disgraceful scenes of the preceding night, as full precautions would be taken. He added that they were doing all in their power to have a restaurant car attached to the train, but it was rather a difficult matter. He also brought me a charming letter from Herr von Jagow couched in the most friendly terms. The day was passed in packing up such articles as time allowed.

The night passed quietly without any incident. In the morning a strong force of police was posted along the usual route to the Lehrter station, while the embassy was smuggled away in taxicabs to the station by side streets. We there suffered no molestation whatever, and avoided the treatment meted out by the crowd to my Russian and French colleagues. Count Wedel met us at the station to say good-bye on behalf of Herr von Jagow and to see that all the arrangements ordered for our comfort had been properly carried out. A retired colonel of the guards accompanied the train to the Dutch frontier, and was exceedingly kind in his efforts to prevent the great crowds which thronged the platforms at every station where we stopped from insulting us; but beyond the yelling of patriotic songs and a few jeers and insulting gestures we had really nothing to complain of during our tedious journey to the Dutch frontier.

Before closing this long account of our last days in Berlin I should like to place on record and bring to your notice the quite admirable behaviour of my staff under the most trying circumstances possible. One and all, they worked night and day with scarcely any rest, and I cannot praise too highly the cheerful zeal with which counselor, naval and military attaches, secretaries, and the two young attaches buckled to their work and kept their nerve with often a yelling mob outside and inside hundreds of British subjects clamouring for advice and assistance. I was proud to have such a staff to work with, and feel most grateful to them all for the invaluable assistance and support, often exposing them to considerable personal risk, which they so readily and cheerfully gave to me.

I should also like to mention the great assistance rendered to us all by my American colleague, Mr. Gerard, and his staff. Undeterred by the hooting and hisses with which he was often greeted by the mob on entering and leaving the embassy, his excellency came repeatedly to see me to ask how he could help us and to make arrangements for the safety of stranded British subjects. He extricated many of these from extremely difficult situations at some personal risk to himself, and his calmness and savoir-faire and his firmness in dealing with the imperial authorities gave full assurance that the protection of British subjects and interests could not have been left in more efficient and able hands.

I have, &c.,
W. E. GOSCHEN.

NO. 161. SIR M. DE BUNSEN TO SIR EDWARD GREY.

London, Sept. 1, 1914.

Sir:—The rapidity of the march of events during the days which led up to the outbreak of the European war made it difficult, at the time, to do more than record their progress by telegraph. I propose now to add a few comments.

The delivery at Belgrade on the 23d July of the Austrian note to Servia was preceded by a period of absolute silence at the Ballplatz. Except Herr von Tschirscky [German ambassador at Vienna], who must have been aware of the tenour, if not of the actual words of the note, none of my colleagues were allowed to see through the veil. On the 22d and 23d July, M. Dumaine, French ambassador, had long interviews with Baron Macchio, one of the under secretaries of state for foreign affairs, by whom he was left under the impression that the words of warning he had been instructed to speak to the Austro-Hungarian government had not been unavailing, and that the note which was being drawn up would be found to contain nothing with which a self-respecting state need hesitate to comply. At the second of these interviews he was not even informed that the note was at that very moment being presented at Belgrade, or that it would be published in Vienna on the following morning. Count Forgach, the other under secretary of state, had indeed been good enough to confide to me on the same day the true character of the note, and the fact of its presentation about the time we were speaking.

So little had the Russian ambassador been made aware of what was preparing that he actually left Vienna on a fortnight's leave of absence about the 20th July. He had only been absent a few days when events compelled him to return. It might have been supposed that Duke Avarna, ambassador of the allied Italian kingdom, which was bound to be so closely affected by fresh complications in the Balkans, would have been taken fully into the confidence of Count Berchtold [Austro-Hungarian minister for foreign affairs] during this critical time. In point of fact his excellency was left completely in the dark. As for myself, no indication was given me by Count Berchtold of the impending storm, and it was from a private source that I received on the 15th July the forecast of what was about to happen which I telegraphed to you

the following day. It is true that during all this time the "Neue Freie Presse" and other leading Viennese newspapers were using language which pointed unmistakably to war with Servia. The official "Fremdenblatt," however, was more cautious, and till the note was published, the prevailing opinion among my colleagues was that Austria would shrink from courses calculated to involve her in grave European complications.

On the 24th July the note was published in the newspapers. By common consent it was at once styled an ultimatum. Its integral acceptance by Servia was neither expected nor desired, and when, on the following afternoon, it was at first rumoured in Vienna that it had been unconditionally accepted, there was a moment of keen disappointment. The mistake was quickly corrected, and as soon as it was known later in the evening that the Servian reply had been rejected and that Baron Giesl [Austro-Hungarian minister at Belgrade] had broken off relations at Belgrade, Vienna burst into frenzy of delight, vast crowds parading the streets and singing patriotic songs till the small hours of the morning.

The demonstrations were perfectly orderly, consisting for the most part of organised processions through the principal streets ending up at the ministry of war. One or two attempts to make hostile manifestations against the Russian embassy were frustrated by the strong guard of police which held the approaches to the principal embassies during those days. The demeanour of the people at Vienna and, as I was informed, in many other principal cities of the monarchy, showed plainly the popularity of the idea of war with Servia, and there can be no doubt that the small body of Austrian and Hungarian statesmen by whom this momentous step was adopted gauged rightly the sense, and it may even be said the determination, of the people, except presumably in portions of the provinces inhabited by the Slav races. There had been much disappointment in many quarters at the avoidance of war with Servia during the annexation crisis in 1908 and again in connection with the recent Balkan war. Count Berchtold's peace policy had met with little sympathy in the delegation. Now the flood-gates were opened, and the entire people and press clamoured impatiently for immediate and condign punishment of the hated Servian race. The country certainly believed that it had before it only the alternative of subduing Servia or of submitting sooner or later to mutilation at her hands. But a peaceful solution should first have been attempted. Few seemed to reflect that the forcible intervention of a great power in the Balkans must inevitably call other great powers into the field. So just was the cause of Austria held to be, that it seemed to her people inconceivable that any country should place itself in her path, or that questions of mere policy or prestige should be regarded anywhere as superseding the necessity which had arisen to exact summary vengeance for the crime of Serajevo. The conviction had been expressed to me by the German ambassador on the 24th July that Russia would stand aside. This feeling, which was also held at the Ballplatz, influenced no doubt the course of events, and it is deplorable that no effort should have been made to secure by means of diplomatic negotiations the acquiescence of Russia and Europe as a whole in some peaceful compromise of the Servian question by which Austrian fears of Servian aggression and intrigue might have been removed for the future. Instead of adopting this course the Austro-Hungarian government resolved upon war. The inevitable consequence ensued. Russia replied to a partial Austrian mobilization and declaration of war against Servia by a partial Russian mobilization against Austria. Austria met this move by completing her own mobilization, and Russia again responded with results which have passed into history. The fate of the proposals put forward by his majesty's government for the preservation of peace is recorded in the White Paper on the European Crisis. On the 28th July I saw Count Berchtold and urged as strongly as I could that the scheme of mediation mentioned in your speech in the house of commons on the previous day should be accepted as offering an honourable and peaceful settlement of the question at issue. His excellency himself read to me a telegraphic report of the speech, but added that matters had gone too far; Austria was that day declaring war on Servia, and she could never accept the conference which you had suggested should take place between the less interested powers on the basis of the Servian reply. This was a matter which must be settled directly between the two parties immediately concerned. I said his majesty's government would hear with regret that hostilities could not be arrested, as you feared they would lead to European complications. I disclaimed any British lack of sympathy with Austria in the matter of her legitimate grievances against Servia, and pointed out that whereas Austria seemed to be making these the starting point of her policy, his majesty's government were bound to look at the question primarily from the point of view of the maintenance of the peace of Europe. In this way the two countries might easily drift apart.

His excellency said that he too was keeping the European aspect of the question in sight. He thought, however, that Russia would have no right to intervene after receiving his assurance that Austria sought no territorial aggrandisement. His excellency remarked to me in the course of his conversation that, though he had been glad to co-operate towards bringing about the settlement which had resulted from the ambassadorial conferences in London during the Balkan crisis, he had never had much belief in the permanency of that settlement, which was necessarily of a highly artificial character, inasmuch as the interests which it sought to harmonise were in themselves profoundly divergent. His excellency maintained a most friendly demeanour throughout the interview, but left no doubt in my mind as to the determination of the Austro-Hungarian government to proceed with the invasion of Servia.

The German government claim to have persevered to the end in the endeavour to support at Vienna your successive proposals in the interest of peace. Herr von Tschirscky abstained from inviting my co-operation or that of the French and Russian ambassadors in carrying out his instructions to that effect, and I had no means of knowing what response he was receiving from the Austro-Hungarian government. I was, however, kept fully informed by M. Schebeko, the Russian ambassador, of his own direct negotiations with Count Berchtold. M. Schebeko endeavoured on the 28th July to persuade the Austro-Hungarian government to furnish count Szapary [Austro-Hungarian ambassador at St. Petersburg] with full powers to continue at St. Petersburg the hopeful conversations which had there been taking place between the latter and M. Sazonof [Russian minister for foreign affairs]. Count Berchtold refused at the time, but two days later (30th July), though in the meantime Russia had partially mobilised against Austria, he received M. Schebeko again, in a perfectly friendly manner, and gave his consent to the continuance of the conversations at St. Petersburg. From now onwards the tension between Russia and Germany was much greater than between Russia and Austria. As between the latter an arrangement seemed almost in sight, and on the 1st August I was informed by M. Schebeko that Count Szapary had at last conceded the main point at issue by announcing to M. Sazonof that Austria would consent to submit to mediation the points in the note to Servia which seemed incompatible with the maintenance of Servian independence. M. Sazonof, M. Schebeko added, had accepted this proposal on condition that Austria would refrain from the actual invasion of Servia. Austria, in fact, had finally yielded, and that she herself had at this point good hopes of a peaceful issue is shown by the communication made to you on the 1st August by Count Mensdorff [Austro-Hungarian ambassador in London], to the effect that Austria had neither "banged the door" on compromise nor cut off the conversations [see No. 137]. M. Schebeko [Russian ambassador in Vienna] to the end was working hard for peace. He was holding the most conciliatory language to Count Berchtold, and he informed

me that the latter, as well as Count Forgach [Austro-Hungarian under secretary of state for foreign affairs], had responded in the same spirit. Certainly it was too much for Russia to expect that Austria would hold back her armies, but this matter could probably have been settled by negotiation, and M. Schebeko repeatedly told me he was prepared to accept any reasonable compromise.

Unfortunately these conversations at St. Petersburg and Vienna were cut short by the transfer of the dispute to the more dangerous ground of a direct conflict between Germany and Russia. Germany intervened on the 31st July by means of her double ultimatums to St. Petersburg and Paris. The ultimatums were of a kind to which only one answer is possible, and Germany declared war on Russia on the 1st August, and on France on the 3d August. A few days' delay might in all probability have saved Europe from one of the greatest calamities in history.

Russia still abstained from attacking Austria, and M. Schebeko had been instructed to remain at his post till war should actually be declared against her by the Austro-Hungarian government. This only happened on the 6th August, when Count Berchtold informed the foreign missions at Vienna that "the Austro-Hungarian ambassador at St. Petersburg had been instructed to notify the Russian government that, in view of the menacing attitude of Russia in the Austro-Servian conflict and the fact that Russia had commenced hostilities against Germany, Austria-Hungary considered herself also at war with Russia."

M. Schebeko left quietly in a special train provided by the Austro-Hungarian government on the 7th August. He had urgently requested to be conveyed to the Roumanian frontier, so that he might be able to proceed to his own country, but was taken instead to the Swiss frontier, and ten days later I found him at Berne.

M. Dumaine, French ambassador, stayed on till the 12th August. On the previous day he had been instructed to demand his passport on the ground that Austrian troops were being employed against France. This point was not fully cleared up when I left Vienna. On the 9th August M. Dumaine had received from Count Berchtold the categorical declaration that no Austrian troops were being moved to Alsace. The next day this statement was supplemented by a further one, in writing, giving Count Berchtold's assurance that not only had no Austrian troops been moved actually to the French frontier, but that none were moving from Austria in a westerly direction into Germany in such a way that they might replace German troops employed at the front. These two statements were made by Count Berchtold in reply to precise questions put to him by M. Dumaine, under instructions from his government. The French ambassador's departure was not attended by any hostile demonstration, but his excellency before leaving had been justly offended by a harangue made by the chief burgomaster of Vienna to the crowd assembled before the steps of the town hall, in which he assured the people that Paris was in the throes of a revolution, and that the president of the republic had been assassinated.

The British declaration of war on Germany was made known in Vienna by special editions of the newspapers about midday on the 4th August. An abstract of your speeches in the house of commons, and also of the German chancellor's speech in the reichstag of the 4th August, appeared the same day, as well as the text of the German ultimatum to Belgium. Otherwise few details of the great events of these days transpired. The "Neue Freie Presse" was violently insulting towards England. The "Fremdenblatt" was not offensive, but little or nothing was said in the columns of any Vienna paper to explain that the violation of Belgium neutrality had left his majesty's government no alternative but to take part in the war.

The declaration of Italian neutrality was bitterly felt in Vienna, but scarcely mentioned in the newspapers.

On the 5th August I had the honour to receive your instruction of the previous day preparing me for the immediate outbreak of war with Germany, but adding that, Austria being understood to be not yet at that date at war with Russia and France, you did not desire me to ask for my passport or to make any particular communication to the Austro-Hungarian government. You stated at the same time that his majesty's government of course expected Austria not to commit any act of war against us without the notice required by diplomatic usage.

On Thursday morning, the 13th August, I had the honour to receive your telegram of the 12th stating that you had been compelled to inform Count Mensdorff, at the request of the French government, that a complete rupture had occurred between France and Austria, on the ground that Austria had declared war on Russia, who was already fighting on the side of France, and that Austria had sent troops to the German frontier under conditions that were a direct menace to France. The rupture having been brought about with France in this way, I was to ask for my passport, and your telegram stated, in conclusion, that you had informed Count Mensdorff that a state of war would exist between the two countries from midnight of the 12th August.

After seeing Mr. Penfield, the United States ambassador, who accepted immediately in the most friendly spirit my request that his excellency would take charge provisionally of British interests in Austria-Hungary, during the unfortunate interruption of relations, I proceeded, with Mr. Theo Russell, counsellor of his majesty's embassy, to the Ballplatz. Count Berchtold received me at midday. I delivered my message, for which his excellency did not seem to be unprepared, although he told me that a long telegram from Count Mensdorff had just come in but had not yet been brought to him. His excellency received my communication with the courtesy which never leaves him. He deplored the unhappy complications which were drawing such good friends as Austria and England into war. In point of fact, he added, Austria did not consider herself then at war with France, though diplomatic relations with that country had been broken off. I explained in a few words how circumstances had forced this unwelcome conflict upon us. We both avoided useless argument. Then I ventured to recommend to his excellency's consideration the case of the numerous stranded British subjects at Carlsbad, Vienna and other places throughout the country. I had already had some correspondence with him on the subject, and his excellency took a note of what I said, and promised to see what could be done to get them away when the stress of mobilisation should be over. Count Berchtold agreed to Mr. Phillpotts, till then British consul at Vienna under Consul-General Sir Frederick Duncan, being left by me at the embassy in the capacity of charge des archives. He presumed a similar privilege would not be refused in England if desired on behalf of the Austro-Hungarian government. I took leave of Count Berchtold with sincere regret, having received from the day of my arrival in Vienna, not quite nine months before, many marks of friendship and consideration from his excellency. As I left I begged his excellency to present my profound respects to the Emperor Francis Joseph, together with an expression of my hope that his majesty would pass through these sad times with unimpaired health and strength. Count Berchtold was pleased to say he would deliver my message.

Count Walterskirchen, of the Austro-Hungarian foreign office, was deputed the following morning to bring me my passport and to acquaint me with the arrangements made for my departure that evening (14th August). In the course of the day Countess Berchtold and other ladies of Vienna society called to take leave of Lady de Bunsen at the embassy. We left the railway station by special train for the Swiss frontier at 7 p. m. No disagreeable incidents occurred. Count Walterskirchen was present at the station on behalf of Count Berchtold. The journey was necessarily slow, owing to the encumbered state of the line. We reached Buchs on the Swiss frontier, early in the morning of the 17th August. At the first halting place there had been some hooting

and stone throwing on the part of the entraining troops and station officials, but no inconvenience was caused, and at the other large stations on our route we found that ample measures had been taken to preserve us from molestation as well as to provide us with food. I was left in no doubt that the Austro-Hungarian government had desired that the journey should be performed under the most comfortable conditions possible, and that I should receive on my departure all the marks of consideration due to his majesty's representative. I was accompanied by my own family and the entire staff of the embassy, for whose untiring zeal and efficient help in trying times I desire to express my sincere thanks. The Swiss government also showed courtesy in providing comfortable accommodation during our journey from the frontier to Berne, and, after three days' stay there, on to Geneva, at which place we found that every provision had been made by the French government, at the request of Sir Francis Bertie, for our speedy conveyance to Paris. We reached England on Saturday morning, the 22d August.

MAURICE DE BUNSEN.

GERMAN WHITE BOOK.

HOW RUSSIA AND HER RULER BETRAYED GERMANY'S CONFIDENCE AND THEREBY CAUSED THE EUROPEAN WAR.

Foreign Office, Berlin, August, 1914.

On June 28 the Austro-Hungarian successor to the throne, Archduke Franz Ferdinand, and his wife, the duchess of Hohenberg, were assassinated by a member of a band of Servian conspirators. The investigation of the crime through the Austro-Hungarian authorities has yielded the fact that the conspiracy against the life of the archduke and successor to the throne was prepared and abetted in Belgrade with the co-operation of Servian officials, and executed with arms from the Servian state arsenal. This crime must have opened the eyes of the entire civilized world, not only in regard to the aims of the Servian policies directed against the conservation and integrity of the Austro-Hungarian monarchy, but also concerning the criminal means which the pan-Serb propaganda in Servia had no hesitation in employing for the achievement of these aims.

The goal of these policies was the gradual revolutionizing and final separation of the southeasterly districts from the Austro-Hungarian monarchy and their union with Servia. This direction of Servia's policy has not been altered in the least in spite of the repeated and solemn declarations of Servia in which it vouchsafed a change in these policies toward Austria-Hungary as well as the cultivation of good and neighborly relations.

In this manner for the third time in the course of the last six years Servia has led Europe to the brink of a world-war.

It could only do this because it believed itself supported in its intentions by Russia.

Russia soon after the events brought about by the Turkish revolution of 1908, endeavored to found a union of the Balkan states under Russian patronage and directed against the existence of Turkey. This union, which succeeded in 1911 in driving out Turkey from a greater part of her European possessions, collapsed over the question of the distribution of spoils. The Russian policies were not dismayed over this failure. According to the idea of the Russian statesmen, a new Balkan union under Russian patronage should be called into existence, headed no longer against Turkey, now dislodged from the Balkans, but against the existence of the Austro-Hungarian monarchy. It was the idea that Servia should cede to Bulgaria those parts of Macedonia which it had received during the last Balkan war, in exchange for Bosnia and Herzegovina, which were to be taken from Austria. To oblige Bulgaria to fall in with this plan it was to be isolated, Roumania attached to Russia with the aid of French propaganda, and Servia promised Bosnia and Herzegovina.

Under these circumstances it was clear to Austria that it was not compatible with the dignity and the spirit of self-preservation of the monarchy to view idly any longer this agitation across the border. The imperial and royal government acquainted Germany with this conception and asked for our opinion. With all our heart we were able to agree with our ally's estimate of the situation and assure him that any action considered necessary to end the movement in Servia directed against the conservation of the monarchy would meet with our approval.

We were perfectly aware that a possible warlike attitude of Austria-Hungary against Servia might bring Russia upon the field, and that it might therefore involve us in a war, in accordance with our duty as allies. We could not, however, in these vital interests of Austria-Hungary, which were at stake, advise our ally to take a yielding attitude incompatible with his dignity, nor deny him our assistance in these trying days. We could do this all the less as our own interests were menaced through the continued Serb agitation. If the Serbs continued, with the aid of Russia and France, to menace the existence of Austria-Hungary, the gradual collapse of Austria and the subjection of all the Slavs under one Russian sceptre would be the consequence, thus making untenable the position of the Teutonic race in central Europe. A morally weakened Austria under the pressure of Russian pan-Slavism would be no longer an ally on whom we could count and in whom we could have confidence, as we must be able to have, in view of the ever more menacing attitude of our easterly and westerly neighbors. We, therefore, permitted Austria a completely free hand in her action towards Servia, but have not participated in her preparations.

Austria chose the method of presenting to the Servian government a note, in which the direct connection between the murder at Sarajevo and the pan-Serb movement, as not only countenanced but actively supported by the Servian government, was explained, and in which complete cessation of this agitation, as well as punishment of the guilty, was requested. At the same time Austria-Hungary demanded as necessary guarantee for the accomplishment of her desire the participation of Austrian officials in the preliminary examination on Servian territory and the final dissolution of the pan-Serb societies agitating against Austria-Hungary. The imperial and royal government gave a period of 48 hours for the unconditional acceptance of its demands.

The Servian government started the mobilization of its army one day after the transmission of the Austro-Hungarian note.

As after the stipulated date the Servian government made a reply which, though complying in some points with the conditions of Austria-Hungary, yet showed in all essentials the endeavor through procrastination and new negotiations to escape from the just demands of the monarchy, the latter discontinued her diplomatic relations with Servia without indulging in further negotiations or accepting further Servian assurances, whose value, to its loss, she had sufficiently experienced.

From this moment Austria was in fact in a state of war with Servia, which it proclaimed officially on the 28th of July by declaring war.

From the beginning of the conflict we assumed the position that there were here concerned the affairs of Austria alone, which it would have to settle with Servia. We therefore directed our efforts toward the localizing of the war, and toward convincing the other powers that Austria-Hungary had to appeal to arms in justifiable self-defense, forced upon her by the conditions. We emphatically took the position that no civilized country possessed the right to stay the arm of Austria in this struggle with barbarism and political crime, and to shield the Servians against their just punishment. In this sense we instructed our representatives with the foreign powers. (See exhibits 1 and 2.)

Simultaneously the Austro-Hungarian government communicated to the Russian government that the step undertaken against Servia implied merely a defensive measure against the Serb agi-

tation, but that Austria-Hungary must of necessity demand guarantees for a continued friendly beLavior of Servia towards the monarchy. Austria-Hungary had no intention whatsoever to shift the balance of power in the Balkans. (See exhibit 3.)

In answer to our declaration that the German government desired, and aimed at, a localization of the conflict, both the French and the English governments promised action in the same direction. But these endeavors did not succeed in preventing the interposition of Russia in the Austro-Servian disagreement.

The Russian government submitted an official communique on July 24, according to which Russia could not possibly remain indifferent in the Servo-Austrian conflict. The same was declared by the Russian secretary of foreign affairs, M. Sazonof, to the German ambassador, Count Pourtales, in the afternoon of July 26. (See exhibit 4.) The German government declared again, through its ambassador at St. Petersburg, that Austria-Hungary had no desire for conquest and only wished peace at her frontiers. After the official explanation by Austria-Hungary to Russia that it did not claim territorial gain in Servia, the decision concerning the peace of the world rested exclusively with St. Petersburg. (See exhibit 5.)

The same day the first news of Russian mobilization reached Berlin in the evening. (See exhibits 6, 7, 8, 9.)

The German ambassadors at London, Paris and St. Petersburg were instructed energetically to point out the danger of this Russian mobilization. The imperial ambassador at St. Petersburg was also directed to make the following declaration to the Russian government: (See exhibits 10, 10a, 10b.)

"Preparatory military measures by Russia will force us to counter-measures which must consist in mobilizing the army. But mobilization means war. As we know the obligations of France towards Russia, this mobilization would be directed against both Russia and France. We cannot assume that Russia desires to unchain such a European war. Since Austria-Hungary will not touch the existence of the Servian kingdom, we are of the opinion that Russia can afford to assume an attitude of waiting. We can all the more support the desire of Russia to protect the integrity of Servia, as Austria-Hungary does not intend to question the latter. It will be easy in the further development of the affair to find a basis for an understanding."

On July 27 the Russian secretary of war, M. Suchomlinoff, gave the German military attache his word of honor that no order to mobilize had been issued; preparations were being made, but not a horse mustered, nor reserves called in. If Austria-Hungary crossed the Servian frontier, the military districts directed towards Austria, i. e., Kiev, Odessa, Moscow, Kazan, would be mobilized, but under no circumstances those situated on the German frontier, i. e., St. Petersburg, Vilna, and Warsaw. Upon inquiry into the object of the mobilization against Austria-Hungary, the Russian minister of war replied by shrugging his shoulders and referring to the diplomats. The military attache then pointed to these mobilization measures against Austria-Hungary as extremely menacing also for Germany. (See exhibit 11.)

In the succeeding days news concerning Russian mobilization came at a rapid rate. Among it was also news about preparations on the German-Russian frontier, as, for instance, the announcement of the state of war in Kovno, the departure of the Warsaw garrison, and the strengthening of the Alexandrovo garrison.

On July 27 the first information was received concerning preparatory measures taken by France; the 14th corps discontinued the manœuvres and returned to its garrison.

In the meantime we had endeavored to localize the conflict by most emphatic steps.

On July 26 Sir Edward Grey had made the proposal to submit the differences between Austria-Hungary and Servia to a conference of the ambassadors of Germany, France, and Italy under his chairmanship. We declared in regard to this proposal that we could not, however much we approved the idea, participate in such a conference, as we could not call Austria in her dispute with Servia before a European tribunal. (See exhibit 12.)

France consented to the proposal of Sir Edward Grey, but it foundered upon Austria's declining it, as was to be expected.

Faithful to our principle that mediation should not extend to the Austro-Servian conflict, which is to be considered as a purely Austro-Hungarian affair, but merely to the relations between Austria-Hungary and Russia, we continued our endeavors to bring about an understanding between these two powers. (See exhibits 13, 14.)

We further declared ourselves ready, after failure of the conference idea, to transmit a second proposal of Sir Edward Grey's to Vienna in which he suggested Austria-Hungary should decide that either the Servian reply was sufficient, or that it be used as a basis for further negotiations. The Austro-Hungarian government remarked with full appreciation of our action that it had come too late, the hostilities having already been opened. (See exhibits 15, 16.)

In spite of this we continued our attempts to the utmost, and we advised Vienna to make every possible advance compatible with the dignity of the monarchy.

Unfortunately, all these proposals were overtaken by the military preparations of Russia and France.

On July 29 the Russian government made the official notification in Berlin that four army districts had been mobilized. At the same time further news was received concerning rapidly progressing military preparations of France, both on water and on land. (See exhibit 17.)

On the same day the imperial ambassador in St. Petersburg had an interview with the Russian foreign secretary, in regard to which he reported by telegraph as follows:

"The secretary tried to persuade me that I should urge my government to participate in a quadruple conference to find means to induce Austria-Hungary to give up those demands which touch upon the sovereignty of Servia. I could merely promise to report the conversation and took the position that, after Russia had decided upon the fateful step of mobilization, every exchange of ideas appeared now extremely difficult, if not impossible. Besides, Russia now was demanding from us in regard to Austria-Hungary the same which Austria-Hungary was being blamed for with regard to Servia, i. e., an infraction of sovereignty. Austria-Hungary having promised to consider the Russian interests by disclaiming any territorial aspiration—a great concession on the part of a state engaged in war—should therefore be permitted to attend to its affair with Servia alone. There would be time at the peace conference to return to the matter of forbearance towards the sovereignty of Servia.

"I added very solemnly that at this moment the entire Austro-Servian affair was eclipsed by the danger of a general European conflagration and I endeavored to present to the secretary the magnitude of this danger.

"It was impossible to dissuade Sazonof from the idea that Servia could not now be deserted by Russia."

On July 29 the German military attache at St. Petersburg wired the following report of a conversation with the chief of the general staff of the Russian army:

"The chief of the general staff has asked me to call on him, and he has told me that he has just come from his majesty. He has been requested by the secretary of war to reiterate once more that everything had remained as the secretary had informed me two days ago. He offered confirmation in writing and gave me his word of honor in the most solemn manner that nowhere there had been a mobilization, viz., calling in of a single man or horse up to the present time, i. e., 3 o'clock in the afternoon. He could not assume a guaranty for the future, but

he could emphasize that in the regions towards our frontiers his majesty desired no mobilization.

"As, however, I had received many pieces of news concerning the calling in of the reserves in different parts of the country, also in Warsaw and in Vilna, I told the general that his statements confronted me with a riddle. On his officer's word of honor he replied that such news was wrong, but that possibly here and there a false alarm might have been given.

"I must consider this conversation as an attempt to mislead us as to the extent of the measures hitherto taken in view of the abundant and positive information about the calling in of reserves."

In reply to various inquiries concerning reasons for its threatening attitude, the Russian government repeatedly pointed out that Austria-Hungary had commenced no conversation in St. Petersburg. The Austro-Hungarian ambassador in St. Petersburg was therefore instructed on July 29, at our suggestion, to enter into such conversation with Sazonof. Count Szapary was empowered to explain to the Russian minister the note to Servia though it had been overtaken by the state of war, and to accept any suggestion on the part of Russia as well as to discuss with Sazonof all questions touching directly upon the Austro-Russian relations.

Shoulder to shoulder with England we labored incessantly and supported every proposal in Vienna from which we hoped to gain the possibility of a peaceable solution of the conflict. We even as late as the 30th of July forwarded the English proposal to Vienna, as basis for negotiations, that Austria-Hungary should dictate her conditions in Servia, i. e. after her march into Servia. We thought that Russia would accept this basis. (See exhibit 19.)

During the interval from July 29 to July 31 there appeared renewed and cumulative news concerning Russian measures of mobilization. Accumulation of troops on the East Prussian frontier and the declaration of the state of war over all important parts of the Russian west frontier allowed no further doubt that the Russian mobilization was in full swing against us, while simultaneously all such measures were denied to our representative in St. Petersburg on word of honor.

Nay, even before the reply from Vienna regarding the Anglo-German mediation, whose tendencies and basis must have been known in St. Petersburg, could possibly have been received in Berlin, Russia ordered a general mobilization.

During the same days, there took place between his majesty the kaiser and Czar Nicolas an exchange of telegrams in which his majesty called the attention of the czar to the menacing character of the Russian mobilization during the continuance of his own mediating activities. (See exhibits 18, 20, 21, 22, 23, 23a.)

On July 31, the czar sent the following telegram to his majesty the kaiser:

"I thank you cordially for your mediation which permits the hope that everything may yet end peaceably. It is technically impossible to discontinue our military preparations which have been made necessary by the Austrian mobilization. It is far from us to want war. As long as the negotiations between Austria and Servia continue, my troops will undertake no provocative action. I give you my solemn word thereon. I confide with all my faith in the grace of God, and I hope for the success of your mediation in Vienna for the welfare of our countries and the peace of Europe.

"Your cordially devoted NICOLAS."

This telegram of the czar crossed with the following sent by his majesty the kaiser, also on July 31, at 2 p. m.:

"Upon your appeal to my friendship and your request for my aid I have engaged in mediation between your government and the government of Austria-Hungary. While this action was taking place, your troops were being mobilized against my ally Austria-Hungary, whereby, as I have already communication to you, my mediation has become almost illusory. In spite of this, I have continued it, and now I receive reliable news that serious preparations for war are going on on my eastern frontier. The responsibility for the security of my country forces me to measures of defense. I have gone to the extreme limit of the possible in my efforts for the preservation of the peace of the world. It is not I who bear the responsibility for the misfortune which now threatens the entire civilized world. It rests in your hands to avert it. No one threatens the honor and peace of Russia, which might well have awaited the success of my mediation. The friendship for you and your country, bequeathed to me by my grandfather on his deathbed, has always been sacred to me, and I have stood faithfully by Russia while it was in serious affliction, especially during its last war. The peace of Europe can still be preserved by you if Russia decides to discontinue the military preparations which menace Germany and Austria-Hungary."

Before this telegram reached its destination, the mobilization of all the Russian forces, obviously directed against us and already ordered during the afternoon of the 31st of July, was in full swing. Notwithstanding, the telegram of the czar was sent at 2 o'clock that same afternoon.

After the Russian general mobilization became known in Berlin, the imperial ambassador at St. Petersburg was instructed on the afternoon of July 31 to explain to the Russian government that Germany declared the state of war as counter-measure against the general mobilization of the Russian army and navy which must be followed by mobilization if Russia did not cease its military measures against Germany and Austria-Hungary within twelve hours and notified Germany thereof. (See exhibit 24.)

At the same time the imperial ambassador in Paris was instructed to demand from the French government a declaration within eighteen hours, whether it would remain neutral in a Russo-German war. (See exhibit 25.)

The Russian government destroyed through its mobilization, menacing the security of our country, the laborious action at mediation of the European cabinets. The Russian mobilization, in regard to the seriousness of which the Russian government was never allowed by us to entertain a doubt, in connection with its continued denial, shows clearly that Russia wanted war.

The imperial ambassador at St. Petersburg delivered his note to M. Sazonof on July 31 at 12 o'clock midnight.

The reply of the Russian government has never reached us.

Two hours after the expiration of the time limit the czar telegraphed to his majesty the kaiser, as follows:

"I have received your telegram. I comprehend that you are forced to mobilize, but I should like to have from you the same guaranty which I have given you, viz., that these measures do not mean war, and that we shall continue to negotiate for the welfare of our two countries and the universal peace which is so dear to our hearts. With the aid of God it must be possible to our long tried friendship to prevent the shedding of blood. I expect with full confidence your urgent reply."

To this his majesty the kaiser replied:

"I thank you for your telegram. I have shown yesterday to your government the way through which alone war may yet be averted. Although I asked for a reply by today noon, no telegram from my ambassador has reached me with the reply of your government. I therefore have been forced to mobilize my army. An immediate, clear and unmistakable reply of your government is the sole way to avoid endless misery. Until I receive this reply I am unable, to my great grief, to enter upon the subject of your telegram. I must ask most earnestly that you, without delay, order your troops to commit, under no circumstances, the slightest violation of our frontiers."

As the time limit given to Russia had expired without the receipt of a reply to our inquiry,

his majesty the kaiser ordered the mobilization of the entire German army and navy on Aug. 1, at 5 p. m.

The German ambassador at St. Petersburg was instructed that, in the event of the Russian government not giving a satisfactory reply within the stipulated time, he should declare that we considered ourselves in a state of war after the refusal of our demands. However, before a confirmation of the execution of this order had been received, that is to say, already in the afternoon of Aug. 1, i. e., the same afternoon on which the telegram of the czar, cited above, was sent, Russian troops crossed our frontier and marched into German territory. (See exhibit 26.)

Thus Russia began the war against us.

Meanwhile the imperial ambassador in Paris put our question to the French cabinet on July 31, at 7 p. m.

The French prime minister gave an equivocal and unsatisfactory reply on Aug. 1, at 1 p. m. which gave no clear idea of the position of France, as he limited himself to the explanation that France would do that which her interests demanded. A few hours later, at 5 p. m., the mobilization of the entire French army and navy was ordered. (See exhibit 27.)

On the morning of the next day France opened hostilities.

THE NOTE OF AUSTRIA-HUNGARY TO SERVIA.

Presented July 23, in Belgrade.

On March 31, 1909, the royal Servian minister to the court of Vienna made the following statement, by order of his government:

"Servia declares that she is not affected in her rights by the situation established in Bosnia, and that she will therefore adapt herself to the decisions which the powers are going to arrive at in reference to Art. 25 of the Berlin treaty. By following the councils of the powers, Servia binds herself to cease the attitude of protest and resistance which she has assumed since last October, relative to the annexation, and she binds herself further to change the direction of her present policies towards Austria-Hungary, and, in the future, to live with the latter in friendly and neighborly relations."

The history of the last years, and especially the painful events of June 28, have demonstrated the existence of a subversive movement in Servia whose aim it is to separate certain territories from the Austro-Hungarian monarchy. This movement, which developed under the eyes of the Servian government, found expression subsequently beyond the territory of the kingdom, in acts of terrorism, a series of assassinations and murders.

Far from fulfilling the formal obligations contained in the declaration of March 31, 1909, the royal Servian government has done nothing to suppress this movement. It suffered the criminal doings of the various societies and associations directed against the monarchy, the unbridled language of the press, the glorification of the originators of assassinations, the participation of officers and officials in subversive intrigues; it suffered the unwholesome propaganda in public education, and lastly permitted all manifestations which would mislead the Servian people into hatred of the monarchy and into contempt for its institutions.

This sufferance of which the royal Servian government made itself guilty has lasted up to the moment in which the events of June 28 demonstrated to the entire world the ghastly consequences of such sufferance.

It becomes plain from the evidence and confessions of the criminal authors of the outrage of June 28 that the murder at Sarajevo was conceived in Belgrade, that the murderers received the arms and bombs with which they were equipped from Servian officers and officials who belonged to the Narodna Odbrana, and that, lastly, the transportation of the criminals and their arms to Bosnia was arranged and carried out by leading Servian frontier officials.

The cited results of the investigation do not permit the imperial and royal government to observe any longer the attitude of waiting which it has assumed for years toward those agitations which have their centre in Belgrade, and which from there radiate into the territory of the monarchy. These results, on the contrary, impose upon the imperial and royal government the duty to terminate intrigues which constitute a permanent menace for the peace of the monarchy.

In order to obtain this purpose, the imperial and royal government is forced to demand official assurance from the Servian government that it condemns the propaganda directed against Austria-Hungary, i. e., the entirety of the machinations whose aim it is to separate parts from the monarchy which belong to it, and that she binds herself to suppress with all means this criminal and terrorizing propaganda.

In order to give to these obligations a solemn character, the royal Servian government will publish on the first page of its official organ of July 26, 1914, the following declaration:

"The royal Servian government condemns the propaganda directed against Austria-Hungary, i. e., the entirety of those machinations whose aim it is to separate from the Austro-Hungarian monarchy territories belonging thereto, and she regrets sincerely the ghastly consequences of these criminal actions.

"The royal Servian government regrets that Servian officers and officials have participated in the propaganda, cited above, and have thus threatened the friendly and neighborly relations which the royal government was solemnly bound to cultivate by its declaration of March 31, 1909.

"The royal government, which disapproves and rejects every thought or every attempt at influencing the destinies of the inhabitants of any part of Austria-Hungary, considers it its duty to call most emphatically to the attention of its officers and officials, and of the entire population of the kingdom, that it will henceforward proceed with the utmost severity against any persons guilty of similar actions, to prevent and suppress which it will make every effort."

This explanation is to be brought simultaneously to the cognizance of the royal army through an order of his majesty the king, and it is to be published in the official organ of the army.

The royal Servian government binds itself, in addition, as follows: (1) To suppress any publication which fosters hatred of, and contempt for, the Austro-Hungarian monarchy, and whose general tendency is directed against the latter's territorial integrity. (2) To proceed at once with the dissolution of the society Narodna Odbrana, to confiscate their entire means of propaganda, and to proceed in the same manner against the other societies and associations in Servia which occupy themselves with the propaganda against Austria-Hungary. The royal government will take the necessary measures, so that the dissolved societies may not continue their activities under another name or in another form. (3) Without delay to eliminate from the public instruction in Servia, so far as the corps of instructors as well as the means of instruction are concerned, that which serves, or may serve, to foster the propaganda against Austria-Hungary. (4) To remove from military service and the administration in general all officers and officials who are guilty of propaganda against Austria-Hungary, and whose names, with a communication of the material which the imperial and royal government possesses against them, the imperial and royal government reserves the right to communicate to the royal government. (5) To consent that in Servia officials of the imperial and royal government co-operate in the suppression of a movement directed against the territorial integrity of the monarchy. (6) To commence a judicial investigation against the participants of the conspiracy of June 28, who are on Servian territory. Officials delegated by the imperial and royal government will participate in the examinations. (7) To proceed at once with all severity to arrest Maj. Voja Tankosic and a certain Milan Ciganowic, Servian state officials, who have been compromised through the result

of the investigation. (8) To prevent through effective measures the participation of the Servian authorities in the smuggling of arms and explosives across the frontier and to dismiss those officials of Shabatz and Loznica, who assisted the originators of the crime of Sarajevo in crossing the frontier. (9) To give to the imperial and royal government explanations in regard to the unjustifiable remarks of high Servian functionaries in Servia and abroad who have not hesitated, in spite of their official position, to express themselves in interviews in a hostile manner against Austria-Hungary after the outrage of June 28. (10) The imperial and royal government expects a reply from the royal government at the latest by Saturday, 25th inst., at 6 p. m. A memoir concerning the results of the investigations at Sarajevo, so far as they concern points 7 and 8, is enclosed with this note.

ENCLOSURE.

The investigation carried on against Gavrilo Prinzip and accomplices in the court of Sarajevo, on account of the assassination on June 28 has, so far, yielded the following results:

1. The plan to murder Archduke Franz Ferdinand during his stay in Sarajevo was conceived in Belgrade by Gavrilo, Prinzip, Nedijko Gabrinowic and a certain Milan Ciganowic and Trifko Grabez, with the aid of Maj. Voja Tankosic.

2. The six bombs and four Browning pistols, which were used by the criminals, were obtained by Milan Ciganowic and Maj. Tankosic, and presented to Prinzip and Gabrinowic in Belgrade.

3. The bombs are hand grenades, manufactured at the arsenal of the Servian army in Kragujevac.

4. To insure the success of the assassination, Milan Ciganowic instructed Prinzip and Gabrinowic in the use of the grenades and gave instructions in shooting with Browning pistols to Prinzip and Grabez in a forest near the target practice field of Topshidor (outside Belgrade).

5. In order to enable the crossing of the frontier of Bosnia and Herzegovina by Prinzip, Gabrinowic and Grabez, and the smuggling of their arms, a secret system of transportation was organized by Ciganowic. The entry of the criminals with their arms into Bosnia and Herzegovina was effected by the frontier captains of Shabatz (Rade Popowic) and of Loznica, as well as by the custom house official Rudivoy Grbic of Loznica with the aid of several other persons.

THE SERVIAN ANSWER.

Presented at Vienna, July 25, 1914.

[With Austria's comments in brackets.]

The royal government has received the communication of the imperial and royal government of the 23d inst., and is convinced that its reply will dissipate any misunderstanding which threatens to destroy the friendly and neighborly relations between the Austrian monarchy and the kingdom of Servia.

The royal government is conscious that nowhere have there been renewed protests against the great neighborly monarchy like those which at one time were expressed in the skupshtina, as well as in the declaration and actions of the responsible representatives of the state at that time, and which were terminated by the Servian declaration of March 31, 1909; furthermore that since that time neither the different corporations of the kingdom nor the officials have made an attempt to alter the political and judicial condition created in Bosnia and the Herzegovina. The royal government states that the imperial and royal government has made no protestation in this sense excepting in the case of a textbook, in regard to which the imperial and royal government has received an entirely satisfactory explanation. Servia has given during the time of the Balkan crisis in numerous cases evidence of her pacific and moderate policy, and it is only owing to Servia and the sacrifices which she has brought in the interest of the peace of Europe that this peace has been preserved.

[The royal Servian government limits itself to establishing that since the declaration of March 31, 1909, there has been no attempt on the part of the Servian government to alter the position of Bosnia and the Herzegovina. With this she deliberately shifts the foundation of our note, as we have not insisted that she and her officials have undertaken anything official in this direction. Our contention is that in spite of the obligation assumed in the cited note, she has omitted to suppress the movement directed against the territorial integrity of the monarchy. Her obligation consisted in changing her attitude and the entire direction of her policies, and in entering into friendly and neighborly relations with the Austro-Hungarian monarchy, and not only not to interfere with the possession of Bosnia.]

The royal government cannot be made responsible for expressions of a private character, as for instance newspaper articles and the peaceable work of societies, expressions which are of very common appearance in other countries, and which ordinarily are not under the control of the state. This, all the less, as the royal government has shown great courtesy in the solution of a whole series of questions which have arisen between Servia and Austria-Hungary, whereby it has succeeded to solve the greater number thereof, in favor of the progress of both countries.

[The assertion of the royal Servian government that the expressions of the press and the activity of Servian associations possess a private character and thus escape governmental control stands in full contrast with the institutions of modern states and even the most liberal of press and society laws, which nearly everywhere subject the press and the societies to a certain control of the state. This is also provided for by the Servian institutions. The rebuke against the Servian government consists in the fact that it has totally omitted to supervise its press and its societies, in so far as it knew their direction to be hostile to the monarchy.]

The royal government was therefore painfully surprised by the assertions that citizens of Servia had participated in the preparations of the outrage in Sarajevo. The government expected to be invited to co-operate in the investigation of the crime, and it was ready in order to prove its complete correctness to proceed against all persons in regard to whom it would receive information.

[This assertion is incorrect. The Servian government was accurately informed about the suspicion resting upon quite definite personalities and not only in the position, but also obliged by its own laws to institute investigations spontaneously. The Servian government has done nothing in this direction.]

According to the wishes of the imperial and royal government, the royal government is prepared to surrender to the court, without regard to position and rank, every Servian citizen, for whose participation in the crime of Sarajevo it should have received proof. It binds itself particularly on the first page of the official organ of the 26th of July to publish the following enunciation:

"The royal Servian government condemns every propaganda directed against Austria-Hungary, i. e., the entirety of such activities as aim towards the separation of certain territories from the Austro-Hungarian monarchy, and it regrets sincerely the lamentable consequences of these criminal machinations."

[The Austrian demand reads: "The royal Servian government condemns the propaganda against Austria-Hungary. * * *" The alteration of the declaration as demanded by us, which has been made by the royal Servian government, is meant to imply that a propaganda directed against Austria-Hungary does not exist, and that it is not aware of such. This formula is insincere, and the Servian government reserves itself the subterfuge for later occasions that it had not disavowed by this declaration the existing propaganda, nor recognized the same as hostile to the monarchy, whence it could deduce further that it is not obliged to suppress in the future a propaganda similar to the present one.]

"The royal government regrets that according to a communication of the imperial and royal government certain Servian officers and functionaries have participated in the propaganda just referred to, and that these have therefore endangered the amicable relations for the observation of which the royal government had solemnly obliged itself through the declaration of March 31, 1909.

"The government * * *" (what follows is identical with the demanded text.)

[The formula as demanded by Austria reads: "The royal government regrets that Servian officers and functionaries * * * have participated * * * " Also with this formula and the further addition "according to the declaration of the imperial and royal government," the Servian government pursue the object, already indicated above, to preserve a free hand for the future.]

The royal government binds itself further:

1. During the next regular meeting of the skupshtina to embody in the press laws a clause, to wit, that the incitement to hatred of, and contempt for, the monarchy is to be most severely punished, as well as every publication whose general tendency is directed against the territorial integrity of Austria-Hungary. It binds itself in view of the coming revision of the constitution to embody an amendment into article 22 of the constitutional law which permits the confiscation of such publications as is at present impossible according to the clear definition of article 22 of the constitution.

[Austria had demanded: (1) "To suppress every publication which incites to hatred and contempt for the monarchy, and whose tendency is directed against the territorial integrity of the monarchy." We wanted to bring about the obligation for Servia to take care that such attacks of the press would cease in the future. Instead Servia offers to pass certain laws which are meant as means toward this end, viz.: (a) A law according to which the expressions of the press hostile to the monarchy can be individually punished, a matter which is immaterial to us, all the more so, as the individual prosecution of press intrigues is very rarely possible and as, with a lax enforcement of such laws, the few cases of this nature would be punished. The proposition, therefore, does not meet our demand in any way, and it offers not the least guarantee for the desired success. (b) An amendment to article 22 of the constitution, which would permit confiscation, a proposal which does not satisfy us, as the existence of such a law in Servia is of no use to us. For we want the obligation of the government to enforce it and that has not been promised us. These proposals are, therefore, entirely unsatisfactory and evasive, as we are not told within what time these laws will be passed, and as in the event of the not-passing of these laws by the skupshtina everything would remain as it is, excepting the event of a possible resignation of the government.]

2. The government possesses no proofs and the note of the imperial and royal government does not submit them that the society Narodna Odbrana and other similar societies have committed, up to the present, any criminal actions of this manner through any one of their members. Notwithstanding this, the royal government will accept the demand of the imperial and royal government and dissolve the society Narodna Odbrana, as well as every society which should act against Austria-Hungary.

[The propaganda of the Narodna Odbrana and affiliated societies hostile to the monarchy fills the entire public life of Servia; it is, therefore, an entirely inacceptable reserve if the Servian government asserts that it knows nothing about it. Aside from this, our demand is not completely fulfilled, as we have asked besides: "To confiscate the means of propaganda of these societies to prevent the reformation of the dissolved societies under another name and in another form." In these two directions the Belgrade cabinet is perfectly silent, so that through this semiconcession there is offered us no guarantee for putting an end to the agitation of the associations hostile to the monarchy, especially the Narodna Odbrana.]

3. The royal Servian government binds itself without delay to eliminate from the public instruction in Servia anything which might further the propaganda directed against Austria-Hungary provided the imperial and royal government furnishes actual proofs.

[Also in this case the Servian government first demands proofs for a propaganda hostile to the monarchy in the public instruction of Servia while it must know that the textbooks introduced in the Servian schools contain objectionable matter in this direction and that a large portion of the teachers are in the camp of the Narodna Odbrana and affiliated societies. Furthermore, the Servian government has not fulfilled a part of our demands, as we have requested, as it omitted in its text the addition desired by us: "As far as the body of instructors is concerned, as well as the means of instruction"—a sentence which shows clearly where the propaganda hostile to the monarchy is to be found in the Servian schools.]

4. The royal government is also ready to dismiss those officers and officials from the military and civil services in regard to whom it has been proved by judicial investigation that they have been guilty of actions against the territorial integrity of the monarchy; it expects that the imperial and royal government communicate to it for the purpose of starting the investigation the names of these officers and officials, and the facts with which they have been charged.

[By promising the dismissal from the military and civil services of those officers and officials who are found guilty by judicial procedure, the Servian government limits its assent to those cases, in which these persons have been charged with a crime according to the statutory code. As, however, we demand the removal of such officers and officials as indulge in a propaganda hostile to the monarchy, which is generally not punishable in Servia, our demands have not been fulfilled in this point.]

5. The royal government confesses that it is not clear about the sense and the scope of that demand of the imperial and royal government which concerns the obligation on the part of the royal Servian government to permit the co-operation of officials of the imperial and royal government on Servian territory, but it declares that it is willing to accept every co-operation which does not run counter to international law and criminal law, as well as to the friendly and neighborly relations.

[The international law, as well as the criminal law, has nothing to do with this question; it is purely a matter of the nature of state police which is to be solved by way of a special agreement. The reserved attitude of Servia is therefore incomprehensible and on account of its vague general form it would lead to unbridgeable difficulties.]

6. The royal government considers it its duty as a matter of course to begin an investigation against all those persons who have participated in the outrage of June 28 and who are in its territory. As far as the co-operation in this investigation of specially delegated officials of the imperial and royal government is concerned, this cannot be accepted, as this is a violation of the constitution and of criminal procedure. Yet in some cases the result of the investigation might be communicated to the Austro-Hungarian officials.

[The Austrian demand was clear and unmistakable: (1) To institute a criminal procedure against the participants in the outrage. (2) Participation by imperial and royal government officials in the examinations ("Recherche" in contrast with "enquete judiciaire"). (3) It did not occur to us to let imperial and royal government officials participate in the Servian court pro-

cedure; they were to co-operate only in the police researches which had to furnish and fix the material for the investigation. If the Servian government misunderstands us here, this is done deliberately, for it must be familiar with the difference between "enquete judiciaire" and simple police researches. As it desired to escape from every control of the investigation which would yield, if correctly carried out, highly undesirable results for it, and as it possesses no means to refuse in a plausible manner the co-operation of our officials (precedents for such police intervention exist in great numbers) it tries to justify its refusal by showing up our demands as impossible.]

7. The royal government ordered on the evening of the day on which the note was received the arrest of Maj. Voislar Tankosic. However, as far as Milan Ciganowic is concerned, who is a citizen of the Austro-Hungarian monarchy and who has been employed till June 28 with the railroad department, it has as yet been impossible to locate him, wherefor a warrant has been issued against him. The imperial and royal government is asked to make known, as soon as possible, for the purpose of conducting the investigation, the existing grounds for suspicion and the proofs of guilt, obtained in the investigation at Sarajevo.

[This reply is disingenuous. According to our investigation, Ciganowic, by order of the police prefect in Belgrade, left three days after the outrage for Ribari, after it had become known that Ciganowic had participated in the outrage. In the first place, it is therefore incorrect that Ciganowic left the Servian service on June 28. In the second place, we add that the prefect of police at Belgrade, who had himself caused the departure of this Ciganowic and who knew his whereabouts, declared in an interview that a man by the name of Milan Ciganowic did not exist in Belgrade.]

8. The Servian government will amplify and render more severe the existing measures against the suppression of smuggling of arms and explosives. It is a matter of course that it will proceed at once against, and punish severely, those officials of the frontier service on the line Shabatz-Loznica who violated their duty and who have permitted the perpetrators of the crime to cross the frontier.

9. The royal government is ready to give explanations about the expressions which its officials in Servia and abroad have made in interviews after the outrage and which, according to the assertion of the imperial and royal government, were hostile to the monarchy. As soon as the imperial and royal government points out in detail where those expressions were made and succeeds in proving that those expressions have actually been made by the functionaries concerned, the royal government itself will take care that the necessary evidences and proofs are collected therefor.

[The royal Servian government must be aware of the interviews in question. If it demands of the imperial and royal government that it should furnish all kinds of detail about the said interviews and if it reserves for itself the right of a formal investigation, it shows that it is not its intention seriously to fulfill the demand.]

10. The royal government will notify the imperial and royal government so far as this has not been already done by the present note, of the execution of the measures in question, as soon as one of those measures has been ordered and put into execution.

The royal Servian government believes it to be to the common interest not to rush the solution of this affair and it is, therefore, in case the imperial and royal government should not consider itself satisfied with this answer, ready, as ever, to accept a peaceable solution, be it by referring the decision of this question to the international court at The Hague or by leaving it to the decision of the great powers who have participated in the working out of the declaration given by the Servian government on March 31, 1909.

[The Servian note, therefore, is entirely a play for time.]

EXHIBIT 1. THE CHANCELLOR TO THE IMPERIAL AMBASSADORS AT PARIS, LONDON, AND ST. PETERSBURG, ON JULY 23, 1914.

The publications of the Austro-Hungarian government concerning the circumstances under which the assassination of the Austrian successor to the throne and his consort took place, disclose clearly the aims which the pan-Serb propaganda has set itself and the means which it utilizes for their realization. Through the published facts the last doubt must disappear that the center of action of the efforts for the separation of the south Slavic provinces from the Austro-Hungarian monarchy and their union with the Servian kingdom must be sought in Belgrade where it displays its activity with the connivance of members of the government and of the army.

The Serb intrigues may be traced back through a series of years. In a specially marked manner the pan-Serb chauvinism showed itself during the Bosnian crisis. Only to the far-reaching self-restraint and moderation of the Austro-Hungarian government and the energetic intercession of the powers is it to be ascribed that the provocations to which at that time Austria-Hungary was exposed on the part of Servia, did not lead to a conflict. The assurance of future well behavior, which the Servian government gave at that time, it has not kept. Under the very eyes, at least with the tacit sufferance of official Servia, the pan-Serb propaganda has meanwhile increased in scope and intensity; at its door is to be laid the latest crime, the threads of which lead to Belgrade. It has become evident that it is compatible neither with the dignity nor with the self-preservation of the Austro-Hungarian monarchy to view any longer idly the doings across the border through which the safety and the integrity of the monarchy are permanently threatened. With this state of affairs, the action as well as the demands of the Austro-Hungarian government can be viewed only as justifiable. Nevertheless, the attitude assumed by public opinion as well as by the government in Servia does not preclude the fear that the Servian government will decline to meet these demands and that it will allow itself to be carried away into a provocative attitude toward Austria-Hungary. Nothing would remain for the Austro-Hungarian government, unless it renounced definitely its position as a great power, but to press its demands with the Servian government and, if need be, enforce the same by appeal to military measures, in regard to which the choice of means must be left with it.

I have the honor to request you to express yourself in the sense indicated above to (the present representative of M. Viviani) (Sir Edward Grey) (M. Sazonof) and therewith give special emphasis to the view that in this question there is concerned an affair which should be settled solely between Austria-Hungary and Servia, the limitation to which it must be the earnest endeavor of the powers to assure. We anxiously desire the localization of the conflict because every intercession of another power on account of the various treaty alliances would precipitate inconceivable consequences.

I shall look forward with interest to a telegraphic report about the course of your interview.

EXHIBIT 2. THE CHANCELLOR TO THE GOVERNMENTS OF GERMANY, CONFIDENTIAL.

Berlin, July 28, 1914.

You will make the following report to the government to which you are accredited:

In view of the facts which the Austrian government has published in its note to the Servian government, the last doubt must disappear that the outrage to which the Austro-Hungarian successor to the throne has fallen a victim, was prepared in Servia, to say the least with the

connivance of members of the Servian government and army. It is a product of the pan-Serb intrigues which for a series of years have become a source of permanent disturbance for the Austro-Hungarian monarchy and for the whole of Europe.

The pan-Serb chauvinism appeared especially marked during the Bosnian crisis. Only to the far-reaching self-restraint and moderation of the Austro-Hungarian government and the energetic intercession of the powers is it to be ascribed that the provocations to which Austria-Hungary was exposed at that time, did not lead to a conflict. The assurance of future well behavior, which the Servian government gave at that time, it has not kept. Under the very eyes, at least with the tacit sufferance of official Servia, the pan-Serb propaganda has meanwhile continued to increase in scope and intensity. It would be compatible neither with its dignity nor with its right to self-preservation if the Austro-Hungarian government persisted to view idly any longer the intrigues beyond the frontier, through which the safety and the integrity of the monarchy are permanently threatened. With this state of affairs, the action as well as the demands of the Austro-Hungarian government can be viewed only as justifiable.

The reply of the Servian government to the demands which the Austro-Hungarian government put on the 23d inst. through its representative in Belgrade, shows that the dominating factors in Servia are not inclined to cease their former policies and agitation. There will remain nothing else for the Austro-Hungarian government than to press its demands, if need be, through military action, unless it renounces for good its position as a great power.

Some Russian personalities deem it their right as a matter of course and a task of Russia's to actively become a party to Servia in the conflict between Austria-Hungary and Servia. For the European conflagration which would result from a similar step by Russia, the "Nowoje Wremja" believes itself justified in making Germany responsible in so far as it does not induce Austria-Hungary to yield.

The Russian press thus turns conditions upside down. It is not Austria-Hungary, which has called forth the conflict with Servia, but it is Servia which, through unscrupulous favor toward pan-Serb aspirations, even in parts of the Austro-Hungarian monarchy, threatens the same in her existence and creates conditions which eventually found expression in the wanton outrage at Sarajevo. If Russia believes that it must champion the cause of Servia in this matter, it certainly has the right to do so. However, it must realize that it makes the Serb activities its own, to undermine the conditions of existence of the Austro-Hungarian monarchy, and that thus it bears the sole responsibility if out of the Austro-Servian affair, which all other great powers desire to localize, there arises a European war. This responsibility of Russia's is evident and it weighs the more heavily as Count Berchtold has officially declared to Russia that Austria-Hungary has no intention to acquire Servian territory or to touch the existence of the Servian kingdom, but only desires peace against the Servian intrigues threatening its existence.

The attitude of the imperial government in this question is clearly indicated. The agitation conducted by the pan-Slavs in Austria-Hungary has for its goal, with the destruction of the Austro-Hungarian monarchy, the scattering or weakening of the triple alliance with a complete isolation of the German empire in consequence. Our own interest therefore calls us to the side of Austria-Hungary. The duty, if at all possible, to guard Europe against a universal war, points to the support by ourselves of those endeavors which aim at the localization of the conflict, faithful to the course of those policies which we have carried out successfully for forty-four years in the interest of the preservation of the peace of Europe.

Should, however, against our hope, through the interference of Russia the fire be spread, we should have to support, faithful to our duty as allies, the neighbor monarchy with all the power at our command. We shall take the sword only if forced to it, but then in the clear consciousness that we are not guilty of the calamity which war will bring upon the peoples of Europe.

EXHIBIT 3. TELEGRAM OF THE IMPERIAL AMBASSADOR AT VIENNA TO THE CHANCELLOR ON JULY 24, 1914.

Count Berchtold has asked to-day for the Russian charge d'affaires in order to explain to him thoroughly and cordially Austria-Hungary's point of view toward Servia. Austria-Hungary would not claim Servian territory. It insisted merely that this step was meant as a definite means of checking the Serb intrigues. Impelled by force of circumstance, Austria-Hungary must have a guaranty for continued amicable relations with Servia. It was far from him to intend to bring about a change in the balance of powers in the Balkans. The charge d'affaires, who had received no instructions from St. Petersburg, took the discussion of the secretary "ad referendum" with the promise to submit it immediately to Sazonof.

EXHIBIT 4. TELEGRAM OF THE IMPERIAL AMBASSADOR AT ST. PETERSBURG TO THE CHANCELLOR ON JULY 24, 1914.

I have just utilized the contents of order 592 in a prolonged interview with Sazonof. The secretary (Sazonof) indulged in unmeasured accusations toward Austria-Hungary and he was very much agitated. He declared most positively that Russia could not permit under any circumstances that the Servo-Austrian difficulty be settled alone between the parties concerned.

EXHIBIT 5. THE IMPERIAL AMBASSADOR AT ST. PETERSBURG TO THE CHANCELLOR. TELEGRAM OF JULY 26, 1914.

The Austro-Hungarian ambassador had an extended interview with Sazonof this afternoon. Both parties had a satisfactory impression as they told me afterwards. The assurance of the ambassador that Austria-Hungary had no idea of conquest but wished to obtain peace at last at her frontiers, greatly pacified the secretary.

EXHIBIT 6. TELEGRAM OF THE IMPERIAL AMBASSADOR AT ST. PETERSBURG TO THE CHANCELLOR ON JULY 25, 1914.

Message to his majesty from Gen. von Chelius (German honorary aide de camp to the czar).

The manoeuvres of the troops in the Krasnoe camp were suddenly interrupted and the regiments returned to their garrisons at once. The manoeuvres have been cancelled. The military pupils were raised today to the ranks of officers instead of next fall. At headquarters there obtains great excitement over the procedure of Austria. I have the impression that complete preparations for mobilization against Austria are being made.

EXHIBIT 7. TELEGRAM OF THE IMPERIAL AMBASSADOR AT ST. PETERSBURG TO THE CHANCELLOR ON JULY 26, 1914.

The military attache requests the following message to be sent to the general staff: I deem it certain that mobilization has been ordered for Kiev and Odessa. It is doubtful at Warsaw and Moscow and improbable elsewhere.

EXHIBIT 8. TELEGRAM OF THE IMPERIAL CONSULATE AT KOVNO TO THE CHANCELLOR ON JULY 27, 1914.

Kovno has been declared to be in a state of war.

EXHIBIT 9. TELEGRAM OF THE IMPERIAL MINISTER AT BERNE TO THE CHANCELLOR ON JULY 27, 1914.

Have learned reliably that French 14th corps has discontinued manoeuvres.

EXHIBIT 10. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT LONDON, JULY 27, 1914.

(Urgent.) Austria-Hungary has declared in St.

Petersburg officially and solemnly that it has no desire for territorial gain in Servia; that it will not touch the existence of the kingdom, but that it desires to establish peaceful conditions. According to news received here, the call for several classes of the reserves is expected immediately, which is equivalent to mobilization. If this news proves correct, we shall be forced to counter-measures very much against our own wishes. Our desire to localize the conflict and to preserve the peace of Europe remains unchanged. We ask to act in this sense at St. Petersburg with all possible emphasis.

EXHIBIT 10A. TELEGRAM OF THE IMPERIAL CHANCELLOR TO THE IMPERIAL AMBASSADOR AT PARIS, JULY 26, 1914.

After officially declaring to Russia that Austria-Hungary has no intention to acquire territorial gain and to touch the existence of the kingdom, the decision whether there is to be a European war rests solely with Russia, which has to bear the entire responsibility. We depend upon France, with which we are at one in the desire for the preservation of the peace of Europe, that it will exercise its influence at St. Petersburg in favor of peace.

EXHIBIT 10B. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT ST. PETERSBURG ON JULY 26, 1914.

After Austria's solemn declaration of its territorial disinterestedness, the responsibility for a possible disturbance of the peace of Europe through a Russian intervention rests solely upon Russia. We trust still that Russia will undertake no steps which will threaten seriously the peace of Europe.

EXHIBIT 11. TELEGRAM OF THE IMPERIAL AMBASSADOR AT ST. PETERSBURG TO THE CHANCELLOR ON JULY 27, 1914.

Military attache reports a conversation with the secretary of war; Sazonof has requested the latter to enlighten me on the situation. The secretary of war has given me his word of honor that no order to mobilize has as yet been issued. Though general preparations are being made, no reserves were called and no horses mustered. If Austria crossed the Servian frontier, such military districts as are directed toward Austria, viz., Kiev, Odessa, Moscow, Kazan, are to be mobilized, but under no circumstances those on the German frontier—Warsaw, Vilna, St. Petersburg. Peace with Germany was desired very much. Upon my inquiry into the object of mobilization against Austria, he shrugged his shoulders and referred to the diplomats. I told the secretary that we appreciated the friendly intentions, but considered mobilization even against Austria as very menacing.

EXHIBIT 12. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT LONDON ON JULY 27, 1914.

We know as yet nothing of a suggestion of Sir Edward Grey's to hold a quadruple conference in London. It is impossible for us to place our ally in his dispute with Servia before a European tribunal. Our mediation must be limited to the danger of an Austro-Russian conflict.

EXHIBIT 13. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT LONDON ON JULY 25 1914.

The distinction made by Sir Edward Grey between an Austro-Servian and an Austro-Russian conflict is perfectly correct. We do not wish to interpose in the former any more than England, and as heretofore we take the position that this question must be localized by virtue of all powers refraining from intervention. It is therefore our hope that Russia will refrain from any action in view of her responsibility and the seriousness of the situation. We are prepared, in the event of an Austro-Russian controversy, quite apart from our known duties as allies, to intercede between Russia and Austria jointly with the other powers.

EXHIBIT 14. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT ST. PETERSBURG ON JULY 28, 1914.

We continue in our endeavor to induce Vienna to elucidate in St. Petersburg the object and scope of the Austrian action in Servia in a manner both convincing and satisfactory to Russia. The declaration of war which has meanwhile ensued alters nothing in this matter.

EXHIBIT 15. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR IN LONDON ON JULY 27, 1914.

We have at once started the mediation proposal in Vienna in the sense as desired by Sir Edward Grey. We have communicated besides to Count Berchtold the desire of M. Sazonof for a direct parley with Vienna.

EXHIBIT 16. TELEGRAM OF THE IMPERIAL AMBASSADOR AT VIENNA TO THE CHANCELLOR ON JULY 28, 1914.

Count Berchtold requests me to express to your excellency his thanks for the communication of the English mediation proposal. He states, however, that after the opening of hostilities by Servia and the subsequent declaration of war, the step appears belated.

EXHIBIT 17. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT PARIS ON JULY 29, 1914.

News received here regarding French preparations of war multiplies from hour to hour. I request that you call the attention of the French government to this and accentuate that such measures would call forth counter-measures on our part. We should have to proclaim threatening state of war (drohende kriegsgefahr), and while this would not mean a call for the reserves or mobilization, yet the tension would be aggravated. We continue to hope for the preservation of peace.

EXHIBIT 18. TELEGRAM OF THE MILITARY ATTACHE AT ST. PETERSBURG TO H. M. THE KAISER ON JULY 30, 1914.

Prince Troubetzki said to me yesterday, after causing your majesty's telegram to be delivered at once to Czar Nicolas: Thank God that a telegram of your emperor has come. He has just told me the telegram has made a deep impression upon the czar, but as the mobilization against Austria had already been ordered and Sazonof had convinced his majesty that it was no longer possible to retreat, his majesty was sorry he could not change it any more. I then told him that the guilt for the measureless consequences lay at the door of premature mobilization against Austria-Hungary, which after all was involved merely in a local war with Servia, for Germany's answer was clear and the responsibility rested upon Russia, which ignored Austria-Hungary's assurance that it had no intentions of territorial gain in Servia. Austria-Hungary mobilized against Servia and not against Russia and there was no ground for an immediate action on the part of Russia. I further added that in Germany one could not understand any more Russia's phrase that "she could not desert her brethren in Servia," after the horrible crime of Sarajevo. I told him finally he need not wonder if Germany's army were to be mobilized.

EXHIBIT 19. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT ROME ON JULY 31, 1914.

We have continued to negotiate between Russia and Austria-Hungary through a direct exchange of telegrams between his majesty the kaiser and his majesty the czar, as well as in conjunction with Sir Edward Grey. Through the mobilization of Russia all our efforts have been greatly handicapped if they have not become impossible. In spite of pacifying assurances Russia is taking such far-reaching measures against us that the situation is becoming continually more menacing.

EXHIBIT 20. HIS MAJESTY TO THE CZAR.

July 28, 10:45 p. m.

I have heard with the greatest anxiety of the impression which is caused by the action of Austria-Hungary against Servia. The unscrupulous agitation, which has been going on for years in Servia, has led to the revolting crime of which

Archduke Franz Ferdinand has become a victim. The spirit which made the Servians murder their own king and his consort still dominates that country. Doubtless you will agree with me that both of us, you as well as I, and all other sovereigns, have a common interest to insist that all those who are responsible for this horrible murder shall suffer their deserved punishment.

On the other hand I by no means overlook the difficulty encountered by you and your government to stem the tide of public opinion. In view of the cordial friendship which has joined us both for a long time with firm ties, I shall use my entire influence to induce Austria-Hungary to obtain a frank and satisfactory understanding with Russia. I hope confidently that you will support me in my efforts to overcome all difficulties which may yet arise.

Your most sincere and devoted friend and cousin. (Signed) WILHELM.

EXHIBIT 21. THE CZAR TO HIS MAJESTY.

Peterhof Palace, July 29, 1 p. m.

I am glad that you are back in Germany. In this serious moment I ask you earnestly to help me. An ignominious war has been declared against a weak country and in Russia the indignation which I fully share is tremendous. I fear that very soon I shall be unable to resist the pressure exercised upon me and that I shall be forced to take measures which will lead to war. To prevent a calamity as a European war would be, I urge you in the name of our old friendship to do all in your power to restrain your ally from going too far.

(Signed) NICOLAS.

EXHIBIT 22. HIS MAJESTY TO THE CZAR.

July 29, 6:30 p. m.

I have received your telegram and I share your desire for the conservation of peace. However, I cannot—as I told you in my first telegram—consider the action of Austria-Hungary as an "ignominious war." Austria-Hungary knows from experience that the promises of Servia as long as they are merely on paper are entirely unreliable.

According to my opinion the action of Austria-Hungary is to be considered as an attempt to receive full guaranty that the promises of Servia are effectively translated into deeds. In this opinion I am strengthened by the explanation of the Austrian cabinet that Austria-Hungary intended no territorial gain at the expense of Servia. I am therefore of opinion that it is perfectly possible for Russia to remain a spectator in the Austro-Servian war without drawing Europe into the most terrible war it has ever seen. I believe that a direct understanding is possible and desirable between your government and Vienna, an understanding which—as I have already telegraphed you—my government endeavors to aid with all possible effort. Naturally military measures by Russia, which might be construed as a menace by Austria-Hungary, would accelerate a calamity which both of us desire to avoid and would undermine my position as mediator which—upon your appeal to my friendship and aid—I willingly accepted.

(Signed) WILHELM.

EXHIBIT 23. HIS MAJESTY TO THE CZAR.

July 30, 1 a. m.

My ambassador has instructions to direct the attention of your government to the dangers and serious consequences of a mobilization; I have told you the same in my last telegram. Austria-Hungary has mobilized only against Servia, and only a part of her army. If Russia, as seems to be the case, according to your advice and that of your government, mobilizes against Austria-Hungary, the part of the mediator with which you have entrusted me in such friendly manner and which I have accepted upon your express desire, is threatened if not made impossible. The entire weight of decision now rests upon your shoulders; you have to bear the responsibility for war or peace. (Signed) WILHELM.

EXHIBIT 23A. THE CZAR TO HIS MAJESTY.

Peterhof, July 30, 1914, 1:20 p. m.

I thank you from my heart for your quick reply. I am sending to-night Tatisheff (Russian honorary aide to the kaiser) with instructions. The military measures now taking form were decided upon five days ago, and for the reason of defense against the preparations of Austria. I hope with all my heart that these measures will not influence in any manner your position as mediator, which I value very highly. We need your strong pressure upon Austria so that an understanding can be arrived at with us.

NICOLAS.

EXHIBIT 24. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR AT ST. PETERSBURG ON JULY 31, 1914.

(Urgent.) In spite of negotiations still pending and although we have up to this hour made no preparations for mobilization, Russia has mobilized her entire army and navy, hence also against us. On account of these Russian measures we have been forced, for the safety of the country, to proclaim the threatening state of war, which does not yet imply mobilization. Mobilization, however, is bound to follow if Russia does not stop every measure of war against us and against Austria-Hungary within twelve hours and notifies us definitely to this effect. Please to communicate this at once to M. Sazonof and wire hour of communication.

EXHIBIT 25. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR IN PARIS ON JULY 31, 1914.

(Urgent.) Russia has ordered mobilization of her entire army and fleet, therefore also against us in spite of our still pending mediation. We have therefore declared the threatening state of war which is bound to be followed by mobilization unless Russia stops within twelve hours all measures of war against us and Austria. Mobilization inevitably implies war. Please ask French government whether it intends to remain neutral in a Russo-German war. Reply must be made in eighteen hours. Wire at once hour of inquiry. Utmost speed necessary.

EXHIBIT 26. TELEGRAM OF THE CHANCELLOR TO THE IMPERIAL AMBASSADOR IN ST. PETERSBURG ON AUG. 1, 12:52 P. M.

(Urgent.) If the Russian government gives no satisfactory reply to our demand, your excellency will please transmit this afternoon 5 o'clock (mid-European time) the following statement:

The imperial government has endeavored from the beginning of the crisis to bring it to a peaceful solution. In accordance with a wish expressed to him by his majesty the emperor of Russia, his majesty the emperor of Germany, in co-operation with England, applied himself to the accomplishment of a mediating role toward the cabinets of Vienna and St. Petersburg, when Russia, without awaiting the outcome, proceeded to mobilize her entire land and naval forces.

Following this threatening measure, occasioned by no military preparation on the part of Germany, the German empire found itself confronted by a serious and imminent peril. If the imperial government had failed to meet this peril it would have jeopardized the safety and even the existence of Germany. Consequently, the German government was obliged to address the government of the emperor of all the Russias and insist upon the cessation of all these military measures. Russia having refused to accede to this demand, and having manifested by this refusal that her acts were directed against Germany, I have the honor, by order of my government, to make known to your excellency the following:

His majesty, the emperor, my august sovereign, in the name of the empire, takes up the defiance and considers himself in a state of war against Russia.

I urgently ask that you wire the hour of arrival of these instructions, and of their carrying out, according to Russian time.

Kindly ask for your passports and hand over protection and business to the American embassy.

EXHIBIT 27. TELEGRAM OF THE IMPERIAL AMBASSADOR IN PARIS TO THE CHANCELLOR ON AUG. 1, 1:05 P. M.

Upon my repeated definite inquiry whether France would remain neutral in the event of a Russo-German war, the prime minister declared that France would do that which her interests dictated.

ROYAL MESSAGES AND OTHER DOCUMENTS.

Pamphlet entitled "How the Franco-German Conflict Could Have Been Avoided" issued by the German government. Original in English only.

The following documents refer to the exchange of views between Germany and England immediately before the war broke out. It will be perceived from these documents that Germany was prepared to spare France in case England should remain neutral and would guarantee the neutrality of France.

TELEGRAM OF HIS ROYAL HIGHNESS PRINCE HENRY OF PRUSSIA TO H. M. THE KING OF ENGLAND OF JULY 30, 1914.

Am here since yesterday; have informed William of what you kindly told me at Buckingham palace last Sunday, who gratefully received your message.

William, much preoccupied, is trying his utmost to fulfill Nicky's appeal to him to work for maintenance of peace and is in constant telegraphic communication with Nicky, who to-day confirms news that military measures have been ordered by him equal to mobilization, measures which have been taken already five days ago.

We are furthermore informed that France is making military preparations, whereas we have taken no measures, but may be forced to do so any moment, should our neighbors continue, which then would mean a European war.

If you really and earnestly wish to prevent this terrible disaster, may I suggest you using your influence on France and also Russia to keep neutral, which seems to me would be most useful.

This I consider a very good, perhaps the only chance, to maintain the peace of Europe.

I may add that now more than ever Germany and England should lend each other mutual help to prevent a terrible catastrophe, which otherwise seems unavoidable.

Believe me that William is most sincere in his endeavors to maintain peace, but that the military preparations of his two neighbors may at last force him to follow their example for the safety of his own country, which otherwise would remain defenseless.

I have informed William of my telegram to you, and hope you will receive my informations in the same spirit of friendship which suggested them. (Signed) HENRY.

TELEGRAM OF H. M. THE KING OF ENGLAND TO PRINCE HENRY OF PRUSSIA OF JULY 30, 1914.

Thanks for your telegram. So pleased to hear of William's effort to concert with Nicky to maintain peace. Indeed, I am earnestly desirous that such an irreparable disaster as a European war should be averted. My government is doing its utmost, suggesting to Russia and France to suspend further military preparations if Austria will consent to be satisfied with occupation of Belgrade and neighboring Servian territory as a hostage for satisfactory settlement of her demands, other countries meanwhile suspending their war preparation. Trust William will use his great influence to induce Austria to accept this proposal, thus proving that Germany and England are working together to prevent what would be an international catastrophe. Pray assure William I am doing and shall continue to do all that lies in my power to preserve peace of Europe. (Signed) GEORGE.

TELEGRAM OF HIS MAJESTY THE EMPEROR TO H. M. THE KING OF ENGLAND OF JULY 31, 1914.

Many thanks for your kind telegram. Your proposals coincide with my ideas and with the statements I got this night from Vienna, which I have had forwarded to London. I just received news from chancellor that official notification has just reached him that this night Nicky had ordered the mobilization of his whole army and fleet. He has not even awaited the results of the mediation I am working at and left me without news. I am off for Berlin to take measures for insuring safety of my eastern frontiers, where Russian troops are already posted. (Signed) WILLY.

TELEGRAM OF THE KING OF ENGLAND TO HIS MAJESTY THE EMPEROR OF AUG. 1, 1914.

Many thanks for your telegram last night. I sent an urgent telegram to Nicky expressing my readiness to do everything in my power to assist in reopening conversations between powers concerned. (Signed) GEORGIE.

TELEGRAM OF THE GERMAN AMBASSADOR IN LONDON TO THE CHANCELLOR OF AUG. 1, 1914.

Sir E. Grey just asked me by telephone whether I believed to be in a position to declare that we would not attack France in a war between Germany and Russia in case France should remain neutral. I declared I believed to be able to give such an undertaking. (Signed) LICHNOWSKY.

TELEGRAM OF HIS MAJESTY THE EMPEROR TO H. M. THE KING OF ENGLAND OF AUG. 1, 1914.

I just received the communication from your government offering French neutrality under guarantee of Great Britain. Added to this offer was the inquiry whether under these conditions Germany would refrain from attacking France. On technical grounds my mobilization, which had already been proclaimed this afternoon, must proceed against two fronts east and west as prepared; this cannot be countermanded because. I am sorry, your telegram came so late. But if France offers me neutrality, which must be guaranteed by the British fleet and army, I shall of course refrain from attacking France and employ my troops elsewhere. I hope that France will not become nervous. The troops on my frontier are in the act of being stopped by telegraph and telephone from crossing into France.

TELEGRAM OF THE CHANCELLOR TO THE GERMAN AMBASSADOR IN LONDON OF AUG. 1, 1914.

Germany is ready to accept British proposal in case England guarantees with all her forces absolute neutrality of France in Russo-German conflict. German mobilization has been ordered to-day on account of Russian challenge before English proposal was known here. It is therefore now impossible to make any change in strategical distribution of troops ordered to the French frontier. But we guarantee that our troops will not cross the French frontier before 7 p. m. on Monday, the 3d inst., in case England will pledge herself meanwhile.

(Signed) BETHMANN-HOLLWEG.

TELEGRAM OF H. M. THE KING OF ENGLAND TO HIS MAJESTY THE EMPEROR OF AUG. 1, 1914.

In answer to your telegram just received, I think there must be some misunderstanding as to a suggestion that passed in friendly conversation between Prince Lichnowsky and Sir Edward Grey this afternoon when they were discussing how actual fighting between German and French armies might be avoided while there is still a chance of some agreement between Austria and Russia. Sir Edward Grey will arrange to see Prince Lichnowsky early to-morrow morning to ascertain whether there is a misunderstanding on his part. (Signed) GEORGE.

TELEGRAM OF THE GERMAN AMBASSADOR IN LONDON TO THE CHANCELLOR OF AUG. 2, 1914.

Sir E. Grey's suggestions were prompted by a desire to make it possible for England to keep permanent neutrality, but as they were not based on a previous understanding with France and made without knowledge of our mobilization, they have been abandoned as absolutely hopeless. (Signed) LICHNOWSKY.

The essence of Germany's declarations is contained in Emperor William's telegram to the king of England of Aug. 1, 1914. Even if there existed a misunderstanding as to an English proposal, the kaiser's offer furnished England the opportunity to prove her pacific disposition and to prevent the Franco-German war.

*SIR EDWARD GREY'S STATEMENT.

Sir Edward Grey, answering a question addressed to him by Sir Robert Cecil in the house of commons, made the following statement:

"It was reported to me one day that the German ambassador had suggested that Germany might remain neutral in a war between Russia and Austria, and also engage not to attack France, if we would remain neutral and secure the neutrality of France. I said at once that, if the German government thought such an arrangement possible, I was sure we could secure it.

"It appeared, however, that what the ambassador meant was that we should secure the neutrality of France if Germany went to war with Russia. This was quite a different proposal, and, as I supposed it in all probability to be incompatible with the terms of the Franco-Russian alliance, it was not in my power to promise to secure it.

"Subsequently, the ambassador sent for my private secretary and told him that as soon as the misunderstanding was cleared up, he had sent a second telegram to Berlin to cancel the impression produced by the first telegram he had sent on the subject."

BELGIUM'S GRAY BOOK.

Issued in October.

NO. 1. LETTER ADDRESSED BY THE BELGIAN MINISTER IN VIENNA TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Vienna, 24th July, 1914.

Sir—I have the honor of transmitting herewith the text of the ultimatum of Austria-Hungary to Servia. Yours, &c. (Signed)

Comte ERREMBAULT de DUDZEELE.

(See No. 4, British White Paper.)

NO. 2. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS, BERLIN, LONDON, VIENNA, AND ST. PETERSBURG.

Brussels, 24th July, 1914.

The king's government has asked itself whether in the existing circumstances it would not be proper to address to the powers who have guaranteed Belgian independence and its neutrality a communication for the purpose of confirming to them its resolution to carry out the international duties which are imposed upon it by treaties in the event of war breaking out on the Belgian frontiers.

It has come to the conclusion that such a communication would be premature at the present moment, but that events might take a rapid course and not allow it time to transmit at the required moment suitable instructions to its representatives abroad.

In view of this position, I proposed to the king and to my colleagues in the cabinet who share my views to give you immediately precise indications as to the steps which you would have to take if the eventuality of a Franco-German war were to become more menacing.

You will find inclosed a letter, signed but not dated, which you will have to hand for persual to the minister for foreign affairs and leave him a copy of same should circumstances require this communication.

I shall by telegram advise you of the moment to take action.

The telegram will be sent to you at the time when the mobilization of the Belgian army will be ordered if, contrary to our earnest hope, and to the appearances of a peaceful solution, our information warranted us in taking this extreme precautionary measure. I am, &c.,

(Signed) DAVIGNON.

INCLOSURE IN NO. 2.

The international position is serious; the eventuality of a conflict between several powers cannot be set aside from the anxieties of the king's government.

Belgium has observed with the most scrupulous exactness the duties of a neutral state imposed upon her by the treaties of 19th April, 1839. She will endeavor unflinchingly to fulfill them, whatever may be the circumstances.

The friendly disposition of the powers toward her has been so often affirmed that Belgium has confidence that her territory will be untouched by any attack should hostilities break out on her frontiers.

All the necessary measures to insure the observance of her neutrality have, nevertheless, been taken by the king's government. The Belgian army is mobilized and is proceeding to the strategic positions selected, for the purpose of insuring the defense of the country and respect for her neutrality. The forts of Antwerp and of the Meuse are in a state of defense.

It is hardly necessary, Monsieur le Ministre, to lay stress upon the character of these measures. They have no other object than to put Belgium in a position to fulfill her international obligations; it goes without saying that they are not and could not be inspired either by a design to participate in an armed struggle of the powers, nor by any sentiment of defiance toward any one of them.

In complying with the orders received, I have the honor to hand your excellency a copy of the declaration of the king's government, requesting you to be good enough to take note of same.

An identical communication has been made to the other powers guaranteeing Belgian neutrality.

NO. 3. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS AT ROME, THE HAGUE, AND LUXEMBURG.

Brussels, 25th July, 1914.

I have forwarded to your colleagues accredited to the powers guaranteeing the independence and neutrality of Belgium an undated circular, the text of which you will find inclosed herewith.

Should the threat of a Franco-German war become imminent, this circular would be communicated to the governments of the guaranteeing powers to make them acquainted with our very definite resolution to fulfill the international duties imposed upon us by the treaties of 1839.

The communication in question would only be effective upon receipt of a telegraphic order from me.

Should circumstances lead me to give this order I would, also by wire, request you to make the government to whom you are accredited acquainted with our step, by communicating to it a copy of the accompanying circular as a matter of information, and without requiring that an acknowledgment of this communication should be handed to you.

My telegram would in that event inform you of the date which the circular should bear, which date you would be careful to enter on the copy which you would hand to the minister for foreign affairs.

It goes without saying that the present dispatch and its inclosure must bear a strictly confidential character until the receipt of further instructions from me.

(Signed) DAVIGNON.

NO. 4. LETTER ADDRESSED BY THE BELGIAN MINISTER AT BELGRADE TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Belgrade, 25th July, 1914.

I have the honor to inclose herewith the text of the reply made by the Servian government to the Austro-Hungarian communication of 10 (23) July. (Signed) MICHOTTE DE WELLE.

INCLOSURE TO NO. 4.

(See No. 39, British White Paper.)

NO. 5. COMMUNICATION MADE ON 26TH JULY, 1914, BY THE AUSTRO-HUNGARIAN LEGATION IN BRUSSELS TO THE MINISTER FOR FOREIGN AFFAIRS.

Yesterday before 6 o'clock M. Pachitch gave the reply of the Servian government to the Austro-Hungarian note. As this reply was not considered satisfactory, diplomatic relations have been broken off and the minister and staff of the

Austrian legation have left Belgrade. The Servian mobilization had already been decreed before 3 o'clock.

NO. 6. TELEGRAM ADDRESSED BY BARON BEYENS, BELGIAN MINISTER IN BERLIN, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Berlin, 27th July, 1914.

According to a telegram from the British charge d'affaires at Belgrade, the Servian government has yielded on all the points of the Austrian note. It even admits the interference of Austrian officials, if this can be brought into accord with the usages of the law of nations. The British charge d'affaires is of opinion that this reply should satisfy Austria in the event that she is not desirous of war. Furthermore, the impression here is more favorable to-day, more especially as hostilities against Servia have not begun. The British government proposes the intervention of England, Germany, France and Italy at St. Petersburg and Vienna in order to find a basis for conciliation. Germany alone has not yet replied. The emperor will decide.

NO. 7. TELEGRAM ADDRESSED BY COUNT ERREMBAULT DE DUDZEELE, BELGIAN MINISTER IN VIENNA, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Vienna, 28th July, 1914.

The minister for foreign affairs notifies me of the declaration of war by Austria-Hungary to Servia.

NO. 8. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN BERLIN, PARIS, LONDON, VIENNA, ST. PETERSBURG, ROME, THE HAGUE, LUXEMBURG.

Brussels, 29th July, 1914.

The king's government has decided to place the army on the reinforced peace footing.

This measure must not in any way be confounded with mobilization.

On account of the small extent of her territory, the whole of Belgium to a certain extent forms a frontier zone.

Her army on the ordinary peace footing only comprises one class of militia under arms. On the reinforced peace footing her army divisions and her cavalry division, owing to the call of three classes, have an effective strength analogous to that of the corps permanently maintained on the frontier zones of the neighboring powers.

These particulars would enable you to reply to any questions which may be addressed to you. I am, &c., (Signed) DAVIGNON.

NO. 9. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN BERLIN, PARIS AND LONDON.

Brussels, 31st July, 1914.

The French minister having called to show me a telegram of the Havas agency, decreeing a state of war in Germany, said to me: I take advantage of this opportunity to declare to you that no incursion of French troops will take place in Belgium, even if large forces were massed upon the frontiers of your country. France does not wish to have the responsibility of carrying out the first act of hostility toward Belgium. Instructions to this effect will be given to the French authorities.

I thanked M. Klobukowski for his communication and I thought it my duty to say to him that we always had the greatest confidence in the loyalty with which our two neighboring states would keep their engagements toward us. We also have every reason for believing that the attitude of the German government will be identical with that of the government of the French republic. (Signed) DAVIGNON.

NO. 10. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO ALL THE HEADS OF LEGATIONS ABROAD.

Brussels, 31st July, 1914.

The minister of war informs me that mobilization has been decreed and that Saturday, 1st August, is the first day of mobilization.

(Signed) DAVIGNON.

NO. 11. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN BERLIN, LONDON AND PARIS.

Brussels, 31st July, 1914.

The British minister asked to see me urgently, and made the following communication to me which he was desirous of being in a position to place before me several days ago. On account of the possibility of a European war, Sir Edward Grey separately inquired of the French and German governments as to whether each of them was prepared to respect the neutrality of Belgium, provided no power violated same:

"In view of the existing treaties I am instructed to inform the Belgian minister for foreign affairs of the foregoing and to say that Sir Edward Grey presumes that Belgium will do all in her power to maintain her neutrality, and that she desires and expects that the other powers shall observe and maintain same."

I hastened to thank Sir Francis Villiers for this communication, which the Belgian government particularly appreciates, and I added that Great Britain and the other nations guaranteeing our independence might rest assured that we would neglect no effort to maintain our neutrality, and that we were convinced that the other powers, in view of the excellent relations of friendship and confidence which we had always maintained with them, would observe and maintain this neutrality.

I did not fail to affirm that our military forces, which were considerably developed in consequence of our recent reorganization, were sufficient to enable us to defend ourselves energetically in the event of violation of our territory.

In the course of the conversation which followed Sir Francis appeared to be somewhat surprised at the rapidity with which we had resolved upon the mobilization of our army. I pointed out that the Netherlands had taken an identical resolution before us, and that, on the other hand, the recent date of our new military regime and the transitory measures which we had to decide upon on that occasion imposed urgent and complete measures upon us. Our neighbors and guarantors ought to view this resolution as an evidence of our desire to manifest our profound desire ourselves to maintain our neutrality.

Sir Francis appeared to me to be satisfied with my reply, and announced to me that his government awaited this reply in order to continue negotiations with France and Germany, the conclusion of which negotiations would be communicated to me. (Signed) DAVIGNON.

NO. 12. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN BERLIN, LONDON AND PARIS.

Brussels, 31st July, 1914.

This morning in the course of a conversation which the secretary general of my department had with Herr von Below, he explained to the German minister the trend of the military measures which we had taken and told him they were a consequence of our decision to carry out our international obligations and that they in no way implied an attitude of defiance toward our neighbors.

The secretary general subsequently asked the German minister whether he had knowledge of the conversation which he had had with his predecessor, Herr von Flotow, and of the reply which the imperial chancellor had instructed the latter to make to him.

In the course of the discussion aroused in 1911 by the lodging of the Dutch scheme regarding the Flushing fortifications, certain papers had asserted that in the event of a Franco-German war our neutrality would be violated by Germany.

The department of foreign affairs had suggested the idea that a declaration made in the German parliament on the occasion of a debate upon foreign policy would be calculated to appease public opinion and to calm its suspicions, which are so regrettable from the point of view of the relations of the two countries.

Herr von Bethmann-Hollweg made reply that he was most appreciative of the sentiment which had inspired our action. He declared that Ger-

many had no intention of violating our neutrality, but he considered that by making a declaration publicly Germany would weaken her military position in respect of France, who, being reassured in the northern quarter, would direct all her forces to the eastern quarter.

Baron van der Elst went on to say that he perfectly understood the objections which Herr von Bethmann-Hollweg raised to the suggested public declaration and he pointed out that subsequently in 1913 Herr von Jagow had given to the budget commission of the reichstag reassuring declarations with reference to Belgian neutrality being respected.

Herr von Below replied that he was aware of a conversation with Herr von Flotow and that he was certain that the sentiments to which expression was given at that time had not changed.

(Signed) DAVIGNON.

INCLOSURE IN NO. 12. LETTER ADDRESSED BY THE BELGIAN MINISTER IN BERLIN TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Berlin, 2d May, 1913.

I have the honor of informing you, according to the semi-official "Norddeutsche Allgemeine Zeitung," of the declarations made in the course of the sitting of 29th April of the budget committee of the reichstag by the secretary of state for foreign affairs and the minister of war with reference to Belgian neutrality.

"A member of the social democratic party said: 'In Belgium the approach of a Franco-German war is viewed with apprehension, because it is feared that Germany will not respect Belgian neutrality.'

"Herr von Jagow, secretary of state for foreign affairs, replied: 'The neutrality of Belgium is determined by international conventions, and Germany is resolved to respect these conventions.'

"This declaration did not satisfy another member of the social democratic party. Herr von Jagow observed that he had nothing to add to the clear statement which he had uttered with reference to the relations between Germany and Belgium.

"In reply to further interrogations from a member of the social democratic party, Herr von Heeringten, minister of war, stated: 'Belgium does not play any part in the justification of the German scheme of military reorganization; the scheme is justified by the position of matters in the east. Germany will not lose sight of the fact that Belgian neutrality is guaranteed by international treaties.'

"A member of the same party having again referred to Belgium, Herr von Jagow again pointed out that his declaration regarding Belgium was sufficiently clear."

NO. 13. TELEGRAM ADDRESSED BY COUNT DE LALAING, BELGIAN MINISTER TO LONDON, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 1st August, 1914.

England has separately inquired of France and Germany as to whether they would respect Belgian territory in the event of their adversary not violating it. The German reply is awaited. France has accepted.

NO. 14. TELEGRAM ADDRESSED BY BARON BEYENS, BELGIAN MINISTER IN BERLIN, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Berlin, 1st August, 1914.

The British ambassador has been instructed to ask the minister for foreign affairs whether in the event of war Germany would respect Belgian neutrality and the minister appears to have said that he cannot reply to this question.

NO. 15. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN BERLIN, PARIS AND LONDON.

Brussels, 1st August, 1914.

I have the honor to inform you that the French minister has verbally made to me the following communication:

"I am authorized to declare that in the event of an international conflict the government of the republic will, as it has always declared, respect the neutrality of Belgium. In the event of this neutrality not being respected by another power, the French government, in order to insure its own defense, might be led to modify its attitude."

I thanked his excellency and added that on our part we had without delay taken all requisite measures to have our independence and our frontiers respected. (Signed) DAVIGNON.

NO. 16. TELEGRAM ADDRESSED BY THE MINISTER FOR FOREIGN AFFAIRS TO THE BELGIAN LEGATIONS IN PARIS, BERLIN, LONDON, VIENNA AND ST. PETERSBURG.

Brussels, 1st August, 1914.

Execute instructions conveyed by letter of 24th July. (Signed) DAVIGNON.

(See No. 2.)

NO. 17. TELEGRAM ADDRESSED BY THE MINISTER FOR FOREIGN AFFAIRS TO THE BELGIAN LEGATIONS IN ROME, THE HAGUE AND LUXEMBURG.

Brussels, 1st August, 1914.

Execute instructions conveyed by letter of 25th July. (Signed) DAVIGNON.

(See No. 3.)

NO. 18. TELEGRAM ADDRESSED BY M. EYSCHEN, PRESIDENT OF THE LUXEMBURG GOVERNMENT, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Luxemburg, 2d August, 1914.

I have the honor to bring the following facts to the knowledge of your excellency: Sunday, 2d August, very early, according to information which reached the grand ducal government at this moment, German troops entered Luxemburg territory by the Wasserbillig and Remich bridges, proceeding more especially toward the south of the country and toward the town of Luxemburg, capital of the grand duchy. A certain number of armored trains with troops and ammunition have been forwarded by the railway from Wasserbillig to Luxemburg, where they are expected to arrive at any moment. These facts imply acts which are manifestly contrary to the neutrality of the grand duchy, guaranteed by the treaty of London of 1867. The Luxemburg government has not failed to protest energetically to the representative of his majesty the German emperor in Luxemburg against this aggression. An identical protest will be transmitted to the secretary of state for foreign affairs in Berlin.

(Signed) EYSCHEN.

The minister of state, president of the government.

NO. 19. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS, BERLIN, LONDON, VIENNA AND ST. PETERSBURG.

Brussels, 2d August, 1914.

I had taken care to have the German minister advised, through M. de Bassompierre, that a communication of M. Klobukowski, the French minister, to the Brussels press would announce the express declaration which the latter had made to me on 1st August. On meeting Herr von Below he thanked me for this attention and added that up to the present he had not been instructed to make us any official communication, but that we were aware of his personal opinion respecting the security with which we had the right to regard our eastern neighbors. I replied at once that all that we knew of the intentions of the latter, intentions set forth in many former interviews, did not allow us to doubt their perfectly correct attitude toward Belgium. I, however, felt bound to add that we should attach the greatest value to possessing an express declaration, of which the nation would take cognizance with joy and gratitude.

(Signed). DAVIGNON.

NO. 20. NOTE HANDED IN ON AUG. 2, AT 7 O'CLOCK P. M., BY HERR VON BELOW SALESKE, GERMAN MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 2d August, 1914.

Imperial German Legation in Belgium. Highly Confidential.

The German government has received reliable information according to which the French forces intend to march on the Meuse, by way of Givet

and Namur. This information leaves no doubt as to the intention of France of marching on Germany through Belgian territory. The imperial German government cannot avoid the fear that Belgium, in spite of its best will, will be in no position to repulse such a largely developed French march without aid. In this fact there is sufficient certainty of a threat directed against Germany.

It is an imperative duty for the preservation of Germany to forestall this attack of the enemy.

The German government would feel keen regret if Belgium should regard as an act of hostility against herself the fact that the measures of the enemies of Germany oblige her on her part to violate Belgian territory.

In order to dissipate any misunderstanding the German government declares as follows:

1. Germany does not contemplate any act of hostility against Belgium. If Belgium consents in the war about to commence to take up an attitude of friendly neutrality toward Germany, the German government on its part undertakes, on the declaration of peace, to guarantee the kingdom and its possessions in their whole extent.

2. Germany undertakes under the condition laid down to evacuate Belgian territory as soon as peace is concluded.

3. If Belgium preserves a friendly attitude, Germany is prepared, in agreement with the authorities of the Belgian government, to buy against cash all that is required by her troops, and to give indemnity for the damages caused in Belgium.

4. If Belgium behaves in a hostile manner toward the German troops, and in particular raises difficulties against their advance by the opposition of the fortifications of the Meuse, or by destroying roads, railways, tunnels, or other engineering work, Germany will be compelled to consider Belgium as an enemy.

In this case Germany will take no engagements toward Belgium, but she will leave the later settlement of relations of the two states toward one another to the decision of arms. The German government has a justified hope that this contingency will not arise and that the Belgian government will know how to take suitable measures to hinder its taking place. In this case the friendly relations which unite the two neighboring states will become closer and more lasting.

NO. 21. NOTE ON THE INTERVIEW ASKED FOR ON THE 3D AUGUST AT HALF-PAST ONE A. M. BY HERR VON BELOW SALESKE, GERMAN MINISTER, WITH BARON VAN DER ELST, SECRETARY GENERAL TO THE MINISTRY FOR FOREIGN AFFAIRS.

At half-past one at night the German minister asked to see Baron van der Elst. He told him that he was instructed by his government to inform us that French dirigibles had thrown bombs, and that a patrol of French cavalry, violating international law, seeing that war was not declared, had crossed the frontier.

The secretary general asked Herr von Below where these events had taken place; in Germany, he was answered. Baron van der Elst observed that in that case he could not understand the object of his communication. Herr von Below said that these acts, contrary to international law, were of a nature to make one expect that other acts contrary to international law would be perpetrated by France.

NO. 22. NOTE HANDED IN BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO HERR VON BELOW SALESKE, GERMAN MINISTER.

Brussels, 3d August, 1914, 7 a. m.

By the note of the 2d August, 1914, the German government has made known that according to certain intelligence the French forces intend to march on the Meuse via Givet and Namur and that Belgium, in spite of her good will, would not be able without help to beat off an advance of the French troops.

The German government felt it to be its duty to forestall this attack and to violate Belgian territory. Under these conditions Germany proposes to the king's government to take up a friendly attitude, and undertakes at the moment of peace to guarantee the integrity of the kingdom and of her possessions in their whole extent. The note adds that if Belgium raises difficulties to the forward march of the German troops Germany will be compelled to consider her as an enemy and to leave the later settlement of the two states toward one another to the decision of arms.

This note caused profound and painful surprise to the king's government.

The intentions which it attributed to France are in contradiction with the express declarations which were made to us on the 1st August, in the name of the government of the republic.

Moreover, if, contrary to our expectation, a violation of Belgian neutrality were to be committed by France, Belgium would fulfill all her international duties, and her army would offer the most vigorous opposition to the invader.

The treaties of 1839, confirmed by the treaties of 1870, establish the independence and the neutrality of Belgium under the guarantee of the powers, and particularly of the government of his majesty the king of Prussia.

Belgium has always been faithful to her international obligations; she has fulfilled her duties in a spirit of loyal impartiality; she has neglected no effort to maintain her neutrality or to make it respected.

The attempt against her independence with which the German government threatens her would constitute a flagrant violation of international law. No strategic interest justifies the violation of that law.

The Belgian government would, by accepting the propositions which are notified to her, sacrifice the honor of the nation while at the same time betraying her duties toward Europe.

Conscious of the part Belgium has played for more than eighty years in the civilization of the world, she refuses to believe that the independence of Belgium can be preserved only at the expense of the violation of her neutrality.

If this hope were disappointed the Belgian government has firmly resolved to repulse by every means in her power any attack upon her rights.

NO. 23. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS AT ST. PETERSBURG, BERLIN, LONDON, PARIS, VIENNA, THE HAGUE.

Brussels, 3d August, 1914.

Last night at 7 o'clock Germany delivered a note proposing friendly neutrality permitting of free passage through our territory, promising the maintenance of the independence of the kingdom and of her possessions at the conclusion of peace, threatening in case of refusal to treat Belgium as an enemy, time limit within which to reply fixed at twelve hours. We have replied that the attack on our neutrality would be a flagrant violation of international law. The acceptance of the German proposal would sacrifice the honor of the nation. Conscious of her duty, Belgium is firmly resolved to repulse aggression by every means. (Signed) DAVIGNON.

NO. 24. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS AT PARIS, BERLIN, LONDON, VIENNA, AND ST. PETERSBURG.

Brussels, 3d August, (Midday,) 1914.

As you are aware, Germany has delivered to Belgium an ultimatum expiring this morning, Aug. 3, at 7 o'clock. No act of war having taken place up to the present time, the council of ministers has decided that there was not for the moment reason to appeal to the guaranteeing powers.

The minister of France said to me on this subject:

"Without being instructed to make a declaration by my government I believe, however, judging by its known intentions, that I can say that, if the royal government should appeal to the French government, as a power guaranteeing her neutrality, we should immediately respond to her appeal; if this appeal was not formulated, it is probable, unless of course the anxiety about their own defense should lead them to take exceptional measures, that they would wait before intervening until Belgium had performed an act of effective resistance."

I thanked M. Klobukowski for the support which the French government would presumably be good enough to offer, and I told him that the Belgian government were not at the moment making an appeal for the guarantee of the powers and reserve to themselves the right to decide later on what it would be best to do.

(Signed) DAVIGNON.

NO. 25. TELEGRAM ADDRESSED BY H. M. THE KING TO HIS MAJESTY THE KING OF ENGLAND.

"Remembering the numerous proofs of your majesty's friendship and that of your predecessor, and the friendly attitude of England in 1870 and the proof of friendship you have just given us again, I make a supreme appeal to the diplomatic intervention of your majesty's government to safeguard the integrity of Belgium."

NO. 26. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER IN LONDON TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 3d August, 1914.

I showed your telegram to the minister for foreign affairs, who communicated same to the cabinet council. The minister for foreign affairs told me that if your neutrality were violated it would mean war with Germany.

(Signed) COMTE DE LALAING.

NO. 27. LETTER ADDRESSED BY HERR VON BELOW SALESKE, GERMAN MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 4th August, 1914 (6 A. M.)

I have been instructed, and have the honor to inform your excellency, that in consequence of the government of his majesty the king having declined the well-intentioned proposals submitted to them by the imperial government, the latter will, deeply to their regret, be compelled to carry out—if necessary by force of arms—the measures of security which have been set forth as indispensable in view of the French menaces.

(Signed) VON BELOW.

NO. 28. NOTE HANDED BY SIR FRANCIS H. VILLIERS, BRITISH MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 4th August, 1914.

I am instructed to inform the Belgian government that if Germany exercises pressure for the purpose of compelling Belgium to abandon her position of a neutral country, the government of his Britannic majesty expects Belgium to resist by every possible means.

The government of his Britannic majesty is ready in that event to join with Russia and France, if desired by Belgium, to offer to the Belgian government at once common action for the purpose of resisting the use of force by Germany against Belgium and at the same time to offer a guarantee to maintain the independence and integrity of Belgium in the future.

NO. 29. LETTER ADDRESSED BY THE BELGIAN MINISTER AT THE HAGUE TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

The Hague, 4th August, 1914.

The minister for foreign affairs told me yesterday evening that the Dutch government would perhaps be compelled in the present grave circumstances to institute war buoyage on the Scheldt.

Jhr. Loudon read to me a draft note which was to inform me of this decision.

I have the honor to transmit to you inclosed copy of the note in question, which was handed to me yesterday evening.

As you will see, the Scheldt will only be closed during the night. During the day navigation will be possible, but only with Dutch pilots who have been supplied with the necessary nautical particulars for the subject. In this way the interests of the defense of Netherlands territory and those of the Belgian navigation to Antwerp are protected.

You will further notice that the Netherlands government asks that in the event of war buoyage being instituted, we should withdraw the lightships Wielingen and Wandelaar, with a view to facilitating the maintenance of the neutrality of the Netherlands territory.

I must point out that the term "ascend the Scheldt" employed in this note is not sufficiently explicit; to go down the river will be permitted in the same conditions. The minister has just given me an assurance to that effect.

As soon as the Netherlands government have come to a decision as to this exceptional measure, I shall be informed thereof.

About six hours are necessary in order to carry out this war buoyage.

I shall at once telegraph you.

(Signed) BARON FALLON.

NOTE INCLOSED IN NO. 29.

The Dutch government might in the interest of the maintenance of the neutrality of the territory of the Netherlands be compelled to institute war buoyage on the Scheldt, that is to say, to take away or modify a portion of the existing buoys and beacons and of the lighthouses.

This war buoyage has, however, been designed in such a way that after it is instituted it will still be possible to ascend the Scheldt in order to reach Antwerp during the daytime, but only with Dutch pilots who have been provided with the requisite nautical instructions on the subject. In acting in this way, the Dutch government are convinced that they will be able to take account both of the interests of the defense of Netherlands territory and of Belgian navigation to Antwerp.

After the institution of war buoyage on the Scheldt there would be no further reason for entering Flushing sea channel during the night, and as the presence of the "Wielingen" and "Wandelaar" lightships is not indispensable for navigation in daytime, the Dutch government would attach great importance to the royal Belgian government being good enough, in the event of war buoyage being instituted by them, to have the said vessels withdrawn with a view to facilitating the maintenance of the neutrality of the Netherlands.

NO. 30. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN LONDON AND PARIS.

Brussels, 4th August, 1914.

The general staff notify that the national territory has been violated at Gemmenich.

(Signed) DAVIGNON.

NO. 31. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO HERR VON BELOW SALESKE, GERMAN MINISTER.

Brussels, 4th August, 1914.

I have the honor of acquainting your excellency that from today the king's government can no longer acknowledge your diplomatic character, and must cease to have official relations with you. Your excellency will find inclosed the passports which are necessary for your departure, and that of the staff of the legation.

(Signed) DAVIGNON.

NO. 32. LETTER ADDRESSED BY HERR VON BELOW SALESKE, GERMAN MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 4th August, 1914.

I have the honor to acknowledge receipt of your excellency's letter of 4th August and to acquaint you that I have handed over the care of the imperial legation at Brussels to my colleague of the United States.

(Signed) VON BELOW.

NO. 33. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON GRENIER, BELGIAN MINISTER AT MADRID.

Brussels, 4th August, 1914.

Please ask the Spanish government whether they would be good enough to undertake the protection of Belgian interests in Germany, and in that event to give the necessary instructions to their ambassador in Berlin.

(Signed) DAVIGNON.

NO. 34. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON BEYENS, BELGIAN MINISTER IN BERLIN.

Brussels, 4th August, 1914.

The German minister leaves this country this

evening; apply for your passports. We are requesting the government of Madrid to authorize the Spanish ambassador to be good enough to undertake the protection of Belgian interests in Germany. (Signed) DAVIGNON.

NO. 35. LETTER ADDRESSED BY THE BELGIAN MINISTER IN BERLIN TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Berlin, 4th August, 1914.

I have the honor to transmit to you below a translation of part of the speech made at the tribune of the reichstag by the imperial chancellor relating to the odious violation of our neutrality:

"We find ourselves in a state of legitimate defense and necessity knows no law.

"Our troops have occupied Luxemburg and have perhaps already penetrated into Belgium. This is contrary to the provision of international law. It is true that France has declared at Brussels that she was resolved to respect the neutrality of Belgium as long as her adversary respected it. But we knew that France held herself in readiness to invade Belgium. France could wait. We could not. A French attack on our flank in the region of the lower Rhine might have become fatal. That is how we have been forced to ignore the just claims of the governments of Luxemburg and Belgium. The injustice which we are committing in this fashion will be made good by us as soon as we shall have attained our military objects.

"Any one who is threatened to such an extent as we are and who is fighting for his supreme welfare can only think of means of hacking his way through; we find ourselves side by side with Austria."

It should be pointed out that Herr von Bethmann-Hollweg acknowledges without the slightest subterfuge that Germany is violating international law by invading Belgian territory and that she is committing an injustice toward us.

(Signed) BARON BEYENS.

NO. 36. LETTER ADDRESSED BY THE BELGIAN MINISTER IN LONDON TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 4th August, 1914.

I have the honor of informing you that the prime minister made a fresh declaration with respect to the European crisis in the house of commons this afternoon.

After having recalled the principal points set forth yesterday by Sir Edward Grey, the prime minister read the following documents:

1. A telegram from Sir F. Villiers, received this morning, which communicates the tenor of the second ultimatum addressed by the German government to the Belgian government and which was handed to us this morning. (See No. 27.)

2. A telegram by which you announce to me the violation of the frontier at Gemmenich, a copy of which I had handed to Sir A. Nicholson.

3. A telegram addressed this morning by the German government to their ambassador in London with the evident object of leading public opinion astray with respect to their attitude. The following is the translation, according to one of this evening's papers:

"Please dispel any mistrust that may subsist on the part of the British government with regard to our intentions by repeating most positively formal assurances that, even in the case of armed conflict with Belgium, Germany will, under no pretense whatever, annex Belgian territory.

"Sincerity of this declaration is borne out by the fact that we solemnly pledged our word to Holland strictly to respect her neutrality.

"It is obvious that we could not profitably annex Belgic territory without making at the same time territorial acquisitions at expense of Holland.

"Please impress upon Sir E. Grey that the German army could not be exposed to French attack across Belgium, which was planned according to absolutely unimpeachable information.

"Germany had consequently to disregard Belgian neutrality, it being for her a question of life or death to prevent a French attack through Belgium."

Mr. Asquith then explained to the house that in reply to this note of the German government the British government had renewed their proposal of last week, i. e., to give on the subject of Belgian neutrality the same assurances as France had given the previous week, both to England and to Belgium. The British cabinet gave that of Berlin up to midnight to let them know their reply.

(Signed) COMTE DE LALAING.

NO. 37. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER IN LONDON TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 4th August, 1914.

The minister for foreign affairs has informed the British ministers in Norway, Holland and Belgium, that Great Britain expects that these three kingdoms will resist the pressure of Germany and maintain neutrality. They will be supported in their resistance by England, who in such a case is ready to co-operate with France and Russia if such is the desire of these three governments in offering an alliance to the said governments to repel the employment of force against them by Germany, and a guarantee for the future maintenance of the independence and the integrity of the three kingdoms. I pointed out that Belgium is neutral in perpetuity. The minister for foreign affairs replied: "It is for the event of neutrality being violated."

(Signed) COMTE DE LALAING.

NO. 38. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS, LONDON, AND ST. PETERSBURG.

Brussels, 4th August, 1914.

I have the honor of informing you of the order of successive events which have during the last few days characterized the relations of Belgium and certain other powers which are guarantors of her neutrality and of her independence.

On 31st July the British minister made a verbal communication to me, according to which, in anticipation of a European war, Sir Edward Grey had asked the German and French governments separately whether each of them was resolved to respect the neutrality of Belgium, provided the said neutrality was not violated by any other power.

By virtue of existing treaties, Sir Francis Villiers was instructed to bring this step to the knowledge of the Belgian government, adding that Sir Edward Grey presumed that Belgium was resolved to maintain her neutrality and that she expected that the other powers would respect it.

I informed the British minister that we greatly appreciated this communication, which was in accordance with our expectations, and I added that Great Britain, as well as the other powers who are guarantors of our independence, might rest fully assured of our firm intention to maintain our neutrality; this neutrality, however, did not appear to us to be menaced by any of the states with whom we are on the most cordial and the most confidential terms. The government, I remarked, had given a proof of this resolution by immediately taking all the military measures which the situation appeared to them to require.

In his turn, the French minister stated on 1st August in a verbal conversation that he was authorized to make known to the Belgian government that in case of an international conflict the government of the republic, in conformity with its constant declaration, would respect the territory of Belgium, and that they would only be led to modify their attitude in case of the violation of Belgian neutrality by another power.

I thanked his excellency and added that we had already taken all the necessary measures to assure our independence and our frontiers being respected.

On 2d August in the morning I had a further interview with Sir Francis Villiers, in the course of which he informed me that he had on Saturday at an early hour transmitted by telegraph

to his government our conversation of 31st July, taking care to reproduce faithfully the solemn declaration which he had obtained of the determination of Belgium to defend her frontiers from whatever side they might be invaded. He added: "We know that France has given us express assurances; but England has not yet received any reply on this subject from Berlin."

This last fact did not provoke any particular emotion in me, because the declaration of the German government might appear to be superfluous in view of the existing treaties. Moreover, the secretary of state for foreign affairs had affirmed at the sitting of the reichstag committee on 29th April, 1913: "That the neutrality of Belgium is conventionally established, and that Germany intends to respect this treaty."

The same day Herr von Below Saleske, the German minister, called at the ministry for foreign affairs at 7 p. m. and handed me the annexed note (see No. 20). The German government granted the Belgian government a time limit of twelve hours to communicate their decision.

There could be no hesitation shown on the subject of the reply called for by the surprising proposal of the German government. You will find a copy thereof inclosed herewith. (See No. 22.)

The ultimatum was to expire on 3d August at 7 a. m. As at 10 o'clock no act of war had taken place, the council of ministers decided that for the moment there was no occasion to make an appeal to the guarantor powers.

Toward noon the French minister questioned me on this point and said to me:

"Although in view of the suddenness of the events I am not yet instructed to make any declaration, I think, nevertheless, judging by the well-known intentions of my government, that I can say that if the Belgian government should appeal to the French government as a power guaranteeing her neutrality they would immediately respond to the appeal. If this appeal were not formulated, it is probable—unless, of course, the anxiety about their own defense should lead them to take exceptional measures—that they would wait before intervening until Belgium had performed an act of effective resistance."

I thanked M. Klobukowski for the support which the French government would presumably be good enough to offer, and I told him that the Belgian government were not at the moment making an appeal for the guarantee of the powers, and reserved to itself the right to decide later on what it would be best to do.

Finally, on the 4th August at 6 o'clock in the morning, the German minister made me the following communication (see No. 27).

The council of ministers is deliberating at the present moment on the subject of the appeal to the powers who are guarantors of our neutrality. (Signed) DAVIGNON.

NO. 39. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER IN LONDON TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 4th August, 1914.

England has this morning called upon Germany to respect Belgian neutrality. The ultimatum states that in view of the note addressed by Germany to Belgium threatening the latter with the force of arms if she should oppose the passage of her troops, in view of the violation of Belgian territory at Gemmenich, in view of the fact that Germany has refused to give England the same assurance as that given last week by France, England must once more demand a satisfactory reply on the subject of the respect of Belgian neutrality and of a treaty of which Germany is a signatory as well as England herself. The ultimatum expires at midnight.

In consequence of the ultimatum from England to Germany the British proposition which I transmitted to you by telegram is canceled for the moment. (Signed) COMTE DE LALAING.

(See No. 37.)

NO. 40. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE MINISTERS OF GREAT BRITAIN, FRANCE, AND RUSSIA.

Brussels, 4th August, 1914.

The Belgian government regrets to have to announce to your excellency that this morning the armed forces of Germany penetrated into Belgian territory, violating the engagements which they have undertaken by treaty.

The Belgian government are firmly decided to resist by all the means in their power.

Belgium appeals to England, to France, and to Russia to co-operate as guarantors in the defense of her territory.

There should be a concerted and common action, having as its object to resist the measures of force employed by Germany against Belgium and at the same time to guarantee the maintenance of the independence and integrity of Belgium for the future.

Belgium is happy to be able to declare that she will undertake the defense of the fortified places. (Signed) DAVIGNON.

NO. 41. TELEGRAM ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY THE BELGIAN MINISTER IN LONDON.

London, 5th August, 1914.

Germany having rejected the British proposals, Great Britain has declared to her that a state of war exists between the two countries as from 11 o'clock. (Signed) COMTE DE LALAING.

NO. 42. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS, LONDON, AND ST. PETERSBURG.

Brussels, 5th August, 1914.

After the violation of territory at Gemmenich, Belgium appealed, through their accredited representatives at Brussels, to England, France, and Russia for co-operation, as guarantors, in the defense of her territory.

Belgium is undertaking the defense of the fortresses. (Signed) DAVIGNON.

NO. 43. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS, LONDON, AND ST. PETERSBURG.

Brussels, 5th August, 1914.

By my telegram of 4th August (see No. 38) I have had the honor of setting forth the sequence of events which have marked the international relations of Belgium from 31st July to 4th August. I added that the council of ministers was examining the question to know whether Belgium, whose territory had been invaded since the morning, would make an appeal to the guarantee.

The council had just decided in favor of the affirmative, when the British minister informed me that the proposal which he had officially brought before me, and in accordance with which the British government was disposed to respond to our appeal for guarantee, was for the moment canceled. (See No. 37.)

A telegram from London informed me that this change of attitude was caused by an ultimatum from England giving Germany a time limit of ten hours to evacuate Belgian soil and to respect the neutrality of Belgium. (See No. 39.) In the evening the king's government addressed, through the intermediary of their respective representatives at Brussels, to France, to Great Britain, and to Russia, the note a copy of which you will find herewith. (See No. 40.)

As you will observe, Belgium appeals to England, to France, to Russia to co-operate as guarantors in the defense of her territory and in the maintenance in future of the independence and the integrity of her territory. She will assure the defense of the fortified places.

Up to the present we do not know what reception has been accorded to our appeal.

(Signed) DAVIGNON.

NO 44. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE DIPLOMATIC CHIEFS IN ALL COUNTRIES ENTERTAINING DIPLOMATIC RELATIONS WITH BELGIUM.

Brussels, 5th August, 1914.

By the treaty of 18th April, 1839, Prussia,

France, England, Austria and Russia declared themselves guarantors of the treaty concluded the same day between H. M. the king of the Belgians and H. M. the king of the Netherlands. This treaty states: "Belgium shall form an independent and perpetually neutral state." Belgium has fulfilled all her international obligations, she has accomplished her duties in a spirit of loyal impartiality, she has neglected no effort in order to maintain and to make respected her neutrality.

Therefore, it is with painful emotion that the king's government has learned that the armed forces of the German army—a power guaranteeing our neutrality—have penetrated into Belgian territory, in violation of engagements which have been undertaken by treaty.

It is our duty to protest indignantly against an attack on international law which no act of ours has provoked.

The king's government is firmly resolved to repulse by all means in their power the attempt against its neutrality, and it recalls that by virtue of article 10 of The Hague convention of 1907, relating to the rights and duties of neutral powers and persons in the event of war on land, the fact of a neutral power repulsing, even by force, attacks on its neutrality cannot be considered as a hostile act.

Will you please make an urgent request for an audience with the minister of foreign affairs and read to his excellency the present letter, of which you will leave him a copy? If the audience cannot be immediately granted to you, you will make the communication in question in writing. (Signed) DAVIGNON.

NO. 45. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER IN BERLIN TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Berlin, 5th August, 1914.

NO. 47. LETTER ADDRESSED BY THE BELGIAN MINISTER IN PARIS TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Paris, 5th August, 1914.

I have the honor of sending you herewith a copy of the notification of the state of war existing between France and Germany, which has been today sent to me.
(Signed) BARON GUILLAUME.

INCLOSURE IN NO. 47.

The imperial German government, after having allowed its armed forces to cross the frontier and to give way on French territory to various acts of murder and of violence; after having violated the neutrality of the grand duchy of Luxemburg, in contempt of the stipulations of the convention of London on the 11th May, 1867, and of The Hague convention of the 18th October, 1907, on the rights and duties of neutral powers and persons in case of war on land (articles 1 to 11), conventions signed by them; after having addressed an ultimatum to the royal Belgian government, demanding the passage of the German forces through Belgian territory, in violation of the treaties of the 19th April, 1839, also signed by them, and of The Hague convention cited above; declared war on France the 3d August, 1914, at 6:45 p. m.

The government of the republic find themselves under these conditions compelled on their part to have recourse to force of arms.

They have consequently the honor of making known hereby to the royal government that a state of war exists between France and Germany as from 6:45 p. m. on 3d August.

The government of the republic protest before all civilized nations, and in particular before the governments signatory of the conventions and treaties above referred to, against the violation by the German empire of her international engagements; they make all reserves as to the reprisals which they might find themselves led to make against an enemy so little careful as to his pledged word.

The government of the republic, which intend to observe the principles of international law, will conform during hostilities and under reserve of reciprocity to the provisions of the international conventions signed by France relating to the rights of war on land and on sea.

The present notification made in conformity with article 2 of the said second convention of The Hague on the 18th October, 1907, relating to the opening of hostilities is given to the Belgian minister in Paris, on the 5th August, 1914, at 2 p. m.

NO. 48. COMMUNICATION MADE ON AUG. 5 BY SIR FRANCIS VILLIERS, BRITISH MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

I am instructed to inform the Belgian government that the government of his Britannic majesty considers common action with the object of resisting Germany as being in force and justified by the treaty of 1839.

NO. 53. LETTER ADDRESSED BY THE DUTCH MINISTER TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 6th August, 1914.

Your excellency: I have the honor of sending your excellency herewith a copy of the extraordinary issue of the staatscourant, containing the declaration of neutrality of Holland in the war between Belgium and Germany and England and Germany. (Signed) JONKHEER DE WEEDE.

SUPPLEMENT TO NO. 53.

Laws, Decrees, Nominations, Etc.
Minister of Foreign Affairs, of Justice, of the Marine, of War and of the Colonies.

The ministers of foreign affairs, of justice, of the marine, of war, and of the colonies, authorized for this purpose by her majesty the queen, beg to notify whomsoever it may concern, that the government of the Netherlands will observe a strict neutrality in the war which has broken out between the powers friendly to Holland, i. e., Great Britain and Germany and Belgium and Germany, and that, with a view to the main-

tenance of this neutrality, the following provisions have been decreed:

Article 1. Within the limits of the territory of the state, including the territory of the kingdom in Europe, and also the colonies and possessions in other parts of the world, no hostilities of any kind are permitted and this territory cannot serve as a base for hostile operations.

Art. 2. Neither the occupation of any part whatever of the territory of the state by a belligerent, nor the passage through this territory by land by troops or convoys of munitions belonging to one of the belligerents, is permitted, nor the passage across the territory situated in the interior of Dutch territorial waters by warships or vessels of the belligerents connected with the fleet.

Art. 3. Troops or soldiers belonging to the belligerents or intended for them arriving on the territory of the state by land shall be immediately disarmed and interned until the end of the war.

Vessels of war or ships connected with the fleet belonging to a belligerent which shall contravene the provisions of articles 2, 4 and 7 may not leave this territory before the end of the war.

Vessels of war or ships connected with the latter belonging to a belligerent which contravene the provisions of articles 2, 4 or 7 may not leave this territory before the end of the war.

Art. 4. War vessels or ships connected with them belonging to a belligerent shall not have access to the territory of the state.

Art. 5. The provision of article 4 is not applicable to the following: 1. To war vessels or ships of a belligerent connected with these latter, which in consequence of damage or of the state of the sea are compelled to enter one of the ports or harbors of the state. These vessels may leave the said ports or roadsteads as soon as the circumstances which have compelled them to take refuge there shall have ceased to exist. 2. To warships or ships connected therewith belonging to a belligerent and which call in a port or a roadstead situated in the territory of the oversea colonies and possessions for the sole purpose of taking in a supply of provisions or of fuel. These vessels must depart again as soon as the circumstances which have forced them to call have ceased to exist, with this condition, that the stay in the roadstead or in the port may not exceed twenty-four hours. 3. To war vessels or ships connected therewith belonging to a belligerent and which are used exclusively for a religious, scientific or humanitarian mission.

Art. 6. The war vessels or ships connected therewith belonging to a belligerent may not repair any damage incurred in the ports or roadsteads of the state except in so far as such repairs are indispensable for the safety of navigation, and they may not increase their fighting capacity in any manner.

Art. 7. The war vessels or ships connected therewith belonging to a belligerent and which may be in the territory of the state at the commencement of the war are bound to leave it within twenty-four hours after the publication of these presents.

Art. 8. If the war vessels or ships connected therewith belonging to several belligerents should be found at the same time in the conditions contemplated in article 5 in one and the same part of the world and in the territory of the state, a period of at least twenty-four hours must elapse between the departure of the vessels of each of the belligerents. Except in the case of special circumstances, the order of departure is determined by the order of arrival. A warship or a vessel connected therewith belonging to a belligerent can only leave the territory of the state twenty-four hours after the departure of a merchant ship sailing under the flag of the other belligerent.

Art. 9. The war vessels or ships connected therewith belonging to a belligerent, contemplated in article 5 and in article 7, may only be provisioned with foodstuffs in the ports and the roadsteads of the country to the extent necessary in order to bring up their stores to the normal limits in times of peace.

Similarly, they can only take so much fuel as will enable them, including the supply they still have on board, to reach the nearest port of their own country.

One and the same vessel may only be supplied afresh with fuel on the expiration of a period of three months at least after it was last supplied in the territory of the state.

Art. 10. A prize may only be brought into the territory when it is incapable of navigating, or cannot keep the sea, or is short of fuel, or of food stores.

It must leave as soon as the cause of its entering our territory ceases to exist.

If it does not do so it shall be ordered to leave immediately; in case of refusal any available means shall be used to liberate the prize with its officers and its crew and to interne the crew placed on board by the belligerent who has taken the prize.

Art. 11. It is prohibited to form fighting corps or to open recruiting offices to the advantage of the belligerents in the territory of the state.

Art. 12. It is forbidden, in the territory of the state, to take service on board war vessels or vessels connected therewith.

Art. 13. It is forbidden, in the territory of the state, to fit out, arm or equip vessels intended for military purposes in favor of one of the belligerents, or to supply or convey such vessels to a belligerent.

Art. 14. It is forbidden, in the territory of the state, to supply arms or munitions to war vessels or ships connected therewith belonging to a belligerent, or to assist them in any manner with a view to increasing their crew or their supplies.

Art. 15. It is forbidden, in the territory of the state, without previous authorization from the competent local authorities, to effect any repairs in the war vessels or vessels connected therewith belonging to a belligerent or to supply them with victuals or fuel.

Art. 16. It is forbidden, in the territory of the state, to co-operate in the unrigging or in the repairing of prizes, except in so far as may be necessary to render them fit to keep the sea, and also to purchase prizes or confiscated merchandise and to receive same in exchange by way of gift or for storage.

Art. 17. The territory of the state includes the sea along the coastline to a distance of three nautical miles at the rate of 60 per degree of latitude reckoning from low water mark.

As regards the base, this distance of three nautical miles is measured starting from a straight line drawn across the bay, as near as possible to the entrance to the point where the opening of the bay does not exceed ten nautical miles, at the rate of 60 per degree of latitude.

Art. 18. In addition attention is drawn to arts. 100 (1) and 205 of the penal code; Indian State Gazette 1905, No. 62; art. 7 (4) of the law with regard to the status of Dutchmen and respecting domicile (Dutch State Gazette 1892, No. 268; 1910, No. 216); art. 2 (No. 3) of the law regarding the status of a Dutch subject (Dutch State Gazette 1910, No. 55; Indian State Gazette 1910, No. 296; arts. 54 and 55 of the penal code of Surinam; arts. 54 and 55 of the penal code of Curacao.)

Similarly the attention of captains of vessels, shipowners, and charterers is drawn to the danger and the difficulties to which they would expose themselves in failing to respect the effective blockade of the belligerents in conveying contraband of war or military dispatches for the belligerents (unless it is a question of the regular postal service) or in executing for them other transport services.

Any one rendering himself guilty of any acts referred to above would expose himself to all the consequences of the said acts and cannot obtain with respect thereto any protection nor intervention of the government of Holland.

NO. 54. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON FALLON, BELGIAN MINISTER AT THE HAGUE.

Brussels, 6th August, 1914.

Please communicate to the Dutch government the following note:

The Belgian government has noted the establishment of war buoyage on the Escaut and that

the government of Holland will assure the maintenance of navigation.

It would be advisable that the navigation might be effected from thirty minutes before sunrise until thirty minutes after sunset, and that the exchange of pilots should be effected at Bath.

However desirous it is of consenting to the demands of the Dutch government, the Belgian government considers that it is necessary on account of the coast ports to maintain the lightships of Wielingen and of Wandelaar, as well as the buoys of the Wielingen channel.

(Signed) DAVIGNON.

(See No. 50).

NO. 55. TELEGRAM ADDRESSED BY BELGIAN MINISTER AT THE HAGUE TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

The Hague, 6th August, 1914.

The navigation on the Escaut may be carried on from daybreak and as long as it is light. The Wielingen buoys have been relaid, the exchange of pilots at Hansweert is easier and better organized. Do you insist on Bath?

(Signed) BARON FALLON.

NO. 56. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON FALLON, BELGIAN MINISTER AT THE HAGUE.

Brussels, 7th August, 1914.

Kindly express to the Dutch government the sincere thanks of the Belgian government for the measures taken to assure the navigation of the Escaut. The government is in agreement with the Dutch government on the subject of the duration of navigation. It had proposed Bath, but accepts Hansweert, seeing this port is better fitted for the exchange of pilots.

(Signed) DAVIGNON.

NO. 57. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS AND LONDON.

Brussels, 7th August, 1914.

Belgium hopes that the war will not be extended to central Africa. The government of Belgian Kongo has received instructions to observe a strictly defensive attitude. You should request the French (English) government to state whether it is its intention to proclaim the neutrality of the French Kongo (British colonies in the conventional basin of the Kongo) according to article II. of the general act of Berlin. A telegram from Boma announces that hostilities are likely to occur between the French and Germans in the Ubanghi. (Signed) DAVIGNON.

NO. 58. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN PARIS AND LONDON.

Brussels, 7th August, 1914.

In continuation of my telegram of this morning I have the honor of requesting you to place the following information before the French (British) government:

Whilst instructing the governor general of the Kongo to take measures of defense on the common frontiers of the Belgian colony, and the German colonies of East Africa and Cameroons, his majesty's government has asked this high official to abstain from any offensive action against these colonies.

In view of the civilizing mission common to the colonizing nations, the Belgian government is desirous, in the interests of humanity, not to extend the area of hostilities to Central Africa. They will, therefore, not take the initiative of inflicting such a misfortune on civilization in this region, and the military forces which they possess there will only take action in case they are compelled to repulse a direct attack against their African possessions.

I shall be glad to know whether the government of the republic (of his Britannic majesty) shares this view of the matter, and, if the case should arise, whether it is their intention, in view of the present conflict, to take advantage of article II. of the general act of Berlin to place those of their colonies which are included in the conventional basin of the Kongo in a position of neutrality.

I am addressing an identical communication to your colleague in London (Paris).

(Signed) DAVIGNON.

NO. 59. LETTER ADDRESSED BY THE BELGIAN MINISTER IN PARIS TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Paris, 8th August, 1914.

I had the honor of speaking with the president of the republic with regard to your telegram of yesterday. I had received it in the evening and had immediately communicated it to the ministry for foreign affairs. They had asked for time to consider the matter before replying to me.

M. Poincare promised me to discuss this question today with the colonial minister. At first sight he did not think there would be any objection to proclaiming the neutrality of the French Kongo, but he, nevertheless, reserved his reply. He believes that acts of war have already taken place in the Ubanghi. He took advantage of the circumstance to remind me that the protection which France accords to us extends also to our colonies, and that we have nothing to fear.

(Signed) BARON GUILLAUME.

NO. 60. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER AT THE HAGUE TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

The Hague, 9th August, 1914.

The minister for foreign affairs has requested me to transmit to you the following information because the American minister at Brussels refuses to do so:

The fortress of Liege has been taken by assault after a courageous defense. The German government very deeply regret that, in consequence of the attitude of the Belgian government toward Germany, bloody conflicts have arisen. Germany is not coming to Belgium as an enemy; it is only by the compulsion of events that she has been compelled, owing to military measures taken by France, to take the grave decision to enter Belgium and to occupy Liege as a point of support for her subsequent military operations. After the Belgian army, by its heroic resistance against greatly superior forces, has maintained the honor of its arms, the German government requests the king of the Belgians and the Belgian government to spare Belgium the further horrors of war. The government is ready to make any agreement with Belgium that is consistent with their arrangements (see No. 70) with France. Germany once more gives the solemn assurance that she has no intention of appropriating Belgian territory and that such an intention is far from her thoughts. Germany is still ready to evacuate Belgium as soon as the state of war will permit of her doing so.

The ambassador of the United States had requested his colleague to undertake this attempt at mediation. The minister for foreign affairs accepted this mission without enthusiasm. I have undertaken it to oblige him.

(Signed) BARON FALLON.

NO. 61. TELEGRAM ADDRESSED BY THE BELGIAN MINISTER IN PARIS TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Paris, 9th August, 1914.

The French government are quite disposed to proclaim the neutrality of their possessions in the conventional basin of the Kongo and request Spain to propose this to Berlin.

NO. 62. LETTER ADDRESSED BY THE BELGIAN MINISTER AT THE HAGUE TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

The Hague, 10th August, 1914.

In response to a telephonic call at 9 o'clock last evening, I proceeded to the foreign office.

Jhr. Loudon informed me that my German colleague had just left his office and had handed him a document which the representative of the United States at Brussels had refused to transmit to you.

The American diplomatist in charge of the German legation at Brussels stated that he had not received any special instructions from Washington to intervene officially with the Belgian government in the interests of Germany.

The American minister consequently telegraphed to his colleague at The Hague, who informed the German representative of Mr. Whitlock's refusal.

The first step was, therefore, taken by the German government in approaching the United States ambassador in Berlin.

Under these circumstances and in view of the urgency of these matters, Herr von Muller requested Jhr. Loudon to act as intermediary of the German government toward you.

His excellency read me the German text of the document. I did not conceal my astonishment at this attempt at mediation and its poor chance of success in this form, but solely in order to be agreeable to the Dutch minister for foreign affairs I promised to telegraph you immediately. This I did yesterday.

You will find herewith the German document in the original text, together with a translation.

(Signed) BARON FALLON.

Inclosure 1 in No. 62 (German original).

Inclosure 2 in No. 62 (translation).

The ambassador of the United States here is in agreement with this attempt at mediation by his Brussels colleague.

NO. 63. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON FALLON, BELGIAN MINISTER AT THE HAGUE.

Brussels, 10th August, 1914.

The Belgian government has received the propositions which the German government have transmitted to them through the intermediary of the Dutch government. They will shortly send you their reply. (Signed) DAVIGNON.

NO. 64. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTER AT THE HAGUE.

Brussels, 10th August, 1914.

A doubt exists as to the meaning of the word "Auseinandersetzung" which you translate "arrangement." Kindly inform us whether in the idea of the German government it is a question of arrangements which we are supposed to have made with France, or of the settlement of the quarrel between France and Germany.

(Signed) DAVIGNON.

NO. 65. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE MINISTERS OF GREAT BRITAIN, RUSSIA AND FRANCE ACCREDITED TO BELGIUM.

Brussels, 10th August, 1914.

I have the honor of informing your excellency that the Belgian minister at The Hague, at the request of the Dutch minister for foreign affairs, has transmitted to us the following proposition of the German government (see No. 62, inclosure 2).

Below is the text of the reply which the Belgian government proposes to give to this communication:

"The proposal made to us by the German government reproduces the proposition which they had formulated in the ultimatum of 2d August. Faithful to her international duties, Belgium can only repeat her reply to this ultimatum, more especially as since 3d of August her neutrality has been violated, a terrible war has been carried into her territory and the guarantors of her neutrality have loyally and immediately responded to her appeal."

The Belgian government are anxious that the powers guaranteeing the neutrality of Belgium should be acquainted with these documents. I am, &c. (Signed) DAVIGNON.

NO. 66. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN MINISTERS IN LONDON, PARIS AND ST. PETERSBURG.

Brussels, 10th August, 1914.

I have the honor of informing you of the circumstances which have led to the departure of the Belgian representative from Luxemburg.

The general commanding the German troops in the grand duchy of Luxemburg, on 8th August, informed the German minister at Luxemburg of the desire of the military authorities to bring about the departure of the Belgian representative at the grand ducal court.

Herr von Buch addressed to M. Eyschen, president of the government, a letter, the translation of which is as follows:

Luxemburg, 8th August, 1914.

Your Excellency: In consequence of the entirely hostile attitude adopted by Belgium toward Germany, the military authorities feel constrained to insist on the departure of the Belgian minister from here.

His excellency, the commandant general, requests Count van den Steen de Jehay to arrange his departure in such a manner that he may, within twenty-four hours, enter into personal relations at Coblenz with Gen. von Ploetz on the subject of his further journey. It is only possible for him to depart via Treves-Coblenz.

(Signed) VON BUCH.

M. Eyschen transmitted this letter on the same day to Count van den Steen de Jehay in the following terms:

"Luxemburg, 8th August, 1914.

"I very deeply regret to have to transmit to you herewith the copy of a letter from the German minister informing me that the military authorities demand your departure.

"You will find the conditions thereof attached thereto.

"Herr von Buch tells me that the military authorities would rather advise the journey to be undertaken by railway, because the journey by motor car would expose you to be stopped too often for purpose of investigation. But it is left to you to choose.

"The German minister will call on me to receive your reply.

"I cannot tell you with what regret I am carrying out the task imposed on me at this moment. I shall never forget the very agreeable relations which have existed between us and I trust that your journey may be completed in the most favorable conditions.

"(Signed) EYSCHEN."

As the Belgian government considered that the grand ducal government had had no choice in its attitude and that the attitude which it had been compelled to adopt did not, in any way, imply any intentional discourtesy toward his majesty and Belgium, it decided that there was no occasion under these circumstances to request the grand ducal charge d'affaires to leave Belgium. (Signed) DAVIGNON.

NO. 67. LETTER ADDRESSSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY THE MINISTER OF THE UNITED STATES ACCREDITED AT BRUSSELS.

Brussels, 11th August, 1914.

The legation has to-day received a telegram from Washington informing it that the government of the United States had, at the request of the German government, consented, as a mat-

ter of international courtesy, to accept the protection of the interests of German subjects in Belgium.

By virtue of the instructions which accompanied this telegram we shall therefore, if you see no objection thereto, undertake to exercise our good and amicable offices with the Belgian government for the protection of German subjects. The pleasant relations which we have had on this subject up to the present give me the conviction that we shall be able to continue them with the same mutual sentiment for the same purpose.

I take this opportunity, Monsieur le Ministre, to express once more the assurance of my profound respect. (Signed) BRAND WHITLOCK.

NO. 68. LETTER ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY SIR FRANCIS H. VILLIERS, BRITISH MINISTER.

Brussels, 11th August, 1914.

I telegraphed to Sir Edward Grey the German communication and the proposed reply.

I have received instructions to express to your excellency the entire approval of his Britannic majesty's government. The latter can only declare their agreement with the terms of the reply which the Belgian government proposes to make to an attempt to sow discord between the countries which are now united for the defense of treaties violated by Germany.

(Signed) F. H. VILLIERS.

(See No. 65.)

NO. 69. LETTER ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY THE FRENCH MINISTER ACCREDITED TO BRUSSELS.

Brussels, 11th August, 1914.

I have the honor of informing your excellency that the French government are entirely in agreement with the reply which the Belgian government propose to make to the fresh ultimatum from Germany.

This reply is indeed just what one would expect from a government and a people who have so heriocally resisted the odious violation of their territory.

France will continue to fulfill her duties as a guarantor of Belgian neutrality and as a faithful friend of Belgium. I am, &c.,

(Signed) KLOBUKOWSKI.

NO. 70. TELEGRAM ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY THE BELGIAN MINISTER AT THE HAGUE.

The Hague, 12th August, 1914.

The German text contained a mistake; instead of "seine Auseinandersetzung" read "ihre," and therefore, translate, "its conflict with France."

NO. 71. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON FALLON, BELGIAN MINISTER AT THE HAGUE.

Brussels, 12th August, 1914.

Please hand the following telegram to the minister for foreign affairs: The proposal made to us by the German government reproduces the proposition which they had formulated in the ultimatum of 2d August. Faithful to her international duties, Belgium can only repeat her reply to this ultimatum, more especially as since 3d of August her neutrality has been violated, a terrible war has been carried into her territories and the guarantors of her neutrality have loyally and immediately responded to her appeal. NO. 72. TELEGRAM ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY HIS EXCELLENCY M. SAZONOF, PRESIDENT OF THE COUNCIL OF MINISTERS OF RUSSIA.

St. Petersburg, 13th August, 1914.

Please thank the Belgian government for their communication and express to them the pleasure felt by the imperial government in seeing their firm and dignified attitude, on which they highly congratulate them. (Signed) SAZONOF.

(See No. 66.)

NO. 73. LETTER ADDRESSED TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, BY THE BELGIAN MINISTER AT THE HAGUE.

The Hague, 13th August, 1914.

I had the honor of receiving your telegram of yesterday's date, and I immediately handed to the minister for foreign affairs the reply of Belgium to the second German proposition.

His excellency promised me to convey immediately to the German minister the communication of the Belgian government.

(Signed) BARON FALLON.

(See No. 71.)

NO. 74. LETTER ADDRESSED BY THE BELGIAN MINISTER IN PARIS TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Paris, 16th August, 1914.

In the course of the interview which I had this morning with M. de Margerie, I turned the conversation to colonial affairs and to the step which you had instructed me to take by your telegram and your dispatch of the 7th instant.

This gentleman reminded me that the government of the republic had addressed themselves to Spain, which had not given any reply before having received advice from England. It appears that the latter continues not to give any reply.

M. de Margerie considers that, in view of the present position, it is important to strike Germany wherever she is vulnerable; he believes that this is also the opinion of Great Britain, who will certainly have some claims to make good; France desires to resume possession of that part of the Kongo which she was compelled to cede in consequence of the Agadir incidents. My interlocutor told me that it would not be difficult to obtain a success. I am, &c.,

(Signed) BARON GUILLAUME.

(See Nos. 57 and 58.)

NO. 75. LETTER ADDRESSED BY THE BELGIAN MINISTER IN LONDON TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

London, 17th August, 1914.

In reply to your dispatch of 7th August I have the honor of informing you that the British government cannot accede to the Belgian proposition to respect the neutrality of the possessions of the belligerent powers in the conventional basin of the Kongo.

The German troops in German East Africa have already taken the offensive against the British protectorate of Central Africa. On the other hand, British troops have already attacked the German harbor of Dar-es-Salaam, where they have destroyed the wireless telegraph station.

Under these circumstances, even if the British government were persuaded of the political and strategical utility of the Belgian proposition, they could not accept same.

The London government believe that the forces which they are sending to Africa will be sufficient to overcome all opposition. They will exert every effort to prevent risings of the native population.

France is of the same opinion as Great Britain in view of German activity, which has been observed near Bonar and Ekododo.

NO. 76. TELEGRAM ADDRESSED BY THE VICE GOVERNOR OF KATANGA TO M. RENKIN, COLONIAL MINISTER.

Elizabethville, 26th August, 1914.

Germans continuing their skirmishing on Tanganyika, where on 22d August they attacked the port of Lukuga. They had two blacks killed and two wounded. Fresh attacks are expected.

NO. 77. TELEGRAM ADDRESSED BY COMTE CLARY UND ALDRINGEN, MINISTER OF AUSTRIA-HUNGARY, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, AND TRANSLATED THROUGH THE INTERMEDIARY OF THE MINISTER FOR FOREIGN AFFAIRS OF HOLLAND.

The Hague, 28th August, 1914.

By instruction from my government I have the

honor to notify your excellency of the following:

"In view of the fact that Belgium, after having refused to accept the proposals which had been addressed to her several times by Germany, is lending her military co-operation to France and Great Britain, who have both declared war against Austria-Hungary, and in the presence of the fact, which has just been proved, that Austrian and Hungarian subjects in Belgium have, with the knowledge of the Belgian authorities, been subjected to treatment contrary to the most primitive requirements of humanity and which are inadmissible even toward subjects of an enemy state, Austria-Hungary is compelled to break off diplomatic relations, and considers herself from this moment in a state of war with Belgium. I am leaving the country with the staff of the legation and am intrusting the protection of my fellow subjects to the minister of the United States of America in Belgium. The imperial and royal government has handed Comte Errenbault de Dudzeele his passports."

(Signed) CLARY.

NO. 78. TELEGRAM ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO BARON FALLON, BELGIAN MINISTER AT THE HAGUE.

Antwerp, 29th August, 1914.

Please acknowledge receipt to the Austrian legation through the intermediary of the minister for foreign affairs of declaration of war by Austria-Hungary against Belgium and add the following:

Belgium has always entertained friendly relations with all her neighbors without distinction. She has scrupulously fulfilled the duties imposed upon her by neutrality. If she did not consider that she could accept the proposals made by Germany, it was because the object of the said proposals was the violation of the engagements Germany had undertaken toward Europe, which engagements were the fundamental conditions of the creation of the kingdom of Belgium. She did not believe that a nation, however feeble it might be, could disown its duties and sacrifice its honor whilst bowing to force. The government awaited not only the terms of the ultimatum, but the violation of her territory by German troops, before appealing to France and to England, guarantors of her neutrality by the same title as Germany and Austria-Hungary, to co-operate in the name and by virtue of the treaties in the defense of Belgian territory.

By repelling the invaders by force of arms, she has not even committed any act of hostility pursuant to the terms of article 10 of The Hague convention relating to the rights and duties of neutral powers.

Germany has herself acknowledged that her aggression constitutes a violation of international law, and being unable to justify it she invoked its strategic interest.

Belgium gives an absolute denial to the statement that Austrian and Hungarian subjects have suffered in Belgium treatment contrary to the most primitive requirements of humanity.

The Belgian government, since the beginning of hostilities, has given the strictest orders for the protection of the persons and property of Austro-Hungarian subjects.

(Signed) DAVIGNON.

NO. 79. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO THE BELGIAN LEGATIONS ABROAD.

Antwerp, 29th August, 1914.

Under date of 17th August I addressed to the Belgian minister in London a letter in which I considered it my duty to reply to certain allegations made by the German government and which are mentioned in the blue book recently published by the British government.

I have the honor of placing before you a copy of this letter and of its inclosures. I request you to communicate it to the government to which you are accredited.

(Signed) DAVIGNON.

INCLOSURE 2 IN NO. 79. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO HERR VON BELOW SALESKE, GERMAN MINISTER.

Brussels, 3d August, 1914.

In continuation of the letter which your excellency was good enough to address to me on 31st July, I have the honor of informing you that my colleague of the finance department has acquainted the service of the customs with the fact that the prohibitions laid down by the royal decree of 30th July last only apply to exportation properly so called, and do not, therefore, extend to merchandise regularly declared as in transit on the occasion of their importation. Moreover, when merchandise which is duty free is declared to be for consumption, although it is really intended for exportation, it is commonly the object of special declarations of free entry, which are considered as transit documents. Finally, if it should happen that such merchandise has been declared as for consumption without restrictions, as if it were in effect to remain in the country, the custom house would still permit its shipment abroad provided it was duly established by the shipping documents, manifests, bills of lading, etc., that it was to be immediately exported in transit.

I may add that the exportation of grain to which the aforesaid letter of the imperial legation referred was authorized on 1st August. I am, &c. (Signed) DAVIGNON.

INCLOSURE 3 IN NO. 79. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO HERR VON BELOW SALESKE, GERMAN MINISTER.

Brussels, 1st August, 1914.

In reply to your excellency's letter of 31st July, I have the honor of informing you that the Belgian decree of 30th July only contemplates the exportation and not the transit of the products mentioned.

I have taken care to transmit your communication to my colleague of the finances, requesting him to kindly give precise instructions to the customs offices in order to prevent any error in the application of the decree referred to above. (Signed) DAVIGNON.

INCLOSURE 4 IN NO. 79. LETTER ADDRESSED BY HERR VON BELOW SALESKE, GERMAN MINISTER, TO M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS.

Brussels, 31st July, 1914.

I am informed from Antwerp that the customs have forbidden the department of boats loaded with corn for Germany.

Seeing that in these cases it is not a question of export of corn, but of transit, because the goods have simply been transshipped at Antwerp, I have the honor of applying for your kind intervention in order that the boats in question may be allowed to leave for Germany.

At the same time, I request your excellency to inform me whether the port of Antwerp is closed for the transit of the goods enumerated in today's Moniteur.

Awaiting your excellency's reply as soon as possible. (Signed) VON BELOW SALESKE.

INCLOSURE 1 IN NO. 79. LETTER ADDRESSED BY M. DAVIGNON, MINISTER FOR FOREIGN AFFAIRS, TO COMTE DE LALAING, BELGIAN MINISTER IN LONDON.

Brussels, 17th August, 1914.

Monsieur le Comte: The blue book recently published by the British government reproduces under No. 122 (page 65) the text of a telegram sent from Berlin on 31st July by Sir E. Goschen to Sir Edward Grey, from which telegram I extract the following:

"It appears from what he (his excellency the secretary of state) said that German government consider that certain hostile acts have been already committed by Belgium. As an instance of this, he alleges that a consignment of corn for Germany had been placed under an embargo already."

The fact to which the German secretary of state for foreign affairs alluded in his interview with Sir Edward Goschen and which he consid-

ered as a hostile act on the part of Belgium no doubt refers to the application of the royal decrees of the 30th July which provisionally prohibited the exportation of certain products from Belgium. As you will see from the statement which I consider it my duty to make below, the fact with which we are reproached has by no means the character which has been attributed to it in Germany.

Royal decrees dated 30th July, and published in the Moniteur Belge on the following day, provisionally prohibited the exportation of a number of products, especially cereals, by all the land and sea frontiers. Under date of 31st July the German minister at Brussels pointed out to me that the Antwerp custom house was retaining cargoes of grain intended for Germany, which, having only been transshipped in our port, were really only in transit. Herr von Below Saleske demanded the free departure of the vessels bearing these cargoes. The very day we received this demand from the German minister my department officially informed the finance ministry thereof, and on the second day thereafter, the 2d of August, the latter informed us that it had transmitted to the Belgian custom house instructions giving full and entire satisfaction to Germany.

I believe that I cannot do better, Monsieur le Comte, than to place before you a copy of the correspondence exchanged on this subject with Herr von Below Saleske. You will see thereby that nothing in our attitude could be considered as indicating hostile dispositions toward Germany; the measure taken by the Belgian government at that moment only constituted simple precautions, which every state has the right and the duty to take in such exceptional circumstances.

It would be well if you would address to the government of his Britannic majesty a communication so as to enlighten them as to the real state of the case. (Signed) DAVIGNON.

NO. 1. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Belgrade, 10 (23) July, 1914.

The Austrian minister has just transmitted at 6 o'clock in the evening to the Minister of Finances Patchou, who is replacing Pachitch, a note in the form of an ultimatum from his government fixing a delay of forty-eight hours for the acceptance of the demands contained therein. Giesl added verbally that in case the note should not be accepted in its integrity within a delay of forty-eight hours, he had orders to leave Belgrade with the staff of the legation. Pachitch and the other ministers, who are absent on electoral campaign, have been recalled and are expected in Belgrade tomorrow, Friday, at 10 o'clock in the morning. Patchou, who communicated to me the contents of the note, solicits the aid of Russia, and declares that no Servian government will be able to accept the demands of Austria. (Signed) STRANDTMAN.

NO. 2. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Belgrade, 10 (23) July, 1914.

Text of the note which was transmitted today by the minister of Austria-Hungary to the Servian government:

(See No. 4 in England's "White Paper.")

A memorandum concerning the results of the investigation of Serajevo in regard to the functionaries mentioned in points 7 and 8 is annexed to this note. (Signed) STRANDTMAN.

NO. 3. VERBAL NOTE TRANSMITTED PERSONALLY BY THE AMBASSADOR OF AUSTRIA-HUNGARY AT ST. PETERSBURG TO THE MINISTER OF FOREIGN AFFAIRS, THE 11 (24) JULY, 1914, AT 10 O'CLOCK IN THE MORNING.

The imperial and royal government has found itself under the necessity of handing on Thursday, 10 (23) of the current month, by the hands of the imperial and royal minister at Belgrade, the following note to the royal government of Servia.

(See No. 4 in England's "White Paper.")

NO. 4. THE MINISTER OF FOREIGN AFFAIRS TO THE CHARGE D'AFFAIRES IN AUSTRIA-HUNGARY.

(Telegram.) St. Petersburg, 11 (24) July, 1914.

Please transmit to the minister of foreign affairs of Austria-Hungary the following:

The communication of the Austro-Hungarian government to the powers the day after the presentation of the ultimatum to Belgrade leaves to the powers a delay entirely insufficient to undertake any useful steps whatever for the straightening out of the complications that have arisen. To prevent the incalculable consequences, equally disastrous for all the powers, which can follow the method of action of the Austro-Hungarian government, it seems indispensable to us that above all the delay given to Servia to reply should be extended. Austria-Hungary, declaring herself disposed to inform the powers of the results of the inquiry upon which the imperial and royal government bases its accusations, should at least give them also the time to take note of them (de s'en rendre compte). In this case, if the powers should convince themselves of the well groundedness of certain of the Austrian demands they would find themselves in a position to send to the Servian government consequential advice. A refusal to extend the terms of the ultimatum would deprive of all value the step taken by the Austro-Hungarian government in regard to the powers and would be in contradiction with the very bases of international relations.

Communicated to London, Rome, Paris, Belgrade. (Signed) SAZONOF.

NO. 5. THE MINISTER OF FOREIGN AFFAIRS TO THE REPRESENTATIVES OF HIS MAJESTY THE EMPEROR IN ENGLAND, IN GERMANY, IN ITALY, AND IN FRANCE.

(Telegram.) St. Petersburg, 11 (24) July, 1914.

In reference to my telegram to Kudachef of today we hope that the government to whom you are accredited will share our point of view and will urgently direct its representative in Vienna to pronounce himself in the same sense.

Communicated to Belgrade.

(Signed) SAZONOF.

NO. 6. TELEGRAM FROM HIS ROYAL HIGHNESS THE PRINCE REGENT OF SERVIA TO HIS MAJESTY THE EMPEROR.

Belgrade, 11 (24) July, 1914.

The Austro-Hungarian government yesterday evening handed to the Servian government a note concerning the "attentat" of Serajevo. Conscious of its international duties, Servia from the first days of the horrible crime declared that she condemned it, and that she was ready to open an inquiry on her territory if the complicity of certain of her subjects were proved in the course of the investigation set afoot by the Austro-Hungarian authorities. However, the demands contained in the Austro-Hungarian note are unnecessarily humiliating for Servia and incompatible with her dignity as an independent state. Thus we are called upon in peremptory tones for a declaration of the government in the Official Gazette and an order from the sovereign to the army wherein we should repress the hostile spirit against Austria by reproaching ourselves for criminal weakness in regard to our perfidious actions. Then upon us is imposed the admission of Austro-Hungarian functionaries into Servia to participate with ours in the investigation and to watch over the execution of the other conditions indicated in the note. We have received a delay of forty-eight hours to accept everything, in default of which the legation of Austria-Hungary will leave Belgrade. We are ready to accept the Austro-Hungarian conditions which are compatible with the situation of an independent state, as well as those whose acceptance shall be advised us by your majesty. All persons whose participation in the "attentat" shall be proved will be severely punished by us. Certain among these demands can-

not be carried out without changes in our legislation, which requires time. We have been given too short a delay. We can be attacked after the expiration of the delay by the Austro-Hungarian army, which is concentrating on our frontier. It is impossible for us to defend ourselves, and we supplicate your majesty to give us your aid as soon as possible. The precious good-will of your majesty, which has so often shown itself toward us, makes us hope firmly that this time again our appeal will be heard by his generous Slav heart.

In these difficult moments I interpret the sentiments of the Servian people, which supplicates your majesty to interest himself in the lot of the kingdom of Servia.

(Signed) ALEXANDER.

NO. 7. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 11 (24) July, 1914.

All the morning papers, even those rare ones which recognize the impossibility of Servia accepting the conditions laid down, welcome with great sympathy the energetic tone adopted by Austria. The semi-official Lokal-Anzeiger is particularly aggressive. It describes as superfluous the eventual recourse of Servia to St. Petersburg, to Paris, to Athens, and to Bucharest, and concludes by saying that the German people will breathe freely when it will have learned that the situation in the Balkan peninsula is at last going to be cleared up. (Signed) BRONEWSKY.

NO. 8. THE CHARGE D'AFFAIRES IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 11 (24) July, 1914.

The copy of the note officially handed to Belgrade has been communicated by the ambassador of Austria to the French government. Later the ambassador of Germany visited the minister and read to him a communication reproducing the Austrian arguments, and indicating that in case of refusal on the part of Servia Austria would be obliged to have recourse to pressure, and in case of need to military measures: the communication concluded by the remark that in the opinion of Germany this question must be settled directly between Austria and Servia, and that it was in the interest of the powers to limit the affair by abandoning it to the interested parties. The gerant of the political department who was present at the interview asked the ambassador if the Austrian action should be considered as an ultimatum—in other words if, in case Servia did not entirely bow to the Austrian demands, hostilities were inevitable. The ambassador avoided a direct reply by alleging the absence of instructions.

(Signed) SEVASTOPOULO.

NO. 9. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Belgrade, 11 (24) July, 1914.

Pachitch has returned to Belgrade. He intends to give within the time delay fixed, that is to say, tomorrow, Saturday, at 6 o'clock in the evening, a reply to Austria indicating the points acceptable and inacceptable. A prayer to defend the independence of Servia will be sent out today to the powers. Finally, added Pachitch, if war is inevitable—we will make war. (Signed) STRANDTMAN.

NO. 10. COMMUNIQUE FROM THE IMPERIAL GOVERNMENT.

St. Petersburg, 12 (25) July, 1914.

The recent events and the dispatch by Austria-Hungary of an ultimatum to Servia preoccupy the imperial government in the highest degree. The government is carefully following the evolution of the Servo-Austrian conflict, which cannot leave Russia indifferent.

NO. 11. THE CHARGE D'AFFAIRES IN AUSTRIA-HUNGARY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Vienna, 12 (25) July, 1914.

Count Berchtold is at Ischl. Seeing the impossibility of arriving there in time, I have telegraphed him our proposal to extend the delay of the ultimatum, and I have repeated it verbally to Baron Macchio. This latter promised me to communicate it in time to the minister of foreign affairs, but added that he could predict with assurance a categorical refusal.

(Signed) KUDACHEF.

NO. 12. THE CHARGE D'AFFAIRES IN AUSTRIA-HUNGARY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Vienna, 12 (25) July, 1914.

Sequel to my telegram of today. Have just received from Macchio the negative reply of the Austro-Hungarian government to our proposal to prolong the delay of the note.

(Signed) KUDACHEF.

NO. 13. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Belgrade, 12 (25) July, 1914.

Received with delay, 14 (27) July, 1914.

I transmit the reply which the president of the Servian Ministerial Council has handed to the Austro-Hungarian minister in Belgium today before the expiration of the delay of the ultimatum. (Signed) STRANDTMAN.

(See No. 39, British White Paper.)

NO. 14. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 12 (25) July, 1914.

Have received your telegram of 11 (24) July. Have communicated its contents to the minister of foreign affairs. He told me that the English government had likewise asked him to urge upon Vienna the extension of the delay of the ultimatum. He had communicated this step telegraphically to Vienna. He is going to do as much in regard to our step, (demarche,) but he fears that in consequence of the absence of Berchtold at Ischl, and seeing the lack of time, his telegrams will remain without result. He has besides doubts upon the opportuneness of Austria yielding at the last moment, and he asks if that could not increase the assurance of Servia. I replied that a great power like Austria could yield without any injury to its prestige, and brought forward all the similar arguments possible. However, I was not able to obtain more precise promises. Even when I allowed it to be understood that it was necessary to act at Vienna to avoid the possibility of redoubtable consequences, the minister of foreign affairs replied each time negatively.

(Signed) BRONEWSKY.

NO. 15. THE CHARGE D'AFFAIRES IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 12 (25) July, 1914.

Have received the telegram of 11 (24) July concerning the extension of the delay of the Austrian ultimatum, and have communicated it as instructed. The representative of France in Vienna has received similar instructions.

NO. 16. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 12 (25) July, 1914.

Received telegram of 11 (24) July. Grey has instructed the ambassador of England at Vienna to support our demarche concerning the extension of the delay of the ultimatum. He told me at the same time that the Austrian ambassador had come to see him and had explained that the character of an ultimatum must not be attributed to the Austrian note—it must be considered as a demarche which, in the case of absence of reply or in case of insufficient reply within the term fixed, would have as a consequence the rupture of diplomatic relations and the immediate departure from Belgrade of the minister of Austria-Hungary, without carrying in its train, however, the immediate commencement of hostilities—Grey added that in consequence of this explanation he had instructed the ambassador of England at Vienna that in case it should be too late to raise the question of the extension of the delay of the ultimatum, that of the stay (arrete) of hostilities might perhaps serve as a basis of discussion. (Signed) BENCKENDORFF.

LGIUM, GERMANY, AUSTRIA-HUNGARY, TURKEY AND RUSSIA.

NO. 17. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR AT LONDON.

(Telegram.) St. Petersburg, 12 (25) July, 1914.

In case of a new aggravation of the situation, possibly provoking on the part of the great powers united action (des actions conformes), we count that England will not delay in placing herself clearly on the side of Russia and France with a view to maintaining the equilibrium of Europe, in favor of which she has constantly intervened in the past, and which would without doubt be compromised in the case of the triumph of Austria. (Signed) SAZONOF.

NO. 18. VERBAL NOTE HANDED BY THE AMBASSADOR OF GERMANY TO THE MINISTER OF FOREIGN AFFAIRS, 12 (25) JULY, 1914.

It comes to us from an authoritative source that the news spread by some journals, according to which the demarche of the government of Austria-Hungary at Belgrade had been made at the instigation of Germany, is absolutely false. The German government had no knowledge of the text of the Austrian note before it was handed in, and has not exercised any influence on its contents. It is a mistake to attribute to Germany a threatening attitude.

Germany naturally supports, as ally of Austria, the claims, in its opinion legitimate, of the cabinet of Vienna against Servia.

Above all, she desires, as she has already declared at the commencement of the Austro-Servian difference, that this conflict remain localized.

NO. 19. THE CHARGE D'AFFAIRES IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 12 (25) July, 1914.

Refers to my telegram of 11-24 July.

Today a morning journal published, in a form not entirely exact, the declarations of yesterday of the ambassador of Germany, following them with commentaries which attributed to this demarche the character of a threat. The ambassador of Germany, very much moved by these divulgations, today visited the gerant of the political department to inform him that his words had in no way the minatory character which were attributed to them. He declared that Austria had presented its note to Servia without a precise understanding with Berlin, but that nevertheless Germany approved the point of view of Austria, and that certainly "the arrow once sent" (these are his own words), Germany could not allow herself to be guided except by her duties as an ally.

(Signed) SEVASTOPOULO.

NO. 20. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 12 (25) July, 1914.

Grey told me that the ambassador of Germany had declared to him that the German government had not been informed of the text of the Austrian note, but that it entirely supported the Austrian demarche. The ambassador at the same time asked if England could consent to act in St. Petersburg in a spirit of conciliation. Grey replied that that was completely impossible. The minister added that so long as the complications only existed between Austria and Servia, English interests were only indirectly engaged, but that he must foresee that Austrian mobilization would have as a consequence the mobilization of Russia, and that from that moment they would be in presence of a situation in which all the powers would be interested. England reserved in this case a complete liberty of action.

(Signed) BENCKENDORFF.

NO. 21. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Belgrade, 12 (25) July, 1914.

Despite the extremely conciliatory character of the Servian reply to the ultimatum, the minister of Austria has just, at half past six in the evening, informed the Servian government by note that, not having received within the delay fixed a satisfactory response, he is leaving Belgrade with the whole personnel of the legation. The skupshtina is convoked at Nisch for the 14 (27) July. The Servian government and the diplomatic corps are leaving this evening for the same town. (Signed) STRANDTMAN.

NO. 22. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 12 (25) July, 1914.

Grey told the ambassador of Germany that in his opinion the Austrian mobilization must bring on the mobilization of Russia, that in that case there would arise acute danger of a general war, and that he only saw one single means of a pacific solution; that in presence of the Austrian and Russian mobilizations, Germany, France, Italy, and England should abstain from an immediate mobilization and propose beforehand their good offices. Grey told me that this plan necessitated above all the agreement of Germany and the engagement of this power not to mobilize. In consequence he has first of all addressed to Berlin a question on this subject.

(Signed) BENCKENDORFF.

NO. 23. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN ITALY.

(Telegram.) St. Petersburg, 13 (26) July, 1914.

Italy could play a role of the very first order in favor of the maintenance of peace by exercising the necessary influence upon Austria and by adopting an attitude clearly unfavorable to the conflict, for this latter could not be localized. It is desirable that you express the conviction that it is impossible for Russia not to come to the aid of Servia. (Signed) SAZONOF.

NO. 24. THE GERANT OF THE CONSULATE AT PRAGUE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Prague, 13 (26) July, 1914.

The mobilization has been decreed.

NO. 25. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN AUSTRIA-HUNGARY.

(Telegram.) St. Petersburg, 13 (26) July, 1914.

I had today a long conversation in a friendly tone with the ambassador of Austria-Hungary. After having examined with him the tone of the demands addressed to Servia, I pointed out that, apart from the scarcely clever form (la forme peu habile) under which they are presented, some among them are absolutely inexecutable, even in case the Servian government should declare its willingness to accept them. Thus, for instance, the points (1) and (2) could not be carried out without an amendment of the Servian laws on the press and on associations, for which the consent of the skupshtina could with difficulty be obtained; as for the execution of points (4) and (5) it might produce consequences highly dangerous, and even create the danger of acts of terrorism directed against the members of the royal house and against Pachitch, which could not enter into the views of Austria. In regard to the other points it seems to me that with certain changes in the details it would not be difficult to discover a ground of agreement if the accusations contained therein were confirmed by sufficient proofs.

In the interest of the preservation of peace, which, according to Szapary's statements, is precious to Austria in the same degree as to all the powers, it would be necessary to put a stop as soon as possible to the strained situation of the moment. With this object it would seem to me very desirable that the ambassador of Austria-Hungary should be authorized to enter with me into an exchange of private views, with the object of an alteration (remaniement) in common of some clauses of the Austrian note of 10 (23) July. This proceeding would perhaps permit of finding a formula which should be acceptable for Servia while at the same time giving satisfaction to Austria as to the basis of its demands. Be so good as to have a prudent and friendly explanation in the sense of this telegram with the minister of foreign affairs.

Communicated to the ambassadors in Germany, in France, in England, and in Italy.

NO. 26. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN GERMANY.

(Telegram.) St. Petersburg, 13 (26) July, 1914.

Be so good as to communicate the contents of my telegram to Vienna of today to the German minister of foreign affairs and express to him the hope that on his side he will find it possible to advise Vienna to meet (aller au devant de) our proposal. (Signed) SAZONOF.

NO. 27. THE CHARGE D'AFFAIRES IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 13 (26) July, 1914.

The director of the political department informs me that at the time of the communication which he made to the Austrian ambassador of the contents of the Servian reply to the ultimatum, the ambassador did not conceal his astonishment that it had not given satisfaction to Giesl. The conciliatory attitude of Servia should, in the opinion of the director of the political department, produce the best impression in Europe. (Signed) SEVASTOPOULO.

NO. 28. THE CHARGE D'AFFAIRES IN FRANCE TO THE FOREIGN MINISTER.

(Telegram.) Paris, 13 (26) July, 1914.

Today the German ambassador again called upon the gerant of the ministry of foreign affairs and made to him the following declarations:

"Austria has declared to Russia that she does not seek territorial acquisitions, and that she does not threaten the integrity of Servia. Her only object is to insure her own tranquillity. Consequently it rests with Russia to avoid war. Germany fee.s herself at one with France in her keen desire to preserve the peace, and strongly hopes that France will use her influence at St. Petersburg in the direction of moderation." The minister observed that Germany could on her side take similar steps at Vienna, especially in view of the conciliatory spirit which Servia had shown. The ambassador answered that that was not possible, in view of the resolution taken not to interfere in the Austro-Servian conflict. Thereupon the minister asked if the four powers —England, Germany, France, and Italy—were not able to take steps at St. Petersburg and Vienna, since the affair reduced itself in essentials to a conflict between Russia and Austria. The ambassador pleaded the absence of instructions. Finally, the minister refused to adhere to the German proposal. (Signed) SEVASTOPOULO.

NO. 29. THE CHARGE D'AFFAIRES IN FRANCE TO THE FOREIGN MINISTER.

(Telegram.) Paris, the 13 (26) July, 1914.

The director of the political department declared that in his personal opinion the successive German demarches at Paris had for their object the intimidation of France, and thereby to bring about her intervention at St. Petersburg. (Signed) SEVASTOPOULO.

NO. 30. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 13 (26) July, 1914.

After the reception in Berlin of the news of the mobilization of the Austrian army against Servia a large crowd, composed, according to the newspapers, partly of Austrians, indulged in a series of noisy manifestations in favor of Austria. At a late hour in the evening the demonstrators gathered several times in front of the imperial embassy, uttering cries against Russia. The police were practically absent and took no steps. (Signed) BRONEWSKY.

NO. 31. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 14 (27) July, 1914.

Received your telegram of 13 (26) July. Pray telegraph me if in your opinion your direct pourparlers with the cabinet of Vienna are in line with Grey's proposal concerning the mediation of the four governments. Having learned from the ambassador of England at St. Petersburg that you were disposed to accept this combination, Grey decided to give it the form of an official proposal, which he made last night to Berlin, Paris, and Rome.

(Signed) BENCKENDORFF.

NO. 32. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADORS IN FRANCE AND IN ENGLAND.

(Telegram.) St. Petersburg, 14 (27) July, 1914.

The ambassador of England called to ascertain if we thought it useful that England should take the initiative in convoking at London a conference of the representatives of England, France, Germany, and Italy, in order to study a solution of the present situation.

I replied to the ambassador that I had opened pourparlers with the Austro-Hungarian ambassador, under conditions that I hope are favorable. However, I have not yet received a reply to the proposal I made for a revision of the note between the two cabinets.

If direct explanations with the cabinet of Vienna prove impracticable, I am ready to accept the English proposal or any other calculated to bring about a favorable solution of the conflict.

(Signed) SAZONOF.

NO. 33. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADORS IN FRANCE, IN ENGLAND, IN GERMANY, IN AUSTRIA-HUNGARY, AND IN ITALY.

(Telegram.) St. Petersburg, 14 (27) July, 1914.

Have taken note of the reply sent by the Servian government to Baron Giesl. It exceeds all our anticipations by its moderation and its desire to give the most complete satisfaction to Austria. We do not see what more Austria could demand, unless the cabinet at Vienna is seeking a pretext for a war with Servia.

NO. 34. THE CHARGE D'AFFAIRES IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 14 (27) July, 1914.

The ambassador of Germany again today conferred at length on the situation with the director of the political department. The ambassador strongly insisted on the exclusion of all possibility of mediation or a conference.

NO. 35. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 14 (27) July, 1914.

Have conferred with the gerant of the ministry of foreign affairs, in presence of Berthelot, immediately after my return to Paris. Both confirmed to me the details concerning the steps (demarches) taken by the ambassadors of Germany which Sevastopoulo communicated to you in his telegrams. This morning Baron von Schoen confirmed in writing his declaration of yesterday, namely: (1) Austria has declared to Russia that she does not seek acquisitions and does not attack the integrity of Servia. Her only object is to insure her own tranquillity. (2) Consequently, it depends upon Russia whether war is averted. (3) Germany and France, completely united in the ardent desire not to break the peace, must influence Russia in the direction of moderation. Baron von Schoen laid special stress on the expression of the united view (la solidarite) of Germany and France. It is the strong conviction of the minister of justice that the aforesaid demarches of Germany have for the obvious object to disunite (desunir) Russia and France, to draw the French government into the representations made at St. Petersburg, and thus to compromise our ally in our eyes; finally, in case of war, to throw the responsibility, not on Germany, which soi-disant is employing all her efforts to maintain peace, but on Russia and France.

(Signed) ISVOLSKY.

NO. 36. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 14 (27) July, 1914.

It follows from your telegram of the 13 (26) July that you did not yet know the reply of the Servian government. The telegram by which this news was communicated to me from Belgrade has likewise been en route for twenty hours. The telegram from the French minister of foreign affairs, dispatched the day before yesterday,

at the triple tariff, at 11 o'clock in the morning, and containing the order to support our demand, only reached its destination at 6 o'clock. There is no doubt that this telegram was intentionally delayed by the Austrian telegraphic authorities.

NO. 37. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 14 (27) July, 1914.
By order of his government the ambassador of Austria has communicated to the director of the ministry of foreign affairs that the reply of Servia has been judged unsatisfactory at Vienna and that tomorrow (Tuesday) Austria would proceed to "energetic action," the object of which would be to force Servia to give the necessary guarantees. The minister having asked in what this action would consist, the ambassador replied that he had no exact information on the subject, but that it might be a question of the crossing of the Servian frontier, of an ultimatum, and even of a declaration of war.
(Signed) ISVOLSKY.

NO. 38. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 14 (27) July, 1914.
I have requested the minister of foreign affairs to support at Vienna your proposal tending to authorize Szapary to elaborate, by means of a private exchange of views with you, a presentation (redaction) of the Austro-Hungarian demands acceptable to both parties. Jagow replied that he was acquainted with this proposal, and that he shared the opinion of Pourtales that, since Szapary had begun this conversation, he might very well continue it. He will telegraph in this sense to the ambassador of Germany at Vienna. I begged him to urge upon Vienna in a more pressing fashion to take up this line of conciliation. Jagow replied that he could not advise Austria to yield. (Signed) BRONEWSKY.

NO. 39. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 14 (27) July, 1914.
Today, before my visit to the minister of foreign affairs, this latter had received the visit of the ambassador of France, who had endeavored to make him accept the English proposal relative to action in favor of peace, action which would be exercised simultaneously at St. Petersburg and at Vienna by England, Germany, Italy, and France. Cambon proposed that these powers advise Vienna in the following terms: "To abstain from any act which might aggravate the situation at the present hour." By adopting this veiled formula there would be no necessity of mentioning the necessity of abstaining from an invasion of Servia. Jagow opposed to this proposal a categorical refusal, and that in despite of the insistence of the ambassador, who laid stress as a good argument for the proposal the mixed grouping of the powers, thanks to which would be avoided the opposition of the alliance to the entente, of which Jagow had himself so often complained. (Signed) BRONEWSKY.

NO. 40. TELEGRAM FROM HIS IMPERIAL MAJESTY THE EMPEROR TO HIS ROYAL HIGHNESS PRINCE ALEXANDER OF SERVIA UNDER DATE OF 14 (27) JULY, 1914.

Your royal highness in addressing me in a moment of particular difficulty was not deceived in regard to the sentiments which animate me in his regard and in regard to my cordial sympathy for the Servian people.
My most serious attention is drawn by the present situation and my government is devoting itself with all its force to smoothing out the present difficulties. I have no doubt that your highness and the royal government wish to facilitate this task by neglecting nothing to arrive at a solution which would prevent the horrors of a new war while at the same time safeguarding the dignity of Servia.
So long as there is the least hope of avoiding bloodshed all our efforts must tend toward this object. If, despite our most sincere desire, we do not succeed, your highness may be assured that in no case will Russia disinterest herself in regard to the fate of Servia.
(Signed) NICOLAS.

NO. 41. THE AMBASSADOR IN AUSTRIA-HUNGARY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Vienna, 14 (27) July, 1914.
The minister of foreign affairs is absent. During a prolonged conversation which I had today with Macchio I drew in altogether friendly terms his attention to the unfavorable impression that had been produced in Russia by the presentation by Austria to Servia of demands absolutely inacceptable by any independent state, no matter how small. I added that this proceeding, which might bring about complications of the least desirable kind, had provoked in Russia a profound surprise and general reprobation. It must be supposed that Austria, under the influence of the assurances of the German representative at Vienna, who during all this crisis has played the role of an instigator, counted upon the probability of the localization of its conflict with Servia and on the possibility of delivering a serious blow to this latter with impunity. The declaration of the imperial government regarding the impossibility for Russia of remaining indifferent in the face of such procedure has provoked here a deep impression. (Signed) SCHEBEKO.

NO. 42. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 14 (27) July, 1914.
Grey has just replied to the ambassador of Germany, who had called to question him regarding the possibility of action at St. Petersburg, that this action should be exercised at Vienna and that the cabinet of Berlin would be best qualified to exercise it. Grey pointed out at the same time that the Servian reply to the Austrian note exceeded by its moderation and its spirit of conciliation anything that could have been expected. Grey added that he concluded that Russia had advised Belgrade to give a moderate reply and that he thought that the Servian reply could serve as the basis of a pacific and acceptable solution of the question.
Under these conditions, continued Grey, if Austria, despite this reply, began hostilities, she would prove her intentions of destroying Servia. The question placed on this ground would produce a situation which might bring about a war in which all the powers would be involved.
Grey, in conclusion, declared that the English government was very sincerely disposed to collaborate with the German government so long as it was a question of the preservation of peace, but that in the contrary case England reserved an entire liberty of action.

NO. 43. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN ENGLAND.

(Telegram.) St. Petersburg, 15 (28) July, 1914.
My conversations with the ambassador of Germany confirm my impressions that Germany is rather favorable to the intransigeance of Austria.
The cabinet of Berlin, which might have been able to arrest the whole development of the crisis, seems to exercise no action upon its ally. The ambassador finds the reply of Servia inadequate.
This German attitude is altogether alarming. It seems to me that, better than any other power, England would be in a position to attempt still to act in Berlin to engage the German government to the necessary line of action. It is at Berlin that without doubt is to be found the key of the situation. (Signed) SAZONOF.

NO. 44. THE CONSUL GENERAL AT FIUME TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Fiume, 15 (28) July, 1914.
The state of siege has been proclaimed in Slavonia, in Croatia, and at Fiume, and at the same time the reservists of all classes have been mobilized. (Signed) SALVIATI.

NO. 45. THE AMBASSADOR IN AUSTRIA-HUNGARY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Vienna, 15 (28) July, 1914.
I had a conversation today with Count Berchtold on the line of the instructions from your ex-

cellency. I pointed out to him in the most friendly terms how much it was desirable to find a solution which, while consolidating the good relations between Austria-Hungary and Russia, should give to the Austro-Hungarian monarchy serious guarantees for its future relations with Servia.

I called the attention of Count Berchtold to all the dangers to the peace of Europe which would be brought about by an armed conflict between Austria-Hungary and Servia.

Count Berchtold replied that he understood perfectly well the seriousness of the situation and the advantages of a frank explanation with the cabinet of St. Petersburg. He told me that on the other hand the Austro-Hungarian government, which had only reluctantly decided upon the energetic measures which it had taken against Servia, could now neither withdraw nor enter upon any discussion of the terms of the Austro-Hungarian note.

Count Berchtold added that the crisis had become so acute and that public opinion had been excited to such a degree that the government, even if it desired, could no longer consent to it, all the less, he said to me, because the very reply of Servia gave proof of the lack of sincerity in its promises for the future.

NO. 46. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 15 (28) July, 1914.

The Wolff bureau has not published the text of the Servian response which was communicated to it. Up to this moment this note has not appeared in extenso in any of the local journals which, according to all the evidence, do not wish to give it a place in their columns, understanding the calming effect which this publication would produce upon the German readers.

(Telegram.) Vienna, 15 (28) July, 1914.

The decree of general mobilization has been signed. (Signed) SCHEBEKO.

NO. 48. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR AT LONDON.

(Telegram.) St. Petersburg, 15 (28) July, 1914.

In view of the hostilities between Austria-Hungary and Servia it is necessary that England should urgently undertake mediatory action and that the military action of Austria against Servia should be immediately suspended, otherwise mediation would only serve as a pretext to delay inordinately the solution of the question and would meanwhile give to Austria the possibility of completely crushing Servia and occupying a dominant situation in the Balkans.

NO. 49. THE MINISTER OF FOREIGN AFFAIRS TO THE CHARGE D'AFFAIRES IN GERMANY.

(Telegram.) St. Petersburg, 16 (29) July, 1914.

The ambassador of Germany informs me in the name of the chancellor that Germany has not ceased to exercise in Vienna a moderating influence, and that she will continue this action even after the declaration of war. Up to this morning there was no news that the Austrian armies had crossed the Servian frontier. I requested the ambassador to transmit to the chancellor my thanks for the friendly tenor of this communication. I informed him of the military measures taken by Russia, none of which, I said to him, was directed against Germany. I added that they did not indicate aggressive measures against Austria-Hungary, these measures being explained by the mobilization of the greatest part of the Austro-Hungarian army. The ambassador pronouncing himself in favor of direct explanations between the cabinet of Vienna and us, I replied that I was quite in favor of that, provided the counsels of the cabinet of Berlin, of which he spoke, should find an echo in Vienna.

At the same time I drew attention to the fact that we were altogether in favor of accepting the plan of a conference of the four powers, a plan with which it seemed Germany was not entirely in sympathy.

I said that, in my opinion, the best means of taking advantage of all the methods likely to produce a pacific solution would consist in a parallel action of the pourparlers for a conference of four of Germany, France, England and Italy, and of direct contact between Austria-Hungary and Russia, somewhat similar to what had taken place during the most critical moments of the crisis of last year.

I told the ambassador that, after the concessions made by Servia, a ground of compromise on the questions that remained open would not be difficult to find on condition, that is, of a certain good-will on the part of Austria, and on condition that all the powers use all their influence in the direction of conciliation.

NO. 50. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADORS IN ENGLAND AND IN FRANCE.

(Telegram.) St. Petersburg, 16 (29th) July, 1914.

At the time of my conversation with the ambassador of Germany, of which my preceding telegram treats, I had not yet received the telegram of 15 (28th) July of M. Schebeko.

The contents of this telegram constitute a refusal on the part of the cabinet of Vienna to proceed to a direct exchange of ideas with the imperial government.

Consequently it only remains with us to leave ourselves entirely in the hands of the British government for the initiation of demarches which it will judge useful to provoke.

Communicated to Vienna, Rome, and Berlin.

NO. 51. THE CHARGE D'AFFAIRES IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 16 (29th) July, 1914.

Upon my question whether he had a reply from Vienna regarding your proposal of private pourparlers at St. Petersburg, the secretary of state replied negatively.

He declares that it is very difficult for him to influence Vienna, especially openly. Speaking to Cambon, he, in fact, added that in case of a too evident pressure Austria would hasten to put Germany in presence of an accomplished fact.

The secretary of state said he had received today a telegram from Pourtales from which he gathered that, even more than at the beginning, you are disposed to find a compromise acceptable to all. I replied that probably you had been from the commencement in favor of a compromise, of course on the condition that it should be acceptable not only to Austria but equally to us. He told me next that it appeared that we had begun to mobilize on the Austrian frontier and that he feared that this would make more difficult for Austria the possibility of coming to an understanding with us, particularly as Austria was only mobilizing against Servia and was making no preparations on our frontier. I replied that according to the information which I had Austria was equally mobilizing on our frontier and that consequently we must take similar measures. I added that the measures which we have probably taken on our side were in no wise directed against Germany.

NO. 52. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Nish, 16 (29th) July, 1914.

Today the minister of Bulgaria, in the name of his government, informed Pachitch that Bulgaria would observe neutrality.

NO. 53. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 16 (29th) July, 1914.

On the arrival of the president of the French republic the minister of foreign affairs had prepared a brief summary of the actual political situation in effect in the following terms: Austria fearing interior decomposition has made use of the pretext of the assassination of the archduke to endeavor to obtain guarantees which will

be able to take the form of the occupation of the Servian military communications or even of Servian territory. Germany is supporting Austria. The maintenance of peace depends entirely upon Russia, because it is a question of an affair which must be "localized" between Austria and Servia, that is to say, of the punishment of the preceding policy of Servia and of the guarantees for the future. From this Germany concludes that a moderating action must be exercised at Petersburg. This sophistry has been refuted in Paris as in London. In Paris Baron von Schoen in vain tried to draw France into united action with Germany upon Russia in favor of the maintenance of peace. The same efforts have been made in London. In the two capitals the reply was made that this action must be exercised in Vienna, for the excessive demands of Austria, its refusal to discuss the exceptional reservations of Servia, and the declaration of war threatened to provoke a general war. France and England cannot exercise a moderating influence upon Russia, who up to the present has given proof of the greatest moderation, especially in urging upon Servia to accept all that was possible of the Austrian note. Today Germany seems to abandon the idea of an action upon Russia alone and inclines toward mediatory action at Petersburg and Vienna, but at the same time Germany, like Austria, is seeking to drag the matter out to lengths. Germany opposes the conference without indicating any other practical manner of acting. Austria is carrying on manifestly dilatory pourparlers at Petersburg. At the same time she is taking active measures, and if these measures are tolerated her pretensions will increase proportionately. It is very desirable that Russia lend all her assistance to the plan of mediation which Sir Edward Grey will present. In the contrary case Austria, under pretext of "guarantees," might in effect change the territorial situation of eastern Europe.

(Signed) ISVOLSKY.

NO. 54. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 16 (29th) July, 1914.

Have communicated the contents of your telegrams of 15 (28th) July to Grey. He declared today to the ambassador of Germany that the direct pourparlers between Russia and Austria had failed, and that the correspondents of the newspapers telegraphed from St. Petersburg that Russia was mobilizing against Austria in consequence of mobilization by the latter. Grey said that in principle the German government had declared in favor of mediation, but that it found difficulties in regard to the form. Grey insisted upon the German government indicating the form which, according to the opinion of Germany, would permit the four powers to exercise their mediation to avoid war; seeing the consent of France, Italy and England had been given, mediation might take place only in case Germany would consent to range herself on the side of peace. (Signed) BENCKENDORFF.

NO. 55. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 16 (29th) July, 1914.

Viviani has just confirmed to me the full determination of the French government to act in accordance with us. This resolution is supported by the most extended circles and by all parties, including the radical socialists, who have presented to him a declaration expressing the absolute confidence and the patriotic dispositions of the group. Upon his arrival in Paris, Viviani telegraphed urgently to London that, in view of the cessation of direct pourparlers between Petersburg and Vienna, it was necessary that the cabinet of London should renew as soon as possible under one or another form its proposal for the mediation of the powers. Before seeing me Viviani received today the ambassador of Germany, who renewed the assurance of the pacific tendencies of Germany. Viviani having pointed out that if Germany desired peace she should hasten to adhere to the British proposal of mediation, Baron von Schoen replied that the words "conference" or "arbitration" frightened Austria. Viviani replied that it was not a question of words, and that it would be easy to find another form of mediation. According to Baron von Schoen, in order that the negotiations between the powers should succeed, it would be necessary to ascertain what Austria was going to demand from Servia. Viviani replied that the Berlin cabinet might very easily inquire about this from Austria, but that in the meantime the Servian note of reply might serve as a basis of discussion; he added that France was still sincerely desirous of peace, but that she was at the same time determined to act in full harmony with her allies and friends, and that he (Baron von Schoen) could have convinced himself that this resolution would meet with the liveliest approval of the country. (Signed) ISVOLSKY.

NO. 56. TELEGRAM FROM HIS ROYAL HIGHNESS PRINCE ALEXANDER OF SERVIA TO HIS MAJESTY THE EMPEROR.

Deeply moved by the telegram which your majesty graciously addressed me yesterday, I hasten to thank him with all my heart. I beg your majesty to be persuaded that the cordial sympathy with which your majesty is animated toward my country is particularly precious to us, and fills our souls with the hope that the future of Servia is assured, since it has become the object of the high solicitude of your majesty. These painful moments can only strengthen the bonds of the deep attachment which unites Servia to Holy Slav Russia, and the sentiments of eternal gratitude for the aid and protection of your majesty will be piously preserved in the soul of all Servians. (Signed) ALEXANDER.

NO. 57. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Nish, 16 (29th) July, 1914.

I communicated to Pachitch the text of the telegraphic reply of his majesty the emperor to Prince Alexander. Pachitch, after reading it, crossed himself and said: "Seigneur, the czar is great and clement." Then he embraced me, unable to restrain the emotion which had taken possession of him. The heir is expected at Nish in the course of the night.

NO. 58. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN FRANCE.

(Telegram.) St. Petersburg, 16 (29th) July, 1914.

Today the ambassador of Germany communicated to me the resolution taken by his government to mobilize if Russia did not stop her military preparations. Now, we did not begin these latter except as a consequence of the mobilization to which Austria had already proceeded, and in view of the evident absence on the latter's part of any desire to accept any method whatever of a pacific solution of its conflicts with Servia.

Since we cannot accede to the desire of Germany, it only remains for us to accelerate our own armament, and to take measures for the probable inevitability of war. Be so good as to notify the French government and express to it at the same time our sincere gratitude for the declaration which the ambassador of France made me in its name to the effect that we can count entirely upon the assistance of our ally, France. In the present circumstances this declaration is particularly precious to us.

Communicated to the ambassadors of England, Austria-Hungary, Italy and Germany.

NO. 59. THE CHARGE D'AFFAIRES IN SERVIA TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Nish, 17 (30th) July, 1914.

The prince regent published yesterday a manifesto signed by all the ministers on occasion of the declaration of war by Austria against Servia. The manifesto finishes with the following words: "Defend with all your strength your homes and Servia." At the solemn opening of the skupshtina the regent read in his name the speech from the throne, at the beginning of which he stated that the place of convocation would show

the importance of the present events. Follows the expose of the facts of the last days—the Austrian ultimatum, the Servian reply, the efforts of the royal government to do everything compatible with the dignity of the state to avoid war, and finally the armed aggression of the more powerful neighbor against Servia, on whose side is found Montenegro. Passing to the examination of the attitude of the powers in presence of the conflict, the prince laid stress first of all on the sentiments which animate Russia and on the very gracious communication of his majesty the emperor saying that in no case will Russia abandon Servia. At each mention of the name of his imperial majesty and of Russia a formidable and feverish "jivio" shook the session hall. The marks of sympathy on the part of France and England were also taken note of separately and provoked "jivios" of approbation on the part of the deputies. The speech from the throne concludes with the declaration of the opening of the skupshtina and with the expression of the wish that all measures will be taken to facilitate the task of the government.

NO. 60. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADORS IN GERMANY, AUSTRIA-HUNGARY, FRANCE, ENGLAND AND ITALY.

(Telegram.) St. Petersburg, 17 (30) July, 1914.

The ambassador of Germany, who has just left me, asked me if we could not content ourselves with the promise that Austria could give—of not infringing on the integrity of the kingdom of Servia—and indicate on what condition we could still agree to suspend our armaments: I dictated to him, to be transmitted urgently to Berlin, the following declaration:

"If Austria, recognizing that the Austro-Servian question has assumed the character of a European question, declares herself ready to eliminate from her ultimatum the points which are an infringement of the soverign rights of Servia, Russia undertakes to cease her military preparations."

Be so good as to telegraph urgently what will be the attitude of the German government in presence of this new proof of our desire to do everything possible for the pacific solution of the question, for we cannot admit that similar pourparlers should only serve to give time to Germany and Austria for their military preparations.

NO. 62. THE AMBASSADOR IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 17 (30) July, 1914.

The minister of foreign affairs has just telephoned me to communicate to me that the news just given of the mobilization of the German army and fleet is false; that the newspapers' slips were printed in advance in view of all eventualities and put on sale at mid-day, but that now they are confiscated.

NO. 63. THE AMBASSADOR IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 17 (30) July, 1914.

Have received your telegram of the 16 (29th) July and have transmitted the text of your proposal to the minister of foreign affairs, whom I have just seen; he told me that he had received a similar telegram from the German ambassador at St. Petersburg, and declared that he found our proposal inacceptable for Austria.

NO. 64. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 17 (30) July, 1914.

Have communicated the contents of your telegrams of the 16th and 17th July to Grey, who considers the situation very serious, but desires to continue the pourparlers. I observed to Grey that since you had proposed to him to accept anything he might propose in favor of the maintenance of peace, provided that Austria could not profit by the delays to crush Servia, the situation in which you found yourself was apparently modified. At that period our relations with Germany were not compromised. After the declaration of the German ambassador at St. Petersburg concerning the German mobilization these relations had changed, and her demand had received from you the only reply which a great power could give. When the ambassador of Germany returned to you and asked for your conditions you formulated them in altogether special circumstances. I at the same time again insisted with Grey on the necessity of taking into consideration the new situation created by the fault of Germany in consequence of the action of the German ambassador. Grey replied he understood it, and that he would take these arguments into consideration. (Signed) BENCKENDORFF.

NO. 65. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, 17 (30) July, 1914.

The German ambassador asked Grey why England was taking military measures on land and on sea. Grey replied that these measures had not an aggressive character, but that the situation was such that every power must prepare itself.

NO. 66. THE AMBASSADOR IN AUSTRIA-HUNGARY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Vienna, 18 (31) July, 1914.

In spite of the general mobilization I continue to exchange views with Count Berchtold and his collaborators. All insist on the absence of aggressive intentions on the part of Austria against Russia and of ambitions of conquest in regard to Servia, but all equally insist on the necessity for Austria of pursuing to the very end the action begun and of giving to Servia a serious lesson which would constitute a certain guarantee for the future. (Signed) SCHEBEKO.

NO. 67. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADORS IN GERMANY, AUSTRIA-HUNGARY, FRANCE, ENGLAND AND ITALY.

(Telegram.) St. Petersburg, 18 (31) July, 1914.

Referring to my telegram of 17 (30) July. By order of his government the ambassador of England transmitted to me the desire of the cabinet of London to introduce certain modifications in the formula which I proposed yesterday to the ambassador of Germany, I replied that I accepted the English proposal. Herewith I transmit to you the modified formula:

"If Austria consents to stay the march of her armies upon Servian territory, and if, recognizing that the Austro-Servian conflict has assumed the character of a question of European interest, she admits that the great powers examine the reparation which Servia could accord to the government of Austria-Hungary without injury to her rights as a soverign state and to her independence—Russia undertakes to maintain her expectant attitude." (Signed) SAZONOF.

NO. 68. THE AMBASSADOR IN GERMANY TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Berlin, 17 (30) July, 1914.

The minister of foreign affairs has just told me that our pourparlers, which were already difficult, in consequence of the mobilization against Austria, become increasingly so in presence of the grave military measures which we are taking against Germany; news regarding these is, according to him, received here from every side, and must inevitably provoke analogous measures on the part of Germany.

To that I replied that, according to sure information of which I disposed, and which was confirmed by all our compatriots arriving in Berlin, the taking against us of the above-mentioned measures was equally being pursued in Germany with great activity. Despite this, the minister of foreign affairs affirms that here they are only recalling officers on leave and the troops of the

"champs de manoeuvres" (field of manoeuvres).

NO. 69. THE MINISTER OF FOREIGN AFFAIRS TO THE AMBASSADOR IN ENGLAND.

(Telegram.)
St. Petersburg, the 18 (31) July, 1914.

I have requested the ambassador of England to transmit to Grey the expression of my most sincere gratitude for the friendly and firm tone which he used during the pourparlers with Germany and Austria, thanks to which the hope of discovering a pacific issue of the present situation is still not lost.

I also asked him to inform the English minister that I thought that it was only at London that the pourparlers wou'd still have some chances of any success by facilitating for Austria the necessity of a compromise.

Communicated to the ambassador of France.

NO. 70. SECRET TELEGRAM TO THE REPRESENTATIVES OF HIS MAJESTY THE EMPEROR ABROAD.

(Telegram.) 19th July (1st August), 1914.

At midnight the ambassador of Germany declared to me, by order of his government, that if within twelve hours, that is at mid-day of Saturday, we did not commence demobilization, not only in regard to Germany, but also in regard to Austria, the German government would be forced to give the order of mobilization. To my question if this was war the ambassador replied in the negative, but added that we were very near it. (Signed) SAZONOF.

NO. 71. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, July 19 (Aug. 1), 1914.

Grey told me that he had telegraphed to Berlin that in his opinion the last formula accepted by the Russian government constituted the basis of negotiations which presented the most chance of a pacific solution of the conflict. He at the same time expressed the hope that no great power would commence hostilities before the examination of this formula.

NO. 72. THE AMBASSADOR IN ENGLAND TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) London, July 19 (Aug. 1), 1914.

The government of Great Britain has put to the French and German governments the question whether they would respect the neutrality of Belgium.

France replied in the affirmative, while the German government declared it could not reply to this question categorically.

NO. 73. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 19 July (1 Aug.), 1914.

The ambassador of Austria yesterday called upon Viviani and declared to him that Austria not only had no intention of infringing the territorial integrity of Servia, but was ready to discuss with the other powers the basis of its conflict with Servia. The French government is very much concerned by the extraordinary military preparations of Germany on the French frontier, for it is convinced that under the veil of the "Kriegszustand" there is a veritable mobilization. (Signed) ISVOLSKY.

NO. 74. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 19 July (1 Aug.), 1914.

On the reception here of the telegram of the ambassador of France at St. Petersburg containing the communication made to you by the German ambassador concerning the resolution of Germany to order today the general mobilization the president of the republic signed the decree of mobilization. In the streets they are posting up the orders calling in the reservists. The ambassador in Germany has just paid a visit to Viviani, but made no fresh communication to him, alleging the impossibility of deciphering the telegrams he had received. Viviani informed him of the signature of the decree of mobilization in reply to the German mobilization, and spoke to him of his astonishment that Germany should have taken such a measure at a moment when a friendly exchange of views was still proceeding between Russia, Austria and the powers; he added that the mobilization did not necessarily mean war, and that the ambassador of Germany might remain in Paris as the ambassador of Russia had remained in Vienna and the ambassador of Austria in St. Petersburg. (Signed) ISVOLSKY.

NO. 75. THE AMBASSADOR IN FRANCE TO THE MINISTER OF FOREIGN AFFAIRS.

(Telegram.) Paris, 19 July (1 Aug.), 1914.

I learn from the president that during the last days the ambassador of Austria strongly assured the president of the council of ministers and himself that Austria had informed us she was ready to respect not only the territorial integrity of Servia but also its sovereign rights, and that we had intentionally kept silence about this declaration. I opposed a categorical denial to this.

NO. 76. NOTE HANDED IN BY THE AMBASSADOR OF GERMANY AT ST. PETERSBURG THE 19 JULY (AUG. 1), 1914, AT 10 MINUTES PAST 7 IN THE EVENING.

The imperial government has endeavored from the opening of the crisis to lead it to a pacific solution. In accordance with a desire which had been expressed to him by his majesty the emperor of Russia his majesty the emperor of Germany in accord with England had applied himself to filling a mediator role with the cabinets of Vienna and St. Petersburg, when Russia, without awaiting the result of this, proceeded to the complete mobilization of her forces on land and sea. As a consequence of this threatening measure, motived by no military "presage" on the part of Germany, the German empire found itself in face of a grave and imminent danger. If the imperial government had failed to safeguard herself against this peril it would have compromised the safety and the very existence of Germany. Consequently the German government saw itself forced to address to the government of his majesty the emperor of all the Russias an insistence on the cessation of the said military acts. Russia having refused to accede to this demand, and having manifested by this refusal that its action was directed against Germany, I have the honor to make known to your excellency the following:

His majesty the emperor, my august sovereign, in the name of the empire, taking up the challenge, considers himself in a state of war with Russia. (Signed) F. POURTALES.

St. Petersburg, 19th July (1st Aug.), 1914.

NO. 77. COMMUNIQUE OF THE MINISTER OF FOREIGN AFFAIRS CONCERNING THE EVENTS OF THE LAST DAYS.

20th July (2d Aug.), 1914.

An expose disfiguring the events of the last days having appeared in the foreign press, the minister of foreign affairs believes it his duty to publish the following apercu of the diplomatic pourparlers during the time above indicated:

The 10 (23) July (old style), the minister of Austria-Hungary at Belgrade presented to the minister president of Servia a note in which the Servian government was accused of having favored the pan-Servian movement, which had culminated in the assassination of the heir of the Austro-Hungarian throne. In consequence Austria-Hungary called upon the Servian government, not only to condemn in a solemn form the abovementioned propaganda, but also to take, under control of Austria-Hungary, a series of measures tending to the discovery of the plot, to the punishment of the Servian subjects having participated in it, and to the prevention in future of any attentat on the soil of the kingdom. A delay of forty-eight hours was fixed for the Servian government's reply to the above note.

The imperial government, to which the ambassador of Austria-Hungary at St. Petersburg had communicated the text of the note seventeen hours after its delivery at Belgrade, having taken note of the demands contained therein, saw that among the number were some that it was entirely impossible to comply with, while others

were presented in a form incompatible with the dignity of an independent state. Finding inadmissible the diminution of the dignity of Servia contained in these demands as well as the tendency of Austria-Hungary to assure her preponderance in the Balkans, shown by these very exigencies, the Russian government pointed out in the most friendly fashion to Austria-Hungary that it would be desirable to submit to a new examination the points contained in the Austro-Hungarian note. The Austro-Hungarian government did not believe it possible to consent to a discussion of the note. The moderating action of the other powers at Vienna was likewise not crowned with success.

Although Servia had condemned the crime and had shown herself ready to give satisfaction to Austria in a measure which exceeded the expectations not only of Russia but also of the other powers, the minister of Austria-Hungary at Belgrade judged the Servian reply inadequate and left that town.

Recognizing the exaggerated character of the demands presented by Austria, Russia had previously declared that it would be impossible for her to remain indifferent, without at the same time refusing to employ all her efforts to obtain a pacific issue which would be acceptable to Austria and would satisfy her amour-propre as a great power. At the same time Russia firmly established that she admitted a pacific solution of the question only in a measure which would not imply the diminution of the dignity of Servia as an independent state. Unfortunately all the efforts made by the imperial government in this direction remained without effect. The Austro-Hungarian government, after evading (s'etre derobe) every conciliatory intervention of the powers in its conflict with Servia, proceeded to mobilize, officially declared war on Servia, and the following day bombarded Servia. The manifesto which accompanied the declaration of war openly accused Servia of having prepared and executed the crime of Serajevo. Such an accusation of a crime of the common law against a whole people and a whole government drew to Servia by its evident inanity the large sympathies of all circles of European society.

As a consequence of this method of acting on the part of the Austro-Hungarian government, despite the declaration of Russia that she could not remain indifferent to the lot of Servia, the imperial government judged it necessary to order the mobilization of the military districts of Kiev, Odessa, Moscow and Kazan. Such a decision was necessary because after the date of the handing of the Austro-Hungarian note to the Servian government and the first steps of Russia five days had passed and meanwhile the cabinet of Vienna had made no step to meet our pacific efforts—on the contrary the mobilization of half of the Austro-Hungarian army had been decreed.

The German government was informed of the measures taken by Russia. It was at the same time explained to it that these measures were only the consequence of the Austrian armaments, and in no wise directed against Germany. At the same time the imperial government declared that Russia was ready to continue the pourparlers in view of a pacific solution of the conflict, either by means of direct negotiations with the cabinet of Vienna, or, following the proposal of Great Britain, by means of a conference of the four great powers not directly interested, namely, England, France, Germany, and Italy.

However, this attempt of Russia equally failed. Austria-Hungary declined a further exchange of views with us, and the cabinet at Vienna evaded participation in the projected conference of the powers.

Nevertheless Russia did not discontinue her efforts in favor of peace. Replying to the question of the ambassador of Germany, under what conditions we would still consent to suspend our armaments, the minister of foreign affairs declared that these conditions would be the recognition by Austria-Hungary that the Austro-Servian question had taken the character of a European question, and the declaration of this same power that she would consent not to insist on demands incompatible with the sovereign rights of Servia.

The proposal of Russia was judged by Germany to be inacceptable for Austria. Simultaneously there was received at St. Petersburg the news of the proclamation of the general mobilization by Austria-Hungary.

At the same time hostilities continued on Servian territory and Belgrade was again bombarded.

The failure of our pacific proposals obliged us to increase the military measures of precaution.

The cabinet of Berlin having addressed to us a question on this subject, it was replied that Russia was forced to commence arming to safeguard herself against all eventualities.

While taking this measure of precaution, Russia none the less did not discontinue to seek with all her powers an issue from the situation and declared herself ready to accept any method of solution of the conflict which would meet the conditions posed by us.

Notwithstanding this conciliatory communication, the German government, 18 (31) July, addressed to the Russian government a demand for the suspension of her military measures by midday of the 19th July (1st August) threatening in the contrary case to proceed to a general mobilization.

Next day, 19th July (1st August), the ambassador of Germany transmitted to the minister of foreign affairs in the name of his government the declaration of war.

NO. 78. THE MINISTER OF FOREIGN AFFAIRS TO THE REPRESENTATIVES OF HIS MAJESTY THE EMPEROR ABROAD.

(Telegram.)

St. Petersburg, 20th July (2d August), 1914.

It is absolutely clear that Germany is already endeavoring to throw upon us the responsibility of the rupture. Our mobilization was provoked by the enormous responsibility which we should have incurred if we had not taken all precautionary measures at a moment when Austria, confining herself to pourparlers of a dilatory character, was bombarding Belgrade and proceeding to a general mobilization.

His majesty the emperor had undertaken, by giving his personal word to the emperor of Germany, not to undertake any aggressive act so long as the pourparlers with Austria should continue. After such a guarantee, and after all the proofs of Russia's love for peace, Germany could not and had no right to doubt our declaration that we would accept with joy any pacific issue compatible with the dignity and independence of Servia. Another issue, while being completely incompatible with our own dignity, would certainly have shaken European equilibrium by insuring the hegemony of Germany. This European, even world-wide, character of the conflict is infinitely more important than the pretext which has created it. By its decision to declare war upon us at a moment when the negotiations between the powers were still being pursued, Germany has assumed a heavy responsibility. (Signed) SAZONOF.

NO. 79. NOTE HANDED BY THE AMBASSADOR OF AUSTRIA-HUNGARY AT ST. PETERSBURG TO THE MINISTER OF FOREIGN AFFAIRS THE 24TH OF JULY (AUG. 6TH), AT 6 O'CLOCK IN THE EVENING.

By order of his government the undersigned ambassador of Austria-Hungary has the honor to notify his excellency the minister of foreign affairs of Russia the following:

Seeing the menacing attitude taken by Russia in the conflict between the Austro-Hungarian monarchy and Servia and in presence of the fact that following this conflict Russia, according to a communication from the cabinet of Berlin, has deemed it advisable to open hostilities against Germany, and that this latter consequently finds herself in a state of war with the said power, Austria-Hungary considers herself equally in a state of war with Russia from the present moment. (Signed) SZAPARY.

St. Petersburg, 24th July (Aug. 6), 1914.

FRENCH YELLOW BOOK.

The French ministry of foreign affairs made public Nov. 30 a "Yellow Book" dealing with the causes of the war. It contains much that appears in the various official documents issued by the other parties to the great controversy and which are printed in full on preceding pages of this volume. The book places the blame for th war entirely on the shoulders of Germany and Austria-Hungary. It says:

"From a perusal of the six chapters of the Yellow Book, which are devoted to the diplomatic negotiations carried on in the month of July, there are to be deduced, and supported by evidence, the following impressions: That the combination between Austria and Germany had decided upon war and that on four successive occasions this combination endeavored to precipitate war by violent proceedings, the purpose of which was to prevent or to insure the failure of all efforts at conciliation.

"The first of these proceedings was the Austrian ultimatum to Servia on July 24, which was the origin of this conflict. In spite of the fact that the Belgrade government offered, for the prosecution of the assassins of the Austrian archduke, every facility compatible with its dignity, the cabinet of Vienna summoned the government at Belgrade not only to disavow all complicity with the crime of Sarajevo, but, furthermore, to permit foreign functionaries to seek the authors of this crime on Servian territory.

"Vienna gave Servia only two days to accept these Draconian conditions. In spite of the fact that M. von Jagow, the German minister of foreign affairs, claimed to be in ignorance of the contents of this note (which was nevertheless known to the president of the Bavarian council) Germany immediately and without restriction united herself with her ally.

"The German ambassador came to the Quay d'Orsay (the French foreign office in Paris) and endeavored to carry through a proposal which he represented as being peaceful, but which was in reality threatening. He declared that the conflict should remain 'localized' and that any intervention on the part of a third power would result in incalculable consequences.

"This was tantamount to letting it be understood that Austria should have every liberty to crush Servia and that Germany would have recourse to arms to prevent Russia from succoring Servia.

"Confronted with this situation, the first thought of the powers forming the triple entente was to gain time to examine the conflict with greater care and if possible to make it less acute. The powers therefore asked that Vienna extend the period allowed Servia for her answer.

"Then Austria became fearful that she would be left without a pretext of war and endeavored to ward off this danger by another expedient. She declined or avoided the request for an extension and declared insufficient the Servian answer, which was given to her in good time and which admitted and accepted her principal demands.

"Austria thereupon ordered her minister at Belgrade to leave the Servian capital (July 26) and diplomatic relations with Servia were severed.

"With this development the situation became considerably aggravated. The powers of the triple entente, however, still endeavored to bring about a settlement. In the meantime M. von Schoen, the German ambassador in Paris, came to the Quay d'Orsay and demanded that France exert her influence on Russia in a peaceful sense, but he refused to exert similar peaceful influence at Vienna.

"England proposed to avoid a crisis by submitting the Austro-Serb difficulty to the official mediation of the four powers which were not directly interested therein. France and Russia accepted this proposal to internationalize the question, but Germany refused under the pretext that she could not thus humiliate her ally, and she proposed, in the place of this common action, the opening of direct conversations between Vienna and St. Petersburg, saying the latter was ready to consent to this arrangement.

"The conflict seemed consequently at this time to be progressing toward a settlement when for the third time Austria, by a fresh provocation, killed the hopes authorized by all that had been done up to the present in the direction of conciliation. She declared war on Servia on July 28 and began at the same time a partial mobilization against Russia on her frontiers on July 29.

"The chances for peace now seemed greatly reduced, particularly as the Austrian army began the bombardment of Belgrade, the occupation of which seemed to be only a question of hours.

"The powers of the triple entente did not, however, give up all hope of accomplishing something in these last remaining minutes. On one side, Sir Edward Grey, the British foreign secretary, started a new project for four sided mediation, a project in which Russia joined at the demand of France.

"M. von Jagow, to whom this project was communicated, evaded it by declaring that while he adhered to its principle it was necessary to find a formula that would be acceptable to Austria. He was then invited to formulate a proposal of settlement, but he again avoided the issue by saying that he would consult the Vienna cabinet on this point.

"Sir Edward Grey, whose spirit of conciliation seemed indefatigable, then came forward with a new compromissary proposition which provided that all the powers should call a halt to their military preparation. Furthermore, Russia gave a fresh evidence of its desire to maintain the peace of Europe by offering to maintain an attitude of expectation if Austria would engage not to undertake any measures directed against the sovereignty of Servia, even after having occupied Belgrade.

"It was then that the cabinet of Vienna, perhaps fearful of the consequences of its irreconcilability, and feeling the necessity of taking a step backward, declared for the first time that it was ready to discuss with Europe the fundamental principle of its differences with Servia.

"At the moment that this work in the direction of reciprocal concessions seemed to warrant a last hope of peace, an irreparable movement on the part of Germany promised to endanger definitely the results acquired with so much labor and to force the crisis to a violent solution.

"At the beginning of the conflict Germany had begun military preparations and it continued them with feverish haste. At the moment when its representatives in foreign countries were protesting its pacific intentions, the 31st of July, in the evening, Germany addressed to the Russian government an ultimatum giving Russia twelve hours in which to demobilize on the Austrian as well as on the German frontiers.

"The alternative was that Germany would mobilize. This was done at a time when the Russian government had given evidence of its conciliatory attitude and at a time when Austria-Hungary was showing itself disposed to discuss with Europe the question of its note to Servia.

"There could be no doubt as to the answer to such an ultimatum. From that moment the cause of peace was definitely lost, the reason being this precipitate action on the part of Germany. The obligations of alliances had to be observed and the great powers were drawn into the fatal conflict.

"Events which then took place are fresh in the memory of every one. On the 31st of July there were acts of hostility clearly defined on our frontier; the 2d of August saw the violation of the neutrality of Luxemburg and the entrance by German troops upon three points of our territory while our troops were holding themselves at a distance of six miles from the frontier.

"The same day Belgium was summoned to permit Germany's military operations against France. Finally, on the 3d of August, the declaration of war was brought by M. von Schoen to the Quay d'Orsay, which act preceded by a short time only the violation of the neutrality of Belgium."

DECLARATIONS OF WAR.

AUSTRIA-HUNGARY AGAINST SERVIA.

(July 28.)

"The royal government of Servia not having replied in a satisfactory manner to the note remitted to it by the Austro-Hungarian minister in Belgrade, July 23, 1914, this imperial and royal government finds itself compelled to proceed itself to safeguard its rights and interests and to have recourse for this purpose to force of arms.

"Austria-Hungary considers itself therefore from this moment in a state of war with Servia."

The declaration was signed by Count Berchtold, minister of foreign affairs of Austria-Hungary.

GERMANY AGAINST RUSSIA.

(Aug. 1.)

"Since the beginning of the crisis the imperial government has endeavored to bring about a peaceful solution. In conformity with the wish expressed to him by his majesty the emperor of Russia, his majesty the emperor of Germany, in agreement with England, was endeavoring to act as mediator between the cabinets of Vienna and St. Petersburg, when Russia, without waiting for the results of his efforts, proceeded to mobilize the whole of its land and sea forces.

"As the result of this threatening step, for which no motive was afforded by any military preparation on Germany's part, the German empire found itself face to face with a serious and imminent danger. If the imperial government had failed to parry this danger it would have compromised the security and even the existence of Germany. Consequently the German government found itself compelled to address the government of his majesty the emperor of all the Russias, and to insist on the cessation of the said military acts. Russia having refused the satisfaction of this demand, and having shown by this refusal that its action was directed against Germany, I have the honor to inform your excellency, by my government's command, as follows:

"His majesty the emperor, my august sovereign, raises the gage in the empire's name and regards himself as in a state of war against Russia."

The declaration was signed by F. Pourtales, German ambassador at St. Petersburg.

GERMANY AGAINST FRANCE.

(Aug. 3.)

"The German administrative and military authorities have observed a certain number of acts of decided hostility committed on German territory by French military aviators. Several of these last have openly violated the neutrality of Belgium, flying over the territory of this country. One tried to destroy constructions near Wessel; others have been seen in the region of Eifel; another has dropped bombs on the railroad near Carlsruhe and Nuremburg.

"I am charged, and I have the honor to make known to your excellency, that in the face of these aggressions the German empire considers itself in a state of war with France by fault of the latter power.

"At the same time I have the honor to bring to the knowledge of your excellency that the German authorities will detain French merchant ships in German ports, but that they will release them if complete reciprocity is assured within forty-eight hours.

"My diplomatic mission having thus ended, there remains for me only to beg your excellency kindly to supply me with my passports and to take any measures which may be judged useful to assure my return into Germany with the personnel of the embassy as well as with the personnel of the Bavarian legation and of the general consulate of Germany in Paris.

"Kindly accept, monsieur the president, the expression of my very high consideration."

The notification was addressed to President Poincare and was signed by Baron von Schoen, German ambassador at Paris.

GREAT BRITAIN AGAINST GERMANY.

(Aug. 4.)

"Owing to the summary rejection by the German government of the request made by his Britannic majesty's government that the neutrality of Belgium should be respected, his majesty's ambassador at Berlin has received his passports, and his majesty's government has declared to the German government that a state of war exists between Great Britain and Germany from 11 o'clock p. m., Aug. 4."

FRANCE AGAINST GERMANY.

(Aug. 4.)

The French minister of war issued the following note Aug. 4:

"The German ambassador has demanded his passports and diplomatic relations between France and Germany have been broken off. War is declared."

AUSTRIA-HUNGARY AGAINST RUSSIA.

(Aug. 6.)

"By order of his government the undersigned ambassador of Austria-Hungary has the honor to notify his excellency the minister of foreign affairs of Russia the following:

"Seeing the menacing attitude taken by Russia in the conflict between the Austro-Hungarian monarchy and Servia and in presence of the fact that following this conflict Russia, according to a communication from the cabinet of Berlin, has deemed it advisable to open hostilities against Germany, and that this latter consequently finds herself in a state of war with the said power, Austria-Hungary considers herself equally in a state of war with Russia from the present moment."

The declaration was signed by Count Szapary, Austro-Hungarian ambassador at St. Petersburg.

FRANCE AND GREAT BRITAIN AGAINST AUSTRIA-HUNGARY.

(Aug. 12.)

Statement issued by British foreign office:

"Diplomatic relations between France and Austria-Hungary being broken off [Aug. 10] the French government requested his majesty's government to communicate to the Austro-Hungarian ambassador in London the following declaration:

" 'Having declared war on Servia and thus taken the initiative in hostilities in Europe the Austro-Hungarian government has placed itself without any provocation from France in a state of war with France, and after Germany had successively declared war against Russia and France Austria-Hungary has interfered in the conflict by declaring war on Russia, who already was fighting on the side of France.

" 'According to information worthy of belief Austria-Hungary has sent troops over the German frontier in such a manner as to constitute a direct menace against France. In face of these facts the French government finds itself obliged to declare to the Austro-Hungarian government that it will take all measures permitted to it to reply to these acts and menaces.'

"In communicating this declaration, accordingly, to the Austro-Hungarian ambassador in London his Britannic majesty's government has declared to his excellency that the rupture with France having been brought about in this way it feels itself obliged to announce that a state of war exists between Great Britain and Austria-Hungary as from midnight." [Aug. 12.]

MONTENEGRO AGAINST AUSTRIA-HUNGARY.

Montenegro declared war against Austria-Hungary Aug. 12.

JAPAN AGAINST GERMANY.

(Aug. 23.)

"We, by the grace of heaven, emperor of Japan, seated on the throne occupied by the same dynasty from time immemorial, do hereby make the following proclamation to all our loyal and brave subjects:

"We hereby declare war against Germany and

we command our army and navy to carry on hostilities against that empire with their strength, and we also command all our competent authorities to make every effort, in pursuance of their respective duties, to attain the national aim by all means within the limits of the law of nations.

"Since the outbreak of the present war in Europe, calamitous effect of which we view with grave concern, we on our part have entertained hopes of preserving the peace of the far east by the maintenance of strict neutrality, but the action of Germany has at length compelled Great Britain, our ally, to open hostilities against that country, and Germany is at Kiaochau, its leased territory in China, busy with warlike preparations, while its armed vessels cruising the seas of eastern Asia are threatening our commerce and that of our ally. Peace of the far east is thus in jeopardy.

"Accordingly, our government and that of his Britannic majesty, after full and frank communication with each other, agreed to take such measures as might be necessary for the protection of the general interests contemplated in the agreement of alliance, and we on our part being desirous to attain that object by peaceful means commanded our government to offer with sincerity an advice to the imperial German government. By the last day appointed for the purpose, however, our government failed to receive an answer accepting the advice. It is with profound regret that we, in spite of our ardent devotion to the cause of peace, are thus compelled to declare war, especially at this early period of our reign and while we are still in mourning for our lamented mother.

"It is our earnest wish that by the loyalty and valor of our faithful subjects peace may soon be restored and the glory of the empire be enhanced."

AUSTRIA-HUNGARY AGAINST JAPAN.

Diplomatic relations between Austria-Hungary and Japan were broken off Aug. 29, a state of war existing between the nations from that date.

TURKEY AGAINST RUSSIA.

Turkey began war on Russia Oct. 29 without any formal declaration of war.

GREAT BRITAIN AGAINST TURKEY.

(Nov. 5.)

"Owing to hostile acts committed by Turkish forces under German officers, a state of war exists between Great Britain and Turkey from to-day and all proclamations and orders in council issued with reference to the state of war between Great Britain and Germany and Austria shall apply to the state of war between Great Britain and Turkey."

The proclamation was signed by King George.

FRANCE AGAINST TURKEY.

(Nov. 5.)

"The hostile acts of the Turkish fleet against a French steamer, causing the death of two Frenchmen and serious damage to the ship, not having been followed by the dismissal of the German naval military missions, the measure whereby Turkey could disclaim responsibility, the government of this republic is obliged to state that as a result of the action of the Ottoman government a state of war exists between France and Turkey."

TURKEY DECLARES A HOLY WAR.

(Nov. 27.)

The proclamation of a holy war against Great Britain, Russia and France was officially published in Constantinople, Turkey, Nov. 27. It was signed by the sultan, Mehmed V., and twenty-eight Moslem priests.

ARMED STRENGTH OF NATIONS AT WAR.

The following statistics of the armies and navies of the nations at war up to Dec. 1, 1914, and of countries likely to be dragged into the conflict are from the Statesman's Year-Book and Brassey's Naval Annual for 1914 and from various other reliable sources. The figures represent the armed strength of the countries named at the opening of hostilities and no deductions have been made for losses of men and ships after that time. What these losses were may be learned at least approximately from other tables given herewith.

ARMIES.

Country.	Standing.	War.
Austria-Hungary	424,318	1,000,000
Germany	790,985	3,350,000

Spain	122,000	220,000
Sweden	80 825	485,000
Switzerland	214,022	214,022

In the foregoing table the standing armies represent the regular establi hment of paid forces: the war armies are the regulars and the first and second line reserves, all trained men. It should be noted that in time of a great war lasting more than a few weeks the armies may be vastly increased by volunteers and conscripts. This is especially true of countries in which military service is not compulsory.

BRANCHES OF SERVICE.

The following table shows the relative strength of the infantry, cavalry and artillery in the regular armies of the leading countries involved in the war:

Austria-Hungary.		France.

ACTION IN THE UNITED STATES.

AMERICAN NEUTRALITY PROCLAMATION.

Issued Aug. 4, 1914.

By the President of the United States of America—A Proclamation:

Whereas, a state of war unhappily exists between Austria-Hungary and Servia, and between Germany and Russia, and between Germany and France; and whereas the United States is on terms of friendship and amity with the contending powers and with the persons inhabiting their several dominions;

And, whereas, there are citizens of the United States residing within the territories or dominions of each of the said belligerents and carrying on commerce, trade or other business or pursuits therein;

And, whereas, there are subjects of each of the said belligerents residing within the territory or jurisdiction of the United States and carrying on commerce, trade or other business or pursuits therein;

And, whereas, the laws and treaties of the United States, without interfering with the free expression of opinion and sympathy or with the commercial manufacture or sale of arms or munitions of war, nevertheless impose upon all persons who may be within their territory and jurisdiction the duty of an impartial neutrality during the existence of the contest;

And, whereas, it is the duty of a neutral government not to permit or suffer the making of its waters subservient to the purposes of war;

Now, therefore, I, Woodrow Wilson, president of the United States of America, in order to preserve the neutrality of the United States and of its citizens and of persons within its territory and jurisdiction, and to enforce its laws and treaties, and in order that all persons, being warned of the general tenor of the laws and treaties of the United States in this behalf, and of the law of nations, may thus be prevented from any violation of the same, do hereby declare and proclaim that by certain provisions of the act approved on the 4th day of March, A. D., 1909, commonly known as the penal code of the United States, the following acts are forbidden to be done, under severe penalties, within the territory and jurisdiction of the United States, to wit:

"1. Accepting and exercising a commission to serve either of the said belligerents by land or by sea against the other belligerents.

"2. Enlisting or entering into the service of either of the said belligerents as a soldier, or as a marine, or seaman on board of any vessel of war, letter of marque, or privateer.

"3. Hiring or retaining another person to enlist or enter himself in the service of either of the said belligerents as a soldier, or as a marine, or seaman on board of any vessel of war, letter of marque, or privateer.

"4. Hiring another person to go beyond the limits or jurisdiction of the United States with intent to be enlisted as aforesaid.

"5. Hiring another person to go beyond the limits of the United States with intent to be entered into service as aforesaid.

"6. Retaining another person to go beyond the limits of the United States with intent to be enlisted as aforesaid.

"7. Retaining another person to go beyond the limits of the United States with intent to be entered into service as aforesaid. (But the said act is not to be construed to extend to a citizen or subject of either belligerent who, being transiently within the United States, shall, on board of any vessel of war, which, at the time of its arrival within the United States, was fitted and equipped as such vessel of war, enlist or enter himself or hire or retain another subject or citizen of the same belligerent, who is transiently within the United States, to enlist or enter himself to serve such belligerent on board such vessel of war, if the United States shall then be at peace with such belligerent.)

"8. Fitting out and arming, or attempting to fit out and arm, or procuring to be fitted out and armed, or knowingly being concerned in the furnishing, fitting out or arming of any ship or vessel with intent that such ship or vessel shall be employed in the service of either of the said belligerents.

"9. Issuing or delivering a commission within the territory or jurisdiction of the United States for any ship or vessel to the intent that she may be employed as aforesaid.

"10. Increasing or augmenting, or procuring to be increased or augmented, or knowingly being concerned in increasing or augmenting the force of any ship of war, cruiser or other armed vessel, which at the time of her arrival within the United States was a ship of war, cruiser or armed vessel in the service of either of the said belligerents, or belonging to the subjects of either by adding to the number of guns of such vessels or by changing those on board of her for guns of a larger caliber, or by the addition thereto of any equipment solely applicable to war.

"11. Beginning or setting on foot or providing or preparing the means for any military expedition or enterprise to be carried on from the territory or jurisdiction of the United States against

the territories or dominions of either of the said belligerents."

And I do hereby further declare and proclaim that any frequenting and use of the waters within the territorial jurisdiction of the United States by the armed vessels of a belligerent, whether public ships or privateers, for the purpose of preparing for hostile operations, or as posts of observation upon the ships of war or privateers or merchant vessels of a belligerent lying within or being about to enter the jurisdiction of the United States, must be regarded as unfriendly and offensive and in violation of that neutrality which it is the determination of this government to observe.

And to the end that the hazard and inconvenience of such apprehended practices may be avoided, I further proclaim and declare that from and after the 5th day of August inst., and during the continuance of the present hostilities between Austria-Hungary and Servia, and Germany and Russia, and Germany and France, no ship of war or privateer of any belligerent shall be permitted to make use of any port, harbor, roadstead or waters subject to the jurisdiction of the United States from which a vessel of an opposing belligerent (whether the same shall be a ship of war, a privateer or a merchant ship) shall have previously departed, until after the expiration of at least twenty-four hours from the departure of such last mentioned vessel beyond the jurisdiction of the United States.

If any ship of war or privateer of a belligerent shall, after the time this notification takes effect, enter any port, harbor, roadstead or waters of the United States, such vessel shall be required to depart and to put to sea within twenty-four hours after her entrance into such port, harbor, roadstead, or waters, except in case of stress of weather or of her requiring provisions, or things necessary for the subsistence of her crew, or for repairs; in any of which cases the authorities of the port or of the nearest port (as the case may be) shall require her to put to sea as soon as possible after the expiration of such period of twenty-four hours, without permitting her to take in supplies beyond what may be necessary for her immediate use, and no such vessel which may have been permitted to remain within the waters of the United States for the purpose of repair shall continue within such port, harbor, roadstead, or waters for a longer period than twenty-four hours after her necessary repairs shall have been completed, unless within such twenty-four hours a vessel, whether ship of war, privateer, or merchant ship of an opposing belligerent, shall have departed therefrom, in which case the time limit for the departure of such ship of war or privateer shall be extended so far as may be necessary to secure an interval of not less than twenty-four hours between such departures and that of any ship of war, privateer, or merchant ship of an opposing belligerent which may have previously quit the same port, harbor, roadstead or waters.

No ship of war or privateer of a belligerent shall be detained in any port, harbor, roadstead or waters of the United States more than twenty-four hours, by reason of the successive departures from such port, harbor, roadstead or waters of more than one vessel of an opposing belligerent. But if there be several vessels of opposing belligerents in the same port, harbor, roadstead or waters, the order of their departure therefrom shall be so arranged as to afford the opportunity of leaving alternately to the vessels of the opposing belligerents and to cause the least detention consistent with the objects of this proclamation.

No ship of war or privateer of a belligerent shall be permitted, while in any port, harbor, roadstead or waters within the jurisdiction of the United States, to take in any supplies except provisions and such other things as may be requisite for the subsistence of her crew and except so much coal only as may be sufficient to carry such vessel, if without any sail power, to the nearest port of her own country, or, in case the vessel is rigged to go under sail, and may also be propelled by steam power, then with half the quantity of coal which she would be entitled to receive, if dependent upon steam alone, and no coal shall be again supplied to any such ship of war or privateer in the same or any other port, harbor, roadstead, or waters of the United States, without special permission, until after the expiration of three months from the time when such coal may have been last supplied to her within the waters of the United States, unless such ship of war or privateer shall, since last thus supplied, have entered a port of the government to which she belongs.

And I do further declare and proclaim that the statutes and the treaties of the United States and the law of nations alike require that no person, within the territory and jurisdiction of the United States, shall take part, directly or indirectly, in the said wars, but shall remain at peace with all of the said belligerents, and shall maintain a strict and impartial neutrality.

And I do hereby enjoin all citizens of the United States, and all persons residing or being within the territory or the jurisdiction of the United States, to observe the laws thereof, and to commit no act contrary to the provisions of the said statutes or treaties or in violation of the law of nations in that behalf.

And I do hereby warn all citizens of the United States and all persons residing or being within its territory or jurisdiction that, while the free and full expression of sympathies in public and private is not restricted by the laws of the United States, military forces in aid of a belligerent cannot lawfully be originated or organized within its jurisdiction, and that, while all persons may lawfully and without restriction, by reason of the aforesaid state of war, manufacture and sell within the United States arms and munitions of war and other articles ordinarily known as contraband of war, yet they cannot carry such articles on the high seas for the use or services of a belligerent, nor can they transport soldiers and officers of a belligerent or attempt to break any blockade which may be lawfully established and maintained during the said wars without incurring the risk of hostile capture and the penalties denounced by the law of the nations in that behalf.

And I do hereby give notice that all citizens of the United States and others who may claim the protection of this government who may misconduct themselves in the premises will do so at their peril, and that they can in nowise obtain any protection from the government of the United States against the consequences of their misconduct.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this 4th day of August, in the year of our Lord one thousand nine hundred and fourteen and of the independence of the United States of America the one hundred and thirty-eighth.

The proclamation was subsequently extended so as to apply to Great Britain and the other belligerent nations.

COMMENT BY OFFICERS FORBIDDEN.

Aug. 6 President Wilson addressed the following letter to the secretaries of war and of the navy:

"I write to suggest that you request and advise all officers of the service, whether active or retired, to refrain from public comment of any kind upon the military or political situation on the other side of the water. I would be obliged if you would let them know that the request and advice comes from me. It seems to me highly unwise and improper that officers of the navy and army of the United States should make any public utterances to which any color of political or military criticism can be given where other nations are involved."

APPEAL TO AMERICANS.

Aug. 18 President Wilson addressed the following appeal to the people of the United States:

My Fellow Countrymen: I suppose that every thoughtful man in America has asked himself

during the last troubled weeks what influence the European war may exert upon the United States, and I take the liberty of addressing a few words to you in order to point out that it is entirely within our own choice what its effects upon us will be and to urge very earnestly upon you the sort of speech and conduct which will best safeguard the nation against distress and disaster.

The effect of the war upon the United States will depend upon what American citizens say or do. Every man who really loves America will act and speak in the true spirit of neutrality, which is the spirit of impartiality and fairness and friendliness to all concerned. The spirit of the nation in this critical matter will be determined largely by what individuals and society and those gathered in public meetings do and say, upon what newspapers and magazines contain, upon what our ministers utter in their pulpits and men proclaim as their opinions on the streets.

The people of the United States are drawn from many nations, and chiefly from the nations now at war. It is natural and inevitable that there should be the utmost variety of sympathy and desire among them with regard to the issues and circumstances of the conflict. Some will wish one nation, others another, to succeed in the momentous struggle. It will be easy to excite passion and difficult to allay it. Those responsible for exciting it will assume a heavy responsibility; responsibility for no less a thing than that the people of the United States, whose love of their country and whose loyalty to its government should unite them as Americans all, bound in honor and affection to think first of her and her interests, may be divided in camps of hostile opinions, hot against each other, involved in the war itself in impulse and opinion, if not in action. Such divisions among us would be fatal to our peace of mind and might seriously stand in the way of the proper performance of our duty as the one great nation at peace, the one people holding itself ready to play a part of impartial mediation and speak the counsels of peace and accommodation, not as a partisan, but as a friend.

I venture, therefore, my fellow countrymen, to speak a solemn word of warning to you against that deepest, most subtle, most essential breach of neutrality which may spring out of partisanship, out of passionately taking sides. The United States must be neutral in fact as well as in name during these days that are to try men's souls. We must be impartial in thought as well as in action, must put a curb upon our sentiments as well as upon every transaction that might be construed as a preference of one party to the struggle before another.

My thought is of America. I am speaking, I feel sure, the earnest wish and purpose of every thoughtful American that this great country of ours, which is, of course, the first in our thoughts and in our hearts, should show herself in this time of peculiar trial a nation fit beyond others to exhibit the fine poise of undisturbed judgment, the dignity of self-control, the efficiency of dispassionate action, a nation that neither sits in judgment upon others nor is disturbed in her own counsels and which keeps herself fit and free to do what is honest and disinterested and truly serviceable for the peace of the world.

Shall we not resolve to put upon ourselves the restraint which will bring to our people the happiness and the great and lasting influence for peace we covet for them?

ACTION BY CONGRESS.

To meet exigencies growing out of the war in Europe congress passed several joint resolutions and bills as follows:

RELIEF OF AMERICANS IN EUROPE.

Resolved, That for the relief, protection and transportation of American citizens, for personal services and for other expenses which may be incurred in connection with or growing out of the existing political disturbances in Europe, there is appropriated, out of any money in the treasury not otherwise appropriated, the sum of $250,000, to be expended at the discretion of the president: Provided, That American citizens to whom relief is extended or transportation is furnished hereunder shall pay to or reimburse the United States all reasonable expenses so incurred, respectively, on their account, if financially able to do so. (Approved Aug. 3, 1914.)

Resolved, That for the relief, protection and transportation of American citizens, and for personal services, rent and other expenses which may be incurred in the District of Columbia or elsewhere in connection with or growing out of the existing political disturbance in Europe, there is appropriated, out of any money in the treasury not otherwise appropriated, the sum of $2,500,000, to be expended at the discretion of the president: Provided, That American citizens to whom relief is extended or transportation is furnished hereunder shall pay to or reimburse the United States all reasonable expenses so incurred, respectively, on their account, if financially able to do so. In the execution of the provisions hereof the president is authorized to employ any officers, employes and vessels of the United States and use any supplies of the naval or military establishments and to charter and employ any vessels that may be required. A detailed statement of all expenditures hereunder and under the appropriation of $250,000 made in the joint resolution approved Aug. 3, 1914, and of all amounts reimbursed to the United States of such expenditures shall be made to congress on or before the beginning of its next regular session. (Approved Aug. 5, 1914.)

ADMISSION OF FOREIGN BUILT SHIPS TO AMERICAN REGISTRY.

The words "not more than five years old at the time they apply for registry" in section 5 of the Panama canal act are repealed. The president of the United States is authorized, whenever in his discretion the needs of foreign commerce may require, to suspend by order, for such a length of time as he may deem desirable, the provisions of law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United States. Under like conditions, in like manner and to like extent the president is also authorized to suspend the provisions of the law requiring survey, inspection and measurement by officers of the United States of foreign built vessels admited to American registry under this act. (Approved Aug. 18, 1914.)

WAR RISK INSURANCE.

There is established in the treasury department a bureau of war risk insurance, the director of which is to have an annual salary of $5,000. The bureau, subject to the general direction of the secretary of the treasury, shall make provision for the insurance by the United States of American vessels, their freight and passage moneys and cargoes shipped or to be shipped therein, against loss and damage by the risks of war, whenever it shall appear to the secretary of the treasury that American vessels, shippers and importers in American vessels are unable in any trade to secure adequate war risk insurance on reasonable terms. The bureau is authorized to adopt a form of war risk policy and fix reasonable rates of premium for the insurance of American vessels, their freight and passage moneys and cargoes against war risks, which rates are subject to change, to each port and for each class, as may be required by circumstances. The proceeds of the premiums are to go to the treasury of the United States.

The secretary of the treasury is authorized to establish an advisory board of three members, skilled in the practices of war risk insurance, to assist the bureau in fixing rates of premium, in the adjustment of losses and in other matters. Provision is made for the prompt adjustment and payment of claims for losses. For the purpose of paying losses accruing under the act the sum of $5,000,000 is appropriated. For the purpose of defraying the expenses of the establishment and maintenance of the bureau the sum of $100,000 is appropriated. The president is authorized to suspend the operations of the act

whenever in his judgment the necessity for war risk insurance has ceased. This suspension, in any event, is to be made within two years after the passage of the act. (Approved Sept. 2, 1914.)

REPRESENTATION OF FOREIGN COUNTRIES.

To enable the United States to fulfill the obligations devolving upon it in connection with its representation of the interests of foreign governments and their nationals, and to extend temporary assistance to other governments and their nationals, made necessary by the hostilities in Europe and elsewhere, by transferring or advancing funds for diplomatic and consular expenses and for the care and benefit of citizens or subjects of foreign nations, there is appropriated the sum of $1,000,000, to be available in the fiscal year 1915, and to be disbursed under the direction of the secretary of state. (Approved Sept. 11, 1914.)

RED CROSS SHIP.

Authority is granted the American Red Cross, during the continuance of the present war [European], to charter a ship or ships of foreign register, to carry the American flag, for the transportation of nurses and supplies and for all uses in connection with the work of the society. (Approved Aug. 20, 1914.)

AMERICAN OFFER OF MEDIATION.

Aug. 5 President Wilson sent the following message to King George, Emperor William, Emperor Francis Joseph, President Poincare and King Albert:

"As official head of one of the powers signatory to The Hague convention, I feel it to be my privilege and my duty under article 3 of that convention to say to you in a spirit of most earnest friendship that I should welcome an opportunity to act in the interest of European peace, either now or any other time that might be thought more suitable, as an occasion to serve you and all concerned in a way that would afford me lasting cause for gratitude and happiness. WOODROW WILSON."

Courteous replies were received from the rulers addressed, but the offer was declined.

HOME RULE PROMISED POLAND.

Grand Duke Nicholas, commander in chief of the Russian armies, addressed the following manifesto to Poland Aug. 15, 1914:

"The hour has sounded when the sacred dream of your fathers may be realized. A hundred and fifty years ago the living body of Poland was torn to pieces, but her soul survived and she lived in hope that for the Polish people would come an hour of regeneration and reconciliation with Russia.

"The Russian army brings you the solemn news of this reconciliation which effaces the frontiers severing the Polish people, whom it unites conjointly under the scepter of the czar of Russia. Under this scepter Poland will be born again, free in her religion, her language and autonomous.

"Russia expects from you only the loyalty to which history has bound you. With open heart and a brotherly hand extended, great Russia comes to meet you. She believes that the sword which struck her enemies at Greunewald is not yet rusted.

"Russia from the shores of the Pacific ocean to the North sea marches in arms. The dawn of a new life commences for you. In this glorious dawn is seen the sign of the cross—the symbol of suffering and the resurrection of a people."

ATROCITIES IN THE WAR.

APPEALS TO AMERICA.

Many charges of cruel and inhuman acts were made against the armies of all the belligerents. The Germans were accused of wantonly destroying homes and other property, burning cities and villages, attacking women and killing noncombatants. The Belgians were accused of torturing German wounded, the French of using dumdum bullets, the English of mistreating prisoners in England, and the Cossacks of pillaging and murder in East Prussia. Henry Carton de Wiart, minister of justice, headed a special mission sent by King Albert to lay before President Wilson in Washington a report on the outrages alleged to have been committed by the Germans in Belgium and to appeal for the influence of the United States in securing justice. The members of the mission were received by the president in the white house Sept. 16 and their report accepted.

In presenting it M. de Wiart spoke of the consequences suffered by Belgium because it declined to permit its neutrality to be violated by the German army. "This army," he said, "not only seized a great portion of our territory, but it committed incredible acts of violence, the nature of which is contrary to the rights of mankind.

"Peaceful inhabitants were massacred, defenseless women and children were outraged, open and undefended towns were destroyed, historic and religious monuments were reduced to dust, and the famous library of the University of Louvain was given to the flames."

Replying, Mr. Wilson spoke of the strong friendship existing between the United States and Belgium, promised to give the report his most thoughtful consideration and continued:

"I am honored that you should have turned to me for an impartial judgment as the representative of a people truly disinterested as respects the present war and truly desirous of knowing and accepting the truth.

"You will, I am sure, not expect me to say more.

"Presently, I pray God very soon, this war will be over. The day of accounting will then come, when, I take it for granted, the nations of Europe will assemble to determine a settlement. Where wrongs have been committed their consequences and the relative responsibility involved will be assessed.

"The nations of the world have fortunately, by agreement, made a plan for such a reckoning and settlement. What such a plan cannot compass the opinion of mankind, the final arbiter of all such matters, will supply.

"It would be unwise, it would be premature, for a single government, however fortunately separated from the present struggle, it would even be inconsistent with the neutral position of any nation, which like this has no part in the contest, to form or express a final judgment.

"I speak thus frankly, because I know that you will expect and wish me to do so as one friend should to another, and because I feel sure that such a reservation of judgment until the end of the war, when all its events and circumstances can be seen in their entirety and in their true relation, will commend itself to you as a true expression of sincere neutrality."

REPLY TO EMPEROR WILLIAM.

Under date Sept. 4 Emperor William sent a cablegram to President Wilson as the "most notable representative of the principles of humanity," informing him that after the capture of the French fort of Longwy his troops found thousands of dumdum bullets made by the French government. The cablegram continued:

"I solemnly protest to you against the way in which this war is being waged by our opponents, whose methods are making it one of the most barbarous in history. Besides the use of these awful weapons, the Belgian government has openly incited the civil population to participate in the fighting and has for a long time carefully organized their resistance. The cruelties practiced in this guerrilla warfare, even by women and priests, toward wounded soldiers and doctors and hospital nurses—physicians were killed and

lazarettos fired on—were such that eventually my generals were compelled to adopt the strongest measures to punish the guilty and frighten the bloodthirsty population from continuing their shameful deeds.

"Some villages and even the old town of Louvain, with the exception of its beautiful town hall, had to be destroyed for the protection of my troops.

"My heart bleeds when I see such measures inevitable and when I think of the many innocent people who have lost their houses and property as a result of the misdeeds of the guilty."

President Wilson's reply was sent on the same day that he received the Belgian mission and was identical in language with that part of his reply to the Belgians, as quoted as above.

EFFECT OF WAR ON MARKETS OF THE WORLD.

STOCK MARKETS.

The effect of the European war crisis during the last week of July, 1914, on the stock and other markets of the world was naturally very great. On the stock market it would have been disastrous but for the prompt closing of the exchanges, the declaration of moratoriums and other measures on the part of bankers and governments. According to the London Bankers' Magazine the depreciation from July 20 to July 30 in 387 representative securities dealt in on the London stock exchange amounted to $940,000,000, the fall being greatest in British and foreign funds. From July 23 to July 30 the shrinkage in the capital value of 135 American stocks, due chiefly to selling by foreign holders, amounted to more than $686,900,000. Some of the heaviest shrinkages were as follows:

Stocks.	Shrinkage.
Amalgamated Copper	$31,162,110
American Telephone and Telegraph	29,962,859
Atchison	16,422,605
Baltimore & Ohio	13,518,134
Canadian Pacific	70,200,000
Chicago, Milwaukee & St. Paul	14,214,737
Great Northern preferred	25,394,490
New York Central	11,561,026
Pennsylvania railroad	26,207,790
Reading	15,750,000
Union Pacific	29,454,618
United States Steel	48,288,690

The crisis on the stock exchanges and bourses became acute July 28 when the Brussels, Montreal and Toronto exchanges closed. On the 29th the St. Petersburg exchange closed and dealings on the Berlin exchange were only on a cash basis. Continental banks were withdrawing foreign balances in London and there were heavy shipments of gold from New York to Europe. July 30 the Bank of England rate increased from 3 to 4 per cent, the Bank of France rate from 3½ to 4½ per cent, and the Bank of Belgium rate from 4 to 5 per cent. The Vienna stock exchange closed and all the machinery for transmitting money from one country to another stopped. July 31 the London stock exchange closed and practically all of the continental bourses ceased doing business. In the United States the New York, Boston, Chicago, Baltimore, Pittsburgh, St. Louis, Indianapolis and Detroit exchanges closed. The bank rates were again raised, that of the Bank of England going from 4 to 8 per cent. The German Reichsbank rate rose from 4 to 5 per cent and the Austro-Hungarian bank rate from 5 to 6 per cent. Aug. 1 the Bank of England rate was raised to 10 per cent and bank rate increases were reported from Germany, Holland, Denmark and France. By this time the whole system of credit was demoralized and most of the stock exchanges throughout the world were closed. The New York and Chicago exchanges were reopened under restrictions near the close of November.

MORATORIUMS DECLARED.

Moratoriums, by which financial settlements were postponed for periods of from one to six months, with provisions for further extensions, were declared by many countries. France led off on Aug. 1, and Aug. 3 the British parliament passed a "postponement of payments" act, the moratorium to remain in force six months. Within ten days moratoriums had been declared in Denmark, Norway, Bulgaria, Argentine Republic, Russia, Brazil, Italy, Egypt, Cyprus and Turkey. No moratorium was declared in Germany, though it was claimed that other measures led to the same end and that settlements were virtually suspended. Specie payments were suspended in all the continental countries of Europe.

[Moratorium—An emergency act of legislation authorizing a debtor or bank to suspend payments for a given period.—Webster.]

Some bank failures occurred in New York and elsewhere through the demoralization of the stock market, but the closing of the exchanges, the adoption of emergency rules as to withdrawals of deposits and the application of currency laws prevented anything like a serious panic.

COTTON MARKETS.

The war in Europe completely demoralized the American cotton market. July 30 on the New Orleans market there was a drop of 76 points, or about $4 a bale. The next day the New Orleans and New York cotton exchanges closed after short periods of trading during which prices dropped 120 to 134 points. The cotton growers in the south were threatened with ruin and to help them the so-called "buy a bale of cotton" movement was started in the north. Congress was appealed to for relief, but nothing was done by that body. The banks of the country, however, subscribed to a cotton loan of $150,000,000 and the crisis was tided over.

PRODUCE MARKETS.

The produce markets of the world were demoralized in sympathy with the stock markets. Wheat advanced sharply and other grains followed. Wheat in the twin cities, Chicago, Duluth, Winnipeg, St. Louis, Kansas City and Milwaukee, July 30, advanced 3 to 6½ cents, while corn advanced 1¾ to 4¼ cents. The price of rye also rose and remained high.

RELIEF OF STRANDED AMERICANS.

The sudden outbreak of the war in Europe caused an immense amount of inconvenience, loss and even suffering to Americans traveling abroad on business or for pleasure. The stoppage of trains for ordinary traffic on account of mobilization, the complete breakdown of the international credit system, the suspension of specie payments, the disappearance of gold and other currency, the closing of many hotels and the cancellation of steamship sailings left the tourists in a helpless condition. Those traveling on the continent in automobiles had their machines seized without ceremony and moving from one country to another was attended with the greatest difficulty. Those without passports had to obtain other identification papers. There was an endless amount of trouble, of annoyance and of privation.

There was a mania for looking upon all strangers as spies. In the first days of the crisis American tourists, with or without money, were in many instances subjected to indignities and uncivil treatment. Later on they fared better, especially in Germany, where, after the rush of mobilization was ended, they were treated with kindness and consideration. One of the worst features of the situation was that all means of communication by telegraph, cable and even by mail were stopped for a considerable period and the relatives and friends of travelers in Europe had to spend many days of anxiety and distress before they could get any trace of them. The state department through its consular and other representatives abroad gave a great amount of assistance in locating tourists and placing them in communication with their home people. Ameri-

can newspapers with offices in the European capitals where Americans registered did much work along the same line.

Committees of American residents in London, Paris, Berlin and other European capitals were formed and these, working in conjunction with ambassadors, ministers and consuls, helped to relieve the distress among the travelers and to help them to find accommodations on the comparatively few steamers sailing for the United States and Canada.

Congress also, as shown elsewhere, appropriated $2,750,000 for the relief, protection and transportation of Americans stranded in Europe. The state, war, navy and treasury departments co-operated in finding the travelers, supplying them with usable funds and securing transportation for them. It was a task of magnitude, as the tourists caught in the war crisis numbered from 100,000 to 150,000. Many of these managed in one way or another to get home without help, but thousands would have been absolutely helpless without assistance from the government. Two ships of the navy, the cruisers Tennessee and North Carolina, were made ready, a number of army officers, headed by Henry S. Breckinridge, assistant secretary of war, were placed in charge, and with $1,500,000 in gold on board sailed for Europe. They arrived at Falmouth, England, Aug. 17, and the distribution of the gold in England, France and other countries where there were tourists in trouble was begun. The work was done systematically and carefully and probably a majority of those deserving help were given all the necessary assistance.

United States consuls were authorized to secure ships at places where the transportation facilities were inadequate and many refugee Americans were enabled in this way to get away from the continent. Later on regular services were resumed by the English, Dutch, French and Scandinavian lines in the north and the Italian lines in the south, so that all who wished to do so might return to America with speed and comfort.

COST OF THE WAR IN MEN.

IN LAND WARFARE.

The number of men killed, wounded, missing or incapacitated by illness during the first four months of the European war cannot yet be given with any degree of accuracy. Such official reports as had been made up to Dec. 7 proved, however, that for the time it had been waged the conflict was the bloodiest on record. The heaviest losers were undoubtedly the Germans and Austrians, as their armies did most of the attacking, but all the belligerents suffered severely.

The official casualty list issued by Germany Dec. 5 showed a total loss of 658,483 officers and men killed, wounded or missing. This did not include the losses of the Saxon, Bavarian and Wuerttemberg armies. Adding these, the total would undoubtedly exceed 1,000,000. A correspondent in Copenhagen, Denmark, reported that an examination of official reports showed that the average Austrian and German loss per day for four months had been 20,000, making the aggregate for that period 2,440,000.

No official reports of the losses sustained by Russia were made public. The Vienna Rundschau estimated that up to Nov. 4 they amounted to 1,150,000 in dead, wounded, victims of disease, deserters and prisoners. By Dec. 1 the number probably did not fall below 1,500,000.

Reports originating in Bern, Switzerland, placed the French losses up to Nov. 1 at 667,000 in killed, wounded and missing. By Dec. 1 they were perhaps in the vicinity of 1,000,000.

Premier Asquith in the British house of commons Nov. 13 said that the casualties in the forces of the empire up to Oct. 31 were approximately 57,000 men of all ranks. By Dec. 1 they probably aggregated 75,000 men.

Servia and Montenegro had each lost about one-third of their forces at the end of November. This would be about 100,000 for Servia and 17,000 for Montenegro.

Belgium in the first four months of the war lost approximately 100,000 men.

Summarized in tabular form, these estimates give the following result:

Germany and Austria	2,440,000
Russia	1,500,000
France	1,000,000
Great Britain	75,000
Belgium	100,000
Servia	100,000
Montenegro	17,000
Total	5,232.000

The losses of the Japanese at Tsingtao were probably under 2,000. The Turkish losses had not been reported up to Dec. 7.

It should be kept in mind that the figures here given do not mean that more than 5,000,000 men were actually incapacitated for service. A considerable proportion of the slightly wounded returned to the front after a short stay in hospital.

Losses in separate battles were not made public by any of the belligerents.

LOSSES IN NAVAL BATTLES.

Winston Spencer Churchill, first lord of the admiralty, said in the house of commons Nov. 18 that the total British naval casualties to that date were: Officers killed, 222; wounded, 37; missing, 5. Men killed, 3,455; wounded, 423; missing, 1. To this list he said should be added 875 men lost on the cruiser Good Hope, making the grand total 3,924. The German loss was not reported, but it was considerably smaller. Probably it was in the neighborhood of 1,500. In the encounter off Helgoland bight Aug. 28 in which the Mainz, Koeln and Ariadne were sunk, the German loss was placed at about 900 without counting those lost on the destroyers that were sent to the bottom. Three hundred were captured. The British loss was sixty-nine killed and wounded.

The British lost 1,400 men when the cruisers Aboukir, Hogue and Cressy were torpedoed in the North sea Sept. 22.

Through the sinking of the Monmouth and Good Hope in a battle off the coast of Chile Nov. 1 the British lost 1,450 men.

Through the sinking of the Scharnhorst, Gneisenau, Leipzig and Nurnberg Dec. 8 the Germans lost, so far as known, about 2,500 men.

Casualties through the damaging or sinking of individual warships by gunfire, mines or submarines included the following: Takachiho, Japanese, 281; Jemtchug, Russian, 86; Pegasus, British, 26; Pallada, Russian, 568; Emden, German, 250; Hawke, British, 350; Bulwark, British, 700. No figures as to the loss of life on torpedo boats, destroyers or submarines were made public.

COST OF WAR IN MONEY.

Estimates of the daily cost of the European war to the countries directly involved vary from $30,000,000 to $50,000,000. This includes only actual expenses and not losses through destruction of property, depreciation in values, stagnation or cessation of trade and industry and nonproduction generally. According to an Associated Press report, the daily war bill of Europe Oct. 19 was figured at $40,225,000, divided as follows:

Russia	$14,000,000
Germany	7,225,000
France	7,000,000
England	5,000,000
Austria-Hungary	4,000,000
Other countries	3,000,000

The estimates in the case of the individual countries also vary widely. Those of Germany, for example, have at different times been placed as low as $4,500,000 and as high as $15,000,000 a day. In the British house of commons Nov. 16 Premier Asquith said that the war was costing the empire $5,000,000 a day. Some idea of the cost of the conflict may be gained from the war credits voted by three or four of the powers. These credits are in addition to the regular army and navy budgets.

Aug. 5 Germany voted a credit of $1,250,000,000 and Dec. 2 it voted an additional credit of the same amount, or $2,500,000,000 in all.

Aug. 6 Great Britain voted a credit of $500,000,000 and Nov. 16 it voted for $1,125,000,000 more, or $1,625,000,000 in all. Of the new credit $50,000,000 was to be loaned to Belgium and $4,000,000 to Servia.

Aug. 5 France voted a credit of $600,000,000.

Nov. 29 it was announced that the people of Austria-Hungary had subscribed for more than $600,000,000 of war bonds.

According to the Wall Street Journal, the total of the war loans issued by the countries involved directly or indirectly up to the middle of October was $1,696,250,000, divided as follows:

German war loan 5s, at 97½	$780,250,000
German treasury bills, about 5% basis	335,000,000
Russian treasury bonds	150,000,000
British treasury bills, about 3¾% basis	300,000,000
Belgium (from British and French governments)	100,000,000
French treasury bills, 5% basis, in London	10,000,000
Danish domestic loan	15,000,000
Switzerland, about 5¼% basis	6,000,000
Total	$1,696,250,000

In a speech in the house of commons Nov. 17 David Lloyd-George, chancellor of the exchequer, estimated that the cost of one year of the war to Great Britain would be $2,250,000,000.

All the countries in Europe that were compelled to mobilize their troops had to bear a share of the direct as well as of the indirect expenses of the war. Thus in Italy up to Dec. 1 more than $200,000,000 had been appropriated for war preparations. Holland by April 1, 1915, will have been put to an expense of $80,000,000 on account of mobilization, caring for Belgian refugees and war measures generally. The Scandinavian countries, Switzerland, Portugal, Spain and the Balkan states were also compelled to meet extraordinary expenses on account of the war.

Oct. 17 Paul Leroy-Beaulieu, the French economist, estimated that each of the greater belligerents was spending on an average $200,000,000 a month and that each of the smaller states, including Japan, would have expenses of from $600,000,000 to $800,000,000 to meet. Assuming that the war would last seven months, he concluded that it would cost the fighting powers alone from $9,000,000,000 to $10,000,000,000.

NEW DEVICES USED IN THE WAR.

The war in Europe was not many days old before it became apparent that it would be fought under conditions quite different from those of previous great struggles. The conflict was carried on, not only on the surface of land and sea, but in the air and beneath the waters. Men and guns, food and ammunition were carried at great speed for long distances, not only on railroad trains but on automobile trucks, and communication between different points of the long extended lines was by wireless messages as well as by telephone and telegraph.

AEROPLANES AND DIRIGIBLES.

In the fighting on land the most important innovation was the extensive use made of aeroplanes. All the main divisions of the troops were accompanied by military aviators whose services were of the utmost value to the commanders. It was estimated that in the early months of the war there were 5,000 aeroplanes and more than 100 dirigibles distributed among the belligerents. They were used chiefly for scouting purposes and in this line of work they proved vastly more effective than cavalry. No

movements of large bodies of troops could be made without being seen and hence surprise attacks were made practically impossible. They were also used in range finding for artillery and in dropping bombs and steel arrows on the enemy. Long and daring flights were made by British, German and other aviators and some damage was done by them at points remote from their starting points. Field Marshal Sir John French, commanding the British army operating in France, said in a report to Lord Kitchener, secretary of war:

"I wish particularly to bring to your lordship's notice the admirable work done by the royal flying corps under Sir David Henderson. Their skill, energy and perseverance have been beyond all praise. They have furnished me with most complete and accurate information which has been of incalculable value in the conduct of operations."

Many aviators lost their lives, were disabled by bullets or by accident or were taken prisoners, but their places were filled by others from the training grounds, and the service was maintained with undiminished efficiency.

Germany's Zeppelins played a somewhat conspicuous part in the war, not so much because of what they actually accomplished as because of what they threatened to do. London was in constant fear of a visit from a fleet of German dirigibles and all kinds of precautions were taken against such an invasion. The fact that these ships of the air could be more easily seen and hit than aeroplanes prevented their use for scouting purposes, but that they could be dangerous under certain circumstances was shown by their bomb dropping exploits at Antwerp and elsewhere. The French and English dirigibles had not accomplished anything of note up to the end of the fourth month of the war.

MOTOR CARS.

Motor cars were used extensively by all the armies where the roads were practicable for vehicles of this kind. They carried food, ammunition, supplies, camp equipage, detachments of troops, artillery and all sorts of things needed on a military campaign. Officers used them for hurried trips and the soldiers for patrol duty. They carried wounded men quickly and comfortably from near the front to the field or fixed hospitals in the rear. They were invaluable in Red Cross work for transporting not only the wounded but physicians, nurses and medical supplies. Motor ambulances were used in the vicinity of all the big battle fields in Belgium and France. There were armored automobiles used for attacking small forces of the enemy and there were motor cars having mounted on them guns made especially for firing at airships. In fact, they were used for all things that a horse drawn vehicle could be used for and for many things besides, where the circumstances were at all favorable. Motorcycles were, of course, used by many soldiers where fast work was required.

WIRELESS APPARATUS.

Portable wireless outfits were extensively used, especially by the German armies. They were carried on motorcycles and automobiles and were used for sending messages over distances averaging thirty-five miles. Heavier outfits were supplied for longer distances. Along well established lines of communication telephone and telegraph lines were used.

SUBMARINES.

The part played by the submarines in the war up to the time this record closed was remarkable. They proved their effectiveness by sending to the bottom many big cruisers and several battle ships at points near and far from the home base. The British naval vessels, as will be seen from the list of ships lost given in another place, were the chief sufferers because they were the most numerous and most easily accessible. In one day England lost three cruisers costing $12,000,000, all sunk by one German submarine. The Germans themselves, the Russians and Japanese were also sufferers from the operations of these unseen and deadly foes.

SIEGE GUNS.

The invention by the Krupps of siege guns of great range and using shells of tremendous destructive power was also one of the surprises of the early days of the war. This was especially true of the 42 centimeter (16.5 inch) mortar, which played such havoc with the forts at Liege and Antwerp. Its work probably put an end forever to the building of forts of the old model, for it proved that they were easily destroyed and not worth the money spent upon them. The trenches dug by the armies after the first weeks of the war proved far more effective against the big, long range guns than the immense forts that were supposed to be impregnable to any kind of attack.

STEEL DARTS.

Steel arrows or darts, as well as bombs, are now dropped from aeroplanes. They are about five inches long and a little thicker than a lead pencil. They are dropped in batches of 500, a mechanical device spreading them over an area of 200 yards. Falling from a height of 1,500 feet or more, they acquire a terrific velocity and will penetrate a man's body from head to foot. Maj.-Gen. von Meyer of the German army was reported Dec. 7 as having been killed by one of these steel arrows as he was entering a motor car. They were first used by the French aviators.

OUTLINE NARRATIVE OF THE WAR.

Up to the time this edition of The Almanac and Year-Book went to press no decision in the European war had been arrived at and the belligerent nations were still carrying on military operations as vigorously as at the beginning of hostilities in midsummer, each claiming to see indications of eventual victory for itself and defeat for its foes. Such indications to impartial observers were not conclusive and the end of the great conflict was not in sight. The complete history of the war remains to be written, but enough history was made in the first four months of the struggle to fill many volumes. For the present a mere outline of what happened in those four months will have to suffice.

From the official documents printed on the preceding pages it will have been seen that the immediate or precipitating cause of the war was the assassination in Sarajevo, Bosnia, June 28, 1914, of Archduke Francis Ferdinand, nephew of the emperor of Austria, heir to the throne and commander in chief of the dual monarchy's armed forces. With him at the time was his wife, the duchess of Hohenberg, who shared his fate. Both were killed by a Servian student, one of a band of conspirators of the same race, who were filled with hatred of the country which, according to their ideas, had repressed the growth and trampled upon the national aspirations of their fatherland. The deed was the culmination of a long series of disputes between Austria-Hungary and Servia, which on more than one occasion had brought them to the brink of war.

Naturally the anger of the Austrians and Hungarians was aroused to a high pitch by the assassination of the heir to the throne and his wife. Anti-Serb demonstrations took place in various towns and cities and the newspapers used bitter language in calling for vengeance on the Servians. The Austro-Hungarian government itself was ominously quiet until July 23, almost a month after the murders. Then it delivered an ultimatum to Servia and demanded a reply within forty-eight hours. Among the ten demands in that ultimatum were some with which the Servian government felt it could not possibly as a sovereign nation comply. The reply made was conciliatory in tone, but it was pronounced unsatisfactory by the Austro-Hungarian minister at Belgrade, who withdrew at the expiration of the time limit on July 25. Three days later Austria-Hungary formally declared war on Servia and within a few hours hostilities had begun and the first shots in the world's greatest war were fired.

MARCH OF EVENTS.

Events from that time on moved with great rapidity. Russia had made it plain that an attack upon its protege, Servia, would be considered an attack upon itself. It proceeded at once, according to reports made to the German and Austrian authorities, partially to mobilize its forces on the western frontiers. Russia denied that this concentration of troops was with hostile intent against Germany, claiming that it was merely a precautionary measure for self-protection. Whatever actually was the case, Germany proceeded on the assumption that the mobilization was directed either against its ally, Austria-Hungary, or against itself. July 30 the Berlin government sent an ultimatum to St. Petersburg demanding that Russian mobilization cease within twelve hours or Germany would mobilize. Russia did not cease mobilizing and Aug. 1 Germany declared war. In doing so it announced that it was acting in accordance with the terms of its alliance with Austria-Hungary. This compact was known as the triple alliance because it included Italy, but the southern kingdom held aloof and refused to be drawn into an aggressive war. So the compact again became what it was at the beginning, a dual alliance.

But the war was not to be confined to Austria-Hungary and Germany on the one side and Russia and Servia on the other. There was another international combination known as the triple entente, which had to be reckoned with. This included France, Russia and Great Britain. Recognizing that France was an ally of Russia and that as such it would come to the aid of the czar, Germany, apparently in accordance with plans matured long before, resolved to strike France a tremendous blow first and then deal with Russia. The impression among the men in authority in the foreign office in Berlin seemed to be that England need not become involved in the struggle provided certain concessions were made. At any rate, the policy adopted was to make war on France without regard to what attitude Britain might assume. It was claimed that French troops were mobilizing and that some of them had already crossed the border and attacked the Germans. This was denied by the French, who, nevertheless, expected war and were not surprised when it came.

NEUTRAL NATIONS INVADED.

To reach France quickly and with the minimum of opposition it was necessary to cross Belgium and the grand duchy of Luxemburg. The neutrality of both these states had been guaranteed by the powers, including Germany itself, for many years, but on the plea that it was a case of bitter necessity Germany disregarded its treaty obligations and prepared to send its armies across the smaller states to the northern French frontier and thence to the great objective —Paris. With Luxemburg it had no trouble. That state was much too weak to offer any sort of resistance and it could only protest when the soldiers of the fatherland entered its territory.

With Belgium it was different. King Albert was determined to protect the neutrality and integrity of his country by force of arms if necessary, and he notified Germany to that effect. At the same time he appealed to Great Britain and France to assist him diplomatically. The documents in the Belgian "Gray Book," printed in full in this volume (see page 417), tell the whole story of the negotiations between Belgium and Germany and need not be repeated. It is sufficient to say that King Albert and his advisers refused to grant the kaiser permission to send his armies through the country and demanded that the powers guaranteeing Belgian neutrality should observe their treaty obligations.

Britain's efforts up to this time had been directed mainly to the preservation of the peace of Europe, or at least to localize the war between Austria-Hungary and Servia, but when Germany proposed to violate the neutrality of Belgium the situation changed quickly and radically. Aug. 4, when there could no longer be any doubt as to Germany's intentions, England sent an ultimatum to Berlin demanding the unqualified observance of Belgian neutrality and to return an answer within twelve hours. No reply was received and Aug. 5 a state of war existed between Great Britain and the German empire. France was already involved, Belgium was invaded and the stage was set for the great tragedy of the nations.

From the beginning of active military operations the movements of armies, of commanders and of fleets were shrouded in mystery so far as possible. Strict censorships were established and newspapers in the countries at war were forbidden to publish anything regarding the location of troops, their number or their encounters with the enemy. Correspondents were not allowed at the front and if they succeeded in getting news of victories or defeats or of anything else which might be of the least value to the enemy, it could not be transmitted by telegraph, telephone, wireless or by mail. The fear of spies amounted to a mania and such newspaper writers as succeeded in getting near the firing line incurred serious danger of meeting with a sudden and ignominious death. Many of them were arrested and only pressure from influential sources secured their release. Some were not released, but were kept in confinement for the term of the war.

Yet while so much trouble was taken to keep the public in the dark it was not difficult to follow the greater movements and to learn the more important results flowing from them. The governments themselves gave out brief official reports, which, while not saying much, indicated a great deal. Comparing them from day to day, discriminating readers learned to interpret them accurately and to get a fairly clear idea of what was going on. Thus it speedily became known that the Germans had attacked Liege and had met with a serious check; that King Albert and his little army were opposing the invasion with dogged perserverance at all points and were causing the Germans to lose much precious time as well as many valuable lives; that the Germans were pouring larger and larger bodies of troops into Belgium and in spite of reverses here and there were steadily pushing their way forward toward the French frontier and that the French and English could not be brought up in sufficient numbers to offer effective resistance at this time. So it was with the subsequent campaigns in northern France, in East Prussia, in Galicia, in Servia and in Russian Poland. The truth came out sometimes quickly and sometimes little by little, but it came out and the public had a pretty clear understanding of the general situation.

CAMPAIGN IN BELGIUM.

The progress of the war may best be followed by reading the appended chronology, but something may be said of the larger movements which took place in each of the main theaters of war. The Germans began their interrupted march through Belgium the first week in August and before the end of the month they had crossed the French frontier. They had taken and occupied Liege, Brussels, Mons, Charleroi, Louvain, Huy, Namur and most of the other cities and towns in Belgium except Ostend and Antwerp. They had driven the Belgian government from Brussels and compelled it to take refuge in Antwerp and they had established a provisional German government in the former Belgian capital, with Field Marshal von der Goltz as military governor. They did not at first appear to pay much attention to Antwerp and other places in the northern and northwestern part of Belgium. They were more concerned with sending a seemingly endless number of troops—about 900,000, it is said—toward the west. Later on Antwerp was besieged, its forts battered down by the heavy Krupp mortars and the city itself taken. This did not happen until Oct. 10, or after the rush to Paris failed and it had become necessary to protect the German lines of communication and to prevent a flanking movement by the allies. The Belgian capital had been moved to Ostend and when this once gay city was threatened the civil authorities

transferred their headquarters to Havre, France. King Albert's troops were gradually pushed westward, but they continued to put up a stubborn resistance until finally they formed the extreme of the allies' left wing, or a part of a battle line extending from the North sea through West Flanders and northern France in a southeasterly direction so far as the point where the frontiers of France, Switzerland and Germany meet. From this time on the Belgian army, or what was left of it, refused to be driven any farther. Assisted by the French and also by the English warships on the coast it held its position west of the Yser canal and contributed its share toward preventing the Germans from sweeping down the coast toward Dunkerque and Calais. King Albert himself had not up to Dec. 10 been forced out of his own country.

Much has been written of the burning of Louvain, Malines and other cities, of alleged atrocities, of the laying waste of the country through which the armies passed and of the military measures which sent 100,000 Belgians to England and thousands of others to Holland and France and which finally brought destitution and actual famine upon all who remained. It is not necessary to go into details concerning these events. They are merely mentioned as forming one of the darkest chapters in the history of war and as outstanding features of the Belgian campaign of 1914.

Not all the German troops approached France by way of Liege and Brussels. The army of the Meuse, as it was called, which took this route, was much the largest, as it was expected to do the most work and do it speedily. Another body of troops, called the army of the Moselle, marched westward from Coblenz toward Longwy. A third army, known as the army of the Rhine, starting from Mayence and Strassburg, took a more southerly route and advanced in the direction of Nancy. The main forces of the Germans were led by the following commanders: On the extreme left or southern end of the line was the crown prince of Bavaria. Then followed Crown Prince William, Duke Albrecht of Wuerttemberg, Gen. von Hausen, Gen. von Bulow, and on the extreme right Gen. von Kluck. The movements of the armies were directed by the general staff with Gen. von Moltke at its head. Emperor William was very active and was credited with determining the main military policies pursued. He had the assistance of Gen. von Falkenhayn, the Prussian minister of war, who took Gen. von Moltke's place when the chief of staff was incapacitated by illness.

THE CAMPAIGN IN FRANCE.

The advance of the armies of the Rhine and of the Moselle was not rapid. They were faced by the strongest fortifications on the French frontier and in addition to that they were delayed by the failure of the army of the Meuse to make as rapid progress as had been expected. They met strong opposition and many battles took place in which heavy losses were suffered on both sides. These occurred in the vicinity of Verdun, St. Mihiel, Belfort and in the Argonne forest region. The Germans won notable victories at Longwy, Maubeuge and other places. The attention of the world, however, was directed toward the advance of the powerful right wing and particularly to the operations of Gen. von Kluck and his hosts. These continued to attack in mass formations as they had done in Belgium, depending upon numbers to carry them through in spite of the extremely heavy losses in killed and wounded.

As was the case in Belgium, the allies reported brilliant victories at various points, but the victories were followed by retreats and it was apparent to close observers that the Germans were driving ahead with considerable speed toward Paris.

France and Great Britain in the meantime had not been idle. The French cabinet was reorganized on a national rather than a party basis and Gen. Joffre, until then comparatively unknown outside of European military circles, was placed in supreme command of the armies. England made Lord Kitchener secretary for war, placed Field Marshal Sir John D. P. French in charge of an expeditionary force to operate with the Belgians and French in resisting the German invasion, appointed Admiral Sir John R. Jellicoe to the supreme command of the home fleets and gave Lord Roberts the title of colonel in chief of the oversea forces. An expedition of less than 100,000 men, but made up of veterans from the Boer and other wars, was secretly hurried across the channel and sent to the front with such leaders as Gen. Smith-Dorrien, Gen. Haig and Gen. Hamilton. Later a large number of native troops from India were brought to France and re-enforcements were received from time to time from the training camps in England, where before the end of the year something like 2,000,000 men were being prepared for home defense or service abroad. Toward the end of September Canada sent a contingent of 33,000 men across the Atlantic to assist the mother country.

This increase in the British forces and also in the fighting line of the French armies took time and during the first month or more of the war the allies, especially on the left flank, were outnumbered. So they were driven from the Belgian frontier back through Lille, Amiens, St. Quentin, Compiegne and other places until at the end of the first week in September the Germans were within a few miles of the outer defenses of Paris. In that city hurried preparations for a siege were made and Sept. 2 the government offices and archives were removed to Bordeaux, which remained the capital until early in December.

On the extreme right of the French line the offensive was taken early in August and an invasion of Alsace and Lorraine was attempted with some success. Altkirch and Muelhausen were captured, but the German forces rallied and retook them. Fighting in this vicinity was heavy, but from a strategical point of view was not of the highest importance, except in so far as the passes in the Vosges mountains were occupied and held against the enemy.

BATTLES OF THE MARNE AND AISNE.

Things looked very dark for the allied cause until Sept. 7, when after having crossed the Marne and having come almost within striking distance of Paris the Germans suddenly began to retreat. Precisely why they did so was not disclosed. It was asserted that through losses in killed and wounded they had become numerically inferior to the allies, that they had outrun their transport service and were suffering from lack of food and ammunition and that it was necessary to withdraw for some distance to avoid a disaster. It was also asserted that the pressure of the Russian invasion of Prussia had become so heavy that re-enforcements from the western theater of war to the east had to be sent in a hurry. Whatever the reason was, the Germans wavered and when the allies at once took the offensive retreated toward the east and north away from Paris.

The battle of the Marne so called was in reality a series of battles in the vicinity of the river of that name. No statement of losses on either side was made, though it was admitted that they were heavy, as more than 2,000,000 took part in the struggle. The Germans withdrew in fairly good order until they reached prepared positions back of the Aisne river. Here they intrenched themselves and here for many days raged another series of desperate battles. The tide flowed back and forth with success first on one side and then on the other. It was expected to be the great decisive battle of the war. It was great, but it was not decisive. Both sides now dug a series of bomb-proof and almost weather-proof trenches, which eventually extended in a semicircular line from Nieuport on the North sea coast of Belgium to the Vosges mountains. The fighting along this line was for a time continuous and savage, but gradually as winter approached the attacks became less frequent and by Dec. 10 they had almost ceased.

In November and the early part of December there were violent assaults by the Germans along a line extending from the North sea as far south as Arras and especially in the vicinity of Dixmude, but no decided gains were made by either side. When this record closed the Germans on the one hand and the allies on the other hand, so far as the western theater of war was concerned, practically fought each other to a standstill.

CAMPAIGN IN EAST PRUSSIA.

Turning now to the east, it may be remarked that the Russians were, as was predicted, slow to get started in the war, but they did better than some had predicted. Grand Duke Nicholas had charge of the military strategy and the greater movements. Under him were many generals who had gained experience and some fame in the war with Japan. Among them were Gen. Rennenkampf, Gen. Russky, Gen. Sazonoff and a host of others. Gen. Demitrieff, the "Bulgarian Napoleon," as he was often called on account of his success against the Turks, offered his services and they were accepted. The czar's forces advanced in two main divisions. One was directed against East Prussia and the other against the Austro-Hungarian province of Galicia. By the end of August the Russians had penetrated into East Prussia as far as Insterburg and Allenstein. They defeated the numerically inferior German forces opposed to them and were threatening to besiege the great fortress of Koenigsberg.

Early in September Gen. von Hindenburg, having received re-enforcements, inflicted a crushing defeat on the Russians at the battle of Allenstein, taking some 70,000 prisoners. He then drove the invaders back across the border, but there they turned on him and he suffered several reverses, which compelled him to remain on the defensive. There were a number of attacks and counter attacks in this part of the war zone later, but they were not of a decisive character.

FIGHTING IN POLAND.

In Galicia, with the Austrians as their opponents, the Russians scored a number of brilliant victories, the greatest being the capture of Lemberg, a city second in importance in the province only to Cracow. They approached close to Cracow itself and penetrated into Hungary through the passes of the Carpathian mountains. Afterward the Austrians received German support and were able to check the Russian advance. The combats in this part of the war territory were sanguinary, but no reliable figures as to the losses sustained by either side are available.

The "front" in Russia was even more extended than that in France and Belgium. It was, in fact, more than 300 miles long, running in a southwesterly direction from the Baltic sea to Lemberg, in Galicia. Battles were fought at various times at or near Kovno, Suwalki, Grodno, Plock, Kalish, Plotrkow, Warsaw, Lodz and many other places. The fortress of Jaroslaw was captured by the Russians and the stronger Przemysl was besieged, but had not been taken when this was written. In November the Germans made a swift advance on Warsaw from the west, but were driven back with heavy loss. Later, spurred on by the kaiser himself and with Gen. von Hindenburg, now become the military hero of Germany, and Gen. Mackensen they advanced again, captured Lodz and once more threatened Warsaw. The Austrians in Galicia also advanced and inflicted some losses on the Russians. The campaign on the eastern front of the war was still in progress in the second week in December without any decisive result having been reached.

SERVIAN CAMPAIGN.

Of the struggle between the Servians and the Austrians little need be said. In the opening weeks of the hostilities the veterans of the Servian armies met and defeated many Austrian forces at such places as Visegrad, Shabats and Semlin. Belgrade, the bombardment of which virtually opened the great war, held out until Dec. 2, when it finally had to surrender. The Servians after four months of fighting, in which they are said to have lost 100,000 men, were worn out and had to give way before the superior numbers and resources of the dual monarchy. They received some financial assistance from England and it appeared early in December as though they were still able to keep a considerable force of Austrians busy They even routed some of the pursuing forces with heavy loss. Montenegro did its share of the fighting, especially in Bosnia. Its army had, it was reported in December, lost one-third of its original strength. Great pressure was brought upon Bulgaria and Roumania to enter the war, but up to Dec. 10 they had preserved their neutrality.

Turkey, at the instigation of Germany, entered the war Oct. 29 by attacking Russia. The Mussulman head priests proclaimed a holy war against Russia, France and Great Britain, but up to the beginning of the second week in December neither Turkey nor its fanatical population had become a serious factor in the war, except in so far that it was made necessary for the allies to divert some of their troops for the protection of the Suez canal and various threatened points.

Japan, as the ally of Great Britain and as the "protector of peace in the far east," declared war against Germany when that country declined voluntarily to give up Kiaochow and the port of Tsingtao in Shantung province, China. It laid siege to Tsingtao and with the aid of the British captured the stronghold Nov. 6 with comparatively small loss of life.

There were minor land engagements between the British and Germans in their colonies in various parts of the world, but these, aside from the fact that they deprived Germany of a number of her smaller possessions, were relatively unimportant.

WAR ON THE SEA.

On the sea the war was carried on chiefly by Great Britain and Germany. At the opening of hostilities the main force of the German navy was in or near the Kiel canal and it remained there up to the time this record closed. The German naval authorities adopted the policy of sowing a large part of the North sea with mines and sending out submarines to attack the enemy's ships. In this policy they were quite successful, as will be seen from the list of British naval losses given elsewhere. There were four encounters on the sea in which the loss of ships and men was serious. In the latter part of August a British squadron sent three light German cruisers and two or three destroyers to the bottom near Helgoland in the North sea. Then, nearly a month later, a German submarine torpedoed and sank the British cruisers Aboukir, Hogue and Cressy in the North sea with a loss of more than 1,000 lives. The next battle was off the coast of Chile, Nov. 1, when the German cruisers Scharnhorst, Gneisenau and Nurnberg met and sank the British cruisers Monmouth and Good Hope and damaged the lighter cruisers Glasgow and Otranto. The British more than evened up the score Dec. 8 when a squadron under Admiral F. C. D. Sturdee encountered the Scharnhorst, Gneisenau, Leipzig, Nurnberg and Dresden near the Falkland islands in the South Atlantic. The three first named were sunk after a five hours' battle. The Nurnberg and Dresden fled, but the former was overtaken and sunk the same day.

The exploits of the German cruiser Emden deserve a chapter to themselves, but space does not permit more than mention of the fact that this vessel destroyed British merchantmen having a value of from $5,000,000 to $10,000,000 and also sank a Russian cruiser and a French destroyer in the harbor of Penang before it was itself finally destroyed by an Australian cruiser in the second week in November.

It may be said in conclusion that while fleet German cruisers did vast damage to British shipping the commerce of Britain was maintained without much more than temporary interruption. That of Germany and Austria ceased almost entirely.

PRONUNCIATION OF WAR NAMES.

The following list, while not complete, contains the names of the most important places mentioned in the press dispatches being received in this country from the European war zone. Care has been taken to make the phonetic pronunciation as accurate as possible. The latest edition of the Standard dictionary was used, after which the names were checked over by natives of the countries in which those places are located—consuls, college professors, court interpreters, etc.

It is impossible to spell phonetically, in English letters, some of the sounds of foreign languages and pronunciations here given do not pretend to be minutely accurate. The nasal "n" of the French and guttural "gh" and "ch" of the German are examples, and only an approximation of the correct sound can be made by any but a native. In each of these cases the letters are set in *italics*. The apostrophe (') is used to denote a quickly disappearing sound, appearing chiefly in the French, as "Hah'vr" for Havre. The accent (') is used to show syllables emphasized.

WHOLESALE PRICES, 1912 TO 1914.

[From bulletin of the bureau of labor statistics, Washington, D. C.]

The marked upward tendency of wholesale prices manifested during recent years did not continue throughout the whole of 1913. Prices moved within very narrow limits from month to month during the year, the most significant feature being a decline in the groups of farm products and food, which have such an important bearing upon the cost of living.

The average of wholesale prices in 1913, as measured by the prices of 252 commodities, was 1.2 per cent higher than the average for 1912. This average was 19.8 per cent higher than in 1890, 22.4 per cent higher than in 1900, 2.7 per cent higher than in 1910, and 35.2 per cent higher than the average price for the 10 years 1890-1899.

The upward movement of prices, which began in July, 1905, continued until October, 1907, from which time there was a general decline until August, 1908. From September, 1908, wholesale prices again moved upward without a break until March, 1910, from which time they declined slightly until January, 1911. During the year 1911 the variations from month to month were small, with the tendency slightly upward, but in the early part of 1912 prices rose rapidly until May. Slight recessions occurred during the summer months of 1912, but prices rose again during the latter part of the year, while throughout the year 1913 only slight variations in prices from month to month occurred, November and December showing slight declines from the high level of the year, which occurred in October.

Wholesale prices in December, 1913, were but 0.4 per cent higher than in December, 1912. As here measured for 1913 they were slightly higher than for any other year of the 24-year period, 1890 to 1913, covered by the bureau of labor statistics price reports, and were higher than for any year since 1883.

Comparing 1913 with 1912, the group of commodities showing the greatest increase in prices was fuel and lighting, the increase in the group as a whole being 6.2 per cent. Six other groups show an increase in 1913 of 1 per cent to 3.9 per cent, while two of the 9 groups into which the 252 commodities have been classified show a decrease. Farm products declined 3.2 per cent in price, while food shows a decline of 1.7 per cent.

THE GENERAL EDUCATION BOARD.

Organized Feb. 27, 1902.

Chairman—Frederick T. Gates.
Secretary—Wallace Buttrick.
Assistant secretaries—E. C. Sage, Abraham Flexner.
Treasurer—L. G. Myers.
Assistant treasurer—L. M. Dashiel.
Members of Board—Frederick T. Gates, Walter H. Page, J. D. Rockefeller, Jr., Albert Shaw, Wallace Buttrick, Starr J. Murphy, Edwin A. Alderman, Hollis B. Frissell, Harry Pratt Judson, Charles W. Eliot, Andrew Carnegie, Edgar L. Marston, Wickliffe Rose, Jerome D. Greene, Anson Phelps Stokes, Jr., Abraham Flexner, George E. Vincent.
Offices—17 Battery place, New York, N. Y.

The general education board was informally organized Feb. 27, 1902, at the suggestion of John D. Rockefeller's committee on benevolence and was given a charter by congress and formally organized in January, 1903. The plan was designed and adapted to assist Mr. Rockefeller in distributing his gifts to education and to afford a medium through which other men of means might contribute to the same end. The board, a few days after its initial meeting, received from Mr. Rockefeller the sum of $1,000,000, the use of which was to be confined to the study and promotion of education in the southern states.

June 30, 1905, the board was notified that Mr. Rockefeller would donate $10,000,000, the principal of which was to be held in perpetuity as a foundation for education, the income to be used for the benefit of institutions of learning in such manner as might be deemed best adapted to promote a comprehensive system of higher education in the United States. In 1907 Mr. Rockefeller gave the board $32,000,000 and in 1909 added $10,000,000 more to the fund. The board was authorized to distribute the principal of the fund, and all other endowment funds hitherto contributed by Mr. Rockefeller, whenever in the discretion of the members or their successors it should be deemed advisable to do so.

The charter of the board provides that the object of the corporation shall be "the promotion of education within the United States of America, without distinction of race, sex or creed."

THE PRESIDENT'S MESSAGE TO CONGRESS.

President Woodrow Wilson read the following message at a joint session of the house and senate Dec. 8, 1914:

Gentlemen of the Congress: The session upon which you are now entering will be the closing session of the 63d congress, a congress, I venture to say, which will long be remembered for the great body of thoughtful and constructive work which it has done, in loyal response to the thought and needs of the country. I should like in this address to review the notable record and try to make adequate assessment of it; but no doubt we stand too near the work that has been done and are ourselves too much part of it to play the part of historians toward it.

Moreover, our thoughts are now more of the future than of the past. While we have worked at our tasks of peace the circumstances of the whole age have been altered by war. What we have done for our own land and our own people we did with the best that was in us, whether of character or of intelligence, with sober enthusiasm and a confidence in the principles upon which we were acting which sustained us at every step of the difficult undertaking; but it is done. It has passed from our hands. It is now an established part of the legislation of the country. Its usefulness, its effects will disclose themselves in experience.

What chiefly strikes us now, as we look about us during these closing days of a year which will be forever memorable in the history of the world, is that we face new tasks, have been facing them these six months, must face them in the months to come—face them without partisan feeling, like men who have forgotten everything but a common duty and the fact that we are representatives of a great people whose thought is not of us but of what America owes to herself and to all mankind in such circumstances as these upon which we look amazed and anxious.

War has interrupted the means of trade not only, but also the processes of production. In Europe it is destroying men and resources wholesale and upon a scale unprecedented and appalling. There is reason to fear that the time is near, if it be not already at hand, when several of the countries of Europe will find it difficult to do for their people what they have hitherto been always easily able to do—many essential and fundamental things. At any rate, they will need our help and our manifold services as they have never needed them before; and we should be ready—more fit and ready than we have ever been.

SOUTH AMERICAN TRADE.

It is of equal consequence that the nations whom Europe has usually supplied with innumerable articles of manufacture and commerce of which they are in constant need, and without which their economic development halts and stands still, can now get only a small part of what they formerly imported and eagerly look to us to supply their all but empty markets. This is particularly true of our own neighbors, the states, great and small, of Central and South America. Their lines of trade have hitherto run chiefly athwart the seas, not to our ports, but to the ports of Great Britain and of the older continent of Europe. I do not stop to inquire why or to make any comment on probable causes. What interests us just now is not the explanation, but the fact, and our duty and opportunity in the presence of it. Here are markets which we must supply, and we must find the means of action. The United States, this great people for whom we speak and act, should be ready, as never before, to serve itself and to serve mankind; ready with its resources, its energies, its forces of production and its means of distribution.

It is a very practical matter, a matter of ways and means. We have the resources, but are we ready to use them? And, if we can make ready what we have, have we the means at hand to distribute it? We are not fully ready; neither have we the means of distribution. We are willing, but we are not fully able. We have the wish to serve and to serve greatly, generously; but we are not prepared as we should be. We are not ready to mobilize our resources at once. We are not prepared to use them immediately and at their best, without delay and without waste.

To speak plainly, we have grossly erred in the way in which we have stunted and hindered the development of our merchant marine. And now, when we need ships, we have not got them. We have year after year debated, without end or conclusion, the best policy to pursue with regard to the use of the ores and forests and water powers of our national domain in the rich states of the west, when we should have acted; and they are still locked up. The key is still turned upon them, the door shut fast at which thousands of vigorous men, full of initiative, knock clamorously for admittance. The water power of our navigable streams outside the national domain also, even in the eastern states, where we have worked and planned for generations, is still not used as it might be, because we will and we won't; because the laws we have made do not intelligently balance encouragement against restraint. We withhold by regulation.

I have come to ask you to remedy and correct these mistakes and omissions, even at this short session of congress, which would certainly seem to have done all the work that could reasonably be expected of it. The time and the circumstances are extraordinary, and so must our efforts be also.

Fortunately two great measures, finely conceived, the one to unlock, with proper safeguards, the resources of the national domain, the other to encourage the use of the navigable waters outside that domain for the generation of power, have already passed the house of representatives and are ready for immediate consideration and action by the senate. With the deepest earnestness I urge their prompt passage. In them both we turn our backs upon hesitation and makeshift and formulate a genuine policy of use and conservation, in the best sense of those words. We owe the one measure not only to the people of that great western country for whose free and systematic development, as it seems to me, our legislation has done so little, but also to the people of the nation as a whole; and we as clearly owe the other in fulfillment of our repeated promises that the water power of the country should in fact as well as in name be put at the disposal of great industries which can make economical and profitable use of it, the rights of the public being adequately guarded the while and monopoly in the use prevented. To have begun such measures and not completed them would indeed mar the record of this great congress very seriously. I hope and confidently believe that they will be completed.

And there is another great piece of legislation which awaits and should receive the sanction of the senate; I mean the bill which gives a larger measure of self-government to the people of the Philippines. How better, in this time of anxious questioning and perplexed policy, could we show our confidence in the principles of liberty as the source as well as the expression of life, how better could we demonstrate our own self-possession and steadfastness in the courses of justice and disinterestedness than by thus going calmly forward to fulfill our promises to a dependent people, who will now look more anxiously than ever to see whether we have indeed the liberality, the unselfishness, the courage, the faith we have boasted and professed. I cannot believe that the senate will let this great measure of constructive justice await the action of another congress. Its passage would nobly crown the record of these two years of memorable labor.

MERCHANT MARINE DEMANDED.

But I think that you will agree with me that this does not complete the toll of our duty. How are we to carry our goods to the empty markets of which I have spoken if we have not the ships? How are we to build up a great trade if we

have not the certain and constant means of transportation upon which all profitable and useful commerce depends? And how are we to get the ships if we wait for the trade to develop without them? To correct the many mistakes by which we have discouraged and all but destroyed the merchant marine of the country, to retrace the steps by which we have, it seems almost deliberately, withdrawn our flag from the seas, except where, here and there, a ship of war is bidden carry it or some wandering yacht displays it, would take a long time and involve many detailed items of legislation, and the trade which we ought immediately to handle would disappear or find other channels while we debated the items.

The case is not unlike that which confronted us when our own continent was to be opened up to settlement and industry and we needed long lines of railway, extended means of transportation prepared beforehand, if development was not to lag intolerably and wait interminably. We lavishly subsidized the building of transcontinental railroads. We look back upon that with regret now because the subsidies led to many scandals of which we are ashamed; but we know that the railroads had to be built and if we had to do it over again we should, of course, build them, but in another way.

Therefore I propose another way of providing the means of transportation, which must precede, not tardily follow, the development of our trade with our neighbor states of America. It may seem a reversal of the natural order of things, but it is true, that the routes of trade must be actually opened—by many ships and regular sailings and moderate charges—before streams of merchandise will flow freely and profitably through them.

Hence the pending shipping bill, discussed at the last session, but as yet passed by neither house. In my judgment such legislation is imperatively needed and cannot wisely be postponed. The government must open these gates of trade and open them wide; open them before it is altogether profitable to open them, or altogether reasonable to ask private capital to open them at a venture. It is not a question of the government's monopolizing the field. It should take action to make it certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable; and then, when the carriage has become sufficiently profitable to attract and engage private capital and engage it in abundance, the government ought to withdraw. I very earnestly hope that the congress will be of this opinion and that both houses will adopt this exceedingly important bill.

RURAL CREDITS BILL.

The great subject of rural credits still remains to be dealt with and it is a matter of deep regret that the difficulties of the subject have seemed to render it impossible to complete a bill for passage at this session. But it cannot be perfected yet and therefore there are no other constructive measures the necessity for which I will at this time call your attention to, but I would be negligent of a very manifest duty were I not to call the attention of the senate to the fact that the proposed convention for safety at sea awaits its confirmation and that the limit fixed in the convention itself for its acceptance is the last day of the present month.

The conference in which this convention originated was called by the United States; the representatives of the United States played a very influential part, indeed, in framing the provisions of the proposed convention, and those provisions are in themselves for the most part admirable. It would hardly be consistent with the part we have played in the whole matter to let it drop and go by the board as if forgotten and neglected. It was ratified in May last by the German government and in August by the parliament of Great Britain. It marks a most hopeful and decided advance in international civilization. We should show our earnest good faith in a great matter by adding our own acceptance of it.

TO SAVE LIVES ON THE SEA.

There is another matter of which I must make special mention, if I am to discharge my conscience, lest it should escape your attention. It may seem a very small thing. It affects only a single item of appropriation. But many human lives and many great enterprises hang upon it. It is the matter of making adequate provision for the survey and charting of our coasts. It is immediately pressing and exigent in connection with the immense coast line of Alaska, a coast line greater than that of the United States themselves, though it is also very important, indeed, with regard to the older coasts of the continent.

We cannot use our great Alaskan domain, ships will not ply thither, if those coasts and their many hidden dangers are not thoroughly surveyed and charted. The work is incomplete at almost every point. Ships and lives have been lost in threading what were supposed to be well known main channels. We have not provided adequate vessels or adequate machinery for the survey and charting. We have used old vessels that were not big enough or strong enough and which were so nearly unseaworthy that our inspectors would not have allowed private owners to send them to sea. This is a matter which, as I have said, seems small, but is in reality very great. Its importance has only to be looked into to be appreciated.

DUTY OF ECONOMY IMPERATIVE.

Before I close may I say a few words upon two topics, much discussed out of doors, upon which it is highly important that our judgments should be clear, definite and steadfast?

One of these is economy in government expenditures. The duty of economy is not debatable. It is manifest and imperative. In the appropriations we pass we are spending the money of the great people whose servants we are—not our own. We are trustees and responsible stewards in the spending. The only thing debatable and upon which we should be careful to make our thought and purpose clear is the kind of economy demanded of us. I assert with the greatest confidence that the people of the United States are not jealous of the amount their government costs if they are sure that they get what they need and desire for the outlay, that the money is being spent for objects which they approve and that it is being applied with good business sense and management.

Governments grow piecemeal, both in their tasks and in the means by which those tasks are to be performed, and very few governments are organized, I venture to say, as wise and experienced business men would organize them if they had a clean sheet of paper to write upon. Certainly the government of the United States is not.

I think that it is generally agreed that there should be a systematic reorganization and reassembling of its parts so as to secure greater efficiency and effect considerable savings in expense. But the amount of money saved in that way would, I believe, though no doubt considerable in itself, running, it may be, into the millions, be relatively small—small, I mean, in proportion to the total necessary outlays of the government. It would be thoroughly worth effecting, as every saving would, great or small. Our duty is not altered by the scale of the saving. But my point is that the people of the United States do not wish to curtail the activities of this government; they wish, rather, to enlarge them; and with every enlargement, with the mere growth, indeed, of the country itself, there must come, of course, the inevitable increase of expense. The sort of economy we ought to practice may be effected, and ought to be effected, by a careful study and assessment of the tasks to be performed; and the money spent ought to be made to yield the best possible returns in efficiency and achievement. And, like good stewards, we should so account for every dollar of our appropriations as to make it perfectly evident what it was spent for and in what way it was spent.

It is not expenditure, but extravagance, that

we should fear being criticised for; not paying for the legitimate enterprises and undertakings of a great government whose people command what it should do, but adding what will benefit only a few or pouring money out for what need not have been undertaken at all or might have been postponed or better and more economically conceived and carried out. The nation is not niggardly; it is very generous. It will chide us only if we forget for whom we pay money out and whose money it is we pay. These are large and general standards, but they are not very difficult of application to particular cases.

POLICY OF PEACE.

The other topic I shall take leave to mention goes deeper into the principles of our national life and policy. It is the subject of national defense.

It cannot be discussed without first answering some very searching questions. It is said in some quarters that we are not prepared for war. What is meant by being prepared? Is it meant that we are not ready upon brief notice to put a nation in the field, a nation of men trained to arms? Of course we are not ready to do that, and we shall never be in time of peace so long as we retain our present political principles and institutions. And what is it that is suggested we should be prepared to do? To defend ourselves against attack? We have always found means to do that, and shall find them whenever it is necessary without calling our people away from their necessary tasks to render compulsory military service in times of peace.

Allow me to speak with great plainness and directness upon this great matter and to avow my convictions with deep earnestness. I have tried to know what America is, what her people think, what they are, what they most cherish and hold dear. I hope that some of their finer passions are in my own heart—some of the great conceptions and desires which gave birth to this government and which have made the voice of this people a voice of peace and hope and liberty among the peoples of the world, and that, speaking my own thoughts, I shall, at least in part, speak theirs also, however faintly and inadequately, upon this vital matter.

We are at peace with all the world. No one who speaks counsel based on fact or drawn from a just and candid interpretation of realities can say that there is reason to fear that from any quarter our independence or the integrity of our territory is threatened. Dread of the power of any other nation we are incapable of. We are not jealous of rivalry in the fields of commerce or of any other peaceful achievement. We mean to live our own lives as we will; but we mean also to let live.

We are, indeed, a true friend to all the nations of the world, because we threaten none, covet the possessions of none, desire the overthrow of none. Our friendship can be accepted and is accepted without reservation, because it is offered in a spirit and for a purpose which no one need ever question or suspect. Therein lies our greatness. We are the champions of peace and of concord. And we should be very jealous of this distinction which we have sought to earn. Just now we should be particularly jealous of it, because it is our dearest present hope that this character and reputation may presently, in God's providence, bring us an opportunity such as has seldom been vouchsafed any nation—the opportunity to counsel and obtain peace in the world and reconciliation and a healing settlement of many a matter that has cooled and interrupted the friendship of nations.

This is the time above all others when we should wish and resolve to keep our strength by self-possession, our influence by preserving our ancient principles of action.

From the first we have had a clear and settled policy with regard to military establishments. We never have had, and while we retain our present principles and ideals we never shall have, a large standing army. If asked, Are you ready to defend yourselves? we reply, Most assuredly, to the utmost; and yet we shall not turn America into a military camp. We will not ask our young men to spend the best years of their lives making soldiers of themselves. There is another sort of energy in us. It will know how to declare itself and make itself effective should occasion arise. And especially when half the world is on fire we shall be careful to make our moral insurance against the spread of the conflagration very definite and certain and adequate indeed.

Let us remind ourselves, therefore, of the only thing we can do or will do. We must depend in every time of national peril, in the future as in the past, not upon a standing army, nor yet upon a reserve army, but upon a citizenry trained and accustomed to arms. It will be right enough, right American policy, based upon our accustomed principles and practices, to provide a system by which every citizen who will volunteer for the training may be made familiar with the use of modern arms, the rudiments of drill and maneuver and the maintenance and sanitation of camps. We should encourage such training and make it a means of discipline which our young men will learn to value. It is right that we should provide it not only, but that we should make it as attractive as possible, and so induce our young men to undergo it at such times as they can command a little freedom and can seek the physical development they need, for mere health's sake if for nothing more.

Every means by which such things can be stimulated is legitimate, and such a method smacks of true American ideas. It is right, too, that the national guard of the states should be developed and strengthened by every means which is not inconsistent with our obligations to our own people or with the established policy of our government. And this, also, not because the time or occasion specially calls for such measures, but because it should be our constant policy to make these provisions for our national peace and safety.

More than this carries with it a reversal of the whole history and character of our polity. More than this, proposed at this time, permit me to say, would mean merely that we had lost our self-possession, that we had been thrown off our balance by a war with which we have nothing to do, whose causes cannot touch us, whose very existence affords us opportunities of friendship and disinterested service which should make us ashamed of any thought of hostility or fearful preparation for trouble. This is assuredly the opportunity for which a people and a government like ours were raised up—the opportunity not only to speak but actually to embody and exemplify the counsels of peace and amity and the lasting concord which is based on justice and fair and generous dealing.

A powerful navy we have always regarded as our proper and natural means of defense and it has always been of defense that we have thought—never of aggression or of conquest. But who shall tell us now what sort of navy to build? We shall take leave to be strong upon the seas, in the future as in the past, and there will be no thought of offense or of provocation in that. Our ships are our natural bulwarks. When will the experts tell us just what kind we should construct, and when will they be right for ten years together, if the relative efficiency of craft of different kinds and uses continues to change as we have seen it change under our very eyes in these last few months?

But I turn away from the subject. It is not new. There is no new need to discuss it. We shall not alter our attitude toward it because some among us are nervous and excited. We shall easily and sensibly agree upon a policy of defense. The question has not changed its aspects because the times are not normal. Our policy will not be for an occasion. It will be conceived as a permanent and settled thing, which we will pursue at all seasons, without haste and after a fashion perfectly consistent with the peace of the world, the abiding friendship of states and the unhampered freedom of all with whom we deal. Let there be no mis-

conception. The country has been misinformed. We have not been negligent of national defense. We are not unmindful of the great responsibility resting upon us. We shall learn and profit by the lesson of every experience and every new circumstance, and what is needed will be adequately done.

I close, as I began, by reminding you of the great tasks and duties of peace which challenge our best powers and invite us to build what will last, the tasks to which we can address ourselves now and at all times with free hearted zest and with all the finest gifts of constructive wisdom we possess. To develop our life and our resources; to supply our own people, and the people of the world as their need arises, from the abundant plenty of our fields and our marts of trade; to enrich the commerce of our own states and of the world with the products of our mines, our farms and our factories, with the creations of our thought and the fruits of our character—this is what will hold our attention and our enthusiasm steadily, now and in the years to come, as we strive to show in our life as a nation what liberty and the inspirations of an emancipated spirit may do for men and for societies, for individuals, for states and for mankind.

GENERAL PEACE TREATIES OF 1914.

Eighteen treaties between the United States and foreign countries for the advancement of the cause of general peace were ratified by the United States senate Aug. 13, 1914. Up to Nov. 1, 1914, twenty-nine of these treaties had been signed with the prospects that they would all be ratified by the countries concerned. The treaties are substantially the same in scope and character and the text of that with Italy is given here as typical of all.

"The president of the United States of America and his majesty the king of Italy, being desirous to strengthen the bonds of amity that bind the two countries, and also to advance the cause of general peace, have resolved to enter into a treaty for those purposes, and to that end have appointed as their plenipotentiaries, the president of the United States of America, the Hon. William Jennings Bryan, secretary of state; and his majesty the king of Italy, his excellency the Marquis Cusani Confalonieri, commander of the Order of Saint Maurice and Saint Lazarus, Grand Cordon of the Order of the Crown of Italy, etc., his ambassador extraordinary and plenipotentiary at Washington.

"Who, after having communicated to each other their respective full powers, found to be in proper form, have agreed upon the following articles:

ARTICLE I.

"The high contracting parties engage to submit for investigation and report to a commission, to be constituted according to the provisions of the following article, all differences of whatever nature they may be which may occur between them which cannot be composed by diplomatic methods or are not submitted to a tribunal of arbitration; they bind themselves not to declare war nor to open hostilities during the examination by the commission and before the commission has presented its report.

ARTICLE II.

"The international commission shall be composed of five members appointed according to the following rules: Each country, by means of its government, chooses two members, one from among its own subjects, the other from among those of a third state; the two governments, after agreement, will name the fifth member, on condition, however, that he be not a citizen of either of these two countries. Each commissioner shall hold his place during a term of four years; at the expiration of this term, or in the event of vacancy, the confirmation or the substitution of the commissioner whose term may have expired or whose place may be vacant shall be made in the same manner. Each of the high contracting parties shall have the right, before the investigation has begun, to substitute for one of the members of the commission appointed by it another one chosen from the category to which the commissioner to be replaced belonged. When the commissioners be actually occupied in the examination of a question they shall receive a compensation which will be mutually agreed upon by the high contracting parties. The expenses of the commission shall be borne by the two governments in equal proportion. The international commission shall be appointed within six months after the exchange of the ratifications of this treaty.

ARTICLE III.

"In case the high contracting parties shall have failed to adjust a dispute by diplomatic methods or by means of a tribunal of arbitration, it shall at once be referred, either by common agreement or by one or the other party, to the international commission for investigation and report. The commission must inform the two governments of the date on which it will begin its labors, inviting them to furnish it with all the documents and to lend it the co-operation necessary for the investigation. The high contracting parties engage to furnish all the documents and to afford all facilities for the investigation and the report, provided that in their judgment this does not conflict with the laws or with the supreme interests of the state, and provided that the interests and rights of third states shall not thereby suffer damage. In the absence of an agreement to the contrary between the high contracting parties, the commission will itself adopt regulations governing its procedure. The report of the commission must be presented within a period of one year after the date on which it shall declare its investigation to have begun, unless the high contracting parties may have shortened or prolonged by mutual agreement this term. The report shall be prepared in triplicate; one copy shall be presented to each government, and the third shall be placed in the archives of the commission. The high contracting parties reserve to themselves the right to act independently on the subject matter of the dispute after the commission shall have presented its report.

ARTICLE IV.

"The present treaty shall be ratified by the president of the United States of America, by and with the advice and consent of the senate, and by his majesty the king of Italy, and the ratifications shall be exchanged as soon as possible. The treaty will come into force, for a period of five years, immediately after the exchange of ratifications. It will thereafter remain in force for twelve months more after one of the high contracting parties shall have notified the other of its intention to terminate it.

"In witness whereof the respective plenipotentiaries have signed the present treaty and have affixed thereunto their seals. Done in duplicate in the English and Italian languages at Washington this fifth day of May, in the year 1914.

*In California the electoral vote was split, the progressives getting eleven and the democrats two. The highest progressive elector received 174 more votes than the highest democratic elector.

†Oklahoma had no progressive ticket, though it was generally understood that the republican electors favored Roosevelt. ‡There were no republican electors on the official ballot in South Dakota.

IMMIGRATION LAW OF THE UNITED STATES.

The immigration law provides for a poll tax of $4 for every alien entering the United States. This tax is not levied upon aliens who shall enter the United States after an uninterrupted residence of at least one year immediately preceding such entrance in Canada, Newfoundland, Cuba or Mexico, nor upon aliens in transit through the United States, nor upon aliens arriving in Guam, Porto Rico or Hawaii.

Whenever the president shall be satisfied that passports issued by any foreign government to its citizens to go to any country other than the United States or to any insular possession of the United States or to the Canal Zone are being used for the purpose of enabling the holders to come to the continental territory of the United States to the detriment of labor conditions therein, the president may refuse to permit such citizens of the country issuing such passports to enter the continental territory of the United States from such other country or from such insular possessions or from the Canal Zone.

The following classes are excluded from admission into the United States: All idiots, imbeciles, feeble-minded persons, epileptics, insane persons and persons who have been insane within five years; persons who have had two or more attacks of insanity at any time previously; paupers; persons likely to become a public charge; professional beggars; persons afflicted with tuberculosis or with a loathsome or dangerous contagious disease; persons who have committed a felony or other crime involving moral turpitude; polygamists or persons who believe in the practice of polygamy; anarchists or persons who believe in or advocate the overthrow by force or violence of the government of the United States, or of all governments or of all forms of law, or the assassination of public officials; prostitutes, or women and girls coming into the United States for any immoral purpose; contract laborers who have been induced to migrate to this country by offers of employment or in consequence of agreements of any kind, verbal or written, express or implied, to perform labor in this country of any kind, skilled or unskilled; any person whose ticket or passage is paid for with the money of another, or who is assisted by others to come, unless it is satisfactorily shown that such person does not belong to one of the foregoing excluded classes and that said ticket or passage was not paid for by any corporation, society, municipality or foreign government, directly or indirectly; all children under 16 years of age unaccompanied by one or both of their parents, at the discretion of the secretary of labor. Nothing in the act shall exclude, if otherwise admissible, persons convicted of an offense purely political, not involving moral turpitude. Skilled labor may be imported if labor of like kind unemployed cannot be found in this country. The provisions of the law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, clergymen, professors for colleges or seminaries, persons belonging to any recognized learned profession or persons employed strictly as personal or domestic servants.

It is unlawful to assist or encourage the importation or migration of any alien by promise of employment through advertisements printed in any foreign country. This, however, does not apply to states or territories advertising the inducements they offer to immigration thereto.

All aliens brought to this country in violation of law shall be immediately sent back by the owners of the vessels bringing them. Any alien entering the United States in violation of law and such as become public charges from causes existing prior to their landing shall be deported at any time within three years after their arrival.

No person who disbelieves in or who is opposed to all organized government, or who is a member of or affiliated with any organization entertaining and teaching such belief in or opposition to all organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally of the government of the United States, or of any other organized government, because of his or their official character, shall be permitted to enter the United States.

THE CARNEGIE HERO FUND.

April 15, 1904, Andrew Carnegie placed in the hands of a commission the sum of $5,000,000 to be known as "the hero fund." Its purpose is to reward with medals and money the men and women who perform heroic deeds, or, in case they lose their lives, to care for those dependent upon them. Widows are given support until they remarry and children are given allowances until they are 16 years of age. Only such as follow peaceful vocations on sea or land in the United States and Canada are eligible to become beneficiaries of the fund.

Recipients of cash awards are not permitted to use the money as they choose without consultation with the commission. In no case is a pecuniary reward paid until after the person to whom the award is made has submitted a proposition for the use of the money which will meet with the approval of the executive committee. Where pecuniary awards are made for educational purposes the payments are made only as needed and approved from time to time. The first awards were made in May, 1905.

Up to Jan. 1, 1914, the commission had awarded 841 medals, of which 506 were bronze, 319 silver and 16 gold. In addition to the medals $835,532 had been awarded for disablement benefits and for educational and other special purposes, and for dependents of heroes who lost their lives, including payments made to Dec. 31, 1913, on monthly allowances. Pensions in force as of Jan. 1, 1914, amount to $64,920 annually. CARNEGIE INSTITUTION OF WASHINGTON.

The Carnegie institution was endowed by Andrew Carnegie with $10,000,000 and incorporated under the laws of the District of Columbia Jan. 4, 1902. Dec. 4, 1907, Mr. Carnegie added $2,000,000 to the endowment of the institution, and Jan. 20, 1911, he gave $10,000,000 more, making the total endowment $22,000,000. Incorporation by act of congress was effected April 28, 1904, section 2 of such act of incorporation specifying that the objects of the corporation shall be to encourage, in the broadest and most liberal manner investigation, research and discovery and the application of knowledge to the improvement of mankind. Three principal agencies to forward these objects have been developed, namely:

First, large projects or departments of work whose execution requires continuous research by a corps of investigators during a series of years.

Secondly, minor projects, which may be carried out by individual experts in a limited period of time.

Thirdly, publication of the results of investigations made under the auspices of the institution, and for certain works which would not otherwise be readily printed. These publications are not distributed gratis except to a limited list of the greater libraries of the world.

The larger projects now under way and the names of the department directors or investigators are as follows:

Botanical research—D. T. MacDougal.
Economics and sociology—Henry W. Farnam.
Embryology—F. P. Mall.
Experimental evolution—Charles B. Davenport.
Geophysics—Arthur L. Day.
Historical research—J. F. Jameson.
Marine biology—A. G. Mayer.
Meridian astrometry—Benjamin Boss.
Nutrition—F. G. Benedict.
Solar physics—George E. Hale.
Terrestrial magnetism—L. A. Bauer.

The officers are as follows:

President of the institution—Robert S. Woodward.

Officers of the board of trustees—Elihu Root, chairman; C. D. Walcott, vice-chairman; C. H. Dodge, secretary.

Executive committee—William H. Welch, chairman; Elihu Root, Robert S. Woodward, C. H. Dodge, C. D. Walcott, Wm. Barclay Parsons, Simon Flexner.

Trustees—Robert S. Brookings, Cleveland H. Dodge, Simon Flexner, W. N. Frew, Henry L. Higginson, Charles L. Hutchinson, Seth Low, Andrew J. Montague, William W. Morrow, Elihu Root, Wm. Barclay Parsons, Henry S. Pritchett, Martin A. Ryerson, Charles D. Walcott, Henry P. Walcott, Andrew D. White, Henry White, Robert S. Woodward, William H. Taft, William H. Welch, George W. Wickersham.

The administration building of the institution is located on the southeast corner of 16th and P streets, N. W., Washington, D. C. The institution, however, is neither a branch of nor subject to any special regulations of the United States government. Neither is it a college or a university, nor does it maintain a library or museum. A prospectus of work and a list of publications may be obtained upon application to the president.

ORGANIZATIONS FOR THE PROMOTION OF PEACE.

AMERICAN PEACE SOCIETY.

President—Senator Theodore E. Burton, Washington, D. C.
Secretary—Benjamin F. Trueblood, LL. D., 313 Colorado building, Washington, D. C.
Executive Director—Arthur D. Call, Washington, D. C.
Treasurer—George W. White, Washington, D. C.
Director Central-West Department—Louis P. Lochren, 30 North LaSalle street, Chicago, Ill.

AMERICAN SOCIETY FOR THE JUDICIAL SETTLEMENT OF INTERNATIONAL DISPUTES.

Honorary President—William H. Taft.
President—Charles W. Eliot, Cambridge, Mass.
Vice-President—Theodore Marburg, Baltimore, Md.
Secretary—James Brown Scott, Washington, D. C.
Treasurer—J. G. Schmidlapp, Cincinnati, O.

CHURCH PEACE UNION.

Organized Feb. 10, 1914.

President—Bishop David H. Greer, New York, N. Y.
Secretary—Frederick Lynch, New York, N. Y.
Treasurer—George A. Plimpton, New York, N. Y.

The Church Peace union was established Feb. 10, 1914, at a meeting in New York city of representatives of the leading religious denominations of the United States to administer the income from a gift of $2,000,000 made by Andrew Carnegie on the same date for the promotion of international peace. This gift is distinct from the $10,000,000 foundation established by Mr. Carnegie Dec. 14, 1910, to hasten the abolition of international wars. The income of the new fund is to be used to organize the moral power of the churches on critical international questions, to circulate peace literature, to bring about the annual observance of a "Peace Sunday" and to call conferences in America and Europe to discuss the promotion of peace.

AMERICAN ASSOCIATION FOR INTERNATIONAL CONCILIATION.

Secretary—Frederick P. Keppel, postoffice substation 84, New York, N. Y.

CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE.

2 Jackson place, Washington, D. C.
President—Elihu Root.
Secretary—James Brown Scott.

WORLD PEACE FOUNDATION.

40 Mount Vernon street, Boston, Mass.
Founder—Edwin Ginn.
President—David Starr Jordan.
Secretary—Edwin D. Mead.

THE INTERCOLLEGIATE PEACE ASSOCIATION.

President—President Charles F. Thwing, Western Reserve university, Cleveland, O.
Secretary—Dean S. F. Weston, Antioch college, Yellow Springs, O.

THE AMERICAN SCHOOL PEACE LEAGUE.

Secretary—Mrs. Fanny Fern Andrews, 405 Marlborough street, Boston, Mass.

THE MOHONK CONFERENCE ON INTERNATIONAL ARBITRATION.

Host—Daniel Smiley, Mohonk Lake, N. Y.
Secretary—H. C. Phillips, Mohonk Lake, N. Y.

FOUNDATION FOR THE PROMOTION OF INDUSTRIAL PEACE.

Established in 1907.

In 1906 President Theodore Roosevelt was awarded the Alfred B. Nobel peace prize and at his suggestion an act was passed by congress March 2, 1907, establishing the Foundation for the Promotion of Industrial Peace. To this organization he turned over the money received from the Nobel committee to be used as the nucleus of a fund the income of which is to be used in promoting an annual conference in Washington between representatives of capital and of labor, with a view to bringing about a better understanding between employers and employes, thus promoting industrial peace. The chief justice of the United States Supreme court, the secretary of agriculture and the secretary of commerce and labor, and their successors in office, and four persons appointed by the president of the United States to represent capital, labor and general public, are the trustees. The trustees are authorized to pay over the funds from time to time to a committee of nine members, known as "the industrial peace committee," whose duty it is to make arrangements for the conferences.

OHIO AND MISSISSIPPI RIVER FLOODS.

[From official reports by Profs. Alfred G. Henry and H. C. Frankenfeld of the weather bureau, United States department of agriculture.]

According to the terminology adopted by the United States weather bureau, a river is at "flood stage" when it reaches a point at which it overflows its banks and begins to damage property in proximity thereto. This stage naturally depends upon the height of the river banks above low water. Three classes of floods are distinguished, namely, (1) technical floods or freshets during which the river does not pass more than 1 foot above the flood stage; (2) severe floods, to signify stages from 2 to 5 feet above flood stage, and (3) great floods, to indicate the greatest recorded floods.

OHIO RIVER FLOODS.

Severe floods in the Ohio river occurred in the years 1882, 1883, 1884, 1897, 1907 and 1913; of these the floods of 1884, 1907 and 1913 may be classed as "great floods." Two severe floods occurred in each of the years 1907 and 1913. From 1832 to 1913 the Ohio river at Pittsburgh was 5 feet or more above flood stage on thirteen occasions. In 1806 it reached a stage of 33.9 feet; in 1832 it reached a stage of 35 feet, which remained the highest of record until 1907, when it reached 35.5. The following table shows Ohio river floods of 5 feet or more above flood stage at Pittsburgh, Cincinnati and Cairo:

*Flood stage.

The great majority of these floods were due to heavy rainfall in the Ohio basin; severe floods occur almost invariably in January, February and March, sometimes lapping over into April.

FLOOD OF MARCH, 1913.

The flood of March, 1913, was due to excessive rain falling upon a surface already saturated. Between March 23 and March 27, inclusive, the rainfall was more than 10 inches over a large district. More than 100 municipalities in Ohio were affected by the flood, the total population most directly concerned numbering 1,388,000. The total number of lives lost as nearly as could be determined was 467. The approximate number of residences flooded was 40,637 and of houses destroyed 2,220. The loss of life in Indiana was estimated at fifty-four.

The weather bureau devoted much labor and time to collecting statistics of the losses to property occasioned by the floods of March and April, 1913. According to these figures the railroad losses by states were:

Ohio	$6,493,555	Mississippi val.	$3,120,661
Indiana	4,812,805	New England.	200,000
Illinois	1,391,544		
Kentucky	150,000	Total	16,168,565

The loss to telegraph and telephone companies was $2,003,179.

The total losses by districts on other property such as buildings, bridges, highways, matured or prospective crops, farms and live stock and losses occasioned by suspension of business were:

Pittsburgh district	$2,725,000
Parkersburgh district	2,451,000
Cincinnati district	3,891,050
Louisville district	1,300,000
Evansville district	2,325,000
Cairo district	1,290,000
Memphis district	5,605,040
Vicksburg district	1,625,000
New Orleans district	565,750
Cumberland river, Nashville	207,200
Hudson and Mohawk rivers	1,100,000
Connecticut river and Vermont	37,500
White river, Indiana	5,596,105
Wabash river, Indiana	10,000,000
Small rivers, Ohio	106,674,404
Total	145,393,049
Grand total	163,564,793

MISSISSIPPI RIVER FLOODS.

Of the lower Mississippi floods, the most notable occurred in 1815, 1828, 1844, 1849, 1850, 1851, 1858, 1859, 1862, 1865, 1867, 1874, 1882, 1884, 1890, 1893, 1897, 1903, 1912 and 1913, being twenty in all, or an average of one flood to about each five years. In the upper Mississippi river the years of high water, as measured at St. Louis, were 1785, 1811, 1823, 1826, 1844, 1851, 1855, 1858, 1862, 1881, 1883, 1892, 1903 and 1909, being fourteen in all, or an average of one flood to about each nine years. The greatest lower Mississippi floods, measured by the flood heights, occurred in 1912 and 1913, while in the upper Mississippi the greatest flood was probably that of 1785, the "year of the high waters," when the river at St. Louis is said to have reached a stage of 42 feet or half a foot higher than the stage of June 28, 1844. This, however, is only tradition and the flood of 1844 is usually considered to have been the greatest of upper Mississippi and lower Missouri floods. The following table shows the highest stages and the dates on which they were reached at various points from Kansas City on the Missouri to New Orleans on the Mississippi:

Place.	Feet.	Date.
Kansas City, Mo.	38.0	June 20, 1844
Hannibal, Mo.	22.5	June 8, 1903
St. Louis, Mo.	41.4	June 28, 1844
New Madrid, Mo.	44.5	April 9, 1913
Memphis, Tenn.	46.5	April 10, 1913
Helena, Ark.	55.2	April 21, 1913
Arkansas City, Ark.	55.4	April 12, 1912
Vicksburg, Miss.	52.5	April 16, 1897
Natchez, Miss.	52.4	April 26-27, 1913
Baton Rouge, La.	43.8	May 11-13, 1912
New Orleans, La.	22.0	May 11, 1912

Accurate comparisons of the damages caused by the various floods in the Mississippi valley cannot be made, as no attempt at careful estimates of losses was made prior to 1912. It is believed, however, that the flood of that year holds the record, as either the area overflowed in former years was less or the value of the property destroyed was smaller. The official estimate made by the weather bureau of the losses and damages occasioned by the flood of 1912 was $78,187,670 and of those caused by the flood of 1913 (in the Mississippi valley only) $11,139,074. These figures do not include damages to levees.

THE HOMESTEAD LAW.

Any person who is the head of a family, or who is 21 years old and is a citizen of the United States or has filed his declaration of intention to become such, and who is not the proprietor of more than 160 acres of land in any state or territory, is entitled to enter one-quarter section (160 acres) or less quantity of unappropriated public land under the homestead laws. The applicant must make affidavit that he is entitled to the privileges of the homestead act and that the entry is made for his exclusive use and for actual settlement and cultivation, and must pay the legal fee and that part of the commission required, as follows: Fee for more than eighty acres, $10; for eighty acres or less, $5; commission, $1 for each forty-acre tract entered outside the limits of a railroad grant and $2 for each forty-acre tract entered within such limits. Within six months from the date of entry the settler must take up his residence upon the land unless an extension of time is granted, and cultivate the same for three years. He may absent himself each year for one or two periods of not exceeding five months in the aggregate, but notice must be given. During the second year not less than one-sixteenth of the area entered must be actually cultivated, and during the third year and until final proof cultivation of not less than one-eighth is required. There must be actual breaking of the soil followed by planting, sowing of seed and tillage for a crop other than native grasses. Summer fallowing or grazing of cattle cannot be accepted. The homestead entryman must have a habitable house upon the land entered at the time of submitting proof. Other improvements should be of such character and amount as are sufficient to show good faith.

Either final or commutation proof may be made at any time when it can be shown that residence and cultivation have been maintained in good faith for the required length of time and to the required extent. Proof under the act of June 6, 1912, must be submitted within five years after the date of the entry, while proof submitted under the law in force before that date must be made within seven years after the date of the entry. Failure to submit proof within the proper period is ground for cancellation of the entry unless good reason for the delay appears.

ENLARGED HOMESTEADS.

The acts of February 19, 1909, June 17, 1910, and June 13, 1912 (37 Stat., 101), extending the first named act to North Dakota and California, provide for the making of homestead entries for areas of not exceeding 320 acres of public lands in the states of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North

Dakota, Oregon, Utah, Washington and Wyoming, designated by the secretary of the interior as nonmineral, nontimbered, nonirrigable. As to Idaho, the act of June 17, 1910, provides that the lands must be "arid." The terms "arid" and "nonirrigable" land, as used in these acts, are construed to mean land which, as a rule, lacks sufficient rainfall to produce agricultural crops without the necessity of resorting to unusual methods of cultivation, such as the system commonly known as "dry farming," and for which there is no known source of water supply from which such land may be successfully irrigated at a reasonable cost.

THE PAN-AMERICAN UNION.

The Pan-American union was established upon the recommendation of the first international American conference in 1890 for the purpose of maintaining closer relations between the republics of the western hemisphere. Its duties have been broadened since then and it is now a general clearing house of information concerning the nations of North, South and Central America. It publishes a monthly bulletin in which are given the latest official data concerning the resources, commerce and other features of the republics. The officers of the union occupy a fine building at the corner of 17th street and Potomac park in Washington, D. C. The structure, which was built with money given by Andrew Carnegie, was dedicated April 26, 1910. Following are the officers:

Director-General—John Barrett.
Assistant Director—Francisco J. Yanes.
Chief Statistician—William C. Wells.
Chief Clerk—Franklin Adams.
Chief Translator—Emilio M. Amores.
Librarian—Charles E. Babcock.
Special Compilers—Albert Hale, C. E. Albes.

CENTENNIAL OF ADMISSION OF ILLINOIS.

The following resolution was adopted by the Illinois state senate Feb. 20 and concurred in by the house April 8, 1913.

"Whereas, Illinois was admitted to the union of states Dec. 3, 1818, the centennial anniversary thereof being rapidly approaching, and it being meet and fit that the state which has given of its sons so liberally to the progress of the nation and the world during the period of its statehood should fittingly observe its hundredth anniversary by a celebration which shall do honor to itself and to the nation:

"Resolved, by the senate, the house of representatives concurring, That a commission, consisting of five members of the senate and five members of the house of representatives of the forty-eighth general assembly, shall be appointed to have charge of the preliminary arrangements of such celebration to be held in Springfield, the state capital, on such centennial date, and to determine, as may be, the character and necessities of such celebration, and to report the result of its findings to the forty-ninth general assembly; such joint commission to hold its meetings in the city of Springfield at such time or times as may be necessary to successfully inaugurate such movement."

Subsequently by another joint resolution E. J. James, E. B. Greene and J. W. Garner of the University of Illinois and Mrs. Jessie Palmer Webber and Dr. Otto L. Schmidt of the Illinois Historical society were appointed as additional members of the committee. The sum of $10,000 was appropriated to defray the expenses of the commission.

At a meeting held in Springfield July 22 Senator Campbell S. Hearn was elected chairman and Mrs. Jessie Palmer Webber secretary. The following proposals were adopted:

1. Promotion of local celebrations throughout the state.

2. Holding of a state celebration at the capital, consisting of an exposition and a pageant illustrative of the social, economic and educational development of the state.

3. Preparation of a series of publications putting into permanent form the record of the state's progress in all lines of development.

4. Erection of a permanent memorial building for the use of the historical and educational departments of the state, where shall be preserved the historical relics of the state; containing a memorial hall where shall be placed statues of Illinois' illustrious men.

5. Erecting and unveiling of bronze statues of Lincoln and Douglas on the capitol grounds as provided for in bills enacted at the session of the legislature in 1913.

A comprehensive and elaborate plan was presented to the state commission by President Edmund J. James of the University of Illinois. His suggestion, similar to that of the commission's, was to have chief celebrations in Springfield, at the University of Illinois, which completes its fiftieth year of organization in 1918, and in Chicago. Lesser celebrations are suggested for the county seats.

The centennial commission as organized in 1914 was as follows:

President—C. S. Hearn, Quincy.
Secretary—Jessie Palmer Webber, Springfield.
Hugh S. Magill, Jr., Princeton; Kent E. Keller, Ava; H. W. Johnson, Ottawa; Logan Hay, Springfield; John S. Burns, Chicago; John Huston, Blandinsville; George B. Baker, Golconda; C. C. Pervier, Sheffield; James F. Morris, Springfield, E. J. James, University of Illinois; E. B. Greene, University of Illinois; J. W. Garner, University of Illinois; Otto L. Schmidt, Chicago; Gov. Edward F. Dunne, ex officio; Francis G. Blair, superintendent of public instruction, ex officio.
Clerk of the Commission—S. Leigh Call, Springfield.

ILLINOIS PRIMARY ELECTIONS.

Under act of March 9, 1910, as amended by act of June 30, 1913.

DATES OF PRIMARIES.

A primary shall be held on the second Tuesday in April in every year in which a president of the United States is to be elected, for the purpose of electing delegates and alternate delegates to national nominating conventions and for the purpose of securing an expression of the sentiment and will of the party voters with respect to candidates for nomination for the office of president of the United States. A primary shall be held on the first Wednesday after the second Tuesday in September in every year in which officers are to be voted for on the first Tuesday after the first Monday in November of such year for the nomination of candidates for such offices as are to be voted for at such November election. Whenever the term "April primaries" is used it shall be construed as referring to both the foregoing primaries.

A primary shall be held on the last Tuesday in February in each year for the nomination of such officers as are to be voted for on the first Tuesday in April of such year.

A primary shall be held on the second Tuesday in March in each year for the nomination of such officers as are to be voted for on the third Tuesday in April of such year.

A primary shall be held on the first Wednesday after the second Tuesday in September, 1914, and every two years thereafter, for the nomination of candidates for senatorial offices and for the election of senatorial committeemen.

A primary for the nomination of all other officers, nominations for which are required to be made under the provisions of the act, shall be held three weeks preceding the date of the general election for such offices, respectively.

The polls shall be open from 6 o'clock a. m. to 5 o'clock p. m.

Any person entitled to vote at such primary shall be entitled to absent himself from his work for two hours between the opening and closing of the polls without incurring loss of wages or salary, providing application shall have been made on the preceding day. The employer may specify the hours.

PETITIONS.

Petitions for nomination shall be signed:

For a state office, by not less than 1,000 nor more than 2,000 primary electors of his party.

For state senator or assemblyman, by at least one-half of 1 per cent of the qualified primary electors of his district.

For a congressional office, by at least one-half of 1 per cent of the qualified primary electors of his party in his congressional district.

For a judicial office, by at least one-half of 1 per cent of the qualified electors in the district.

For a county office, by at least one-half of 1 per cent of the qualified primary electors of his party cast at the last preceding general election in his county; if for the nomination for county commissioner of Cook county, then by at least one-half of 1 per cent of the qualified primary electors of his party in his county in the division in which such person is a candidate for nomination.

For a city or village office, to be filled by the electors of the entire village, by at least one-half of 1 per cent of the qualified primary electors of his party in his city or village; if for alderman, by at least one-half of 1 per cent of the voters of his party in his ward.

For a senatorial committeeman, by at least ten of the primary electors of his party of the county where the senatorial district is co-extensive with one county or is composed of more than one county; but in case the senatorial district is wholly within the territorial limits of one county, or partly within the territorial limits of one county and partly within the territorial limits of another county, then such petition shall be signed by at least ten of the primary electors of his party of his senatorial district.

For state central committeeman, by at least 100 of the primary electors of his party of his congressional district.

For a candidate for trustee of a sanitary district, by at least one-half of 1 per cent of the primary electors of his party from such sanitary district.

For a candidate for clerk of the Appellate court, by at least one-half of 1 per cent of the primary electors of his party of the district.

For any other office, by at least ten primary electors of his party of the district or division for which nomination is made.

CANDIDATE FOR PRESIDENT OR SENATOR.

Any candidate for president of the United States or for United States senator may have his name printed upon the primary ballot of his political party by filing in the office of the secretary of state not more than sixty days and not less than thirty days prior to the date of the April primary, in any year, a petition signed by not less than 1,000 nor more than 2,000 primary electors of the party of which he is a candidate. Provided, That the vote for president of the United States shall be for the sole purpose of securing an expression of the sentiment and will of the party voters with respect to candidates for nomination, and the vote of the state at large shall be taken and considered as advisory to the delegates and alternates at large to the national conventions of the respective political parties; and the vote of the respective congressional districts shall be taken and considered as advisory to the delegates and alternates of the congressional districts to the national conventions of the respective political parties.

DELEGATES TO NATIONAL CONVENTIONS.

Each person seeking to be elected as delegate or alternate delegate to the national nominating convention of his party shall file, along with his nominating petition, a statement in writing signed by him in which he shall state the name of the candidate of his choice for nomination for president of the United States, or, in lieu thereof, may file a statement to the effect that he has no preference. Any candidate for president for whom a preference is stated by any candidate for delegate or alternate delegate to a nominating convention, may, at any time after the filing of such petition and before the name of such candidate is certified to the various county clerks for printing, file in the office of the secretary of state an instrument in writing disavowing the candidacy of the person who has so filed a nominating petition, and in case such candidate for president shall disavow the candidacy of the candidate for delegate or alternate delegate, the name of such candidate shall not be certified to the various county clerks for printing upon the official primary ballot.

CONVENTIONS.

On the first Monday after the April primary the county central committee of each political party shall meet at the county seat and organize, such meeting to be called the county convention. The county convention of each political party shall choose delegates to the congressional and state conventions of its party. Only precinct committeemen residing within a congressional district shall take part in the selection of delegates to a congressional convention. Each delegate to the county convention shall have one vote and one additional vote for each fifty or major fraction thereof of his party as cast in his precinct at the last general election.

All congressional conventions shall be held on the first Wednesday after the first Monday next succeeding the April primary. The congressional convention of each political party shall have power to select delegates to national nominating convention and to recommend to the state convention of its party the nomination of candidate or candidates from such congressional district for elector or electors of president and vice-president of the United States.

All state conventions shall be held on the first Friday after the first Monday next succeeding the April primary. The state convention of each political party shall have power to make nominations of candidates for the electors of president and vice-president of the United States and for trustees of the University of Illinois, to adopt any party platform and to select delegates and alternates to the national nominating conventions.

GOVERNMENT OF ILLINOIS.

Legislative power is vested in a general assembly, consisting of a senate and house of representatives, both elected by the people. The state is divided into fifty-one senatorial districts, each of which elects a senator and three representatives. The general assembly makes laws and appropriates money for the government of the state and in general stands in the same relation to the state as congress does to all the states as a whole. The powers and duties of the chief executive officers are as follows:

Governor—The governor is vested with the chief executive power of the state. He is the commander in chief of the military and naval forces and may call out the militia to maintain the peace. He is required to inform the general assembly, by message, of the condition of affairs of the state and to recommend needed legislation. He may, by proclamation, call a special session of the assembly or adjourn it in case of disagreement between the two houses. He has the power to appoint certain officers and during a recess of the senate may fill vacancies or remove certain officers and may call special elections to fill vacancies in certain offices. He may make requisitions upon the governors of other states for the return of fugitives from justice or offer rewards for the arrest of offenders against the laws of the state. He exercises a general supervision over the penitentiaries and may grant reprieves, commutations and pardons and may restore the rights of citizenship to ex-convicts. He may approve acts of the legislature and exercise the veto power.

Lieutenant-Governor—This officer is ex-officio president of the senate and has the power to cast the deciding vote in case of a tie. In case of the death, conviction on impeachment, failure to qualify, resignation, absence from the state or other disability on the part of the governor, the lieutenant-governor succeeds to the office to the close of the term.

Secretary of State—The secretary of state is charged with the safekeeping of the original laws and resolutions of the general assembly; with all books, bills and documents deposited with him by either house, and with all bonds, records and papers filed in his office. He keeps a record of the official acts of the governor; furnishes certified copies of the same to the assembly on request and certified copies of any of the records of his office on the payment of the statutory fees. He countersigns and affixes the seal of the state to all proclamations and commissions issued by the governor; issues licenses for incorporations and certificates of organization to cities and villages and incorporated towns. He has charge of most of the buildings and grounds belonging to the state in Springfield, furnishes supplies for the general assembly and supervises the printing and distribution of all the public documents of the state. He calls the house of representatives to order at the beginning of each general assembly and presides over the same until the election of a speaker. He is the keeper of the great seal of the state and is the custodian and sealer of weights and measures.

Auditor—The auditor is required to keep all the accounts of the state; to audit the accounts of all officers or other persons authorized to receive moneys from the state treasury; to personally sign all warrants drawn on the treasury; to institute suits wherein the state is a plaintiff, and to make a biennial report of the business of his office to the governor. With the governor and treasurer he determines the state tax rate. He exercises a general supervision over state banks, building, loan and homestead associations.

State Treasurer—The state treasurer is custodian of the revenues and public moneys of the state. He must make monthly settlements with the auditor and a biennial report to the governor.

Superintendent of Public Instruction—The superintendent exercises a general supervision over all the public schools of the state. He is the general and legal adviser of the county superintendents and must report biennially to the governor the general condition of all the schools of the state, the amount raised by taxation for school purposes and the manner of its expenditure and the general condition of all the school funds. He may grant state certificates to teachers or cause them to be withheld and must visit charitable institutions which are educational in character.

Attorney-General—It is the duty of the attorney-general to represent the state in the Supreme court in all cases in which the state is interested; to act as counsel for all state officials; to be the legal adviser of the governor and other state officers in matters relating to their official duties, and, on request, to furnish them, as well as either branch of the general assembly, with written opinions upon constitutional or legal questions.

ILLINOIS SUFFRAGE LAW CONSTITUTIONAL.

The Illinois woman's suffrage act of 1913 was declared constitutional by the state Supreme court, the decision of which was handed down June 13, 1914. The court was divided in its opinion, four voting to uphold the validity of the law and three dissenting. Justice Frank K. Dunn of Charleston wrote the majority opinion, in which he was joined by Justice James H. Cartwright of Oregon, Justice Orrin N. Carter of Chicago and Justice Alonzo K. Vickers of East St. Louis, all republicans. The dissenting opinions were filed by Justice George A. Cooke of Aledo, Justice Charles C. Craig of Galesburg and Justice William M. Farmer of Vandalia, all democrats. The decision came in the suit filed by William J. Scown in the Superior court in Chicago. As a taxpayer he demanded that the election commissioners of Chicago be forbidden to incur expense in providing facilities for women voting at the February primaries in 1914 on the ground that the suffrage act of 1913 was unconstitutional. The bill was dismissed for want of equity by the Superior court chancellor, after which an appeal was taken to the state Supreme court. Counsel for Mr. Scown contended that the act was in effect an amendment to the state constitution and as such could not be sanctioned. The point was also raised that the suffrage act really amended the general election law, although no reference was made in its title to its amendatory effect as required by law.

These arguments were overruled by the majority opinion, which was that the right of women to vote for all offices not established by the state constitution had been determined in principle by the decision handed down thirty years ago in the case of Plummer vs. Yost, which involved the right of women to vote for school officers.

Commissioners, City Districts—Peter Reinberg, D.; Frank Ragen, D.; Joseph M. Fitzgerald, D.; Bartley Burg, D.; Daniel Moriarty, D.; Albert Nowak, D.; Daniel Ryan, D.; Thomas Kasperski, D.; Owen O'Malley, D.; William D. Scott, D. Country districts—William Busse, R.; Joseph Carolan, R.; Dudley D. Pierson, R.; George A. Miller, R.; William H. McLean, R. Room 537 courthouse.
Committee Clerk—Peter Ellert, 527 courthouse.
Meetings—The regular meetings of the board of commissioners are held on the first Monday of December, January, February, March, June and September of each year.
Duties—The commissioners are charged with the management of the county affairs of Cook county, as provided by law, having the same powers as the boards of supervisors in other counties. They make all appropriations and contracts and authorize all expenditures. The president appoints, with the approval of the board, the superintendent of public service and other officers and employes whose election or appointment is not otherwise provided for by law.

COUNTY CLERK'S OFFICE.

Courthouse, 2d floor, south end.

County Clerk—Robert M. Sweitzer, D.
Chief Deputy—John H. Mack.
Chief Clerk—Al F. Gorman.
Chief Election Department—Daniel Herlihy.
Duties—The county clerk is clerk of the county board and ex officio comptroller of county financial affairs. As such he has charge of all deeds, mortgages, contracts, bonds, notes and similar papers belonging to the county, settles all accounts, keeps books showing appropriations and expenditures, makes out report for fiscal year and submits estimates for the expenses of all the departments of the county organization.

CHICAGO SCHOOL CENSUS OF MAY 4, 1914.

Taken under the supervision of William L. Bodine for the board of education.

TOTAL POPULATION.

The biennial school census of Chicago taken as of May 4, 1914, included adults as well as minors and showed that the total population of the city at that time was 2,437,526. This figure and the other statistics given herewith may be accepted as correct, Mr. Bodine and his assistants having verified it by comparison with the rate of growth shown by the federal census of 1910 and in various other ways.

OCCUPATIONAL POPULATION OF LOOP DISTRICT.

Realizing the public interest in the loop district, with its problem of transportation and congested population, school census enumerators visited the skyscrapers and all buildings in that portion of the 1st ward bounded by Polk street on the south, by the lake on the east and by the river on the north and west. It is generally known as the "loop district"—the business heart of Chicago. It was found that the district in May, 1914, contained 13,602 tenants in buildings and that 174,680 males and 78,308 females—a total of 252,988—constituted the total occupational population in this busiest spot in the life of Chicago. This new feature of the census presents the first complete and up to date statistics on this subject—canvassed personally by school census enumerators and verified by employers and managers. These are not the residents of the

district. They are employed, however, or have occupations, every day, within the loop. The apportionment of this occupational population in the loop portion of the 1st ward is as follows:

Precinct.	Male.	Female.	21 and over.	14 to 16.	16 to 21.

SUBURBANITES WITH OCCUPATIONS IN CHICAGO.

Thousands of men and women whose daily vocational life is spent in Chicago live in the suburbs within the ten to twenty mile zone. Maywood and Oak Park are just over the border line. Evanston, Wilmette, Berwyn, Riverside, La Grange, Hinsdale, Western Springs, Blue Island, Harvey and other adjacent towns are residential preferences for the suburbanite whose daily employment is in Chicago.

With the co-operation of the railway companies, the surface lines and elevated railway companies, it was officially ascertained by the director of the school census, on the basis of sales of tickets within this zone (commutation and monthly ride tickets and individual fares) and estimates by ticket agents of daily patrons who had occupations in the city, that 95,798 persons could be classified as the portion of the occupational population of Chicago that lived in the immediate vicinity of the city. This does not include the total population of the suburbs named, but merely that portion of their townspeople who earn their livelihood in Chicago.

BIRTHS AND DEATHS.

The births reported in 1912 were 43,010; in 1913 the number was 50,044, and in 1914 (four months), 19,785, a total of 112,839 births reported from January, 1912, to May 4, 1914. The total deaths in the city (all ages) during the comparative period were 82,158, leaving an excess of 30,681 births reported during the time named.

EPILEPTICS, CRIPPLES, DEAF AND DUMB, BLIND.

May 4, 1914, there were in Chicago, according to the school census, 301 epileptics under 21 years of age; 692 cripples, 201 of whom were eligible for transportation to crippled children's centers; 570 deaf and 218 mute children and 225 blind children or children having visual defects leading to blindness.

ILLITERATE MINORS.

The number of illiterate minors in Chicago, more than 16 and under 21 years, was 636 May 4, 1914.

TEACHERS IN CHICAGO SCHOOLS.

The number of teachers in Chicago May 4, 1914, was: Public schools, 7,544 (743 men and 6,796 women); private parochial schools, 1,833 (244 men and 1,639 women).

BUSINESS COLLEGES, ETC.

In the business colleges, private law, medical and other professional and technical educational institutions there were May 4, 1914, 30,108 pupils and 1,627 teachers, of whom 994 were men and 633 women.

John Stone was executed publicly on the prairie on the south side. William Jackson and Albert Staub were also executed publicly, but on the west side. After that executions were private and took place in the courthouse until 1878, since which time they have taken place in the county jail on the north side. Rafferty was hanged in Waukegan for murder in Chicago. All the executions have been on Fridays except those of Sylvestri, Gilardo, Azzaro and Zephyr Davis, which occurred on Saturdays.

SUICIDE OF SECRETARY OF STATE WOODS.

Harry Woods, secretary of state of Illinois, committed suicide at his residence in Springfield, Ill., Oct. 11, 1914. His body was found on the following day lying in the garage in the rear of the house. He had shot himself in the head with a revolver. Mr. Woods was elected on the democratic ticket in November, 1912, after he had been nominated at the primaries without the support of any organization. His home was in Chicago, where he was an operator on the board of trade. He was born in Canada in 1864 and had lived in Cook county for thirty-four years. In the state primary of Sept. 10, 1914, he was a candidate for United States senator, but received only a small vote and his suicide a month later was attributed to disappointment at the result of the election.

Louis G. Stevenson of Bloomington, son of the late Adlai E. Stevenson, was appointed by Gov. Dunne Oct. 13 to serve out the unexpired term of Secretary Woods.

The original town of Chicago in 1835 extended from Chicago avenue on the north to 12th street on the south and from Halsted street on the west to Lake Michigan on the east. When the city was incorporated in 1837 the city limits were as follows: From Lake Michigan west along Center street to North Clark street, south to North avenue, west to Wood street, south to 22d street and east to the lake. The largest addition to the area of the city was made in 1889, when Lake View, Jefferson, Hyde Park and Lake were annexed. Edison Park was annexed Nov. 8, 1910. Morgan Park was annexed April 7, 1914.

CHICAGO STREET GRADES.

The grade of the streets in the central portion of Chicago has been raised three times. In 1855 it was raised from 2½ to 3 feet above the then existing surface, and it was again raised by about the same amount in 1857 and 1872, making the present level fourteen feet above "city datum," which is the low-water mark of the lake in 1847.

CHICAGO INTERURBAN TROLLEY LINES.

Following are the principal electric interurban lines with terminals in or near Chicago, with the names of the principal points reached by them:

Chicago & Milwaukee—Terminal in Evanston; makes connection with Northwestern elevated and surface lines to Chicago; runs north to Waukegan, Kenosha, Racine and Milwaukee; branch from Lake Bluff to Libertyville and Rockefeller. Electric lines run from Milwaukee to Burlington, to East Troy, to Waukesha, Pewaukee, Oconomowoc and Watertown and to Sheboygan and Elkhart lake.

Chicago & Joliet—Terminal at 48th street and Archer avenue; runs southwest to Lockport and Joliet; connects at Joliet with lines for Aurora, Chicago Heights, Morris, Seneca, Ottawa, Starved Rock, Utica, LaSalle, Peru, Spring Valley, Bureau and Princeton. From Ottawa a line runs to Streator.

Aurora, Elgin & Chicago—Terminal at 256 5th avenue; runs in a westerly direction to Wheaton, where one branch runs northwest to Elgin and one southwest to Aurora; at Eola Junction on the latter branch a line runs to Batavia. Aurora and Elgin are connected by a line which runs as far south as Yorkville and as far north as Carpenterville. At Elgin connection is made with a line running to Belvidere and Rockford and from the latter place a line runs west to Freeport and another north to Beloit and Janesville. At Aurora a line runs northwest to DeKalb. The Aurora, Elgin & Chicago road is operated on the third rail system.

Chicago & Southern Traction—Terminal at 79th and Halsted streets; runs in a southeasterly direction to Chicago Heights and Kankakee.

Chicago, Lake Shore & South Bend—Terminal at Pullman; runs in an easterly direction to Michigan City and South Bend; connects at South Bend with interurban lines reaching various points in Michigan and Indiana.

*Estimated from United States government census.

In 1913 the total amount of water pumped was 210,919,000,000 gallons.

The pumping stations, with the year of construction of each, follow:

Chicago avenue.....1854	Washington Heights..1892
Twenty-second-st. ..1875	Norwood Park.....1897
Harrison street.....1889	Rogers Park.....1899
Lake View.....1892	Central Park.....1900
Fourteenth street....1892	Springfield avenue...1901
Sixty-eighth street..1892	Roseland 1910

The total daily capacity of the waterworks in gallons is 771,150,000.

Other statistics: Number of taps, 283,558; meters in use, 16,969; mileage of water pipe, 2,404.

LAKE TUNNELS.

One 5 foot tunnel from two mile crib to Chicago avenue pumping station; built 1867; cost $464,866.05.

One 7 foot tunnel from two mile crib to Chicago avenue pumping station; built 1874; cost $415,709.36.

One 7 foot tunnel from two mile crib to Chicago avenue pumping station; built 1887-1895; cost $342,786.64.

One 14 foot tunnel lake extension of Chicago avenue and Blue Island avenue system; begun 1911; cost $7,530.28.

One 8 foot tunnel from four mile crib to 14th street pumping station; built 1892; cost $1,104,744.12.

One 10 foot tunnel from Carter H. Harrison crib to foot of Oak street; built 1898; cost $677,577.55.

One 7 foot tunnel from Lake View crib to Lake View pumping station; built 1896; cost $701,792.45.

One 7 foot tunnel from Hyde Park crib to 68th street pumping station; built 1898; cost $771,556.07.

One 14 foot tunnel from Hyde Park to 73d street and Railroad avenue; built 1912; cost $1,793,860.10.

LAND TUNNELS.

One 7 foot tunnel from Chicago avenue pumping station to 22d street pumping station; built 1874; cost $542,912.63.

One 7 foot tunnel from Park row shaft to foot of Peck place and thence to Harrison street pumping station; built 1891; cost $279,848.78.

One 6 foot connecting tunnel in Jefferson street from Van Buren to Harrison; built 1891; cost $15,968.17.

One 10 foot tunnel foot of Oak street to Green street and Grand avenue, and two 8 foot tunnels from that point to Central Park avenue and Springfield avenue pumping stations, respectively; built 1900; cost, $2,121,525.02.

One 7 foot tunnel connecting above 10 foot tunnel with Chicago avenue pumping station (remodeled); built 1898; cost $42,436.45.

One 9 foot tunnel from 104th street and Stewart avenue to 73d and State streets; one 12 foot tunnel in 73d street from State street to Yates avenue, and one 14 foot tunnel from Yates avenue to Railroad avenue; built 1912; cost $1,647,591.18.

One 7 foot tunnel in Polk street connecting Peck place shaft and Jefferson street shaft; built 1907; cost $181,929.54.

One 8 foot tunnel from Chicago avenue to 22d street and Ashland avenue; built 1911; cost $833,267.77.

One 9 foot tunnel 73d and State streets to 75th street and Western avenue; in course of construction.

CHICAGO'S BRIDGE SYSTEM.

The first ferry across the river was established in 1829, where the Lake street bridge now is. In 1833 a floating bridge of logs was in operation just north of the present Randolph street bridge. A foot bridge over the north branch was built in 1832 at Kinzie street. The first drawbridge over the main branch of the river was placed at Dearborn street in 1834. In 1854 a pivot bridge was built at Clark street. These and other bridges of that time were built by the persons most directly benefited by them. It was not until 1857 that a bridge was built entirely at the city's expense. This was the structure over the south branch at Madison street. It cost $30,000. Until 1872 the swing bridges were turned by hand, but in the year named steam power was installed on the Dearborn street structure and later on most of the other bridges in the downtown section were similarly equipped. In 1895 the Rush, Lake and Van Buren street bridges were operated by electric motors. The last named structure, which was opened for traffic in that year, was the first of the Scherzer rolling type. The Halsted street lift bridge, the first and only one of its kind, was opened in 1894 and was operated by steam. It cost the city $242,880.

Of the bridges operated by the city thirty-five are operated by electricity and fourteen by hand power. Fourteen are bascule bridges of various types, twelve are rolling lift bridges, one is a vertical lift bridge and the others are swing bridges.

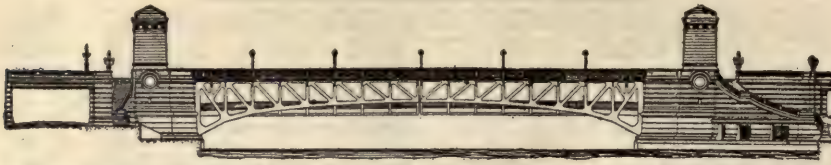
BOULEVARD CONNECTING LINK PROJECT.



DOUBLE DECKED BASCULE BRIDGE TO CONNECT NORTH AND SOUTH SIDE BOULEVARDS.

Plans for properly connecting the south and north side boulevard systems of Chicago by means of widening Michigan avenue and a new bridge over the river began to be studied seriously in 1905 by committees of various public bodies, such as the city council, real estate boards, park boards and by architects and other private individuals. In 1906, 1907 and 1908 Daniel H. Burnham and Edward H. Bennett, architects, working under the direction of the Commercial club, prepared the famous "Plan of Chicago," of which one feature was the Michigan avenue improvement project. Nov. 1, 1909, the Chicago Plan commission, representing the official administration and the public generally, was created by the city council in response to an official request from Mayor Fred A. Busse, who appointed its members. It held its first meeting Nov. 4 in that year and elected Charles H. Wacker as president. The duty of the commission was to carry out as far as practicable from time to time the ideas formulated in the Commercial club, or as it is often called, the Burnham plan.

Study of the Michigan avenue project was begun at once by the commission and after a long series of meetings and conferences it adopted, July 10, 1911, a plan which was presented two days later to the board of local improvements for its consideration. June 2, 1913, that body submitted to the city council an ordinance for carrying the plan into effect and July 14 the ordinance was passed. Some of the property owners affected began proceedings attacking the validity of the ordinance and in December the State Supreme court made a ruling in which it declared that the ordinance was invalid because of faulty description of land involved in the project. A revised ordinance, correcting the errors pointed out by the court, was introduced in the council and finally passed by that body March 23, 1914, without opposition.

The ordinance as passed calls for the improvement of a thoroughfare extending from Randolph street northward along Michigan avenue, over the river, thence over private property and along Pine street and Lincoln parkway to Chicago avenue. Michigan avenue is to be widened to 127.5 feet and that part of the new thoroughfare north of the river is to be 141 feet wide. The improvement is to consist of a two-level roadway comprising an upper level extending the entire distance between Randolph street and Chicago avenue and supported between Lake street and Grand avenue upon an elevated steel and concrete structure, and a lower level extending from Lake street to Grand avenue. The bridge is to be double decked and of the bascule type, the upper level connecting the parts of the upper level of the thoroughfare and the lower level connecting the portions of the lower level of the thoroughfare north and south of the river. The upper level of the bridge is to be ninety feet wide and the lower level sixty feet. The structure is to have a clear span between the abutments of 220 feet. The upper level is to be used by pleasure vehicles and the lower level is to carry heavy traffic.

The total cost of the entire improvement, including land to be taken, is estimated at about $7,000,000. The cost of the bridge, elevated structure, walls and excavations, pavements lighting and bridge machinery alone, without land damages, is estimated at $2,298,247.

GENERAL INFORMATION.

The Chicago public library is a free public institution, established under the Illinois library law of 1872. It derives its revenue from an annual library tax of approximately four-tenths of a mill. A board of directors of nine members is appointed by the mayor, three annually for terms of three years. The library occupies the site formerly known as Dearborn park, bounded by Michigan avenue, Washington street, Garland court and Randolph street. The cost of the building was about $2,000,000, including the furniture, book stacks and machinery. There are thirty-two branches and 111 delivery stations.

The right of drawing books from the public library belongs to all who reside in the city of Chicago, and also to those who make their homes in the suburbs within the limits of Cook county and are regularly employed in the city. In order to become a book borrower it is necessary only to file an application giving the name and residence of the applicant and bearing the signature of a second person, who must be an actual resident of the city, appearing as such in the latest city directory. This person becomes the guarantor to the library for the proper observance of the library regulations on the part of the applicant. These regulations merely provide that books drawn for home use must be returned within the stated period and must not be defaced or injured.

At the close of May 31, 1914, the public library contained 571,358 volumes. The aggregate circulation for the year ending May 31, 1914, was 3,428,638 volumes, which does not include the use of books kept on the open shelves at the main library or its branches or the periodicals or newspapers used in the reading rooms. This use would bring the total book issue to 4,500,000.

Ex officio: Carter H. Harrison, mayor; John E. Traeger, city comptroller; John Barton Payne, president south park commissioners; Joseph Donnersberger, auditor south park commissioners.

The Art Institute of Chicago was incorporated May 24, 1879, for the "founding and maintenance of schools of art and design, the formation and exhibition of collections of objects of art and the cultivation and extension of the arts of design by any appropriate means." The museum building upon the lake front, first occupied in 1893, has never been closed for a day. It is open to the public every weekday from 9 to 6, Sundays from 12:15 to 10 p. m. Admission is free to members and their families at all times, and free to all upon Wednesdays, Saturdays, Sundays and legal holidays. Upon other days the entrance fee is 25 cents.

All friends of art are invited to become members. Annual members pay a fee of $10 a year. Life members pay $100 and are thenceforth exempt from dues. Governing members are elected by the trustees and pay $100 upon election and $25 a year thereafter. Upon the payment of $400 governing members become governing life members and are thenceforth exempt from dues. All receipts from life memberships are invested and the income only expended. All members are entitled, with their families and visiting friends, to admission to all exhibitions, receptions, public lectures and entertainments given by the Art institute and to the use of the Ryerson reference library of art. Visitors desiring to see the collections under guidance may make appointments with the museum instructors at the office of the director.

MUSEUM.

The Art museum now ranks among the first three or four in the country. It contains excellent examples of the old masters and of the modern painters. There is also a large and comprehensive collection of sculptures, including reproductions of the work of the greatest sculptors, ancient and modern. There is an extensive collection of architectural casts. Other fields of art are represented by collections of etchings, engravings, textiles, oriental art, Egyptian and classical antiquities, etc. There is a constant succession of passing exhibitions, thirty or more in a year. All students enjoy the full use of the collections and the library. The number of visitors to the museum during the year ended June 1, 1914, was 861,267.

SCHOOL.

The school of instruction in the practice and theory of art includes departments of painting, sculpture, decorative designing, illustration, architecture and normal instruction. There are day and evening classes for beginners and for advanced pupils and special classes on Saturdays. The instructors number about eighty and the pupils average about 3,000 a year. The principle upon which the school is founded is to maintain in the highest efficiency the severe practice of academic drawing and painting, from life, from the antique and from objects, and around this practice, as a living stem, to group the various departments of art education.

The school is conducted upon the most modern methods and has grown to be the most comprehensive and probably the largest fine arts school in the United States. Constant communication and interchange are kept up with European art centers and distinguished teachers from a distance are called in from time to time. Students may enter at any time. The tuition rates are as follows:

Day School—Registration fee, $5; full time for full term of twelve weeks, $30; four weeks, $12; four days a week, full term, $27; four weeks, $11; three days a week, full term, $24; four weeks, $9; two days a week, full term, $18; four weeks, $7; one day a week, full term, $12; four weeks, $5.

CHICAGO ACADEMY OF FINE ARTS.

81 East Madison street.

President—Carl N. Werntz.
Vice-President—M. M. Newman.
Secretary—E. M. Ashcraft, Jr.

The Chicago Academy of Fine Arts was founded in October, 1902. Its object is to popularize art and art education through the more practical channels of illustration, cartooning, commercial illustration, design, normal art training, crafts, miniature, etc. It was the first school to teach commercial art, craftswork, miniature and cartooning in exclusive classes. The average attendance is 700 pupils per year, with twenty instructors, the faculty including well known local artists. There are day and evening classes and the rates of tuition are as follows: Afternoons only, $26 for three months; mornings only, $31 for three months; all day classes, $150 per season of ten months; evening classes, $23 for ten months, three nights weekly; Sunday class, $23 for ten months; Saturday classes, for school teachers, high school students and children, $6 for three months; all classes limited.

MUSIC IN CHICAGO.

CHICAGO SYMPHONY ORCHESTRA.

Founded by Theodore Thomas.

The Theodore Thomas orchestra was organized in Chicago in 1890-1891 by a number of men interested in promoting the highest class of instrumental music. The Orchestral association was incorporated Dec. 16, 1890, and Theodore Thomas, famous for many years as a conductor, was engaged to lead the new organization, which was then named the Chicago orchestra. The preparations were completed in 1891 and the first public rehearsal was given at the Auditorium Friday afternoon, Oct. 16, of that year. Financially the result of the first season was discouraging, the fifty or more gentlemen guaranteeing the expenses being compelled to meet a deficit of about $53,000. Receipts, however, continued to increase from year to year until the orchestra was finally placed on a permanent basis. This was accomplished when Orchestra hall, erected by subscriptions from more than 8,000 persons, was erected at 220 South Michigan avenue, and the organization was provided with a home of its own. The first concert there was given Wednesday evening, Dec. 14, 1904. Theodore Thomas died Jan. 4, 1905, and the orchestra, which until then had been called the Chicago orchestra, was named the Theodore Thomas orchestra. Feb. 24, 1913, the title was changed to the Chicago Symphony orchestra (founded by Theodore Thomas). Frederick Stock, after the death of Mr. Thomas, was made conductor, a position he still holds. The plan of giving two performances a week—a public rehearsal on Friday afternoon and a concert on Saturday evening—has been followed from the beginning. The season consists of twenty-eight weeks, beginning in October and ending in April.

The first officers of the Orchestral association were: N. K. Fairbank, president; C. Norman Fay, vice-president; P. A. McEwan, treasurer and secretary; Millward Adams, manager.

FIELD MUSEUM OF NATURAL HISTORY.

President—Stanley Field.
Vice-Presidents—Martin A. Ryerson, Watson F. Blair.
Director of the Museum and Secretary—Frederick J. V. Skiff.
Treasurer—Solomon A. Smith.
Assistant Secretary and Recorder—D. C. Davies.

The Field Museum of Natural History, established in 1894 at the close of the World's Columbian exposition of 1893, occupies the temporary building erected for fine arts in Jackson park, the exposition site. The founding of a scientific institution of this character in Chicago was made possible by the gift of $1,000,000 by Marshall Field, who on his death (Jan. 16, 1906) bequeathed the institution a further $8,000,000, $4,000,000 for the erection of a permanent building and $4,600,000 for endowment. In addition $800,000 has been donated by other individuals and there is an annual income from other sources than endowment of about $25,000. The citizens of Chicago have confirmed legislative provision for the levy of a tax for the maintenance of the museum when a new building shall have been erected, which it is estimated will eventually produce approximately $100,000 per annum.

The nucleus of the exhibition material was gathered by gift and purchase at the World's Columbian exposition. Most of this material, however, has since been rearranged, readapted or discarded. Several departments created at the organization have been abandoned, until, after the lapse of twenty years and the expenditure of approximately $6,000,000, the museum is now divided into four departments—namely, anthropology, botany, geology and zoology. Many expeditions for the purpose of obtaining study, exhibition and exchange material and data have been dispatched to all parts of North America and to different countries. The results of these expeditions, investigations and researches have been published by the museum from time to time, which publications have been distributed to kindred societies and institutions both at home and abroad. Two courses of free lectures are given annually. An important contribution of $250,000 by Norman W. Harris was announced in December, 1911, for the extension of the work of the museum into the public schools of Chicago. The plans for carrying out Mr. Harris' wishes were placed in operation in the spring of 1913. The museum has a working library of about 63,000 titles, an extensive exchange system, fully equipped departmental laboratories, a herbarium of 286,000 sheets, study collections in mammals and birds reaching many thousand specimens, a large two story taxidermy section, a well equipped printing shop, illustration studios and assaying and lapidary rooms. In North American ethnology, in the world's mineralogy, in economic botany the museum is particularly prominent, while its series of mounted mammals furnishes examples of advanced museum methods. The present main building covers nine acres and is open to the public on all days except Christmas and Thanksgiving. An admission fee of 25 cents is charged except on Saturdays and Sundays, when admission is free to all. Students, scholars and teachers are admitted free on all days between 9 a. m. and 4 p. m.

The museum is incorporated under state law and the administrative control rests in a board of trustees with president, secretary, etc. The executive of the museum is the director, under whom there are four head curators with divisional assistant curators, preparators, etc. The entire museum records, the accessions system, the historical files, publications and supplies are in charge of a recorder.

FREIGHT TUNNELS UNDER CHICAGO.

Underlying nearly all the streets in the central business section of Chicago are sixty miles of tunnels connecting the freight terminals of the railroads with commercial houses. The tunnels are provided with narrow-gauge (2 ft.) electric railroads equipped with electric locomotives and steel cars. These are used chiefly in transporting goods to and from railroad freight yards and in carrying coal to business houses. Excavated and waste material from new buildings is removed through the tunnels and disposed of, permitting the work of construction to go on without interruption. In 1914 the Chicago Utilities company, which now owns the tunnel system, had in operation 117 electric motors and 3,000 coal, freight and other cars. In addition it had charge of some 24,000 telephones.

The original franchise for the tunnel system was granted Feb. 20, 1899, to the Illinois Telephone and Telegraph company, which was organized in 1908 by A. G. Wheeler and associates, for the purpose of establishing an independent telephone system. By an amendatory ordinance granted July 15, 1903, the company was given the right to construct and operate a subway system for the transportation of mail matter, newspapers, packages and freight generally. The tunnels are 19 feet below city datum or 33 feet below the surface of the streets, the trunk line tunnels being limited in size to 12 feet 9 inches in width by 14 feet in height, and the smaller ones to 6 feet in width and 7 feet 6 inches in height. Part of the tunnel system was put into operation Aug. 15, 1906, but the whole of it was not in use until Sept. 1, 1907.

The Illinois Telephone and Telegraph company was succeeded in October, 1903, by the Illinois Tunnel company, which was followed in November, 1904, by the Chicago Subway company. The property of the Subway company and underlying concerns was acquired in April, 1912, by the Chicago Utilities company, the authorized capital stock of which is $53,000,000.

THE RUFUS F. DAWES HOTEL.

The Rufus F. Dawes hotel at 18 South Peoria street, Chicago, was opened for business Jan. 1, 1914. It was built at a cost of about $100,000 by Charles G. Dawes as a memorial to his son, Rufus Fearing Dawes, who was accidentally drowned in Lake Geneva, Wis., Sept. 5, 1912, at the age of 21. Its purpose is to provide lodging and food at a nominal cost for all men who wish to be decent citizens and who will accept work when offered. For each of the 200 beds in the ward rooms 5 cents a night is charged and for each of the 100 beds in private rooms 10 cents a night. Eight cents pays for a meal consisting of coffee, soup, doughnuts and pie. Baths are free.

HOUSE NUMBER SYSTEM IN CHICAGO.

The present house number system in Chicago was established by an ordinance passed June 22, 1908, and effective Sept. 1, 1909. This applied to all streets except those between the river, 12th street and the lake. Sept. 20, 1910, the city council passed an amendment to the ordinance making it applicable to the entire city. The change in the business district went into effect April 1, 1911. The system is laid out on two base lines, State street dividing the east and west streets and Madison street the north and south streets. Numbers are assigned on the basis of 800 to the mile or 100 to the prevailing block of 660 feet or one-eighth of a mile.

WIDTH OF TIRES REQUIRED IN CHICAGO.

The wide-tire ordinance passed by the Chicago city council Feb. 4, 1908, requires that all four-wheeled vehicles shall have tires proportionate to the load they carry, as follows:

Load.	Tires, inches.
3,000 pounds or under	1½
Between 3,000 and 4,000 pounds	2
Between 4,000 and 6,000 pounds	2½
Between 6,000 and 8,000 pounds	3¼
Between 8,000 and 10,000 pounds	3¾
Between 10,000 and 14,000 pounds	4¼
Between 14,000 and 18,000 pounds	6
Over 18,000 pounds	7

The width for two-wheeled trucks is double.

SUBSTITUTES (ELEMENTARY SCHOOLS).

Substitutes in elementary schools receive $3 per day for days of actual service.

Substitutes in manual training, household arts, physical education and in schools for the deaf in the elementary schools receive $3.50 per day for days of actual service.

Substitutes in high schools and in the Chicago normal college receive $5 or $6 per day—the rate to be determined by the superintendent.

GREAT LAKES NAVAL TRAINING STATION.

North Chicago, Ill.

The great lakes naval training station at North Chicago, Ill., was placed in commission July 1, 1911, and the work of fitting young men for service in the enlisted force of the United States navy was at once begun.

Enlistment—The term of enlistment is four years, except minors under 18 years of age, who are enlisted for the period of minority. Only such persons are enlisted as can be reasonably expected to remain in the service, and when enlisted they must serve out the term specified. The age limit is 17 to 35 years.

Physical Requirements—For a minor enlisting as an apprentice seaman the following minimum heights (barefooted) and weights (without clothes) are required:

Age.	Height.	Weight.
17	62 inches	110 pounds
18	64 inches	115 pounds
19	64 inches	120 pounds
20	64 inches	125 pounds

Any one of the following conditions will be sufficient to cause the rejection of an applicant: Feeble constitution, general poor physique or impaired general health; any disease or deformity, either congenital or acquired, that would impair efficiency; any acute disease.

Mental Requirements—Applicants for enlistment must be able to read and write English.

Other Requirements—Applicants for enlistment must be American citizens, native or naturalized. A minor must present a certificate of birth or verified written statement by his parents, or either of them, or in case of their death a similar statement by his legal guardian, showing the applicant to be of the age required by the navy regulations.

Pay—The pay of apprentice seamen is $17.60 per month. Each enlisted man is furnished with a free outfit of clothing, amounting to $60, on first enlistment.

How to Enlist—Any one who wishes to enlist in the navy should write to the bureau of navigation, navy department, Washington, D. C., stating such desire, and the bureau will immediately reply, giving the address of the nearest recruiting station, where applicants are examined physically and either accepted or rejected. The government pays the expenses from the point of enlistment to the training station, but not to the recruiting station.

There are similar training stations at Narragansett bay, R. I., and San Francisco, Cal.

POSTAL SAVINGS BANK.

The postal savings bank was opened at the main postoffice, Chicago, Aug. 1, 1911. Any one 10 years old or over may open an account. No account may be opened for less than $1, nor will fractions of a dollar be accepted for deposit. No person is permitted to deposit more than $100 in any one calendar month, nor to have a total balance to his credit at one time of more than $500, exclusive of accumulated interest.

Deposits are evidenced by postal savings certificates issued in denominations of $1, $2, $5, $10, $20, $50 and $100.

Depositors of the postal savings system by applying therefor thirty days in advance may exchange the whole or a part of their deposits on Jan. 1 or July 1 of each year for United States registered or coupon bonds in denominations of $20, $100 and $500, bearing interest at the rate of 2½ per cent per annum, payable semiannually, and redeemable at the pleasure of the United States after one year from the date of issue, both principal and interest payable twenty years from that date in United States gold coin.

Postal savings banks have also been established at the following postal stations: Armour, Auburn Park, Austin, C, Carpenter street, Chicago avenue, Chicago Lawn, Cragin, D, Dauphin Park, Douglas park, Eastside, Edgewater, Elsdon, Englewood, 51st street, Garfield park, Grand Crossing, Hawthorne, Hegewisch, Hyde Park, Irving Park, Jackson park, Jefferson, Lake View, Lincoln park, Logan square, M, McKinley park Morgan park, North Halsted, Norwood Park, Ogden park, Pilsen, Pullman, Ravenswood, Riverdale, Rogers Park, Sheridan Park, South Chicago, Stockyards, 20th street, Washington Heights, West Pullman, Wicker park.

FOUR YEAR TERMS.

Adoption of act to amend article XII. of an act to provide for the incorporation of cities and villages so as to make terms of city clerk, city treasurer and aldermen four years.

	Men.	Women.	Total.
For	81,667	30,596	112,263
Against	166,902	75,270	242,172

COOK COUNTY HOSPITAL BONDS.

Proposed issue of $4,000,000 gold bonds of Cook county for the purpose of erecting new public buildings for the Cook county hospital and for branch county hospitals in connection with the county poorhouse, and the assessing of an additional tax required to pay the principal and interest of the bonds.

	Men.	Women.	Total.

ANNEXATION OF VILLAGE OF MORGAN PARK.

	Men.	Women.	Total.
For	164,003	73,564	237,567
Against	91,639	37,311	128,950

Morgan Park cast 1,315 votes for annexation and 804 against, so the proposition carried and the village became part of Chicago. Of the affirmative vote 616 ballots were cast by men and 699 by women. Three hundred and ninety-eight men and 230 women voted against annexation.

ANNEXATION OF TOWN OF CICERO.

	Men.	Women.	Total.
For	164,380	72,483	236,863
Against	88,388	37,078	125,466

In the town of Cicero 871 men and 488 women, or a total of 1,349, voted for the proposition, while 2,287 men and 1,421 women, or a total of 3,708, voted against it. The proposition therefore failed to carry and the town of Cicero was not annexed.

COOK COUNTY PRIMARY ELECTION, SEPT. 9, 1914.

The vote given herewith includes only that for democratic and republican candidates for the principal county offices. There were practically no contests in the other parties. The vote for candidates for national and state offices will be found under "Illinois Primary Election."

INHERITANCE TAX IN ILLINOIS.

The Illinois law taxing gifts, legacies and inheritances was passed by the legislature in 1895 and amended in 1901. Its constitutionality was contested, but the United States Supreme court in a decision rendered Jan. 19, 1903, held it to be valid.

Under the provisions of this law all property, real, personal and mixed, which shall pass by will or by the intestate laws of the state from any resident of the state or any one whose property is in this state to any person or persons is subject to a tax at the following rates: When the beneficial interests to any property or income therefrom shall pass to any father, mother, husband, wife, child, brother, sister, wife or widow of the son or the husband of the daughter, or any adopted child or children, or to any lineal descendant born in lawful wedlock, the rate of tax shall be $1 on every $100 of the clear market value of such property received by each person and at the same rate for any less amount, provided that any estate which may be valued at less than $20,000 shall not be subject to any such tax; and the tax is to be levied in the above cases only upon the excess of $20,000 received by each person.

When the property passes to any uncle, aunt, niece, nephew or any lineal descendant of the same the rate shall be $2 on every $100 in excess of $2,000.

In all other cases the rate shall be as follows: On each and every $100 of the clear market value of all property and at the same rate for any less amount: On all estates of $10,000 and less, $3; on all estates of over $10,000 and not exceeding $20,000, $4; on all estates over $20,000 and not exceeding $50,000, $5, and on all estates over $50,000, $6; provided, that an estate in the above case which may be valued at a less sum than $500 shall not be subject to any tax.

WEST SIDE RAILWAY TERMINAL ORDINANCES.

Ordinances for a new union passenger station and new freight terminals on the west side were passed by the city council March 23, 1914, after many months of investigation and consideration. The measures passed by a vote of sixty-three to three, the only aldermen voting against them being Kunz, Hey and Kearns. Under the ordinances the union passenger station, to be occupied by the Pennsylvania, Burlington, Alton and St. Paul railroads, is to be located on the block bounded by Canal, Adams, Clinton and Jackson streets. Under Canal street there will be a subway connecting a large concourse on the east of that thoroughfare with the station. Sixteen passenger tracks will lead to the south and ten to the north. This part of the passenger terminal will reach practically from Carroll avenue on the north to 12th street on the south. The Pennsylvania freight houses will be located immediately north of 12th street and extend to Taylor street, while the Burlington freight houses will be between Harrison and Taylor streets and near Canal street. In exchange for rights in certain streets the railroads agreed to make improvements as follows:

Improvements.	Cost.
Viaduct, Monroe street	$100,000
Viaduct, 12th street	270,000
Viaduct, Congress street	300,000
Viaducts, 14th and 16th streets	400,000
Viaducts, Taylor, Polk, Harrison, Van Buren, Jackson, Adams, Madison, Randolph and Lake streets	1,760,000
Elevated roadway, Canal and Kinzie streets	650,000
Revamping of Canal street, Washington to 12th street	2,375,000
Total	$5,855,000

To fit in with these improvements the city agreed to the following improvements at the costs estimated:

Bridge, Monroe street	$500,000
Double decked bridge, Kinzie street	600,000
Land to widen Canal street to 100 feet	760,753
Total	$1,860,753

In addition, the roads agreed to pay $1,511,000 in cash compensation.

The total cost to the railroads of the improvements under the terminal ordinances was estimated at $65,000,000, exclusive of money previously paid for land. Coupled with the terminal ordinances was a resolution providing for the creation of an expert railway terminal commission which is to make a study of the entire terminal situation in Chicago. Of the seven members of the commission four were to be selected by the mayor and three by the citizens' terminal plan committee and the Chicago plan commission.

STREET LIGHTING IN CHICAGO.

Number of lights of specified kinds used:

In 1913 the operating cost per light for the various kinds used was as follows: Gas, $20.64; gasoline, $31.25; electric, municipal arc, $58.13 (17,493 in use); electric, municipal, series tungsten, $22.62 (3,549 in use); electric, multiple incandescent, $6 (282 in use); electric, rented, arc, $75 (1,056 in use); electric, rented tungsten, $7.25 (58 in use).

CHICAGO OUTER HARBOR PLANS.

Four outer harbor sites along Chicago's lake front were established by the city council Nov. 20, 1911. The ordinances provided for the following districts:

No. 1—From the mouth of the Chicago river north to Chicago avenue and extending one mile into Lake Michigan.

No. 2—From the mouth of the Chicago river south to Randolph street and extending one mile into the lake.

No. 3—From the south end of Grant park south to 31st street and extending one mile into the lake.

No. 4—All of the Calumet river within the city and all of Lake Calumet.

Feb. 7, 1912, the harbor and subway commission submitted to the council committee on harbors, wharves and bridges preliminary plans and drawings for the initial development of "outer harbor district No. 1." In this report the commission stated that it had proceeded on the theory that joint and parallel action by the federal government would be taken to protect the initial piers recommended by the construction of an adequate outer breakwater. The plan proposed by the commission provided for the construction of five piers extending eastward from the shore line between the mouth of the Chicago river and Chicago avenue, with a uniform length for four piers of 2,500 feet and one pier of 3,000 feet. The detailed plans were for the construction of two piers only—one for freight and one for passenger purposes. The water slips between the piers were to be 300 feet wide. The piers were to be 292 feet wide with an eighty foot roadway in the center. The outer 645 feet of the passenger pier, which was to be 3,000 feet long, was to be reserved for boats with an exclusively passenger traffic. Part of the pier was to be used for recreation purposes. The estimated cost of these two piers was $4,400,000. The plan made provision for adequate street car service.

At the election of April 3, 1912, a proposition to issue $5,000,000 in bonds for harbor construction was approved by popular vote. With plans prepared, the consent of the government secured and financial means provided, it seemed as if an actual beginning would be made in the construction of an outer harbor, but July 25, 1912, it was announced by Mayor Harrison and Corporation Counsel Sexton that the legislative act known as the O'Connor harbor law contained a "joker" in the shape of a provision prohibiting the city from purchasing or acquiring any title to property along the lake shore line where it has been filled in or where riparian or littoral rights are in dispute. Certain property which it was desired to use for harbor purposes was claimed by the Chicago Canal and Dock company, which had leased its holdings to the Pugh Terminal Warehouse company. The Pugh company was willing to treat with the city, but the corporation counsel held that the provision referred to would have to be eliminated from the act by legislative action before anything further could be done.

The work of harbor construction was therefore halted to await further legislative action. The harbor law was re-enacted by the legislature in June, 1913, in amended form, and Aug. 21 a deal was closed by the city with the Chicago Canal and Dock company for land along the lake shore between Indiana and Ohio streets on which to construct a recreation pier and wharf. The price paid was $300,000. Bids on the construction work were opened in December and the actual work of building the first pier was begun March 16, 1914.

LOCAL GOVERNMENTS WITHIN CHICAGO.

[From report of Chicago Bureau of Public Efficiency.]

There are nineteen distinct governing agencies in the territory that Chicago comprises, most of them absolutely independent of one another. They are:

City of Chicago.
Board of education.
Library board.
Municipal tuberculosis sanitarium.
Cook county.
Sanitary district of Chicago.
South park commissioners.
West Chicago park commissioners.
Lincoln park commissioners.
Ridge avenue park commissioners.
North shore park commissioners.
Calumet park commissioners.
Fernwood park commissioners.
Ridge park commissioners.
Irving park commissioners.
Northwest park commissioners.
Old Portage park commissioners.
Edison park commissioners.
West Pullman park commissioners.

The board of education, the library board and the tuberculosis sanitarium, while having their separate tax levies, are subject to a degree to control by the mayor and city council. The other bodies named are independent of one another. The state public utilities commission, though not a taxing body, is, in a sense, another governmental agency in the city.

The valuation since 1875 is the equalized valuation fixed by the state board of equalization. From 1867 to 1875 the valuation was made by the city for the city tax. From 1898 to 1908, inclusive, the assessed value was one-fifth of the actual value. In 1909 the rate was fixed at one-third. The total valuation includes capital stock and railroads.

For the first hour..... 2.00
For each additional hour or part thereof, at the rate of $1.50 an hour.

6. In the case of any vehicle described in this section being engaged by the hour and discharged at a distance from the place where it was engaged, the driver shall have the right to charge for the time necessary to return to such place.

Hiring by the Hour—Must be so specified at the time of hiring. In all cases where the hiring of any vehicle licensed under the provisions of this article is not at the time of such hiring specified by the person hiring same to be by the hour, it shall be deemed to be by the mile, and for any detention exceeding a total period of fifteen minutes during the whole period of such hiring, when so working by the mile, the driver may demand pay for such period of detention at the rate of $1.50 per hour in addition to the rate per mile.

Baggage—Every passenger upon any vehicle licensed under the provisions of this article shall be allowed to have conveyed with him upon such vehicle without charge therefor his ordinary light traveling baggage in an amount not to exceed in weight seventy-five pounds.

Lost Baggage—Whenever any package, article of baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, the driver of such vehicle shall upon the discovery of such package, baggage or goods forthwith deliver the same to the board of inspectors of passenger vehicles.

TAXICABS.

No person, firm or corporation owning, operating or controlling any taxicab shall let the same for hire or reward for a fee or charge to be fixed and determined by the hour or fraction thereof, but the fare demanded and received shall (excepting for waiting time as herein provided for) be computed by the distance traveled and shall not exceed the following rates:

For the first one-half mile or fraction thereof, for one person.....$0.50
For each one-fourth mile thereafter..... .10
For each additional person for whole journey .20
For each four minutes of waiting..... .10

Waiting Time—Waiting time shall include the time during which the taxicab is not in motion, beginning with its arrival at the place to which it has been called, or the time consumed while standing at the direction of a passenger, but no charge shall be made for time lost for inefficiency of the taxicab or its operator or for time consumed by a prematur arrival in response to a call; provided, however, that no operator or driver of any taxicab which has responded to the call of a prospective passenger shall throw down or place in a recording position the flag attached to the taximeter until at least eight minutes' waiting time has elapsed or been consumed.

Operator to Announce Charge Before Changing Position of Flagpost—It shall be the duty of the operator or driver of every taxicab at the termination of his services to throw the flag to the nonrecording position on the taximeter and call the passenger's attention to the amount registered. The taximeter shall not be changed until after the fare is paid or a charge ticket therefor made out and delivered to the person hiring such taxicab.

Baggage—Every passenger upon any taxicab shall be allowed to have conveyed with him upon such vehicle, without charge therefor, his ordinary light traveling baggage in an amount not to exceed in weight fifty pounds. A fee of 20 cents may be charged for conveying a trunk.

Lost Baggage—Whenever any package, article of baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, operator of such vehicle shall, upon discovery of such package, baggage or goods, forthwith deliver the same to the board of inspectors of passenger vehicles.

AUTOMOBILES (OTHER THAN TAXICABS).

Rates of Fare—The rate of fare to be asked or demanded by the operator or person in charge or control of any automobile, autocar or other similar vehicle operated for the conveyance of passengers, for hire or reward, within the city, shall not exceed the following prescribed rates:

Seating Capacity Not Exceeding Two Passengers—For the use of any such vehicle the seating capacity of which shall not exceed two persons, at the rate of $3 per hour; provided, however, that no operator of such vehicle shall be compelled to rent the same for a fee of less than $1.

Seating Capacity from Three to Five Passengers—For the use of any such vehicle the seating capacity of which shall be more than two persons, and not exceeding five persons, at the rate of $4 per hour; provided, however, that no operator of such vehicle shall be compelled to rent the same for a fee of less than $1.50.

Seating Capacity More than Five Passengers—For the use of any such vehicle the seating capacity of which is more than five persons, at the rate of $5 per hour; provided, however, that no operator of such vehicle shall be compelled to rent the same for a fee of less than $2.

Rate to Be Based on Time Vehicle Is in Use—The rate of fare to be asked or demanded by such vehicles not equipped with taximeters shall be determined in accordance with the time in which the vehicle is in use by the passenger or passengers engaging the same.

Operator's Seat Not to Be Counted—In determining the seating capacity of any such vehicle, neither the operator's seat nor any portion thereof shall be computed, but the seating capacity shall be determined by the number of persons which can be accommodated in the interior or tonneau of such vehicle.

No Charge for Answering Call or for Return from Call—No charge shall be made for the time consumed in responding to a call or in returning to the place from which such vehicle is called.

"Hour" Rates to Be Charged Only When Passenger So Elects—The foregoing rates shall apply only in cases where the passenger at the time of the hiring of any vehicle referred to in this section expressly elects to pay therefor at the rate herein provided, and if such passenger so elects, the operator in charge of such vehicle shall hand to such passenger at the time of such hiring a card upon which shall appear: First, the name of the owner; second, the name of the operator of such vehicle; third, the exact time of such hiring; and in the absence of an express agreement as to the rate of fare to be charged for any vehicle referred to in this section, the rate of fare charged shall be the same as now is or hereafter may be provided by ordinance to be charged for the hire of taxicabs.

No Charge in Case of Breakdown—In case any automobile, autocar or other similar vehicle shall, while conveying for hire or reward any passenger or passengers, become disabled or shall break down so as to be unable to convey such passenger or passengers to his or their destination, and such disablement or breaking down cannot be remedied so that such vehicle shall be enabled to proceed within fifteen minutes from the time such vehicle shall have become disabled or shall have stopped, no fare shall be charged or collected for any service rendered or distance traveled up to the time of such stoppage, disablement or breakdown. Provided, however, that if any such passenger or passengers elect to remain in such vehicle and desire to be conveyed to their destination thereby, after such breakdown or disablement shall have been remedied, in such event full rates for the distance traveled shall be charged as if no breakdown or stoppage had occurred, or if such vehicle was employed by the hour, the time of stoppage shall be deducted from the time charged for.

Baggage—Every passenger upon any public automobile, autocar or other similar vehicle shall be allowed to have conveyed with him upon such vehicle, without charge therefor, his ordinary light traveling baggage in an amount not to exceed in weight fifty pounds. A fee of 25 cents may be charged for conveying a trunk.

Lost Baggage—Whenever any package, article of baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, the operator of such vehicle shall, upon discovery of such package, baggage or goods, forthwith deliver the same to the board of inspectors of public vehicles.

INFORMATION FOR TAXPAYERS.

[By Robert M. Sweitzer, county clerk.]

Errors in Assessment—The board of review holds its first meeting of the summer session for the purpose of revising the assessment of property on the third Monday of June, annually, and remains in session until Sept. 7, or until all complaints have been disposed of. New assessment of real estate and buildings is made every four years. The last quadrennial assessment was in 1911 and the next will be in 1915. The board has the power to revise assessment where an overvaluation exists, but it will not reduce the land value on single lots. Where overassessment is found on lots the entire block or street will have to be reduced so that land values remain uniform. Complaints of errors in assessments must be filed on blanks provided by the board before Aug. 1 to affect the taxes for the current year. The board holds sessions in November, December, February and March to hear complaints, but action taken in any of these months cannot affect the taxes for the current year.

Payment of Taxes—The county clerk delivers on Jan. 2, annually, the tax books for the previous year's taxes to the county and various town collectors, after which date general taxes are due and payable up to March 10 as follows: On property inside the city of Chicago to the county collector; on property outside the city to the proper town collector at his town office. Special assessments may become due at any time during the year and should be paid to the city or village collector at his office.

After March 10 each year all bills for taxes and special assessments must be obtained from and paid to the county collector in the county building. On and after April 1 of each year he advertises all unpaid taxes as delinquent. He also gives notice of his intention to apply for judgment and an order for the sale of all property upon which taxes remain unpaid.

May 1 of each year all unpaid taxes on real estate are delinquent and a charge at the rate of 1 per cent per month on general taxes must be added by the county collector. The county collector applies shortly after the June term (usually in July) for judgment against all delinquent property in the county and at the same time a court order for the sale of all unpaid general taxes and special assessments is obtained. Objections to such judgment and sale must be made in writing and be filed in the office of the clerk of the County court.

On or shortly after Aug. 1 the collector and clerk begin the annual tax sale and sell all real estate upon which judgment has been given. The penalty for the redemption of real estate sold for taxes may be as high as 25 per cent, which penalty is added to the amount of taxes sold each six months after the date of sale.

Redemption of real estate sold for taxes must be made at the office of the county clerk before the expiration of two years. Penalties increase each six months after date of sale and two years is the limit allowed for redemption. A penalty of 7 per cent must be included in redemptions, the same being charged on account of any and all taxes or assessments which may have accrued subsequent to the date of sale, unless such assessments or taxes have been paid by the person making the redemption.

Tax deeds on unredeemed tax sales will necessarily be issued by the county clerk upon proper application after the time for redemption (two years) expires. After the tax deed is issued the former owner cannot redeem through the county clerk, as he has no such power. The release must be obtained by private arrangement with the tax purchaser or his assignee.

CHICAGO BUREAU OF PUBLIC EFFICIENCY.

Organized in 1910.
Trustees—Julius Rosenwald, chairman; Alfred L. Baker, treasurer; Onward Bates, George G. Tunell, Charles R. Crane, Henry B. Favill, Walter L. Fisher, A. B. Pond, Victor Elting.
Director—Harris S. Keeler.
Secretary—George C. Sikes.
Headquarters—City Club building, 315 Plymouth court.

The purposes of the organization are:

(1) To scrutinize the systems of accounting in the eight local governments of Chicago.

(2) To examine the methods of purchasing materials and supplies and letting and executing construction contracts in these bodies.

(3) To examine the pay rolls of these local governing bodies with a view of determining the efficiency of such expenditures.

(4) To make constructive suggestions for improvements in the directions indicated under 1, 2 and 3, and to co-operate with public officials in the installation of these improved methods.

(5) To furnish the public with exact information regarding public revenues and expenditures and thereby promote efficiency and economy in the public service.

PROPOSED PASSENGER SUBWAY SYSTEM FOR CHICAGO.

The harbor and subway commission and the subcommittee of the council committee on local transportation submitted a joint report Sept. 10, 1912, on a "comprehensive scheme of subways which shall extend into the outlying districts and which shall be designed to remedy the existing traction evils of the city of Chicago." The general plan recommended was a high level subway as close as possible to the surface of the streets and avoiding all grade crossings. The power system contemplated comprised alternating current generation and distribution and direct current operation of motors. The estimates were based on a third rail direct current system of conductors. The capacity of the subways outlined in the report was estimated at 180,000 seats per hour.

PROPOSED ROUTES.

Following were the routes recommended:

North to South Side—Beginning at Lawrence avenue and Broadway, a two track subway in Broadway to Irving Park boulevard and Halsted street; south in Halsted to Fullerton avenue.

Beginning at Lawrence and Lincoln avenues, a two track subway in Lincoln avenue to Halsted street and Fullerton avenue.

The two subways from the north joining at Halsted street and Fullerton avenue are continued as a four track subway southeast in Lincoln avenue to Clark street; south in Clark street to some point just north of the river (subject to further engineering investigation). Thence a two track subway for express trains south in Clark street to Polk street or some street farther south; east in Polk street or some other street to State street; south in State street in a four track subway to 55th street. A two track subway east in 55th street to Cottage Grove avenue; south in Cottage Grove avenue to 79th street. Transfers can be made from this subway at Fullerton avenue to the Halsted street subway; at Clark and Madison streets to the Madison street subway; at Harrison and Clark streets to the southwest subway.

North Side to Southwest Side—Two of the four tracks from the North Clark street subway continue in a two track subway east from Clark street to State street; thence south in State street to Harrison street; west in a two track subway in Harrison street to Halsted street and Blue Island avenue; thence continuing southwest in Blue Island avenue to 22d street and Ashland avenue; west in 22d street to Marshall boulevard; south in Marshall boulevard to 26th street; west in 26th street to South Crawford avenue. Transfers can be made from the subway at Fullerton avenue to the Halsted street subway, at State street to the "Northwest Side to South Side" subways, at Halsted and Harrison streets to Halsted street subway.

Northwest Side to South Side—Beginning at Elston and Kedzie avenues, a two track subway in Elston avenue southeast to Belmont and California avenues; south in California avenue to Milwaukee avenue; southeast in Milwaukee avenue to Desplaines or Canal street. Continuing south in Desplaines or Canal street to Randolph street; east in Randolph street to State street; south in State street in the four track subway to 55th street and State street; thence west in 55th street in a two track subway to Western avenue. Transfers can be made from the subway at Milwaukee avenue and Halsted street to the Halsted street subway; at State street to the "North Side to Southwest Side" subway; at 55th street and Halsted street to Halsted street subway.

A two track subway in Armitage avenue from North Crawford avenue to Milwaukee avenue, connecting with the Elston-Milwaukee avenue line.

Halsted Street—Beginning at the junction of the Lincoln avenue and Broadway lines at Fullerton avenue, a two track subway in Halsted street to 79th street. Transfers can be made from this subway at Fullerton avenue to the "North Side to South Side" and the "North Side to Southwest Side" subways; at Milwaukee avenue to the "Northwest Side to South Side" subway; at Harrison street to the "North Side to Southwest Side" subways; at 55th street to the "Northwest Side to South Side" subway.

Madison Street—Beginning at South Clark street, a two track subway in Madison street to Crawford avenue. Transfers can be made from the subway at Halsted street to the Halsted street subway; at Clark and Madison streets to the "North Side to South Side" subway. This subway may eventually be extended south in Clark street and other streets to serve the southwestern part of the city.

ESTIMATED COST OF SUBWAYS.

North side to Lawrence avenue	$20,123,000
South side to 79th street	25,778,000
West side to Crawford avenue	31,049,000
Halsted street	19,307,000
Total	96,257,000
Estimated cost of equipment	34,844,000
Total	131,101,000

The equipment will be furnished by the operating company.

Two plans for financing the project were suggested. One was to have the city build the subways out of the proceeds of legalized Mueller certificates and the other to have them built by private capital under such conditions as would insure absolute municipal control. It was subsequently ascertained that the scheme could not be financed by the issuance of Mueller certificates.

The joint report was signed by John Ericson, James J. Reynolds and E. C. Shankland of the harbor and subway commission and by Aldermen Eugene Block (chairman), John A. Richert, Patrick J. Carr, William F. Schultz, William J. Healy, Henry D. Capitain and Charles Twigg, subcommittee of the council committee on local transportation.

ARNOLD SUBWAY PLAN.

Little or no progress was made with the subway project in 1913, but the matter was taken up by the council transportation committee in the fall and expert advice was sought. A plan submitted by Bion J. Arnold received favorable consideration from the committee. He recommended that the city proceed to the construction of two initial subways for the use of the surface lines. The north and south route, he said, should be under Clark street from North avenue to 22d street. For the east and west bores he outlined a "loop back" in the downtown section, entering it by way of the Washington street tunnel, proceeding east to Michigan avenue and leaving the loop by the Van Buren street tunnel, and vice versa.

He estimated the first of these routes to cost $9,600,000 and the second $4,900,000, a total of $14,500,000. This figure, he pointed out, is well within the amount held available under the subway provisions of the traction ordinances. The city had $11,000,000 in its subway fund, it would receive another $2,000,000 next April, and it could compel the companies to contribute $5,000,000, making the total $18,000,000.

DEVELOPMENTS IN 1914.

No bids having been received for the construction of the $130,000,000 comprehensive system of subways favored by Mayor Harrison, the members of the harbor and subway commission appointed in 1911 resigned in a body Jan. 7, 1914, on the ground that there was nothing further for them to do. For the completion of work in connection with the north side municipal pier the commission was continued, but changed so as to include the city comptroller, commissioner of public works and E. C. Shankland, who was made chairman. The secretary of the commission is W. O. Johnson. The office is in the City Hall Square building, 139 North Clark street.

It operates the municipal lodging houses for men and women.

CHICAGO PARKS AND BOULEVARDS.

LINCOLN PARK SYSTEM.

Commissioners (appointed by governor with consent of senate)—Timothy J. O'Byrne, Leo Austrian, Bernard Jung, N. N. Lampert, William Rehm, Bertram M. Winston, John P. Friedlund.

Officers—President, Timothy J. O'Byrne; vice-president, Bernard Jung; auditor, B. M. Winston; secretary, George D. Crowley; superintendent, Edwin A. Kaust; attorney, Francis O'Shaughnessy; treasurer, Frederick H. Rawson.

Office—In Lincoln park near Clark and Center streets.

The Lincoln park district consists of the towns of North Chicago and Lake View, with Fullerton avenue as the dividing line, and is bounded on the north by Devon avenue, on the south by the Chicago river and extends from Lake Michigan on the east to the north branch of the river and North Western avenue on the west.

The area of the Lincoln park district is 12.64 square miles. The total area of the parks and boulevards is 699.94 acres, with 9.33 miles of boulevards.

Lincoln Park—Lincoln park, previously known as Lake park, began its history under its present name by resolution passed by the common council of Chicago under date of June 5, 1865. The park proper is 317 acres in extent and extends from Diversey boulevard to Oak street along the lake front. To this 235 acres of land has been added by filling in Lake Michigan north of Diversey boulevard. This extension will contain a seventy-acre yacht harbor and will have bathing facilities.

The park contains a large floral department, also an extensive zoological garden containing about 1,800 animals. Boating and bathing facilities are furnished and the park lagoon—one mile in length—gives an admirable course for racing. The Academy of Sciences is located in the park at the foot of Center street. This building was erected in 1893 and contains about 250,000 specimens. It is noted for its collection of local natural history specimens and for its complete collection of mollusks.

The park has provided facilities for outdoor games during both the winter and summer seasons.

Stanton Park—At Vedder, Vine and Rees streets; area 5 acres; equipped with fieldhouse and outdoor gym facilities.

Lake Shore Playground—Area 9.160 acres; is situated between Pearson street and Chicago avenue, extending from the Chicago avenue pumping works to the lake. This park is fitted up as a playground, containing a shelter house, and with outdoor gymnasium apparatus.

Seward Park—Contains 1.73 acres; is fitted with outdoor and indoor gymnasium and has a fieldhouse which contains reading rooms, assembly hall, clubrooms, a branch of the public library and facilities for gymnastic work and aquatic sports.

Hamlin Park—Wellington avenue and Robey street; area 10 acres; is fully equipped with fieldhouse and out-of-door gymnasium facilities.

Welles Park—Western avenue and Montrose boulevard; area 10 acres.

WILLETT TEAMING

THE A. T. WILLETT COMPANY began in 1868 with twenty horses. The one horse two wheel dray was the popular wagon of that time. Some of our first customers whom early settlers will recall were McKinley-Gilchrist, C. T. Reynolds & Co., Davis Bros., H. A. & H. D. Bogardus, Mauran Wright & Co., and R. B. Boak & Co. Of this old bunch only R. B. Boak & Co. and the Willett Co. still survive.

To-day we operate three hundred teams and motor trucks. A few of our customers are Steele-Wedeles Co., Montgomery Ward & Co., International Paper Co., The Tribune, James S. Kirk & Co., Procter & Gamble Co., W. F. McLaughlin & Co. and The Daily News.

One reason for our success is the personal loyalty we feel for our customers. Our customers are part of our gang and in labor troubles we stick with them to the finish.

The service of the Willett Company has never failed to any customer for a single hour since 1868.

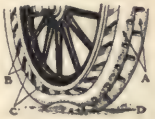
For Cars of Business and Pleasure

Maintained car efficiency is largely a matter of *tires*. While the tire bill itself may not seem excessive, the jolt and grind that improper tires transmit to the engine, and the car itself, frequently means a car out of commission—loss in time, money and *service*.

Motz Cushion Tires have solved the tire problem on pleasure electrics and light delivery cars. They have all the resiliency of properly inflated pneumatic tires, with none of their "pneumatic" troubles.

This resiliency is due to the dual treads (A) and the Motz undercut sides (B) and slantwise elastic bridges (C) that give and yield (D) like the air in a pneumatic tire.



MOTZ Cushion Tires

A car that is Motz equipped does not have to carry an extra set of tires. And Motz tires are not confined simply to one or two cars. They are used everywhere on electric pleasure cars, and utility cars of all kinds—ambulances, light delivery trucks, omnibuses, etc.

The Guarantee

And Motz Tires are guaranteed for ten thousand miles when applied according to their rated carrying capacity. Many have traveled twenty thousand and even twenty-five thousand miles without trouble.

Write for Motz Book No. 190 on tires. It will interest you. It is free.

Dealers

Dealers and garage men wishing to add a popular *proven* line should write to-day for the Motz selling proposition.

J. L. Byrne won the revolver championship of Illinois at the 1st regiment armory, Chicago, April 27, 1914, by making a score of 440 out of a possible 500. W. P. Northcott won the pistol competition with 422 points. Col. W. H. Whigham the pocket revolver title with 177 points and Capt. E. Bittel the novice event with 224 points.

MOTORING.

[By C. G. Sinsabaugh, editor of Motor Age.]

Chicago still retains its honors in the line of motoring promotions, for no other city in the country was as active as was Chicago in 1914. Still Chicago did not come up to its usual mark, there being fewer competitions than usual. The Elgin road races, promoted by the Chicago Automobile club, were more interesting than ever before because of the brilliant field of starters. The Kane county meet attracted fifty-eight entries, the largest number ever brought together in a road racing carnival in this country. Both races were won by DePalma.

The Chicago Automobile club also attempted to stage its Chicago-Boston day and night reliability and secured the Glidden trophy for the piece de resistance. But it took so long to get the stock car rule through the A. A. A. that it was found impossible to get enough entries to warrant running off this national reliability.

But Chicago maintained its reputation for promoting interclub team matches and, as usual, the Chicago Automobile club and the Chicago Athletic association came together in two matches. The summer match was a two day affair to Peoria and return, the seventh annual clash between these two organizations. It was won by the Chicago Automobile club, led by J. T. Brown, the first victory for the C. A. C. in five years. The fall match was a one day run to Brook, Ind., and return, which was won by the Cherry Circle. This match brought out a record breaking entry, fifty-eight cars contesting.

The Chicago Motor club also had its usual Banta trophy team match between its amateur and trade teams, and again the amateurs won.

MOTORCYCLING.

NORTH SHORE CLUB RACES.

The annual racing meet of the North Shore Motorcycling club occurred May 16 and 17, 1914, on the Hawthorne track, Chicago. Winners and time in chief events:

*A strike in the mechanical and distributing departments of all Chicago newspapers began May 2, 1912, affecting circulation until Nov. 18.

The records for May and the first part of June of that year are incomplete because of the demoralization of the machinery of distribution.

Facts for the Factory

This is Chicago's industrial center. Here will be found the ideal home for factories, warehouses, etc., where the greatest economies are effected.

Save your teaming expenses, switching charges and delays.

The Chicago Junction Railway serving this property gives its industries the advantages of being located on every trunk line entering Chicago. Transfer of freight to all connecting lines is made without charge to the industry. Carload and Less Carload shipments to all points of the Country are made with through Chicago rate applying.

Long-term Leases made. Buildings financed.

Locate your factory where you have the best Railway service, attractive surroundings, proximity to City deliveries, mail, express and banking facilities.

Complete sets of THE DAILY NEWS ALMANAC AND YEAR-BOOK from the year 1885 to 1915 inclusive can be supplied for $15.00, transportation prepaid. The first five issues for the years 1885, 1886, 1887, 1888 and 1889 are bound in one volume, half morocco, library style. This volume is sold only to purchasers of complete sets. A complete set embraces the library volume and a cloth bound issue for each succeeding year.

Single cloth bound copies can be bought only for the years 1890, 1893, 1894, 1895, 1896, 1898, 1899, 1900, 1903, 1911 and 1914. These are supplied at the rate of 50 cents each, 1890 to 1911, and 41 cents for 1914, transportation prepaid. Single paper covered copies can be supplied for each year from 1886 to 1903, except 1897 and 1899, for 25 cents each at the office of publication, or 35 cents by mail.

Orders should be addressed to THE DAILY NEWS office, 15 North 5th avenue, Chicago, Ill.

THE INDISPENSABLE NEWSPAPER.

In 1815 American newspapers were a curiosity.

In 1855 they were a luxury.

In 1915 they are a necessity.

Thus into nineteen words may be condensed the history of American newspapers. There is another way of putting it—just as short:

In 1815 American newspapers were experimental.

In 1855 they were successful.

In 1915 they are indispensable.

There is a lot of difference between an experiment and a success. Between a successful thing and an indispensable thing there is a wider difference. Newspapers used to be successful in spite of being—many of them—selfish. Great newspapers of to-day are indispensable because they SERVE.

The Chicago Daily News sells between 375,000 and 400,000 papers daily. Ninety-two per cent of its readers are Chicagoans. It reaches daily, at the usual estimate of three readers to each paper sold, from 1,000,000 to 1,200,000 persons.

The Daily News serves readers who wish to learn the latest news at the earliest possible moment.

It serves tired folks who seek entertainment.

It serves the buyer who wants good merchandise at an attractive price, and the merchant who wants many buyers.

It serves alike the man of large affairs and the man of modest means; the mammoth department store with its "page ad" or "double truck," and the woman who finds her lost dog or rents a hallroom through a one or two line "want ad."

Because of its SERVICE The Daily News is INDISPENSABLE.
